I have asked permission to dedicate this book to you not only in memory of the happy evenings I have spent with you in Saigon over the last five years, but also because I have quite shamelessly borrowed the location of your flat to house one of my characters, and your name, Phuong, for the convenience of readers because it is simple, beautiful and easy to pronounce, which is not true of all your country- women's names. You will both realise I have borrowed little else, certainly not the characters of anyone in Viet Nam. Pyle, Granger, Fowler, Vigot, Joe— these have had no origi-

nals in the life of Saigon or Hanoi, and General The is dead : shot in the back, so thfcy say. Even the historical events have been rearranged. For example, the big bomb near the Continental preceded and did not follow the bicycle bombs. I have no scruples about such small changes. This is a story and not a piece of history, and I hope that as a story about a few imaginary characters it will pass for both of you one hot Saigon evening.

Dear Thomas, I know you're angry. It's true, I was sent to expose your mentor as a fraud illusionist, and instead I have put your secret in jeopardy. I fear I have even put your life in jeopardy. For that I can only beg your forgiveness. I've fallen for you. You know I have. And I never wanted to create a rift between us, but if it means protecting you from those who wish you dead—I'll do it. I'll do anything to keep you safe, whatever the sacrifice. Please forgive me for all I've done and what I'm about to do next. I promise, it's one magic trick no one will ever see coming. Love, Saverio

A luminous story of a young artist grappling with first love, family boundaries and the complications of a cross-cultural relationship. Perfect for fans of Sandhya Menon, Erika Sanchez and Jandy Nelson. Rani Kelkar has never lied to her parents, until she meets Oliver. The same qualities that draw her in--his tattoos, his charisma, his passion for art--make him her mother's worst nightmare. They begin dating in secret, but when Oliver's troubled home life

unravels, he starts to ask more of Rani than she knows how to give, desperately trying to fit into her world, no matter how high the cost. When a twist of fate leads Rani from Evanston, Illinois to Pune, India for a summer, she has a reckoning with herself--and what's really brewing beneath the surface of her first love. Winner of SCBWI's Emerging Voices award, Anuradha D. Rajurkar takes an honest look at the ways cultures can clash in an interracial relationship. Braiding together themes of sexuality, artistic expression, and appropriation, she gives voice to a girl claiming ownership of her identity, one shattered stereotype at a time. "A brave, beautiful exploration of identity--those thrust upon us, and those we forge for ourselves." --Elana K. Arnold, award-winning author of *What Girls Are Made Of*

THE MILLION COPY INTERNATIONAL BESTSELLER Drawn from 3,000 years of the history of power, this is the definitive guide to help readers achieve for themselves what Queen Elizabeth I, Henry Kissinger, Louis XIV and Machiavelli learnt the hard way. Law 1: Never outshine the master Law 2: Never put too much trust in friends; learn how to use enemies Law 3: Conceal your intentions Law 4: Always say less than necessary. The text is bold and elegant, laid out in black and red throughout and replete with fables and unique word sculptures. The 48 laws are illustrated through the tactics, triumphs and failures of great figures from the past who have wielded - or been victimised by - power.

(From the Playboy interview with Jay-Z, April 2003) PLAYBOY: Rap careers are usually over fast: one or two hits, then styles change and a new guy comes along. Why have you endured while other rappers haven't? JAY-Z: I would say that it's from still being able to relate to people. It's natural to lose yourself when you have success, to start surrounding yourself with fake people. In *The 48 Laws of Power*, it says the worst thing you can do is build a fortress around yourself. I still got the people who grew up with me, my cousin and my childhood friends. This guy right here (gestures to the studio manager), he's my friend, and he told me that one of my records, Volume Three, was wack. People set higher standards for me, and I love it.

A physician-anthropologist explores how public health practices--from epidemiological modeling to outbreak containment--help perpetuate global inequities. In *Epidemic Illusions*, Eugene Richardson, a physician and an anthropologist, contends that

public health practices--from epidemiological modeling and outbreak containment to Big Data and causal inference--play an essential role in perpetuating a range of global inequities. Drawing on postcolonial theory, medical anthropology, and critical science studies, Richardson demonstrates the ways in which the flagship discipline of epidemiology has been shaped by the colonial, racist, and patriarchal system that had its inception in 1492.

Fool your brain with mind-boggling illusions, then get hands-on and make your own to wow your friends! Learn all about the science behind these wacky phenomena, from moving liquid on a page, to shapes that disappear in front of your eyes with this clever guide. The brain is an amazing thing, but it doesn't always get things right when it comes to sight. This book is here to explain why, with astounding images, baffling puzzles, and simple reveals which show the reader how each trick works. Covering a range of optical topics, from shapes and movement, to light and reflection, this cool manual contains templates at the back which reveal answers and help you to create your own astounding illusions.

****National Bestseller**** Drawing on cutting-edge neuroscience, behavioral economic, and social psychology research, acclaimed author, former Harvard professor, and think tank founder Todd Rose reveals how so much of our thinking about each other is informed by false assumptions that drive bad decisions that make us dangerously mistrustful as a society and hopelessly unhappy as individuals. The desire to fit in is one of the most powerful, least understood forces in a society. Todd Rose believes that as human beings we continually act against our own best interests out of our brains' misunderstanding of what we think others believe. A complicated set of illusions driven by conformity bias distorts how we see the world around us. From toilet paper shortages to kidneys that get thrown away rather than used for desperately needed organ transplants, from racial segregation to the perceived "electability" of women for political office, from bottled water to "cancel culture," we routinely copy others, lie about what we believe, cling to tribes, and silence others. We are so profoundly social that when we are incongruent with the group that we do lasting damage to our self-worth, diminish our well-being and never realize our full potential. It's why we all too often chase the familiar trappings of money, fame, and success that leave us feeling empty even when we do achieve them. It's why we'll blindly espouse a viewpoint we don't necessarily believe in so that we blend in

with the group. We trap ourselves in prisons of our own making that prevent us from living the happy, fulfilled lives we envision. The question is, Why do we keep believing the lies and hurting ourselves? Todd Rose reveals the answer is deeply hard-wired in our DNA, with brains that are more socially dependent than we realize or dare to accept. Most of us would rather be fully in sync with the social norms of our respective groups than true to who we are. Using originally researched data, *Collective Illusions* shows us where we get things wrong and just as important, how we can be authentic in forming our opinions while valuing truth. Rose offers a counterintuitive, empowering, and hopeful explanation for how we can bridge the inference gap, make decisions with a newfound clarity, and achieve fulfillment. Only then can we transform ourselves, and ultimately, society.

With a new epilogue about Bill Gates's global agenda and how we can resist the billionaires' war on life Widespread poverty and malnutrition, an alarming refugee crisis, social unrest, and economic polarization have become our lived reality as the top 1% of the world's seven-billion-plus population pushes the planet—and all its people—to the social and ecological brink. In *Oneness vs. the 1%*, Vandana Shiva takes on the Billionaires Club of Gates, Buffet, and Zuckerberg, as well as other modern empires whose blindness to the rights of people, and to the destructive impact of their construct of linear progress, have wrought havoc across the world. Their single-minded pursuit of profit has undemocratically enforced uniformity and monocultures, division and separation, monopolies and external control—over finance, food, energy, information, healthcare, and even relationships. Basing her analysis on explosive, little-known facts, Shiva exposes the 1%'s model of philanthrocapitalism, which is about deploying unaccountable money to bypass democratic structures, derail diversity, and impose totalitarian ideas based on One Science, One Agriculture, and One History. She calls for the "resurgence of real knowledge, real intelligence, real wealth, real work, real well-being," so that people can reclaim their right to: Live Free. Think Free. Breathe Free. Eat Free.

In a future where most people have computer implants in their heads to control their environment, a boy meets an unusual girl who is in serious trouble.

A man and a woman who thrive on danger and deception find explosive passion in this compelling novel where nothing is as it

seems--from #1 New York Times bestselling author Nora Roberts. The daughter of a world-renowned magician, Roxy Nouvelle has inherited her father's talents--and his penchant for jewel thievery. Into this colorful world comes Luke Callahan, an escape artist who captures her heart--and keeps secrets that could shatter all her illusions...

"This disturbing but very important book makes clear we must dig deeper than the normal solutions we are offered."—Yvon Chouinard, founder of Patagonia Works "Bright Green Lies exposes the hypocrisy and bankruptcy of leading environmental groups and their most prominent cheerleaders. The best-known environmentalists are not in the business of speaking truth, or even holding up rational solutions to blunt the impending ecocide, but instead indulge in a mendacious and self-serving delusion that provides comfort at the expense of reality. They fail to state the obvious: We cannot continue to wallow in hedonistic consumption and industrial expansion and survive as a species. The environmental debate, Derrick Jensen and his coauthors argue, has been distorted by hubris and the childish desire by those in industrialized nations to sustain the unsustainable. All debates about environmental policy need to begin with honoring and protecting, not the desires of the human species, but with the sanctity of the Earth itself. We refuse to ask the right questions because these questions expose a stark truth—we cannot continue to live as we are living. To do so is suicidal folly. 'Tell me how you seek, and I will tell you what you are seeking,' the German philosopher Ludwig Wittgenstein said. This is the power of Bright Green Lies: It asks the questions most refuse to ask, and in that questioning, that seeking, uncovers profound truths we ignore at our peril."—Chris Hedges, Pulitzer Prize-winning journalist and author of *America: The Farewell Tour*

Takes us back to a time that is half-history, half-myth, and wholly magical. Narrated by Panchaali, the wife of the five Pandava brothers, this book gives a woman's take on the timeless tale that is the Mahabharata.

"I don't do patrols, I don't go hunting, I just stick close to you. You live your life. I'll keep you safe," Tamani said, sweeping a lock of hair from her face. "Or die trying." Laurel hasn't seen Tamani since she begged him to let her go last year. Though her heart still aches, Laurel is confident that David was the right choice. But just as life returns to normal, Laurel realizes that a hidden enemy

lies in wait. Once again, Laurel must turn to Tamani to protect and guide her, for the danger that now threatens Avalon is one that no faerie thought would ever be possible. And for the first time, Laurel cannot be sure that her side will prevail.

We live in a time of great uncertainty about the future. Those heady days of the late twentieth century, when the end of the Cold War seemed to be ushering in a new and more optimistic age, now seem like a distant memory. During the last couple of decades, we've been battered by one crisis after another and the idea that humanity is on a progressive path to a better future seems like an illusion. It is only now that we can see clearly the real scope and structure of the profound shifts that Western societies have undergone over the last 30 years. Classical industrial society has been transformed into a late-modern society that is molded by polarization and paradoxes. The pervasive singularization of the social, the orientation toward the unique and exceptional, generates systematic asymmetries and disparities, and hence progress and unease go hand in hand. Reckwitz examines this dual structure of singularization and polarization as it plays itself out in the different sectors of our societies and, in so doing, he outlines the central structural features of the present: the new class society, the characteristics of a postindustrial economy, the conflict about culture and identity, the exhaustion of the self resulting from the imperative to seek authentic fulfillment, and the political crisis of liberalism. Building on his path-breaking work *The Society of Singularities*, this new book will be of great interest to students and scholars in sociology, politics, and the social sciences generally, and to anyone concerned with the great social and political issues of our time.

Based on dozens of shocking interviews with some of the most influential names in sports, this is the urgent and revelatory examination of racial inequality in professional athletics America has been waiting for. Commentators, coaches, and fans alike have long touted the diverse rosters of leagues like the NFL and MLB as sterling examples of a post-racial America. Yet decades after Tommie Smith and John Carlos raised their fists in a display of Black power and pride, and years after Colin Kaepernick shocked the world by kneeling for the national anthem, the role Black athletes and coaches are expected to perform—both on and off the field—still can be determined as much by stereotype and old-fashioned ideology as ability and performance. Whether it's the pre-

game moments of resistance, the lack of diversity among coaching and managerial staff, or the consistent undervaluation of Black quarterbacks, racial politics impact every aspect of every sport being played—yet the gigantic salaries and glitzy lifestyles of pro athletes often disguise the ugly truths of how minority players are treated and discarded by their White bosses. John Feinstein crisscrossed the country to secure personal interviews with quarterbacks, coaches, and more, revealing the stories none of us have heard (but all of us should know). Seventy-five years after Jackie Robinson broke baseball's color line, race is still a central and defining factor of America's professional sports leagues. With an encyclopedic knowledge of professional sports, and shrewd cultural criticism, bestselling and award-winning author John Feinstein uncovers not just why, but how, pro sports continue to perpetuate racial inequality. "None of us are trying to make race an issue. Race IS an issue." (From the Foreword by Doug Williams)

A kaleidoscopic tale inspired by a legend from the medieval Persian epic "Book of Kings" follows the coming-of-age of a feral Middle Eastern youth in New York City on the eve of the September 11 attacks. By the award-winning author of *Sons and Other Flammable Objects*. 25,000 first printing.

"A book that examines the growing population of mixed minority-white backgrounds and society"--

The art of optical illusion has been an integral part of painting since antiquity when it was used as a yardstick by which to judge an artist's level of mastery. This book presents a fascinating overview of the different methods of illusion practiced by artists over hundreds of years. Organised into five chapters - Optical Illusions, Distortions and Hidden Images, De-Figurations, Questioning Perception, and Overstepping Reality - it brings together artists from various time periods and disciplines.--

From the #1 New York Times-bestselling author of *The 48 Laws of Power* comes the definitive new book on decoding the behavior of the people around you Robert Greene is a master guide for millions of readers, distilling ancient wisdom and philosophy into essential texts for seekers of power, understanding and mastery. Now he turns to the most important subject of all - understanding people's drives and motivations, even when they are unconscious of them themselves. We are social animals. Our very lives depend on our relationships with people. Knowing why people do what they do is the most important tool we can possess, without which

our other talents can only take us so far. Drawing from the ideas and examples of Pericles, Queen Elizabeth I, Martin Luther King Jr, and many others, Greene teaches us how to detach ourselves from our own emotions and master self-control, how to develop the empathy that leads to insight, how to look behind people's masks, and how to resist conformity to develop your singular sense of purpose. Whether at work, in relationships, or in shaping the world around you, *The Laws of Human Nature* offers brilliant tactics for success, self-improvement, and self-defense.

In the cloud-washed airspace between the cornfields of Illinois and blue infinity, a man puts his faith in the propeller of his bi-plane. For disillusioned writer and itinerant barnstormer Richard Bach, belief is as real as a full tank of gas and sparks firing in the cylinders...until he meets Donald Shimoda--former mechanic and self-described messiah who can make wrenches fly and Richard's imagination soar.... In *Illusions*, the unforgettable follow-up to his phenomenal bestseller *Jonathan Livingston Seagull*, Richard Bach takes to the air to discover the ageless truths that give our souls wings: that people don't need airplanes to soar...that even the darkest clouds have meaning once we lift ourselves above them... and that messiahs can be found in the unlikeliest places--like hay fields, one-traffic-light midwestern towns, and most of all, deep within ourselves.

Taking us back to a time that is half history, half myth and wholly magical, bestselling author Chitra Banerjee Divakaruni gives voice to Panchaali, the fire-born heroine of the Mahabharata, as she weaves a vibrant retelling of an ancient epic saga. Married to five royal husbands who have been cheated out of their father's kingdom, Panchaali aids their quest to reclaim their birthright, remaining at their side through years of exile and a terrible civil war. But she cannot deny her complicated friendship with the enigmatic Krishna—or her secret attraction to the mysterious man who is her husbands' most dangerous enemy—as she is caught up in the ever-manipulating hands of fate.

A young woman wakes up in the middle of nowhere. Her mind, a blank slate. Her ailment, retrograde amnesia. Armed with her innocence and her kindness, she embarks on a quest for purpose and identity. Will she find herself? Or will she crumble under the pressure of societal expectations and social norms?

Presents over 270 examples and works of art designed to trick the eye, including explanations for each illusion, information on the

artists, and discussions about the science of illusion.

“One of the few world intellectuals on whom we may rely to make sense out of our existential confusion.”—Nadine Gordimer In this sweeping philosophical work, Amartya Sen proposes that the murderous violence that has riven our society is driven as much by confusion as by inescapable hatred. Challenging the reductionist division of people by race, religion, and class, Sen presents an inspiring vision of a world that can be made to move toward peace as firmly as it has spiraled in recent years toward brutality and war.

From Brian Greene, one of the world's leading physicists and author of the Pulitzer Prize finalist *The Elegant Universe*, comes a grand tour of the universe that makes us look at reality in a completely different way. Space and time form the very fabric of the cosmos. Yet they remain among the most mysterious of concepts. Is space an entity? Why does time have a direction? Could the universe exist without space and time? Can we travel to the past? Greene has set himself a daunting task: to explain non-intuitive, mathematical concepts like String Theory, the Heisenberg Uncertainty Principle, and Inflationary Cosmology with analogies drawn from common experience. From Newton's unchanging realm in which space and time are absolute, to Einstein's fluid conception of spacetime, to quantum mechanics' entangled arena where vastly distant objects can instantaneously coordinate their behavior, Greene takes us all, regardless of our scientific backgrounds, on an irresistible and revelatory journey to the new layers of reality that modern physics has discovered lying just beneath the surface of our everyday world.

'My favourite book' Tinchy Stryder BA Business Life Book of the Month The ultimate hustle is to move freely between the street and corporate worlds, to find your flow and never stay locked in the same position. This is a manifesto for how to operate in the twenty-first century, where everything has been turned on its head. Building on the runaway success of Robert Greene's *The 48 Laws of Power* (almost five million copies sold), the 'modern Machiavelli' teams up with rapper 50 Cent to show how the power game of success can be played to your advantage. Drawing on the lore of gangsters, hustlers, and hip-hop artists, as well as 50 Cent's business and artistic dealings, the authors present the 'Laws of 50', revealing how to become a master strategist and supreme realist. Success comes from seeking an advantage in each and ev-

ery encounter, and *The 50th Law* offers indispensable advice on how to win in business - and in life.

In *The Illusion of Separateness*, award-winning author Simon Van Booy tells a harrowing and enchanting story of how one man's act of mercy during World War II changed the lives of strangers, and how they each discover the astonishing truth of their connection. Whether they are pursued by Nazi soldiers, old age, shame, deformity, disease, or regret, the characters in this utterly compelling novel discover in their, darkest moments of fear and isolation that they are not alone, that they were never alone, that every human being is a link in an unseen chain. *The Illusion of Separateness* intertwines the stories of unique and compelling characters who—through seemingly random acts of selflessness—discover the vital parts they have played in each other's lives.

A popular magic act for 40 years, Dane and Mandy are separated when a car wreck supposedly takes Mandy's life, but instead she is transformed into her 19-year-old self in the present, and when the pair reunite, she still mesmerizes Dane--now 40 years her elder. Reprint. 550,000 first printing.

An award-winning professor of economics at MIT and a Harvard University political scientist and economist evaluate the reasons that some nations are poor while others succeed, outlining provocative perspectives that support theories about the importance of institutions.

“An interactive and empowering book” to help African American men and women create a new vision of better health and navigate the health care system (BET.com). According to the federal Office of Minority Health, African Americans “are affected by serious diseases and health conditions at far greater rates than other Americans.” In fact, African Americans suffer an estimated 85,000 excess deaths every year from diseases we know how to prevent: heart disease, stroke, cancer, high blood pressure, and diabetes. In this important and accessible book, Dr. Michelle Gourdine provides African Americans with the knowledge and guidance they need to take charge of their wellbeing. *Reclaiming Our Health* begins with an overview of the primary health concerns facing African Americans and explains who is at greatest risk of illness. Expanding on her career and life experiences as an African American physician, Dr. Gourdine presents key insights into the ways African American culture shapes health choices—how beliefs, traditions, and values can influence eating choices, exercise habits,

and even the decision to seek medical attention. She translates extensive research into practical information and presents readers with concrete steps for achieving a healthier lifestyle, as well as strategies for navigating the health-care system. This interactive guide with illustrations is a vital resource for every African American on how to live a healthier and more empowered life, and an indispensable handbook for health-care providers, policy makers, and others working to close the health gap among people of color. Says Gourdine, "I wrote this book to empower our community to solve our own health problems and save our own lives." Which sort of seducer could you be? Siren? Rake? Cold Coquette? Star? Comedian? Charismatic? Or Saint? This book will show you which. Charm, persuasion, the ability to create illusions: these are some of the many dazzling gifts of the Seducer, the compelling figure who is able to manipulate, mislead and give pleasure all at once. When raised to the level of art, seduction, an indirect and subtle form of power, has toppled empires, won elections and enslaved great minds. In this beautiful, sensually designed book, Greene unearths the two sides of seduction: the characters and the process. Discover who you, or your pursuer, most resembles. Learn, too, the pitfalls of the anti-Seducer. Immerse yourself in the twenty-four manoeuvres and strategies of the seductive process, the ritual by which a seducer gains mastery over their target. Understand how to 'Choose the Right Victim', 'Appear to Be an Object of Desire' and 'Confuse Desire and Reality'. In addition, Greene provides instruction on how to identify victims by type. Each fascinating character and each cunning tactic demonstrates a fundamental truth about who we are, and the targets we've become - or hope to win over. *The Art of Seduction* is an indispensable primer on the essence of one of history's greatest weapons and the ultimate power trip. From the internationally bestselling author of *The 48 Laws of Power*, *Mastery*, and *The 33 Strategies Of War*.

We don't have an energy crisis. We have a consumption crisis. And this book, which takes aim at cherished assumptions regarding energy, offers refreshingly straight talk about what's wrong with the way we think and talk about the problem. Though we generally believe we can solve environmental problems with more energy—more solar cells, wind turbines, and biofuels—alternative technologies come with their own side effects and limitations. How, for instance, do solar cells cause harm? Why can't engineers

solve wind power's biggest obstacle? Why won't contraception solve the problem of overpopulation lying at the heart of our concerns about energy, and what will? This practical, environmentally informed, and lucid book persuasively argues for a change of perspective. If consumption is the problem, as Ozzie Zehner suggests, then we need to shift our focus from suspect alternative energies to improving social and political fundamentals: walkable communities, improved consumption, enlightened governance, and, most notably, women's rights. The dozens of first steps he offers are surprisingly straightforward. For instance, he introduces a simple sticker that promises a greater impact than all of the nation's solar cells. He uncovers why carbon taxes won't solve our energy challenges (and presents two taxes that could). Finally, he explores how future environmentalists will focus on similarly fresh alternatives that are affordable, clean, and can actually improve our well-being. Watch a book trailer.

What is reading? In this groundbreaking book, esteemed researchers Ken Goodman, Peter Fries, and Steven Strauss, explain not only what reading really is but also why common sense makes it seem to be something quite different from that reality. How can this grand illusion be explained? That is the purpose of this book. As the authors show, unraveling the secrets of the grand illusion of reading teaches about far more than reading itself, but also about how remarkable human language is, how the brain uses language to navigate the world, what it means to be human. Each author brings a different perspective, but all share a common view of the reading process. Together they provide a clear and surprising exposition of the reading process, in which they involve readers of this book in exploring the ways they themselves read and make sense of written language while their eyes fixate on fewer than 70 percent of the words in the text. In addition, the authors engage in a cross-disciplinary discussion about how readers use the brain, eyes, and language in reading. The different perspectives provide depth to the authors' description of reading. The information presented in this book will be new to many teachers, researchers, teacher educators, and the public alike. The final chapter draws on the understandings from the book to challenge the treatment of reading and writing as school subjects and offers the basis for supporting literacy development as a natural extension of oral language development.

Pulitzer prize-winner Chris Hedges charts the dramatic and dis-

turbing rise of a post-literate society that craves fantasy, ecstasy and illusion. Chris Hedges argues that we now live in two societies: One, the minority, functions in a print-based, literate world, that can cope with complexity and can separate illusion from truth. The other, a growing majority, is retreating from a reality-based world into one of false certainty and magic. In this "other society," serious film and theatre, as well as newspapers and books, are being pushed to the margins. In the tradition of Christopher Lasch's *The Culture of Narcissism* and Neil Postman's *Amusing Ourselves to Death*, Hedges navigates this culture — attending WWF contests as well as Ivy League graduation ceremonies — exposing an age of terrifying decline and heightened self-delusion.

NEW YORK TIMES BESTSELLER • A captivating exploration of deep time and humanity's search for purpose, from the world-renowned physicist and best-selling author of *The Elegant Universe*. Instant National Bestseller! Wall Street Journal bestseller; USA Today bestseller; Publishers Weekly bestseller; international bestseller. An inspirational book by self-made musical superstar, Russ, reminding you that it starts with YOU, to believe in yourself, and to get out of your own way. Twenty-seven-year-old rapper, songwriter, and producer Russ walks his own path, at his own pace. By doing so, he proved that he didn't need a major label to surpass over a billion streams on Spotify/Apple Music, get on *Forbes'* 2019 "30 Under 30," make the *Forbes'* "30 Under 30 Cash Kings" at number 20 for most earned, sell out arenas across the U.S. and around the globe, and become one of the most popular and engaged rappers right now. His method was simple: love and believe in yourself absolutely and work hard no matter what. In this

memoir, Russ inspires readers to walk to their individual rhythms and beat their biggest obstacles: themselves. With chapters named after his most powerful and popular songs, *IT'S ALL IN YOUR HEAD* will reflect on the lessons he's learned from his career, family, and relationships. He'll push readers to bet on themselves, take those leaps of faith, and recognize struggles as opportunities. With illustrations throughout consistent with the brand Russ has built and his fan base loves, *IT'S ALL IN YOUR HEAD* will give readers an inside-look at the man and the motivation behind the music. A lover of books like *The Alchemist* and *The Seven Spiritual Laws of Success*, Russ delivers a short, potent, inspirational, raw, and honest book that gives readers a way to find self-belief and unlock their potential. Fans already rely on Russ as an inspiration of confidence; now, he is taking it to the next level with this book, which will contain lyrics from his music and visuals that reflect his inimitable style.

"The Knowledge Illusion is filled with insights on how we should

deal with our individual ignorance and collective wisdom." —Steven Pinker We all think we know more than we actually do. Humans have built hugely complex societies and technologies, but most of us don't even know how a pen or a toilet works. How have we achieved so much despite understanding so little? Cognitive scientists Steven Sloman and Philip Fernbach argue that we survive and thrive despite our mental shortcomings because we live in a rich community of knowledge. The key to our intelligence lies in the people and things around us. We're constantly drawing on information and expertise stored outside our heads: in our bodies, our environment, our possessions, and the community with which we interact—and usually we don't even realize we're doing it. The human mind is both brilliant and pathetic. We have mastered fire, created democratic institutions, stood on the moon, and sequenced our genome. And yet each of us is error prone, sometimes irrational, and often ignorant. The fundamentally communal nature of intelligence and knowledge explains why

we often assume we know more than we really do, why political opinions and false beliefs are so hard to change, and why individual-oriented approaches to education and management frequently fail. But our collaborative minds also enable us to do amazing things. The Knowledge Illusion contends that true genius can be found in the ways we create intelligence using the community around us.

Winner of the Pulitzer Prize "A masterwork . . . the novel astonishes with its inventiveness . . . it is nothing less than a grand comic fugue."—The New York Times Book Review *A Confederacy of Dunces* is an American comic masterpiece. John Kennedy Toole's hero, one Ignatius J. Reilly, is "huge, obese, fractious, fastidious, a latter-day Gargantua, a Don Quixote of the French Quarter. His story bursts with wholly original characters, denizens of New Orleans' lower depths, incredibly true-to-life dialogue, and the zaniest series of high and low comic adventures" (Henry Kisor, Chicago Sun-Times).
