Hesston has been known as the hay and forage innovator since 1955, when the company developed the first commercially available self-propelled windrower. Other industry firsts have included the first hydrostatic windrower, the first center-pivot mower-conditioner and the first big square baler—which had nearly 50 individual patents of its own.

The Hesston 560 is a pull-type, PTO driven baler with a variable cylindrical chamber and a drum pickup. The Hesston produces bales measuring 5.1 ft (1.6 m) wide and up to 6.2 ft (1.9 m) in diameter. Bale diameter is adjustable and the desired size is manually set on the baler.
