Queer Argentina Matthew J. Edwards 2016-11-10 Through insightful, high-paced commentary this book directs attention south, towards Argentina. Current events, political debates, and the cultural production of artists, authors and public figures, including César Aira, María Moreno, Naty Menstrual and Copi, among others, provide case studies where heterosexual social models are rejected and, in their place, queer frameworks become the preferred model for living differently. Queer Argentina traces the movements of today's marginalized communities as they pass through and choose to remain within the closet: a space that is emblematic of collective struggles in silence and community formation outside the (hetero)norm.

Fandom as Methodology Catherine Grant 2019-12-03 An illustrated exploration of fandom that combines academic essays with artist pages and experimental texts. Fandom as Methodology examines fandom as a set of practices for approaching and writing about art. The collection includes experimental texts, autobiography, fiction, and new academic perspectives on fandom in and as art. Key to the idea of "fandom as methodology" is a focus on the potential for fandom in art to create oppositional spaces, communities, and practices, particularly from queer perspectives, but also through transnational, feminist and artist-of-color fandoms. The book provides a range of examples of artists and writers working in this vein, as well as academic essays that explore the ways in which fandom can be theorized as a methodology for art practice and art history. Fandom as Methodology proposes that many artists and art writers already draw on affective strategies found in fandom. With the current focus in many areas of art history, art writing, and performance studies around affective engagement with artworks and imaginative potentials, fandom is a key methodology that has yet to be explored. Interwoven into the academic essays are lavishly designed artist pages in which artists offer an introduction to their use of fandom as methodology. Contributors Taylor J. Acosta, Catherine Grant, Dominic Johnson, Kate Random Love, Maud Lavin, Owen G. Parry, Alice Butler, SooJin Lee, Jenny Lin, Judy Batalion, Ika Willis. Artists featured in the artist pages Jeremy Deller, Ego Ahaïwe Sowinski, Anna Bunting-Branch, Maria Fusco, Cathy Lomax, Kamau Amu Patton, Holly Pester, Dawn Mellor, Michelle Williams Gamaker, The Women of Colour Index Reading Group, Liv Wynter, Zhiyuan Yang

The Object of the Atlantic Rachel Price 2014-11-30 The Object of the Atlantic is a wide-ranging study of the transition from a concern with sovereignty to a concern with things in Iberian Atlantic literature and art produced between 1868 and 1968. Rachel Price uncovers the surprising ways that concrete aesthetics from Cuba, Brazil, and Spain drew not only on global forms of constructivism but also on a history of empire, slavery, and media technologies from the Atlantic world. Analyzing Jose Marti's notebooks, Joaquim de Sousa Andrade's poetry, Ramiro de Maeztu's essays on things and on slavery, 1920s Cuban literature on economic restructuring, Ferreira Gullar's theory of the "non-object," and neoconcrete art, Price shows that the turn to objects—and from these to

new media networks—was rooted in the very philosophies of history that helped form the Atlantic world itself. Women, Culture, and Politics in Latin America Seminar on Feminism & Culture in Latin America 1992-02-25 The result of a collaboration among eight women scholars, this collection examines the history of women's participation in literary, journalistic, educational, and political activity in Latin American history, with special attention to the first half of this century.

Science, Strategy and War Frans P.B. Osinga 2007-01-24 John Boyd is often known exclusively for the so-called 'OODA' loop model he developed. This model refers to a decision-making process and to the idea that military victory goes to the side that can complete the cycle from observation to action the fastest. This book aims to redress this state of affairs and re-examines John Boyd's original contribution to strategic theory. By highlighting diverse sources that shaped Boyd's thinking, and by offering a comprehensive overview of Boyd's work, this volume demonstrates that the common interpretation of the meaning of Boyd's OODA loop concept is incomplete. It also shows that Boyd's work is much more comprehensive, richer and deeper than is generally thought. With his ideas featuring in the literature on Network Centric Warfare, a key element of the US and NATO's so-called 'military transformation' programmes, as well as in the debate on Fourth Generation Warfare, Boyd continues to exert a strong influence on Western military thinking. Dr Osinga demonstrates how Boyd's work can help us to understand the new strategic threats in the post- 9/11 world, and establishes why John Boyd should be regarded as one of the most important (post)modern strategic theorists.

Critical Medical Anthropology Jennie Gamlin 2020-03-12 Critical Medical Anthropology presents inspiring work from scholars doing and engaging with ethnographic research in or from Latin America, addressing themes that are central to contemporary Critical Medical Anthropology (CMA). This includes issues of inequality, embodiment of history, indigeneity, non-communicable diseases, gendered violence, migration, substance abuse, reproductive politics and judicialisation, as these relate to health. The collection of ethnographically informed research, including original theoretical contributions, reconsiders the broader relevance of CMA perspectives for addressing current global healthcare challenges from and of Latin America. It includes work spanning four countries in Latin America (Mexico, Brazil, Guatemala and Peru) as well as the trans-migratory contexts they connect and are defined by. By drawing on diverse social practices, it addresses challenges of central relevance to medical anthropology and global health, including reproduction and maternal health, sex work, rare and chronic diseases, the pharmaceutical industry and questions of agency, political economy, identity, ethnicity, and human rights.

Canada and the Middle East Paul Heinbecker 2007-10-26 Canada and the Middle East: In Theory and Practice provides a unique perspective on one of the world's most geopolitically important regions. From the perspective of Canada's diplomats, academics, and former policy practitioners involved in the region, the book offers an overview of Canada's relationship with the Middle East and the challenges Canada faces there. The contributors examine Canada's efforts to promote its interests and values—peace building, peacekeeping, multiculturalism, and multilateralism, for example—and investigate the views of interested communities on Canada's relations with countries of the Middle East. Canada and the Middle East will be useful to academics and students studying the Middle East, Canadian foreign policy, and international relations. It will also serve as a primer for Canadian companies investing in the Middle East and a helpful reference for Canada's foreign service and journalists stationed abroad by providing a background to Canada's interests and role in the region. Environmental Crime and Social Conflict Avi Brisman 2016-03-09 This impressive collection of original essays explores the relationship between social conflict and the environment - a topic that has received little attention within criminology. The chapters provide a systematic and comprehensive introduction and overview of conflict situations stemming from human exploitation of environments, as well as the impact of social conflicts on the wellbeing and health of specific species and ecosystems. Largely informed by green criminology perspectives, the chapters in the book are intended to stimulate new understandings of the relationships between humans and nature through critical evaluation of environmental destruction and degradation associated with social conflicts occurring around the world. With a goal of creating a typology of environment-social conflict relationships useful for green criminological research, this study is essential reading for scholars and academics in criminology, as well as those interested in crime, law and justice.

The Social Life of Economic Inequalities in Contemporary Latin America Margit Ystanes 2017-10-25 This book is open access under a CC BY 4.0 license. This edited volume examines how economic processes have worked upon social lives and social realities in Latin America during the past decades. Through tracing the effects of the neoliberal epoch into the era of the so-called pink tide, the book seeks to understand to what extent the turn to the left at the start of the millennium managed to challenge historically constituted configurations of inequality. A central argument in the book is that in spite of economic reforms and social advances on a range of arenas, the fundamental tenants of socio-economic inequalities have not been challenged substantially. As several countries are now experiencing a return to right-wing politics, this collection helps us better understand why inequalities are so entrenched in the Latin American continent, but also the complex and creative ways that it is continuously

contested. The book directs itself to students, scholars and anyone interested in Latin America, economic anthropology, political anthropology, left-wing politics, poverty and socio-economic inequalities.

Toward a Theory of Peace Randall Caroline Watson Forsberg 2019-12-15 Military analyst, peace activist, teacher, and social theorist Randall Caroline Watson Forsberg (1943–2007) founded the Nuclear Freeze campaign and the Institute for Defense and Disarmament Studies. In "Toward a Theory of Peace," completed in 1997 and published for the first time here, she delves into a vast literature in psychology, anthropology, archeology, sociology, and history to examine the ways in which changing moral beliefs came to stigmatize forms of "socially sanctioned violence" such as human sacrifice, cannibalism, and slavery, eventually rendering them unacceptable. Could the same process work for war? Edited and with an introduction by political scientists Matthew Evangelista (Cornell University) and Neta C. Crawford (Boston University), both of whom worked with Forsberg.

Beyond Convergence National Defense University (US) 2017-08-24 The world order built upon the Peace of Westphalia is faltering. State fragility or failure are endemic, with no fewer than one-third of the states in the United Nations earning a "high warning"-or worse-in the Fragile States Index, and an equal number suffering a decline in sustainability over the past decade.¹ State weakness invites a range of illicit actors, including international terrorists, globally networked insurgents, and transnational criminal organizations (TCOs). The presence and operations of these entities keep states weak and incapable of effective governance, and limit the possibility of fruitful partnerships with the United States and its allies. Illicit organizations and their networks fuel corruption, eroding state legitimacy among the governed, and sowing doubt that the state is a genuine guardian of the public interest. These networks can penetrate the state, leading to state capture, and even criminal sovereignty.² A growing number of weak and corrupt states is creating gaping holes in the global rule-based system of states that we depend on for our security and prosperity. Indeed, the chapters of this book suggest the emergence of a highly adaptive and parasitic alternative ecosystem, based on criminal commerce and extreme violence, with little regard for what we commonly conceive of as the public interest or the public good. The last 10 years have seen unprecedented growth in interactivity between and among a wide range of illicit networks, as well as the emergence of hybrid organizations that use methods characteristic of both terrorist and criminal groups. In a convergence of interests, terrorist organizations collaborate with cartels, and trafficking organizations collude with insurgents. International terrorist organizations, such as al-Qaeda and Hezbollah, engage energetically in transnational crime to raise funds for their operations. Prominent criminal organizations like Los Zetas in Mexico and D-Company in Pakistan have adopted the symbolic violence of terrorists-the propaganda of the deed-to secure their "turf." And networked insurgents, such as the Islamic State of Iraq and the Levant (ISIL), the Revolutionary Armed Forces of Colombia (FARC), and the Liberation Tigers of Tamil Eelam (LTTE), have adopted the techniques of both crime and terror.

The Transgender Exigency Edward Schiappa 2021-11 "At no other point in human history have the definitions of "woman" and "man," "male" and "female," "masculine" and "feminine," been more contentious than now. This book advances a pragmatic approach to the act of defining that acknowledges the important ethical dimensions of our definitional practices. Increased transgender rights and visibility has been met with increased opposition, controversy, and even violence. Who should have the power to define the meanings of sex and gender? What values and interests are advanced by competing definitions? Should an all-boys' college or high school allow transgender boys to apply? Should transgender women be allowed to use the women's bathroom? How has growing recognition of intersex conditions challenged our definitions of sex/gender? In this timely intervention, Edward Schiappa examines the key sites of debate and including schools, bathrooms, the military, sports, prisons, and feminism, drawing attention to the political, practical, and ethical dimensions of the act of defining itself. This is an important text for students and scholars in gender studies, philosophy, communication, and sociology"--

Social Representations for the Anthropocene: Latin American Perspectives Clarilza Prado de Sousa 2021-04-30 The Anthropocene has become a field of studies in which the influence of human activity on the Earth System and nature is both the main threat and the potential solution. Social Representations Theory has been evolving since the 1960s. It links knowledge and practice in everyday life and is an effective way to deal with systemic crises based on common sense. This book assembles key contributions by Latin American scholars working with social representations in the social sciences that are of conceptual relevance to the study of the Anthropocene and that investigate the societal consequences of complex interrelations between common sense and topics of global relevance, such as the contradictions of sustainable development, the construction of risks beyond risk-perception, health, negotiation and governance in the field of education, gender equality, the usefulness of longitudinal and systemic ethnography and case studies, and agency and the link between inequality, crises and risk society in the context of COVID-19, presenting theoretical and methodological innovations from Spanish, Portuguese and French research that have rarely been available in English. • This is the first book to address the relevance of Social Representations Theory for the Anthropocene as a societal era • It presents the multidisciplinary scope of Social Representations • This book covers emerging research contributions in Social

Representations Theory from Latin America• This book presents innovative research and commentaries by established researchers in the field• This multidisciplinary book should be in the libraries of many disciplines in the social sciences and humanities

Strategic Latency Unleashed Zachary Davis 2021-01-30 The world is being transformed physically and politically. Technology is the handmaiden of much of this change. But since the current sweep of global change is transforming the face of warfare, Special Operations Forces (SOF) must adapt to these circumstances. Fortunately, adaptation is in the SOF DNA. This book examines the changes affecting SOF and offers possible solutions to the complexities that are challenging many long-held assumptions. The chapters explore what has changed, what stays the same, and what it all means for U.S. SOF. The authors are a mix of leading experts in technology, business, policy, intelligence, and geopolitics, partnered with experienced special operators who either cowrote the chapters or reviewed them to ensure accuracy and relevance for SOF. Our goal is to provide insights into the changes around us and generate ideas about how SOF can adapt and succeed in the emerging operational environment.

Language Learning in Study Abroad Wenhao Diao 2021-03-04 Vestiges of monolingual bias are present in the portrayal of study abroad as an idealized monolingual immersion experience and the steps many programs take to encourage or enforce target language monolingualism. In reality, study abroad is often inherently multilingual. This book addresses the need for a recognition of the multilingual realities of study abroad across a variety of traditional and non-traditional national contexts and target languages. The chapters examine multilingual socialization and translanguaging with peers, local hosts and instructors; how the target language is necessarily entwined in global, local and historical contexts; and how students negotiate the use of local and global varieties of English. Together the chapters present a powerful argument for scholars and study abroad practitioners to consider and critically incorporate multilingual realities into their research and planning.

Why Democracies Flounder and Fail Michael Haas 2018-06-26 Democracy is in crisis because voices of the people are ignored due to a politics of mass society. After demonstrating how the French Fourth Republic failed, wherein Singapore's totalitarianism is a dangerous model, Washington is enmeshed in gridlock, and there is a global democracy deficit, solutions are offered to revitalize democracy as the best form of government. The book demonstrates how mass society politics operates, with intermediate institutions of civil society (media, pressure groups, political parties) no longer transmitting the will of the people to government but instead are concerned with corporate interests and have developed oligarchical mindsets. Rather than micro-remedy bandaids, the author focuses on the need to transform governing philosophies from pragmatic to humanistic solutions.

Contemporary Feminist Utopianism Lucy Sargisson 2002-11-01 A new and challenging entry into the debates between feminism and postmodernism, Contemporary Feminist Utopianism challenges some basic preconceptions about the role of political theory today. Sargisson explores current debates within utopian studies, feminist theory and poststructuralist deconstruction. Utopian thinking is offered as a route out of the dilemma of contemporary feminism as well as a way of conceptualizing its current situation. This book provides an exploration of, and exercise in, utopian thought.

Transvestism, Masculinity, and Latin American Literature B. Sifuentes-Jáuregui 2002-02-22 This book is about transvestism and the performance of gender in Latin American literature and culture. Ben. Sifuentes-Jáuregui explores the figure of the transvestite and his/her relation to the body through a series of canonical Latin American texts. By analyzing works by Alejo Carpentier, José Donoso, Severo Sarduy and Manuel Puig (author of Kiss of the Spiderwoma n), alongside critical works in gender studies and queer theory, Sifuentes-Jáuregui shows how transvestism operates not only to destabilize, but often to affirm sexual, gender, national and political identities.

Networked Governance of Freedom and Tyranny John Braithwaite 2012-03-01 This book offers a new approach to the extraordinary story of Timor-Leste. The Indonesian invasion of the former Portuguese colony in 1975 was widely considered to have permanently crushed the Timorese independence movement. Initial international

condemnation of the invasion was quickly replaced by widespread acceptance of Indonesian sovereignty. But inside Timor-Leste various resistance networks maintained their struggle, against all odds. Twenty-four years later, the Timorese were allowed to choose their political future and the new country of Timor-Leste came into being in 2002. This book presents freedom in Timor-Leste as an accomplishment of networked governance, arguing that weak networks are capable of controlling strong tyrannies. Yet, as events in Timor-Leste since independence show, the nodes of networks of freedom can themselves become nodes of tyranny. The authors argue that constant renewal of liberation networks is critical for peace with justice - feminist networks for the liberation of women, preventive diplomacy networks for liberation of victims of war, village development networks, civil society networks. Constant renewal of the separation of powers is also necessary. A case is made for a different way of seeing the separation of powers as constitutive of the republican ideal of freedom as non-domination. The book is also a critique of realism as a theory of international affairs and of the limits of reforming tyranny through the centralised agency of a state sovereign. Reversal of Indonesia's 1975 invasion of Timor-Leste was an implausible accomplishment. Among the things that achieved it was principled engagement with Indonesia and its democracy movement by the Timor resistance. Unprincipled engagement by Australia and the United States in particular allowed the 1975 invasion to occur. The book argues that when the international community regulates tyranny responsively, with principled engagement, there is hope for a domestic politics of nonviolent transformation for freedom and justice.

Ever Faithful David Sartorius 2014-01-10 Known for much of the nineteenth century as "the ever-faithful isle," Cuba did not earn its independence from Spain until 1898, long after most American colonies had achieved emancipation from European rule. In this groundbreaking history, David Sartorius explores the relationship between political allegiance and race in nineteenth-century Cuba. Challenging assumptions that loyalty to the Spanish empire was the exclusive province of the white Cuban elite, he examines the free and enslaved people of African descent who actively supported colonialism. By claiming loyalty, many black and mulatto Cubans attained some degree of social mobility, legal freedom, and political inclusion in a world where hierarchy and inequality were the fundamental lineaments of colonial subjectivity. Sartorius explores Cuba's battlefields, plantations, and meeting halls to consider the goals and limits of loyalty. In the process, he makes a bold call for fresh perspectives on imperial ideologies of race and on the rich political history of the African diaspora.

Water, Cultural Diversity, and Global Environmental Change Barbara Rose Johnston 2011-12-07 Co-published with UNESCO A product of the UNESCO-IHP project on Water and Cultural Diversity, this book represents an effort to examine the complex role water plays as a force in sustaining, maintaining, and threatening the viability of culturally diverse peoples. It is argued that water is a fundamental human need, a human right, and a core sustaining element in biodiversity and cultural diversity. The core concepts utilized in this book draw upon a larger trend in sustainability science, a recognition of the synergism and analytical potential in utilizing a coupled biological and social systems analysis, as the functioning viability of nature is both sustained and threatened by humans.

Social Science Concepts and Measurement Gary Goertz 2020-09-29 A fully revised edition of the classic reference on concepts and their role in social science research *Social Science Concepts and Measurement* offers an updated look at the theory and methodology of concepts for the social sciences. Emphasizing that most

concepts are multilevel and multidimensional, this revised edition continues to bring the qualitative and quantitative closer together, with new chapters devoted to scaling, aggregation, and the methodological links between the semantics of concepts and numeric measures. In addition, it stresses that concepts are used for description and causal inference, and contain normative judgments. Initial chapters focus on conceptualization, followed by chapters on issues of measurement. The textbook examines concepts in the international arena (such as the global performance indicators used by international organizations like the UN and the World Bank), as well as classic paired concepts such as poverty and wealth, democracy and authoritarianism, and war and peace. Additionally, it explores such topics as typologies, hybrid concepts, and how complex concepts constitute complex theories. The volume serves as a guide to the methodology of concepts in the classroom and is accompanied by more than two hundred exercises. *Social Science Concepts and Measurement* is an indispensable resource for graduate students and scholars.

Non-Human Nature in World Politics Joana Castro Pereira 2020-08-26 This book explores the interconnections between world politics and non-human nature to overcome the anthropocentric boundaries that characterize the field of international relations. By gathering contributions from various perspectives, ranging from post-humanism and ecological modernization, to new materialism and post-colonialism, it conceptualizes the embeddedness of world politics in non-human nature, and proposes a reorientation of political practice to better address the challenges posed by climate change and the deterioration of the Earth's ecosystems. The book is divided into two main parts, the first of which addresses new ways of theoretically conceiving the relationship between non-human nature and world politics. In turn, the second presents empirical investigations into specific case studies, including studies on state actors and international organizations and bodies. Given its scope and the new perspectives it shares, this edited volume represents a uniquely valuable contribution to the field.

American Psychiatric Association Practice Guidelines American Psychiatric Association 1996 The aim of the American Psychiatric Association Practice Guideline series is to improve patient care. Guidelines provide a comprehensive synthesis of all available information relevant to the clinical topic. Practice guidelines can be vehicles for educating psychiatrists, other medical and mental health professionals, and the general public about appropriate and inappropriate treatments. The series also will identify those areas in which critical information is lacking and in which research could be expected to improve clinical decisions. The Practice Guidelines are also designed to help those charged with overseeing the utilization and reimbursement of psychiatric services to develop more scientifically based and clinically sensitive criteria.

Style and Social Identities Peter Auer 2007-01-01 This volume presents an interactional perspective on linguistic variability that takes into account the construction of social identities through the formation of social communicative styles. It shows that style is a useful category in bridging the gap between single parameter variation and social identity. Social positioning, i.e., finding one's place in society, is one of its motivating forces. Various aspects of the expression of stylistic features are focused on, from language choice and linguistic variation in a narrow sense to practices of social categorization, pragmatics patterns, preferences for specific communicative genres, rhetorical practices including prosodic features, and aesthetic choices and preferences for specific forms of taste (looks, clothes, music, etc.). These various features of expression are connected to multimodal stylistic indices through talk; thus, styles emerge from discourse. Styles are adapted to changing contexts, and develop in the course of social processes. The analytical perspective chosen proposes an alternative to current approaches to variability under the influence of the so-called variationist paradigm.

Whose Keeper? Alan Wolfe 2022-03-25 *Whose Keeper?* is a profound and creative treatise on modernity and its challenge to social science. Alan Wolfe argues that modern liberal democracies, such as the United States and Scandinavia, have broken with traditional sources of mortality and instead have relied upon economic and political frameworks to define their obligations to one another. Wolfe calls for reinvigorating a sense of community and thus a sense of obligation to the larger society.
