Shadows in the Tree Jennifer DeBruin 2015-08 "We have been marked as traitors." A mere shadow in the family tree, little could Eliza have realized the way in which her fifth great-grandmother, Maria Catrina, would step from the shadows of her husband's life to reveal the true price paid for loyalty. The unrivaled beauty and abundance of the Mohawk Valley, engulfed in the fight for liberty, forced the Eamers to choose between the freedom sought by many and their loyalty to the king. The impossible choice, once made, compelled them to abandon the land they loved and the hope that they would find peace amongst their once-loved neighbours, friends...and family. Fleeing his impending arrest, Peter leaves Maria Catrina with their young children, telling her she must make her way north to the safety of the king's lands in Quebec. Their exodus through the wild, untamed Adirondack Mountains reveals the darkness of men's hearts and the lengths to which a mother will go to safeguard her precious ones. Inspired by true events.

Visualizing the Universe Athena Tacha 2017 -Offers a unique insight into the complexities of public art competitions in America, featuring proposals from a world-renowned sculptor -Doubles as a study on some of Athena Tacha's most groundbreaking and innovative work Visualizing the Universe offers a unique insight into the complexities of public art competitions in America by focusing on one of its pioneers, Athena Tacha. The book provides a complete record of her proposals for permanent public sculpture from 1972 to 2012 - all of the texts she submitted for 139 competitions in which she was a finalist - with illustrations of every work. The book pays special attention to projects that have been developed since 2000, which include some of Tacha's most ambitious work, notably her multiple sculptures at Wisconsin Place in Washington, D.C. and the Muhammad Ali Center in Louisville. As Glenn Harper, editor of Sculpture magazine, notes in the Introduction (co-authored with Twylene Moyer): "This book is a testament to a lifetime's worth of projects devoted to creating... public sculptural environments that translate the forms and forces of nature into abstract playgrounds for the human body and mind. ... Inspired by geometric growth and generative patterning on both micro and macro levels, they reinterpret the various concerns of earthwork and Minimalism, abstraction, place-making and social interaction through a cosmic lens that sees human beings and our efforts as part of a larger system." Contents: Introduction by Glenn Harper and Twylene Moyer; Early Proposals: 1972-80, Projects 1-25; Prodigious Activity: 1981-91, Projects 25-102; An Easing Pace: 1992-98, Projects 103-121; Major Commissions: 2000-2012, Projects 122-139

Global Tax Fairness Thomas Pogge 2016-02-04 This book addresses sixteen different reform proposals that are urgently needed to correct the fault lines in the international tax system as it exists today, and which deprive both developing and developed countries of critical tax resources. It offers clear and concrete ideas on how the reforms can be achieved and why they are important for a more just and equitable global system to prevail. The key to reducing the tax gap and consequent human rights deficit in poor countries is global financial transparency. Such transparency is essential to curbing illicit financial flows that drain less developed countries of capital and tax revenues, and are an impediment to sustainable development. A major break-through for financial transparency is now within reach. The policy reforms outlined in this book not only advance tax justice but also protect human rights by curtailing illegal activity and making available more resources for development. While the reforms are realistic they require both political and an informed and engaged civil society that can put pressure on governments and policy makers to act.

Southern Edwardseans Obbie Tyler Todd 2022-01-17 The founders and forerunners of the Southern Baptist Convention were fundamentally shaped by the thought of Puritan theologian Jonathan Edwards and his theological successors. While Baptists in the antebellum South boasted a different theological pedigree than Presbyterians or Congregationalists, and while they inhabited a Southern landscape unfamiliar to the bustling cities and tall forests of New England, they believed their similarities with Edwards far outweighed their differences. Like Edwards, these Baptists were revivalistic, Calvinistic, loosely confessional, and committed to practical divinity. In these four things, Southern Edwardseanism lived, moved, and had its being. In the nineteenth-century, when so many Presbyterians scoffed at Edwards's "innovation" and Methodists scorned his Calvinism, Baptists found in Edwards a man after their own heart. By 1845, at the first Southern Baptist Convention, Southern Edwardseans had laid the groundwork for a convention marked by the theology of Jonathan

Edwards.

When the concierge of The Alexander, a historic Atlanta apartment building, invites his fellow residents to join him for weekly screenings of Downton Abbey, four very different people find themselves connecting with the addictive drama, and—even more unexpectedly—with each other... Samantha Davis married young and for the wrong reason: the security of old Atlanta money—for herself and for her orphaned brother and sister. She never expected her marriage to be complicated by love and compromised by a shattering family betrayal. Claire Walker is now an empty nester and struggling author who left her home in the suburbs for the old world charm of The Alexander, and for a new and productive life. But she soon wonders if clinging to old dreams can be more destructive than having no dreams at all. And then there's Brooke MacKenzie, a woman in constant battle with her faithless ex-husband. She's just starting to realize that it's time to take a deep breath and come to terms with the fact that her life is not the fairy tale she thought it would be. For Samantha, Claire, Brooke—and Edward, who arranges the weekly gatherings—it will be a season of surprises as they forge a bond that will sustain them through some of life's hardest moments—all of it reflected in the unfolding drama, comedy, and convergent lives of Downton Abbey.

Achtung-Panzer! Heinz Guderian 1995 This is one of the most significant military books of the twentieth century. By an outstanding soldier of independent mind, it pushed forward the evolution of land warfare and was directly responsible for German armoured supremacy in the early years of the Second World War. Published in 1937, the result of 15 years of careful study since his days on the German General Staff in the First World War, Guderian's book argued, quite clearly, how vital the proper use of tanks and supporting armoured vehicles would be in the conduct of a future war. When that war came, just two years later, he proved it, leading his Panzers with distinction in the Polish, French and Russian campaigns. Panzer warfare had come of age, exactly as he had forecast. This first English translation of Heinz Guderian's classic book - used as a textbook by Panzer officers in the war - has an introduction and extensive background notes by the modern English historian Paul Harris.

The Making of Modern Colombia David Bushnell 1993-02-09 Colombia's status as the fourth largest nation in Latin America and third most populous—as well as its largest exporter of such disparate commodities as emeralds, books, processed cocaine, and cut flowers—makes this, the first history of Colombia written in English, a much-needed book. It tells the remarkable story of a country that has consistently defied modern Latin American stereotypes—a country where military dictators are virtually unknown, where the political left is congenitally weak, and where urbanization and industrialization have spawned no lasting populist movement. There is more to Colombia than the drug trafficking and violence that have recently gripped the world's attention. In the face of both cocaine wars and guerrilla conflict, the country has maintained steady economic growth as well as a relatively open and democratic government based on a two-party system. It has also produced an impressive body of art and literature. David Bushnell traces the process of state-building in Colombia from the struggle for independence, territorial consolidation, and reform in the nineteenth century to economic development and social and political democratization in the twentieth. He also sheds light on the modern history of Latin America as a whole.

The GMO Deception Sheldon Krimsky 2014-06-03 Seventy-five percent of processed foods on supermarket shelves—from soda to soup, crackers to condiments—contain genetically engineered ingredients. The long-term effects of these foods on human health and ecology are still unknown, and public concern has been steadily intensifying. This new book from the Council for Responsible Genetics gathers the best, most thought-provoking essays by the leading scientists, science writers, and public health advocates. Collectively, they address such questions as: Are GM foods safe and healthy for us? Will GM food really solve world hunger? Who really controls the power structure of food production? Are GM foods ecologically safe and sustainable? Why is it so difficult to get GM foods labeled in the US? What kinds of regulations and policies should be instituted? How is seed biodiversity, of lack thereof, affecting developing countries? Should animals be genetically modified for food? How are other countries handling GM crops? Ultimately, this definitive book encourages us to think about the social, environmental, and moral ramifications of where this particular branch of biotechnology is taking us, and what we should do about it.

Blueprint for Black Power Amos N. Wilson 1998 Afrikan life into the coming millennia is imperiled by White and Asian power. True power must nest in the ownership of the real estate wherever Afrikan people dwell. Economic destiny determines biological destiny. 'Blueprint for Black Power' details a master plan for the power revolution necessary for Black survival in the 21st century. White treatment of Afrikan Americans, despite a myriad of theories explaining White behavior, ultimately rests on the fact that they can. They possess the power to do so. Such a power differential must be neutralized if Blacks are to prosper in the 21st century ... Aptly titled, 'Blueprint for Black Power' stops not at critique but prescribes radical, practical theories, frameworks and approaches for true power. It gives a biting look into Black potentiality. (Back cover).
