The goal of teaching writing is to create independent and self-motivated writers. When students write more often, they become better at writing. They acquire habits, skills, and strategies that enable them to learn more about the craft of writing. Yet they require the guidance and support of a more knowledgeable person who understands the writing process, the changes over time in writing development, and specific techniques and procedures for teaching writing. In *Scaffolding Young Writers: A Writers' Workshop Approach*, Linda J. Dorn and Carla Soffos present a clear road map for implementing writers' workshop in the primary grades. Adopting an apprenticeship approach, the authors show how explicit teaching, good models, clear demonstrations, established routines, assisted teaching followed by independent practice, and self-regulated learning are all fundamental in establishing a successful writers' workshop. There is a detailed chapter on organizing for writers' workshop, including materials, components, routines, and procedures. Other chapters provide explicit guidelines for designing productive mini-lessons and student conferences. *Scaffolding Young Writers* also features: an overview of how children become writers; analyses of students' samples according to informal and formal writing assessments; writing checklists, benchmark behaviors, and rubrics based on national stan-

dards; examples of teaching interactions during mini-lessons and writing conferences; illustrations of completed forms and checklists with detailed descriptions, and blank reproducible forms in the appendix for classroom use. Instruction is linked with assessment throughout the book, so that all teaching interactions are grounded in what children already know and what they need to know as they develop into independent writers.

"HELP! My Students Can't Write!" Why You Need a Writing Revolution in Your Classroom and How to Lead It. The Writing Revolution (TWR) provides a clear method of instruction that you can use no matter what subject or grade level you teach. The model, also known as The Hochman Method, has demonstrated, over and over, that it can turn weak writers into strong communicators by focusing on specific techniques that match their needs and by providing them with targeted feedback. Insurmountable as the challenges faced by many students may seem, TWR can make a dramatic difference. And the method does more than improve writing skills. It also helps: Boost reading comprehension Improve organizational and study skills Enhance speaking abilities Develop analytical capabilities TWR is as much a method of teaching content as it is a method of teaching writing. There's no separate writing block and no separate writing curriculum. Instead, teachers of all subjects adapt the TWR strategies and activities to their current curriculum and weave them into their content instruction. But perhaps what's most revolutionary about the TWR method is that it takes the mystery out of learning to write well. It breaks the writing process down into manageable chunks and then has students practice the chunks they need, repeatedly, while also learning content.

Arizona never did make it to those places. Instead she became a teacher, helping generations of children in the one-room schoolhouse which she herself had attended. Gloria Houston's Joyous recounting of her great-aunt Arizona's quiet yet meaningful life reminds us of the magical place a special teacher can hold in our hearts.
