In 2011 the World Bank—with funding from the Bill and Melinda Gates Foundation—launched the Global Findex database, the world’s most comprehensive data set on how adults save, borrow, make payments, and manage risk. Drawing on survey data collected in collaboration with Gallup, Inc., the Global Findex database covers more than 140 economies around the world. The initial survey round was followed by a second one in 2014 and by a third in 2017. Compiled using nationally representative surveys of more than 150,000 adults age 15 and above in over 140 economies, The Global Findex Database 2017: Measuring Financial Inclusion and the Fintech Revolution includes updated indicators on access to and use of formal and informal financial services. It has additional data on the use of financial technology (or fintech), including the use of mobile phones and the Internet to conduct financial transactions. The data reveal opportunities to expand access to financial services among people who do not have an account—the unbanked—as well as to promote greater use of digital financial services among those who do have an account. The Global Findex database has become a mainstay of global efforts to promote financial inclusion. In addition to being widely cited by scholars and development practitioners, Global Findex data are used to

track progress toward the World Bank goal of Universal Financial Access by 2020 and the United Nations Sustainable Development Goals. The database, the full text of the report, and the underlying country-level data for all figures—along with the questionnaire, the survey methodology, and other relevant materials—are available at www.worldbank.org/globalindex.

This comparative study explores how shadow banking differs from the traditional banking system. It discusses the origins, history, purposes, risks, regulatory constraints, and projected future evolution of both financial sectors of the world economy. This thorough examination of non-bank financial intermediaries follows the migration of services from traditional banks to less-regulated alternative banking products, as well as the evolution of regulations and the Financial Stability Oversight Council to monitor these new entities. Three chapters explore in depth the major financial structures newly designated as systemically important financial institutions (SIFIs), with particular attention to insurance companies such as MetLife, which seek exemption from the designation. Finally, the focus shifts to international financial institutions' efforts to protect consumers and curtail irresponsible shadow banks, with an eye toward the effects of these actions on future banking practices.

In response to a clear need by low-income people to gain access to the full range of financial services including savings, a growing number of microfinance NGOs are seeking guidelines to transform from credit-focused microfinance organizations to regulated deposit-taking financial intermediaries. In response to this trend, this book presents a practical 'how-to' manual for MFIs to develop the capacity to become licensed and regulated to mobilize deposits from the public. 'Transforming Microfinance Institutions' provides guidelines for regulators to license and regulate microfinance providers, and for transforming MFIs to meet the demands of two major new stakeholders regulators and shareholders. As such, it focuses on developing the capacity of NGO MFIs to mobilize and intermediate voluntary savings. Drawing from worldwide experience, it outlines how to manage the transformation process and address major strategic and operational issues inherent in transformation including competitive positioning, business planning, accessing capital and shareholders, and how to 'transform' the MFI's human resources, financial management, MIS, internal controls, and branch operations. Case studies then provide exam-

ples of developing a new regulatory tier for microfinance, and how a Ugandan NGO transformed to become a licensed financial intermediary. This book will be invaluable to regulators and microfinance NGOs contemplating institutional transformation and will be of tremendous use to donors and technical support agencies supporting MFIs in their transformation.
