Health Promotion

The health promotion theorists in the new generation represented in this book are grounded in research and practice, more so than most of those in earlier generations of social and behavioral science who brought their theories to public health. The latter-day emerging theories are better informed by a range of social and

pack. A panoply of insightful and promising new approaches is presented for consideration and exploration in our contemporary behavioral science arsenal.

Emerging Theories in Health Promotion Practice and ...

160Emerging Theories in Health Promotion Practice and Research Community coalitions that survive over time must provide ongoing benefits that outweigh the costs of membership. Finally, the field of interorganizational relations has contributed to our understanding of the stages of collaboration that community coalitions often experience.

Emerging Theories in Health Promotion Practice and ...

The World Health Organization defines capacity building as "the development of knowledge, skills, commitment, structures, systems, and leadership to enable effective health promotion" . It involves actions to improve health at three levels: the advancement of knowledge and skills among practitioners; the expansion of support and infrastructure for health promotion in organizations, and; the development of cohesive partnerships for health in communities .
