#### Forensic Science: Crime Scene Investigation | Summer ...

##### Home - Virginia Department of Forensic Science

ABOUT US. Crime Scene has been online since 1995. We sell forensic supplies to law enforcement, high schools and universities, and the public. We also host an online detective game where web sleuths can examine the evidence and solve the case.

Forensic science, also known as criminalistics, is the application of science to criminal and civil laws, mainly—on the criminal side—during criminal investigation, as governed by the legal standards of admissible evidence and criminal procedure. Forensic scientists collect, preserve, and analyze scientific evidence during the course of an investigation. While some forensic scientists travel to the scene of the crime to collect the evidence themselves, others occupy a laboratory role ...

4-AP Field Test Kits. The Department of Forensic Science (DFS) received grant funding from the Department of Criminal Justice Services to purchase 4-AP (also known as Swiss or Cannabis Typification) field test kits for distribution to law enforcement agencies.

Crime scene investigators are required to handle the following work: Collaborate with law enforcement officials at crime scenes. Collaborate with forensic science technicians in the laboratory. Identify visual clues at a crime scene. Collect crime scene evidence. Classify and organize evidence. Photograph crime scenes.

Arrowhead Forensics serves crime scene investigators, latent print examiners, forensic nurses, property room technicians, educators, private investigators and crime laboratory personnel worldwide. Our product offering includes forensic kits such as sexual assault, blood alcohol/urine collection, DNA collection and GSR processing.

#### Crime Scene Forensics: A Scientific Method Approach ...

Forensic Science: Crime Scene Investigation. Back to Programs. Date: July 19 - August 1, 2020. Much of our knowledge of forensic science comes from popular TV shows like Criminal Minds, CSI, Dexter, Sherlock, and Bones. But is a single drop of blood or strand of hair really a smoking gun – enough to secure a criminal conviction?

At crime scenes, forensic science technicians typically do the following: Analyze crime scenes to determine what evidence should be collected and how. Take photographs of the crime scene and evidence. Make sketches of the crime scene. Record observations and findings, such as the location and position of evidence.

Crime scene technicians primarily analyze the scene of a crime or accident and collect evidence. Forensic scientists analyze that evidence in search of clues pointing to a possible suspect, cause... Students are encouraged to develop their STEAM skills as this innovative project about forensic science enables them to investigate a simulated crime.

Crime Scene Science Kit. Solve the ‘Mystery of the Disappearing Diamonds’ with this crime scene lab kit! With it kids will be able to explore the field of forensic science and do 7 fun experiments to determine which of four suspects is responsible for stealing the precious stones.
