Application of Surrogate-based Global Optimization to Aerodynamic Design Emiliano Iuliano 2015-10-05

Aerodynamic design, like many other engineering applications, is increasingly relying on computational power. The growing need for multi-disciplinarity and high fidelity in design optimization for industrial applications requires a huge number of repeated simulations in order to find an optimal design candidate. The main drawback is that each simulation can be computationally expensive – this becomes an even bigger issue when used within parametric studies, automated search or optimization loops, which typically may require thousands of analysis evaluations. The core issue of a design-optimization problem is the search process involved. However, when facing complex problems, the high-dimensionality of the design space and the high-multi-modality of the target functions cannot be tackled with standard techniques. In recent years, global optimization using meta-models has been widely applied to design exploration in order to rapidly investigate the design space and find sub-optimal solutions. Indeed, surrogate and reduced-order models can provide a valuable alternative at a much lower computational cost. In this context, this volume offers advanced surrogate modeling applications and optimization techniques featuring reasonable computational resources. It also discusses basic theory concepts and their application to aerodynamic design cases. It is aimed at researchers and engineers who deal with complex aerodynamic design problems on a daily basis and employ expensive simulations to solve them.

Narratives Unfolding Martha Langford 2017-07-18 Somewhere between global and local, the nation still lingers as a concept. National art histories continue to be written – some for the first time – while innovative methods and practices redraw the boundaries of these imagined communities. Narratives Unfolding considers the mobility of ideas, transnationalism, and entangled histories in essays that define new ways to see national art in ever-changing nations. Examining works that were designed to reclaim or rethink issues of territory and dispossession, home and exile, contributors to this volume demonstrate that the writing of national art histories is a vital project for intergenerational exchange of knowledge and its visual formations. Essays showcase revealing moments of modern and contemporary art history in Canada, Egypt, Iceland, India, Ireland, Israel/Palestine, Romania, Scotland, Turkey, and the United Arab Emirates, paying particular attention to the agency of

institutions such as archives, art galleries, milestone exhibitions, and artist retreats. Old and emergent art cities, including Cairo, Dubai, New York, and Vancouver, are also examined in light of avant-gardism, cosmopolitanism, and migration. Narratives Unfolding is both a survey of current art historical approaches and their connection to the source: art-making and art experience happening somewhere.

Trial of George Joseph Smith (Classic Reprint) Eric R. Watson 2015-07-06 Excerpt from Trial of George Joseph Smith The trial of George Joseph Smith is without a parallel in the history of crime in any age or country. The singularly revolting means by which the murderer accomplished the destruction of his victims, the spectacle of Justice, in all its pomp and circumstance, solemnly deciding whether one transparently worthless man should live or die at a time when the war claimed a daily holocaust from among the youngest and bravest of the manhood of Britain, the novelty of the questions of forensic medicine, the complexity of the evidence given by some 120 witnesses, twice as many as were needed to establish the guilt of Palmer - all combine to make this a notable trial indeed. A shrewd American lawyer, after a few weeks spent in observing our Courts, said, "British justice! Its dear, but its prime!" And certainly we may, I think, regard with complacency this patient and costly investigation, pursued day after day at such a period. I have to thank numerous people for their assistance in preparing this volume; firstly, the Right Honourable Lord Justice Scrutton, for the loan of his photograph and for the favour of his views on the medico-legal issues; Sir Archibald Bodkin, for the loan of his photograph; Sir Edward Marshall Hall, for the loan of his copy of the shorthand notes and for some autograph memoranda by the murderer; Mr. Montague Shearman, for like benefits, and the loan of much correspondence not actually put in as exhibits. Dr. Bernard Spilsbury has most kindly revised all the medical evidence, and has assisted me as to certain gynecological and pathological matters, respecting the illnesses and deaths of the "brides." Mr. Neil has placed all the Scotland Yard material at my disposal, and Detective Inspector Page has very kindly lent me his photographs bearing on the case. Detective Inspector Grose has also rendered me assistance in presenting the manner in which the police worked up the case. The clerk attached to room 93, C. I. D., has also laid me under obligations by visiting me with dockets and documents from the "Yard." If one has any regrets at publishing so infamous a story of crime, the main one is that the ease with which murder may be thus accomplished may lead others to emulate Smith's examples. The Handbook for Embedded Formative Assessment Solution Tree 2017-11-09 Educational achievement carries more importance than ever in the 21st century. According to academic research, teacher quality plays the most vital role in raising achievement among all K-12 students, so improving teacher quality will lead to both greater student outcomes and greater prosperity for individuals and the whole of society. The Handbook for Embedded Formative Assessment makes the case that incorporating formative assessment into daily classroom practice raises teacher quality and enhances student learning to help all parties meet the evolving demands of society. As a companion to Embedded Formative Assessment, Second Edition (William, 2018), this book has one main purpose: to help teachers develop the practice of formative assessment in classrooms by providing tried-and-tested classroom formative assessment techniques and giving evidence that shows how these techniques positively impact student achievement. Grades K-12 teachers can choose from these techniques, try them out in the classroom, and modify them to meet their specific needs. However, The Handbook for Embedded Formative Assessment can also act as a stand-alone book, sharing highlights from Embedded Formative Assessment as necessary before leading straight to the how-tos of classroom formative assessment.
