Neonatal Nutrition for Inflammatory Disorders and Necrotizing Enterocolitis Misty Good 2020-11-19 This Nutrients Special Issue focuses on neonatal nutritional advances for inflammatory disorders affecting infants such as necrotizing enterocolitis (NEC). Nutrition can significantly impact the development of certain diseases that afflict infants. This Special Issue aims to bring together the latest research on the role of nutrition in preventing or impacting neonatal disorders. Specifically, this Special Issue focuses on the role of breast milk or donor breast milk and the various components in milk that have been demonstrated to protect against NEC and other inflammatory diseases. This issue provides a comprehensive composite of the advances in nutritional strategies that can modulate or prevent neonatal intestinal disorders.

HACCP and ISO 22000 Ioannis S. Arvanitoyannis 2009-11-09 Food Safety is an increasingly important issue. Numerous foodcrises have occurred internationally in recent years (the use of the dye Sudan Red I; the presence of acrylamide in various fried and baked foods; mislabelled or unlabelled genetically modified foods; and the outbreak of variant Creutzfeldt-Jakob disease) originating in both primary agricultural production and in the food manufacturing industries. Public concern at these and other events has led government agencies to implement a variety of legislative actions covering many aspects of the food chain. This book presents and compares the HACCP and ISO 22000:2005 food safety management systems. These systems were introduced to improve and build upon existing systems in an attempt to address the kinds of failures which can lead to food crises. Numerous practical examples illustrating the application of ISO 22000 to the manufacture of food products of animal origin are presented in this extensively-referenced volume. After an opening chapter which introduces ISO 22000 and compares it with the well-established HACCP food safety management system, a summary of international legislation relating to safety in foods of animal origin is presented. The main part of the book is divided into chapters which are devoted to the principle groups of animal-derived food products: dairy, meat, poultry, eggs and seafood. Chapters are also included on catering and likely future directions. The book is aimed at food industry managers and consultants; government officials responsible for food safety monitoring; researchers and advanced students interested in food safety.

The State of World Fisheries and Aquaculture 2020 FAO 2020-06-01 The 2020 edition of The State of World Fisheries and Aquaculture has a particular focus on sustainability. This reflects a number of specific considerations. First, 2020 marks the twenty-fifth anniversary of the Code of Conduct for Responsible Fisheries (the Code). Second, several Sustainable Development Goal indicators mature in 2020. Third, FAO hosted the International Symposium on Fisheries Sustainability in late 2019, and fourth, 2020 sees the finalization of specific FAO guidelines on sustainable aquaculture growth, and on social sustainability along value chains. While Part 1 retains the format of previous editions, the structure of the rest of the publication has been revised. Part 2 opens with a special section marking the twenty fifth anniversary of the Code. It also focuses on issues coming to the fore, in particular, those related to Sustainable Development Goal 14 and its indicators for which FAO is the "custodian" agency. In addition, Part 2 covers various aspects of fisheries and aquaculture sustainability. The topics discussed range widely, from data and information systems to ocean pollution, product legality, user rights and climate change adaptation. Part 3 now forms the final part of the publication, covering projections and emerging issues such as new technologies and aquaculture biosecurity. It concludes by outlining steps towards a new vision for capture fisheries. The State of World Fisheries and Aquaculture aims to provide objective, reliable and up-to-date information to a wide audience – policymakers, managers, scientists, stakeholders and indeed everyone interested in the fisheries and aquaculture sector.

Fisheries and Aquaculture Emergency Response Guidance Benjamin Cattermoul 2014 "The Fisheries and Aquaculture Emergency Response Guidance (the Guidance) aims to help to save the lives and livelihoods of people in the fisheries and aquaculture sector who have been affected by disasters and humanitarian emergencies. It aims to do this by improving the quality of the design, implementation and assessment of interventions in fisheries and aquaculture in the wake of disasters. It draws on best practice and experience in responding to disasters that have affected fisheries and aquaculture and in supporting people working in the sector to rebuild their livelihoods."--Publisher's description.

Cybernetic Revolutionaries Eden Medina 2014-01-10 A historical study of Chile's twin experiments with cybernetics and socialism, and what they tell us about the relationship of technology and politics. In Cybernetic Revolutionaries, Eden Medina tells the history of two intersecting utopian visions, one political and one technological. The first was Chile's experiment with peaceful socialist change under Salvador Allende; the second was the simultaneous attempt to build a computer system that would manage Chile's economy. Neither vision was fully realized—Allende's government ended with a violent military coup; the system, known as Project Cybersyn, was never completely implemented—but they hold lessons for today about the relationship between technology and politics. Drawing on extensive archival material and interviews, Medina examines the cybernetic system envisioned by the Chilean government—which was to feature holistic system design, decentralized management, human-computer interaction, a national telex network, near real-time control of the growing industrial sector, and modeling the behavior of dynamic systems. She also describes,

and documents with photographs, the network's Star Trek-like operations room, which featured swivel chairs with armrest control panels, a wall of screens displaying data, and flashing red lights to indicate economic emergencies. Studying project Cybersyn today helps us understand not only the technological ambitions of a government in the midst of political change but also the limitations of the Chilean revolution. This history further shows how human attempts to combine the political and the technological with the goal of creating a more just society can open new technological, intellectual, and political possibilities. Technologies, Medina writes, are historical texts; when we read them we are reading history.

Youth Transforming Conflict Nadine Lyamouri-Bajja 2013-01-01 In 1998, the Council of Europe and the European Commission decided to take common action in the field of youth. Both institutions initiated a partnership agreement with the aim "to promote active European citizenship and civil society by giving impetus to the training of youth leaders and youth workers working within a European dimension". In 2003, additional agreements were signed in the fields of "youth research" and "Euro-Mediterranean youth co-operation". Since 2005, the partnership between the European Commission and the Council of Europe in the field of youth activities has focused on the following topics: European citizenship, human rights education and intercultural dialogue, quality and recognition of youth work and training, better understanding and knowledge of youth and youth policy development. The partnership between the European Commission and the Council of Europe in the field of youth brings together the two institutions' experience in non-formal education, youth policy, youth research and youth work practice. Activities organised within its framework gather representatives of those areas who share their knowledge and experience for the benefit of enhancing evidence-based policy, practice, quality and recognition of youth work and training. Results and other material are made available on the partnership website (<http://youth-partnership-eu.coe.int>) and in various publications, including the Training Kits (T-Kits). T-Kits are thematic publications written by experienced youth trainers and experts and constitute easy-to-use handbooks for educational activities. All activities and publications enhance the exchange of experience and good practice between the actors involved and contribute to the implementation of the political objectives of both partner institutions.

Brain Repair After Stroke Steven C. Cramer 2010-10-28 Increasing evidence identifies the possibility of restoring function to the damaged brain via exogenous therapies. One major target for these advances is stroke, where most patients can be left with significant disability. Treatments have the potential to improve the victim's quality of life significantly and reduce the time and expense of rehabilitation. *Brain Repair After Stroke* reviews the biology of spontaneous brain repair after stroke in animal models and in humans. Detailed chapters cover the many forms of therapy being explored to promote brain repair and consider clinical trial issues in this context. This book provides a summary of the neurobiology of innate and treatment-induced repair mechanisms after hypoxia and reviews the state of the art for human therapeutics in relation to promoting behavioral recovery after stroke. Essential reading for stroke physicians, neurologists, rehabilitation physicians and neuropsychologists.

Strategic Latency Unleashed Zachary Davis 2021-01-30 The world is being transformed physically and politically. Technology is the handmaiden of much of this change. But since the current sweep of global change is transforming the face of warfare, Special Operations Forces (SOF) must adapt to these circumstances. Fortunately, adaptation is in the SOF DNA. This book examines the changes affecting SOF and offers possible solutions to the complexities that are challenging many long-held assumptions. The chapters explore what has changed, what stays the same, and what it all means for U.S. SOF. The authors are a mix of leading experts in technology, business, policy, intelligence, and geopolitics, partnered with experienced special operators who either cowrote the chapters or reviewed them to ensure accuracy and relevance for SOF. Our goal is to provide insights into the changes around us and generate ideas about how SOF can adapt and succeed in the emerging operational environment.

Breaking Out of Beginner's Spanish Joseph J. Keenan 2010-01-01 Many language books are boring—this one is not. Written by a native English speaker who learned Spanish the hard way—by trying to talk to Spanish-speaking people—it offers English speakers with a basic knowledge of Spanish hundreds of tips for using the language more fluently and colloquially, with fewer obvious "gringo" errors. Writing with humor, common sense, and a minimum of jargon, Joseph Keenan covers everything from pronunciation, verb usage, and common grammatical mistakes to the subtleties of addressing other people, "trickster" words that look alike in both languages, inadvertent obscenities, and intentional swearing. He guides readers through the set phrases and idiomatic expressions that pepper the native speaker's conversation and provides a valuable introduction to the most widely used

Spanish slang. With this book, both students in school and adult learners who never want to see another classroom can rapidly improve their speaking ability. Breaking Out of Beginner's Spanish will be an essential aid in passing the supreme language test—communicating fluently with native speakers.

Preharvest Food Safety Siddhartha Thakur 2019-12-17 An overview of farm-to-fork safety in the preharvest realm Foodborne outbreaks continue to take lives and harm economies, making controlling the entry of pathogens into the food supply a priority. Preharvest factors have been the cause of numerous outbreaks, including Listeria in melons, Salmonella associated with tomatoes, and Shiga toxin-producing E.coli in beef products, yet most traditional control measures and regulations occur at the postharvest stage. Preharvest Food Safety covers a broad swath of knowledge surrounding topics of safety at the preharvest and harvest stages, focusing on problems for specific food sources and food pathogens, as well as new tools and potential solutions. Led by editors Siddhartha Thakur and Kalmia Kniel, a team of expert authors provides insights into critical themes surrounding preharvest food safety, including Challenges specific to meat, seafood, dairy, egg, produce, grain, and nut production Established and emerging foodborne and agriculture-related pathogens Influences of external factors such as climate change and the growing local-foods trend Regulatory issues from both US and EU perspectives Use of pre- and probiotics, molecular tools, mathematical modeling, and one health approaches Intended to encourage the scientific community and food industry stakeholders to advance their knowledge of the developments and challenges associated with preharvest food safety, this book addresses the current state of the field and provides a diverse array of chapters focused on a variety of food commodities and microbiological hazards.
