For most of us, one of the most rewarding, yet difficult tasks, is preparing messages to preach and teach. We are honored by God to stand before our congregation each week, and we want to give them the very best, but with the press of the many demands of ministry, sometimes that is difficult to do. And if you're like me, you prefer writing your own sermons because you have a special connection with your congregation that is hard to reach through a message someone else has written. In other words, no one knows your people like you do! Our new Pulpit Outline Series gives you a starting point - a sermon title, a deductive sermon outline; and a relevant illustration you can use however you like. In this edition, rather than an outline, we have given you full manuscript messages that can be edited to suit your purposes. We invite you to make these messages your own, because only you know the people God has called you to preach to. And we are so honored that you've invested in this unique third volume in the Pulpit Outline series - 52 Funeral Sermons. We have put together the most tasteful, relevant, and Biblical messages possible. May God Bless You as You Share His Word!

New York Times Bestseller • Finalist for the 2018 National Book Critics Circle Award in Nonfiction • A New York Times Notable Book • Bloomberg Best Book of 2018 “Their distinctive contribution to the higher-education debate is to meet safetyism on its own, psychological turf . . . Lukianoff and Haidt tell us that safetyism undermines the freedom of inquiry and speech that are indispensable to universities.” —Jonathan Marks, Commentary “The remedies the book outlines should be considered on college campuses, among parents of current and future students, and by anyone longing for a more sane society.” —Pittsburgh Post-Gazette Something has been going wrong on many college campuses in the last few years. Speakers are shouted down. Students and professors say they are walking on eggshells and are afraid to speak honestly. Rates of anxiety, depression, and suicide are rising—on campus as well as nationally. How did this happen? First Amendment expert Greg Lukianoff and social psychologist Jonathan Haidt show how the new problems on campus have their origins in three terrible ideas that have become increasingly woven into American childhood and education: What doesn't kill you makes you weaker; always trust your feelings; and life is a battle between good people and evil people. These three Great Untruths contradict basic psychological principles about well-being and ancient wisdom from many cultures. Embracing these untruths—and the resulting culture of safetyism—interferes with young people's social, emotional, and intellectual development. It makes it harder for them to become autonomous adults who are able to navigate the bumpy road of life. Lukianoff and Haidt investigate the many social trends that have intersected to promote the spread of these untruths. They explore changes in childhood such as the rise of fearful parenting, the decline of unsupervised, child-directed play, and the new world of social media that has engulfed teenagers in the last decade. They examine changes on campus, including the corporatization of universities and the emergence of new ideas about identity and justice. They situate the conflicts on campus within the context of America's rapidly rising political polarization and dysfunction. This is a book for anyone who is confused by what is happening on college campuses today, or has children, or is concerned about the growing inability of Americans to live, work, and cooperate across party lines.

"Mine" is one of the first words babies learn, and by the time we grow up, the idea of ownership seems natural, whether we are buying a cup of coffee or a house. But who controls the space behind your airplane seat: you, reclining, or the squished laptop user behind you? Why is plagiarism wrong, but it's okay to knock off a recipe or a dress design? And after a snowstorm, why does a chair in the street hold your parking space in Chicago, while in New York you lose both the space and the chair? In Mine!, Michael Heller and James Salzman, two of the world's leading authorities on ownership, explain these puzzles and many more. Remarkably, they reveal, there are just six

simple rules that everyone uses to claim everything. Owners choose the rule that steers us to do what they want. But we can pick differently. This is true not just for airplane seats, but also for battles over digital privacy, climate change, and wealth inequality. Mine! draws on mind-bending, often infuriating, and always fascinating accounts from business, history, courtrooms, and everyday life to reveal how the rules of ownership control our lives and shape our world.

Los tiempos actuales plantean a los profesionistas de las distintas disciplinas, incluidas las relacionadas con la salud mental y el bienestar emocional, retos particulares que son producto de la modernidad y el contexto en que nos encontramos inmersos. En ese sentido, la temática elegida para la organización del 7º Congreso Internacional de la Asociación Mexicana de Orientación Psicológica y Psicoterapia, A. C. (AMOPP) representó un esfuerzo por dar respuesta a la imperiosa necesidad de ampliar la visión y alcance de la profesión del orientador psicológico en el ámbito de la justicia social y la psicología forense, ámbitos que sin duda merecen un espacio para el análisis y discusión. La Universidad Marista de Mérida fue sede de este Congreso, que se realizó los días 24, 25 y 26 de septiembre de 2015, evento avalado académicamente por la Universidad Iberoamericana de la Ciudad de México, la AMOPP y el National Board for Certified Counselors, por sus siglas NBCC. Siguiendo la tradición iniciada desde hace varios años, consideramos pertinente, dada la calidad de los ponentes y de los contenidos temáticos, realizar la edición una publicación bajo el título "Psicología forense y justicia social: estrategias de intervención", y que presentamos como el X volumen de *Temas Selectos en Orientación Psicológica (TSOP)*. Esta revista se mantiene como una serie de publicaciones anuales, bilingües, organizada en números monotemáticos continuos, que se

integran por artículos inéditos de autores destacados en el área de la psicología y de la orientación psicológica. El objetivo de esta publicación es promover la salud mental en contextos no tradicionales de prevención e intervención. Ubicando con exactitud a la orientación psicológica en el mundo de los profesionales, proporcionándoles un marco teórico de referencia que les permita adoptar una identidad y un concepto funcional de salud psicológica. Los artículos que se presentan ayudarán a la promoción de una práctica profesional eficiente frente a los problemas que aquejan a nuestra sociedad actual; profesionales y estudiantes de medicina, psicología, psiquiatría, trabajo social y educación, entre otros; encontrarán en *Temas Selectos en Orientación Psicológica*, las herramientas adecuadas para el ejercicio profesional de sus funciones. Ser competentes y sensibles en el tema de Justicia Social implica no sólo la posibilidad de estar atentos a los prejuicios, la discriminación, la opresión, marginación, maltrato y violencia que se genera ante la falta de aceptación y tolerancia a las diferencias por raza, origen étnico, clase social, grupo cultural, religión, lengua, discapacidad física o mental, nivel económico, género, nivel educativo u orientación sexual. Implica asimismo contar con los elementos teóricos y las estrategias de acción concretas que permitan a los orientadores psicológicos apoyar a sus clientes/pacientes para cambiar las condiciones ambientales que perpetúan varias formas de injusticia y opresión y que tienen efectos adversos en la salud mental y el bienestar del individuo, en un marco de responsabilidad ética. En el presente número de *TSOP* consideramos que una de las actividades por mejorar en la orientación psicológica, es también la intervención en el ámbito forense. En México, no existe aún el reconocimiento oficial de la psicoterapia forense como disciplina. Las contribuciones que la orientación psicológica forense aportan al sistema de justicia, como una nueva forma de intervención psicológica que abarca no solamente a personas que han infringido la ley o realizado alguna conducta antisocial, incluyen la rehabilitación de terceros en áreas que han sido afectadas en grado importante, así como el apoyo y fortalecimiento de víctimas y testigos en tránsito ante el sistema de justicia. Este volumen está dirigido a psicoterapeutas, orientadores psicológicos, psicólogos y estudiantes de Psicología y disciplinas afines con el objetivo de proporcionar conocimientos y herramientas prácticas para identificar las intervenciones terapéuticas que se puedan realizar en el campo de la Psicología Forense y de la Justicia Social, manteniendo una perspectiva integral y de Derechos Humanos y abordando con mayor eficacia los retos presentados en estos ámbitos
