1001 Afternoons in Chicago Ben Hecht 2020-12-17 1001 Afternoons in Chicago were launched in June, 1921. They were presented to the public as journalism extraordinary; journalism that invaded the realm of literature, where in large part, journalism really dwells. They went out backed by confidence in the genius of Ben Hecht. The sketches themselves reveal Hecht's literary powers and creative delight in them; they ring with the happiness of a spirit at last free to tell what it feels; they teem with thought and impressions long treasured; they are a recital of songs echoing the voices of Ben's own city and performed with a virtuosity granted to him alone. They announced to a Chicago audience which only half understood them, the arrival of a prodigy whose precise significance is still unmeasured.

Twelve Years a Slave Solomon Northup 2021-01-01 "Having been born a freeman, and for more than thirty years enjoyed the blessings of liberty in a free State—and having at the end of that time been kidnapped and sold into Slavery, where I remained, until happily rescued in the month of January, 1853, after a bondage of twelve years—it has been suggested that an account of my life and fortunes would not be uninteresting to the public." -an excerpt

Heritage Sites of Astronomy and Archaeoastronomy in the Context of the UNESCO World Heritage Convention Clive L. N. Ruggles 2017-11-30 This joint venture between ICOMOS, the advisory body to UNESCO on cultural sites, and the International Astronomical Union is the second volume in an ongoing exploration of themes and issues relating to astronomical heritage in particular and to science and technology heritage in general. It examines a number of key questions relating to astronomical heritage sites and their potential recognition as World Heritage, attempting to identify what might constitute "outstanding universal value" in relation to astronomy. "Heritage Sites of Astronomy and Archaeoastronomy--Volume 2" represents the culmination of several years' work to address some of the most challenging issues raised in the first ICOMOS-IAU Thematic Study, published in 2010. These include the recognition and preservation of the value of dark skies at both cultural and natural sites and landscapes; balancing archaeoastronomical considerations in the context of broader archaeological and cultural values; the potential for serial nominations; and management issues such as preserving the integrity of astronomical sightlines through the landscape. Its case studies are developed in greater depth than those in volume 1, and generally structured as segments of draft nomination dossiers. They include seven-stone antas (prehistoric dolmens) in Portugal and Spain, the thirteen towers of Chankillo in Peru, the astronomical timing of irrigation in Oman, Pic du Midi de Bigorre Observatory in France, Baikonur Cosmodrome in Kazakhstan, and Aoraki-Mackenzie International Dark Sky Reserve in New Zealand. A case study on Stonehenge, already a World Heritage Site, focuses on preserving the integrity of the solstitial sightlines. As for the first ICOMOS-IAU Thematic Study, a international team of authors including historians, astronomers and heritage professionals is led by Professor Clive Ruggles for the IAU and Professor Michel Cotte for ICOMOS.

Evaluation of Fire Safety D. Rasbash 2004-04-21 Fire safety is a major concern in many industries, particularly as there have been significant increases in recent years in the quantities of hazardous materials in process, storage or transport. Plants are becoming larger and are often situated in or close to densely populated areas, and the hazards are continually highlighted with incidents such as the fires and

explosions at the Piper Alpha oil and gas platform, and the Enschede firework factory. As a result, greater attention than ever before is now being given to the evaluation and control of these hazards. In a comprehensive treatment of the subject unavailable elsewhere, this book describes in detail the applications of hazard and risk analysis to fire safety, going on to develop and apply quantification methods. It also gives an explanation in quantitative terms of improvements in fire safety in association with the costs that are expended in their achievement. Furthermore, a quantitative approach is applied to major fire and explosion disasters to demonstrate crucial faults and events. Featuring: Full international coverage and a review of several major fires and explosion disasters. Presentation of the properties and science of fire including the latest research. Detailed coverage of the performance of fire safety measures. This is an essential book for practitioners in fire safety engineering, loss prevention professionals, technical personnel in insurance companies as well as academics involved in fire science and postgraduate students. This book is also a useful reference for fire safety officers, building designers, engineers in the process industries, safety practitioners and risk assessment consultants.

A Complicated Kindness Miriam Toews 2019-01-15 Winner of the Governor General's Literary Award In this stunning coming-of-age novel, the award-winning author of *Women Talking* balances grief and hope in the voice of a witty, beleaguered teenager whose family is shattered by fundamentalist Christianity "Half of our family, the better-looking half, is missing," Nomi Nickel tells us at the beginning of *A Complicated Kindness*. Left alone with her sad, peculiar father, her days are spent piecing together why her mother and sister have disappeared and contemplating her inevitable career at Happy Family Farms, a chicken slaughterhouse on the outskirts of East Village. Not the East Village in New York City where Nomi would prefer to live, but an oppressive town founded by Mennonites on the cold, flat plains of Manitoba, Canada. This darkly funny novel is the world according to the unforgettable Nomi, a bewildered and wry sixteen-year-old trapped in a town governed by fundamentalist religion and in the shattered remains of a family it destroyed. In Nomi's droll, refreshing voice, we're told the story of an eccentric, loving family that falls apart as each member lands on a collision course with the only community any of them have ever known. A work of fierce humor and tragedy by a writer who has taken the American market by storm, this searing, tender, comic testament to family love will break your heart. "Brilliant." —New York Times Book Review "A darkly funny and provocative novel." —O, the Oprah Magazine

Basic Issues in Police Performance 1982 Since the complexity of police services does not lend itself to standardized performance measures, measurement techniques should be designed to inform more about what police do and how they affect their communities. This report reviews conventional police measurement practices and offers ways to improve the management value of performance information. Traditional performance measurement has emphasized the measurement of individual departments' effectiveness in preventing crime. This approach fails to consider the broad range of other police duties, citizens' expectations of police, and how police activities produce social change. Police can be evaluated in terms of efficiency, effectiveness, equity, and accountability, but citizens disagree about which of these performance criteria are the most important because community/police problems are too diverse. Instead of developing uniform, inflexible performance standards to apply globally to entire departments, evaluators should ask more detailed questions about common police processes and their results. Sketchy knowledge of how policing works now produces many hypotheses, but rarely standards worthy of emulation. Evaluators should develop better theories about police functions, obtain more reliable data, and control data collection costs with the aid of police managers so that measures inform departmental policymakers. Tables, diagrams, and 197 references are given. Appendixes include police services study

data and a list of problem codes.

Let's Pretend This Never Happened Jenny Lawson 2012-04-17 The #1 New York Times bestselling (mostly true) memoir from the hilarious author of Furiously Happy. "Gaspingly funny and wonderfully inappropriate."—O, The Oprah Magazine When Jenny Lawson was little, all she ever wanted was to fit in. That dream was cut short by her fantastically unbalanced father and a morbidly eccentric childhood. It did, however, open up an opportunity for Lawson to find the humor in the strange shame-spiral that is her life, and we are all the better for it. In the irreverent Let's Pretend This Never Happened, Lawson's long-suffering husband and sweet daughter help her uncover the surprising discovery that the most terribly human moments—the ones we want to pretend never happened—are the very same moments that make us the people we are today. For every intellectual misfit who thought they were the only ones to think the things that Lawson dares to say out loud, this is a poignant and hysterical look at the dark, disturbing, yet wonderful moments of our lives. Trance Christopher Sorrentino 2006-04-18 1974: A tiny band of self-styled urban guerrillas, calling itself the Symbionese Liberation Army, abducts a newspaper heiress, who then abruptly announces that she has adopted the guerrilla name "Tania" and chosen to remain with her former captors. Has she been brainwashed? Coerced? Could she be sincere? Why would such a nice girl disavow her loving parents, her adoring fiancé, her comfortable home? Why would she suddenly adopt the SLA's cri de coeur, "Death to the Fascist Insect that Preys Upon the Life of the People"? Soon most of the SLA are dead, killed in a suicidal confrontation with police in Los Angeles, forcing Tania and her two remaining comrades--the pompous and abusive General Teko and his duplicitous lieutenant, Yolanda--into hiding, where they will remain for the next sixteen months. Trance, Christopher Sorrentino's mesmerizing and brilliant second novel, traces this fugitive period, leading the reader on a breathtaking, hilarious, and heartbreaking underground tour across a beleaguered America, in the company of scam artists, visionaries, cultists, and a mismatched gang of middle-class people who typify the guiding conceit of their time, that of self-renovation. Along the way he tells the story of a nation divided against itself--parents and children, men and women, black and white; a story of hidebound tradition and radical change, of truth and propaganda, of cynicism and idealism; a story as transfixing and relevant today as it was then. Insightful, compassionate, scathingly funny, and moving, Trance is a virtuoso performance, placing Christopher Sorrentino in the first rank of American novelists. Trance is a 2005 National Book Award Finalist for Fiction.

A Falklands Family at War Neville Bennett 2021-07-30 Many military accounts of the British side of the

Falklands War have been published as well as memoirs written by servicemen who took part, so this aspect of the story of the Argentine occupation and the British liberation of this remote territory in the South Atlantic is well known. But little attention has been paid to the Falkland islanders who had direct personal experience of this extraordinary crisis in their history. That is why the previously unpublished diaries of Neville Bennett and his wife Valerie, a fireman and a nurse who lived with their two daughters in Port Stanley throughout the war, is such vivid and revealing reading. As chief fireman Neville was frequently called out to deal with fires and other incidents during the occupation, and each day he recorded what happened and what he thought about it in his sharp and forthright way. Valerie saw a different side of the occupation through her work at the Stanley hospital where she had to handle the Argentines as well as daily accidents and emergencies. Their joint record of the exceptional circumstances in the Falklands in April, May and June 1982 gives us a fascinating inside view of family life during the occupation and of their relations with the Argentine soldiers and commanders. It is engrossing reading.

When I Was Puerto Rican Esmeralda Santiago 2006-02-28 Esmeralda Santiago's story begins in rural Puerto Rico, where her childhood was full of both tenderness and domestic strife, tropical sounds and sights as well as poverty. Growing up, she learned the proper way to eat a guava, the sound of tree frogs in the mango groves at night, the taste of the delectable sausage called morcilla, and the formula for ushering a dead baby's soul to heaven. As she enters school we see the clash, both hilarious and fierce, of Puerto Rican and Yankee culture. When her mother, Mami, a force of nature, takes off to New York with her seven, soon to be eleven children, Esmeralda, the oldest, must learn new rules, a new language, and eventually take on a new identity. In this first volume of her much-praised, bestselling trilogy, Santiago brilliantly recreates the idyllic landscape and tumultuous family life of her earliest years and her tremendous journey from the barrio to Brooklyn, from translating for her mother at the welfare office to high honors at Harvard.
