The Golden Bough James George Frazer 2012-04-26 This work by Sir James Frazer (1854-1941) is widely considered to be one of the most important early texts in the fields of psychology and anthropology. At the same time, by applying modern methods of comparative ethnography to the classical world, and revealing the superstition and irrationality beneath the surface of the classical culture which had for so long been a model for Western civilisation, it was extremely controversial. Frazer was greatly influenced by E. B. Tylor's Primitive Culture (also reissued in this series), and by the work of the biblical scholar William Robertson Smith, to whom the first edition is dedicated. The twelve-volume third edition, reissued here, was greatly revised and enlarged, and published between 1911 and 1915; the two-volume first edition (1890) is also available in this series. Volume 1 (1911) explores the belief that kings could harness Nature.

life.love.beauty Keegan Allen 2015-02-03 "This book takes you on a photographic voyage through my life so far." —Keegan Allen Keegan Allen is currently known to fans of the ABC Family hit television series, Pretty Little Liars. He has also appeared in numerous independent films and made his New York Stage debut in the acclaimed MCC production of Small Engine Repair. Keegan was given his first camera at age nine, and began a lifelong study and pursuit of photography. life.love.beauty is a selection of photographs taken since his childhood. It's a photo journey through the life of an intensely creative soul whose expression finds various forms: in acting, in poems and stories, lyrics and music, but above all in photography. This book's content resonates in the commonality we all share on our own journeys while unveiling an inside look into a world that very few experience. Organized into three broad groups—life, love, and beauty—the book ranges over the public and private side of Keegan Allen and his world. A child of Hollywood, whose father was also an actor and his mother a painter, Keegan roams freely through that realm, photographing his fellow actors on set, behind the scenes; and recording the amazed, gleeful, sometimes weeping fans that flock to his television and career related events. Allen also has an eye for the anonymous and the unexpected: the woman gazing dreamily from the balcony of a run-down hotel; the rifle-toting dog walker who seems to have emerged from the 19th century; the performers and denizens of Venice Beach and also the streets of New York, some of them chasing the dream of fame, others having long-since abandoned it; the little boy amid in the crowd in an enormous airport; portraits of lovers kissing on subways, in parks, and on the streets. Traveling from California to New York to Paris and back, as well as through the American west, he finds beauty in both urban and rural places: from large-scale landscapes to glimpses of light transforming what it touches. Keegan's poems, stories, captions and musings, song lyrics, and journal pages complement the photographs on this journey. He provides an account of growing up just off the Sunset Strip, coming into his own as an actor/artist, dealing with public recognition while maintaining a very private life, falling in and out of love, and acknowledging the influence of his family, friends, fans, and loved ones. life.love.beauty is an unusually intimate and revealing book: a delight for anyone who values photography, and a gift for the many fans who already follow Keegan's career. Keegan's real passion comes through in both his photographs and candid story telling in this unique photo-journal.

Necessity, Proportionality and the Use of Force by States Judith Gardam 2004-11-18 There has been considerable debate in the international community as to the legality of the forceful actions in Kosovo in 1999, Afghanistan in 2002 and Iraq in 2003 under the United Nations Charter. There has been consensus,

however, that the use of force in all these situations had to be both proportional and necessary. Against the background of these recent armed conflicts, this 2004 book offers the first comprehensive assessment of the twin requirements of proportionality and necessity as legal restraints on the forceful actions of States. It also provides a much-needed examination of the relationship between proportionality in the law on the use of force and international humanitarian law.

Wave Propagation in Linear and Nonlinear Periodic Media Francesco Romeo 2013-07-30 Waves and defect modes in structures media.- Piezoelectric superlattices and shunted periodic arrays as tunable periodic structures and metamaterials.- Topology optimization.- Map-based approaches for periodic structures.- Methodologies for nonlinear periodic media.? The contributions in this volume present both the theoretical background and an overview of the state-of-the-art in wave propagation in linear and nonlinear periodic media in a consistent format. They combine the material issued from a variety of engineering applications, spanning a wide range of length scale, characterized by structures and materials, both man-made and naturally occurring, featuring geometry, micro-structural and/or materials properties that vary periodically in space, including periodically stiffened plates, shells and beam-like as well as bladed disc assemblies, phononic metamaterials, photonic crystals and ordered granular media. Along with linear models and applications, analytical methodologies for analyzing and exploiting complex dynamical phenomena arising in nonlinear periodic systems are also presented.?

The Cambridge Companion to Ben Jonson Richard L. Harp 2000-11-30 Ben Jonson is, in many ways, the figure of greatest centrality to literary study of the Elizabethan and Jacobean period. He wrote in virtually every literary genre: in drama, comedy, tragedy and masque; in poetry, epigram, epistle and lyric; in prose, literary criticism and English grammar. He became the most visible poet of his age, honored more than even William Shakespeare, and his dramatic works, in particular his major comedies, continue to be performed today. This Companion brings together leading scholars from both sides of the Atlantic to provide an accessible and up-to-date introduction to Jonson's life and works. It represents an invaluable guide to current critical perspectives, providing generous coverage not only of his plays but also his non-dramatic works. The volume is informed by the latest development in Jonson scholarship and will therefore appeal to scholars and teachers as well as newcomers to his work.

Urologic Oncology Timothy L. Ratliff 2012-12-06 The study of genitourinary tumors is an area of recent rapid growth both in the understanding of disease processes and in the development of new diagnostic and therapeutic modalities. During rapid growth phases within any field, it is desirable to reflect on the current 'state of the art'. It is difficult even for experts in reputed areas of advancement to distinguish true advances from false leads, but it is far more difficult yet for those whose expertise lies in other areas to evaluate important advances. Thus, an objective assessment of evolving areas of investigation in the form of a comprehensive review is of considerable value. We have attempted to provide the reader with an overview. In this volume, view of some of the current areas of investigation in urologic oncology by experts in each area. There often is a tendency for invited papers in books of this nature to lack important critical peer review and therefore, suffer from a lack of objectivity. We have attempted to diminish this problem by the selection of two experts to discuss each subject. We believe that this format has improved the overall quality of the book for two reasons: 1) the knowledge of each contributor that his or her work would be reviewed by a peer 2) the fact that contributions by encourages more rigorous scholarship, and two experts, including the individual insights of each, provides a better perspective for the reader.

Chora, Volume Six Alberto Pérez-Gómez 2011-06-15 Different concepts of the machine are pursued in essays on Fritz Lang's Metropolis, Alfred Jarry's pataphysical machines, and cosmological and political orders in sixteenth-century utopias. Cross-cultural tensions are examined in essays on the Christian appropriation of Aztec symbolism, and on Jesuit perspectives in an imperial Chinese garden in Beijing. Architectural origins and education are revisited in essays on fire and language in Vitruvius, on storytelling by Spanish theorist Juan Caramuel de Lobkowitz, and on the role of history in the design of the Prato della Valle, a public square in Padua. Phenomenal experience is the focus of essays on light and stone in the Gothic church of Saint-Denis, and on bodily movement through the ancient Palace of Minos at Knossos in Crete. Tensions in architectural representation are investigated in essays on the influence of Villard de Honnecourt on drawings by William Burges in Victorian England, and on Stendhal's curious narrative drawings in his book Vie de Henry Brulard. Contemporary beliefs are scrutinized in an essay that uses psychoanalytic theory to examine the modern concept of sustainability.
