Obesity G. Michael Steelman 2016-04-27 Obesity is considered a complex and multifactorial disease. Its treatment, therefore, must also be multimodal and tailored to meet the needs of each patient. Obesity: Evaluation and Treatment Essentials presents a wide spectrum of practical treatment protocols for obesity including exercise, pharmacology, behavior modification, and dietary factors,

Oncoplastic Breast Surgery Techniques for the General Surgeon V. Suzanne Klimberg 2020-05-22 This book covers an up-to-date review of advances in the management strategies for patients with breast cancer and their co-morbidities. Oncoplasty has become the standard of care for breast conservation surgery and can lead to improving aesthetic outcomes of breast cancer surgery, without compromising oncological outcomes. The goal of the text is to increase the competencies and performance of healthcare professionals involved in treating this patient population, which will ultimately improve the aesthetic outcomes, quality of life and overall survival of patients with breast disease and breast cancer. Written by experts in the field, chapters address a wide range of breast surgery techniques

that help the general surgeon provide improved oncologic and aesthetic results for patients. The authors have detailed not only best practice for conventional procedures but also new and evolving techniques. *Oncoplastic Breast Surgery Techniques for the General Surgeon* serves as a valuable resource not only for medical students but also for the general surgeon seeking to improve results in private practice and for professors learning and teaching new breast surgery techniques.

Build a House Rhiannon Giddens 2022-10-11 Grammy Award winner Rhiannon Giddens celebrates Black history and culture in her unflinching, uplifting, and gorgeously illustrated picture book debut. I learned your words and wrote my song. I put my story down. As an acclaimed musician, singer, songwriter, and cofounder of the traditional African American string band the Carolina Chocolate Drops, Rhiannon Giddens has long used her art to mine America's musical past and manifest its future, passionately recovering lost voices and reconstructing a nation's musical heritage. Written as a song to commemorate the 155th anniversary of Juneteenth—which was originally performed with famed cellist Yo-Yo Ma—and paired here with bold illustrations by painter Monica Mikai, *Build a House* tells the moving story of a people who would not be moved and the music that sustained them. Steeped in sorrow and joy, resilience and resolve, turmoil and

transcendence, this dramatic debut offers a proud view of history and a vital message for readers of all ages: honor your heritage, express your truth, and let your voice soar, even—or perhaps especially—when your heart is heaviest.

New Concepts on Abdominoplasty and Further Applications Juarez M. Avelar
2016-09-24 This book documents the important advances that have been achieved in abdominoplasty over the past 15 years, in particular through the introduction of a nontraumatic approach associated with minimal morbidity owing to the avoidance of resection of abdominal panniculus and damage to the perforating vessels. The surgical principles of this procedure, including in combination with liposuction, are fully described by its developer, Juarez Avelar, with the aid of a wealth of color illustrations. A miniabdominoplasty option is also discussed and recent significant technical contributions such as various new plication techniques and means of minimizing complications are clearly presented. In addition, a series of chapters explain how the surgical principles underlying the described nontraumatic method of abdominoplasty can now be applied to other areas of the body, for example to improve rhytidoplasty, ear reconstruction, body contouring, and medial thigh lifting. This book enables the plastic surgeon to apply the latest abdominoplasty techniques effectively and safely.

Dissemination of Cartographic Knowledge Mirela Alti? 2017-09-08 This book

gathers 22 papers which were presented at the 6th International Symposium of the ICA Commission on the History of Cartography in Dubrovnik, Croatia on 13–15 October 2016. The overall conference theme was ‘The Dissemination of Cartographic Knowledge: Production – Trade – Consumption – Preservation’. The book presents original research by internationally respected authors in the field of historical cartography, offering a significant contribution to the development of this field of study, but also of geography, history and the GIS sciences. The primary target audience includes researchers, educators, postgraduate students, map librarians and archivists.

Peppered Minds Om Somani 2020-02-18 Peppered Minds is about the journey of a young geologist, Neeraj, beginning his professional life. His imaginative mind conjures up a thesis presented on a brainstorming session for the welfare of his countrymen and the nation. The book provides an interesting insight to explain blatant problems that contribute to the lack of innovation, misconduct and all kinds of frenzy we see around today. The writing of the book is a lighthearted account of the protagonist, Neeraj, brought up in a conservative middle-class god-fearing family, who travels from Jaipur to Hyderabad to start his professional life as a geologist. The story depicts his bitter and heartening experiences, be it meeting an astrologer, making a railway reservation, going on a rail journey from Jaipur,

joining up at his new office in Hyderabad or eventually completing a successful geological expedition in the wild. Neeraj's tryst with the various characters along his brief journey brings to light the mind set, personal traits, beliefs and culture of a vast cross section of the ordinary public that span age groups ranging from the child to the octogenarian. The book depicts several interplays of events that envelope the geologists in the office as well as in the field. One of the momentous events that overwhelms Neeraj is his meeting with the Moon and learning of the unbelievable history of human existence on earth. There are also hilarious episodes, including the one which describes the use of kerosene as the basic material for nuclear research.

Acoustic Properties Tom McEnaney 2017-06-15 Acoustic Properties: Radio, Narrative, and the New Neighborhood of the Americas discovers the prehistory of wireless culture. It examines both the coevolution of radio and the novel in Argentina, Cuba, and the United States from the early 1930s to the late 1960s, and the various populist political climates in which the emerging medium of radio became the chosen means to produce the voice of the people. Based on original archival research in Buenos Aires, Havana, Paris, and the United States, the book develops a literary media theory that understands sound as a transmedial phenomenon and radio as a transnational medium. Analyzing the construction of

new social and political relations in the wake of the United States' 1930s Good Neighbor Policy, *Acoustic Properties* challenges standard narratives of hemispheric influence through new readings of Richard Wright's cinematic work in Argentina, Severo Sarduy's radio plays in France, and novels by John Dos Passos, Manuel Puig, Raymond Chandler, and Carson McCullers. Alongside these writers, the book also explores Che Guevara and Fidel Castro's *Radio Rebelde*, FDR's fireside chats, Félix Caignet's invention of the radionovela in Cuba, Evita Perón's populist melodramas in Argentina, Orson Welles's experimental New Deal radio, Cuban and U.S. "radio wars," and the 1960s African American activist Robert F. Williams's proto-black power *Radio Free Dixie*. From the doldrums of the Great Depression to the tumult of the Cuban Revolution, *Acoustic Properties* illuminates how novelists in the radio age converted writing into a practice of listening, transforming realism as they struggled to channel and shape popular power.

Beautiful Rising Andrew Boyd 2018-01-20 In the struggle for freedom and justice, organizers and activists have often turned to art, creativity, and humor. In this follow-up to the bestselling *Beautiful Trouble: A Toolbox for Revolution*, *Beautiful Rising* showcases some of the most innovative tactics used in struggles against autocracy and austerity across the Global South. Based on face-to-face jam

sessions held in Yangon, Amman, Harare, Dhaka, Kampala, and Oaxaca, Beautiful Rising includes stories of the Ugandan organizers who smuggled two yellow-painted pigs into parliament to protest corruption; the Burmese students' 360-mile-long march against undemocratic and overly centralized education reforms; the Lebanese "honk at parliament" campaign against politicians who had clung to power long after their term had expired; and much more.

The Optics of Giambattista Della Porta (ca. 1535–1615): A Reassessment Arianna Borrelli 2017-03-22 This volume contains essays that examine the optical works of Giambattista Della Porta, an Italian natural philosopher during the Scientific Revolution. Coverage also explores the science and technology of early modern optics. Della Porta's groundbreaking book, *Magia Naturalis* (Natural Magic), includes a prototype of the camera. Yet, because of his obsession with magic, Della Porta's scientific achievements are often forgotten. As the contributors argue, his work inspired such great minds as Johannes Kepler and Francis Bacon. After reading this book, researchers, historians, and students will have a better appreciation of this influential scientist. They will also gain a greater understanding of an important period in the history of optics. Readers will learn about Della Porta's experimental method, a process governed by the protocols, aims, and theoretical assumptions of natural magic. Coverage also discusses the material

properties and limitations of optical technology in the early 17th century, based on a recently discovered Dutch spyglass. It also demonstrates how diagrams were instrumental in the discovery of the sine law of refraction. In addition, the book includes an in-depth analysis of previously untranslated Latin sources. This makes the material useful to historians of optics unfamiliar with the language. More than 70 illustrations complement the text.

The Latin American (Counter-) Road Movie and Ambivalent Modernity Nadia Lie
2017-01-20 This book offers a comprehensive and systematic overview of the flourishing genre of the contemporary Latin American road movie, of which *Diarios de motocicleta* and *Y tu mamá también* are only the best-known examples. It offers the first systematic survey of the genre and explains why the road movie is key to contemporary Latin American cinema and society. Proposing the new category of “counter-road movie,” and paying special attention to the genre’s intricate relationship to modernity, Nadia Lie charts the variety of the road movie through films by both renowned and emerging filmmakers. *The Latin American (Counter-) Road Movie and Ambivalent Modernity* engages with ongoing debates on transnationalism and takes the reader along a wide range of topics, from exile to undocumented migration, from tourism to internally displaced people.

Arctic Hydrology, Permafrost and Ecosystems Daqing Yang 2020-08-28 This book

provides a comprehensive, up-to-date assessment of the key terrestrial components of the Arctic system, i.e., its hydrology, permafrost, and ecology, drawing on the latest research results from across the circumpolar regions. The Arctic is an integrated system, the elements of which are closely linked by the atmosphere, ocean, and land. Using an integrated system approach, the book's 30 chapters, written by a diverse team of leading scholars, carefully examine Arctic climate variability/change, large river hydrology, lakes and wetlands, snow cover and ice processes, permafrost characteristics, vegetation/landscape changes, and the future trajectory of Arctic system evolution. The discussions cover the fundamental features of and processes in the Arctic system, with a special focus on critical knowledge gaps, i.e., the interactions and feedbacks between water, permafrost, and ecosystem, such as snow pack and permafrost changes and their impacts on basin hydrology and ecology, river flow, geochemistry, and energy fluxes to the Arctic Ocean, and the structure and function of the Arctic ecosystem in response to past/future changes in climate, hydrology, and permafrost conditions. Given its scope, the book offers a valuable resource for researchers, graduate students, environmentalists, managers, and administrators who are concerned with the northern environment and resources.

The Englishman J. E. R. Staddon 2016 Although I have been basically an academic for most of my life, the way I got there has taken some surprising turns.

The first four chapters of this memoir describe what I can remember and discover about my early life: an unsuspected ancestry, fun in WW2 London, comical schooldays, and a spell in colonial Africa interrupting a wobbly college career at the end of which I left England for America. In the US I followed again a slightly erratic graduate-school trajectory that ended up in a Harvard basement. The main part of the book is about science, my efforts to understand the world opened up for me by biology, Darwin, the evolving cybernetic revolution and the experimental methods of influential and opinionated behaviorist B. F. Skinner. I have tried to make this part as simple and nontechnical as possible, although a couple of graphs have intruded.

Marketing Management Philip Kotler 2012 This is the 14th edition of 'Marketing Management' which preserves the strengths of previous editions while introducing new material and structure to further enhance learning.

The Structures of Practical Knowledge Matteo Valleriani 2017-02-20 The Structures of Practical Knowledge investigates the nature of practical knowledge – why, how, when and by whom it is codified, and once codified, how this knowledge is structured. The inquiry unfolds in a series of fifteen case studies, which range in focus from early modern Italy to eighteenth century China. At the heart of each study is a shared definition of practical knowledge, that is, knowledge needed to

obtain a certain outcome, whether that be an artistic or mechanical artifact, a healing practice, or a mathematical result. While the content of practical knowledge is widely variable, this study shows that all practical knowledge is formally equivalent in following a defined workflow, as reflected in a construction procedure, a recipe, or an algorithm. As explored in the volume's fifteen contributions, there are three levels at which structures of practical knowledge may be understood and examined. At the most immediate level, there are the individual workflows that encompasses practical knowledge itself. Probing further, it is possible to examine the structure of practical knowledge as it is externalized and codified in texts, drawings, and artifacts such as models. Finally, practical knowledge is also related to social structures, which fundamentally determine its dissemination and evolution into new knowledge structures. The social structures of professionals and institutions represent the critical means by which practical knowledge takes form. These actors are the agents of codification, and by means of selection, appropriation, investment, and knowledge development, they determine the formation of new structures of practical knowledge. On a more abstract level, the creation of new knowledge structures is understood as constituting the basis for the further development of scientific knowledge. Rich in subject matter and incisive in the theory it lays out, this volume represents an important contribution to the

history of science and epistemology. Individually, the fifteen case studies – encompassing the history of architecture, mining, brewing, glass production, printing, ballistics, mechanics, cartography, cosmology and astronomy – are replete with original research, and offer new insights into the history of science. Taken together, the contributions remodel historical epistemology as a whole, elucidating the underlining knowledge structures that transcend disciplinary boundaries, and that unite practitioners across time and space.

Oncoplastic Breast Surgery Florian Fitzal 2015-06-18 This book presents 50 cases, encompassing a broad range of oncoplastic breast surgeries. Each case is dedicated to a particular surgical technique, using classifications of “good, bad, and ugly” to point out potential pitfalls and to optimize post-surgery results. With the help of more than 500 high-quality illustrations and photos and detailed step-by-step instructions the editors, respected experts in their field, describe the most common procedures. Now in its second edition, this comprehensive surgical atlas provides practical guidance for various oncoplastic techniques used in breast conservation surgery and mastectomy with immediate reconstruction. The book will be a valuable resource not only for surgeons specialized in breast cancer therapy, but also for general surgeons and gynecologists as well as for plastic and

reconstructive surgeons.

Manual of Catalan Linguistics Joan A. Argenter 2020-04-06 This manual is intended to fill a gap in the area of Romance studies. There is no introduction available so far that broadly covers the field of Catalan linguistics, neither in Catalan nor in any other language. The work deals with the language spoken in Catalonia and Andorra, the Balearic Islands, the region of Valencia, Northern Catalonia and the town of l'Alguer in Sardinia. Besides introducing the ideologies of language and nation and the history of Catalan linguistics, the manual is divided into separate parts embracing the description – grammar, lexicon, variation and varieties – and the history of the language since the early medieval period to the present day. It also covers its current social and political situation in the new local and global contexts. The main emphasis is placed on modern Catalan. The manual is designed as a companion for students of Catalan, while also introducing specialists of other languages into this field, in particular scholars of Romance languages.

Stories of Practice: Tourism Policy and Planning Dianne Dredge 2016-04-01 Analyses of contemporary tourism planning and policymaking practice at local to global scales is lacking and there is an urgent need for research that informs theory and practice. Illustrated with a set of cohesive, theoretically-informed,

international case studies constructed through storytelling, this volume expands readers' knowledge about how tourism planning and policymaking takes place. Challenging traditional notions of tourism planning and policy processes, this book also provides critical insights into how theoretical concepts and frameworks are applied in tourism planning and policy making practice at different spatial scales. The book engages readers in the intellectual, political, moral and ethical issues that often surround tourism policymaking and planning, highlighting the great value of reflective learning grounded in the social sciences and revealing the complexity of tourism planning and policy.

Exercise and Sporting Activity During Pregnancy Rita Santos-Rocha 2018-12-13
This clinically and practice oriented, multidisciplinary book is intended to fill the gap between evidence-based knowledge on the benefits of physical activity and exercise during pregnancy and the implementation of exercise programmes and related health promotion measures in pregnant women. It will provide medical, sports, and fitness professionals both with the knowledge needed to allay undue fears regarding the consequences of exercising during pregnancy and with the practical expertise to offer optimal guidance on exercising to pregnant exercisers

and athletes. Readers will find up-to-date evidence on the psychological, social, physiological, body composition, musculoskeletal, and biomechanical changes that occur during pregnancy and their implications for physical activity and exercise. Detailed descriptions are provided of the components of exercise testing and prescription for pregnant women, the current evidence-based and practice-oriented guidelines, and exercise selection and adaptation during pregnancy. Exercises specifically targeting musculoskeletal health are discussed separately, and a concluding chapter explains the nutritional requirements in pregnant women who exercise.

The Death of Expertise Thomas M. Nichols 2017 A cult of anti-expertise sentiment has coincided with anti-intellectualism, resulting in massively viral yet poorly

informed debates ranging from the anti-vaccination movement to attacks on GMOs. As Tom Nichols shows in *The Death of Expertise*, there are a number of reasons why this has occurred—ranging from easy access to Internet search engines to a customer satisfaction model within higher education.

The Encyclopedia of the Motorcycle Hugo Wilson 1995 *The Motorcycle Encyclopaedia* is a complete and comprehensive reference work. The book is designed in two major sections. The first is a photo-gallery of over 400 classic motorbikes, alphabetically arranged by manufacturers, with all their significant models covered in detail. The second section lists every maker from the inception of motorcycling to the present day, and includes rare photographs and design blueprints. Each manufacturer is profiled, from ABC to Sundapp through giants of the industry like Honda and extinct but fondly remembered producers like Vincent and Velocette.

A Cultural History of Spanish Speakers in Japan Araceli Tinajero 2021 Beginning in 1990, thousands of Spanish speakers emigrated to Japan. *A Cultural History of Spanish Speakers in Japan* focuses on the intellectuals, literature, translations, festivals, cultural associations, music (bolero, tropical music, and pop, including reggaeton), dance (flamenco, tango and salsa), radio, newspapers, magazines, libraries, and blogs produced in Spanish, in Japan, by Latin Americans and

Spaniards who have lived in that country over the last three decades. Based on in-depth research in archives throughout the country as well as field work including several interviews, Japanese-speaking Mexican scholar Araceli Tinajero uncovers a transnational, contemporary cultural history that is not only important for today but for future generations. Araceli Tinajero is professor of Hispanic literatures at The City College of New York and at the Graduate Center. She is the author of *Orientalismo en el modernismo hispanoamericano*, *El Lector: A History of the Cigar Factory*, and *Kokoro: A Mexican Woman in Japan*. Tinajero is the editor or co-editor of various volumes including *Exilio y cosmopolitismo en el arte y la literatura hispanica*, *Orientalisms of the Hispanic and Luso-Brazilian World*, *Technology and Culture in Twentieth Century Mexico*, and *Handbook on Cuban History, Literature, and the Arts*. She is the Book Review Editor of the journal *Asia / America Latina*.

Summer of Brave Amy Noelle Parks 2021-03-01 Twelve-year-old Lilla Baxter-Willoughby doesn't lie. She's just a little bit...selective. To keep her parents happy, Lilla hides how much she hates moving back and forth between their houses, and she stomps down her doubts about that elite high school they're pushing her toward. To keep peace with her best friend Vivi, Lilla doesn't share that she got the junior camp counselor job that Vivi wanted. And even though—no, especially because—he seems into it, Lilla does not tell the boy she grew up with about all the little sparks that flared up inside her the day she noticed his Suddenly Adorable Freckles. So when Vivi dares Lilla to start telling the truth as part of their Summer of Brave, Lilla hesitates. Because if she says out loud what she really wants, her whole life might crash down around her. And she doesn't need that. Except maybe she does.

Queer Argentina Matthew J. Edwards 2016-11-10 Through insightful, high-paced

commentary this book directs attention south, towards Argentina. Current events, political debates, and the cultural production of artists, authors and public figures, including César Aira, María Moreno, Naty Menstrual and Copi, among others, provide case studies where heterosexual social models are rejected and, in their place, queer frameworks become the preferred model for living differently. Queer Argentina traces the movements of today's marginalized communities as they pass through and choose to remain within the closet: a space that is emblematic of collective struggles in silence and community formation outside the (hetero)norm.

Food Safety Culture Frank Yiannas 2008-12-10 Food safety awareness is at an all time high, new and emerging threats to the food supply are being recognized, and consumers are eating more and more meals prepared outside of the home. Accordingly, retail and foodservice establishments, as well as food producers at all levels of the food production chain, have a growing responsibility to ensure that proper food safety and sanitation practices are followed, thereby, safeguarding the health of their guests and customers. Achieving food safety success in this changing environment requires going beyond traditional training, testing, and inspectional approaches to managing risks. It requires a better understanding of organizational culture and the human dimensions of food safety. To improve the food safety performance of a retail or foodservice establishment, an organization

with thousands of employees, or a local community, you must change the way people do things. You must change their behavior. In fact, simply put, food safety equals behavior. When viewed from these lenses, one of the most common contributing causes of food borne disease is unsafe behavior (such as improper hand washing, cross-contamination, or undercooking food). Thus, to improve food safety, we need to better integrate food science with behavioral science and use a systems-based approach to managing food safety risk. The importance of organizational culture, human behavior, and systems thinking is well documented in the occupational safety and health fields. However, significant contributions to the scientific literature on these topics are noticeably absent in the field of food safety.

Incerteza viva 2017 Sixteen artists from 9 countries created works of art inspired by ecology and the environment that were specifically developed for the exhibition, in dialogue with the MAMBO curatorial team. Most of the artistic projects were specially commissioned for the 32nd São Paulo Biennial. "Incerteza viva is a collective process that began in early 2015 and brings together teachers, students, artists, activists, educators, scientists and thinkers in Brazil, Colombia and other places." --Page [1].
