Cognitive Linguistic Approaches to Teaching Vocabulary and Phraseology Frank Boers 2008 Mastering the vocabulary of a foreign language is one of the most daunting tasks that language learners face. The immensity of the task is underscored by the realisation that it is not only single words but also numerous standardised phrases (idioms, collocations, etc.) that need to be acquired. There is thus a clear need for instructional methods that help learners tackle this task, and yet few proposals for vocabulary instruction have so far gone beyond techniques for rote-learning and familiar means of promoting of noticing. The reason for this is that vocabulary and phraseology have long been assumed arbitrary. The volume offers a long-overdue alternative by exploring and exploiting the presence of linguistic 'motivation' - or, systematic non-arbitrariness - in the lexicon. The first half of the volume reports ample empirical evidence of the pedagogical effectiveness of presenting vocabulary to learners as non-arbitrary. The data reported indicate that the proposed instructional methods can benefit when both the nature of the target lexis and the basic cognitive orientations of particular learners are taken into account. The first half of the book mostly targets lexis that has already attracted a fair amount of attention from Cognitive Linguists in the past (e.g. phrasal verbs and figurative idioms). The second half broadens the scope considerably by revealing the non-arbitrariness of diverse other lexical patterns, including collocations and word partnerships generally. This is achieved by recognising some long-neglected dimensions of linguistic motivation - etymological and phonological motivation, in particular. Concrete suggestions are made for putting the non-arbitrary nature of words and phrases to good use in instructed language learning. The volume is therefore of interest not only to applied linguists and researchers in Second Language Acquisition/Foreign Language Teaching, but also to second and foreign language teaching professionals.

Handbook of Arabic Literacy Elinor Saiegh-Haddad 2014-04-03 This book provides a synopsis of recently published empirical research

into the acquisition of reading and writing in Arabic. Its particular focus is on the interplay between the linguistic and orthographic structure of Arabic and the development of reading and writing/spelling. In addition, the book addresses the socio-cultural, political and educational milieu in which Arabic literacy is embedded. It enables readers to appreciate both the implications of empirical research to literacy enhancement and the challenges and limitations to the applicability of such insights in the Arabic language and literacy context. The book will advance the understanding of the full context of literacy acquisition in Arabic with the very many factors (religious, historical, linguistic etc.) that interact and will hence contribute to weakening the anglocentricity that dominates discussions of this topic.

The Gloves Robert Anasi 2003-02-05 A gritty, spirited inside look at the world of amateur boxing today The Golden Gloves tournament is center stage in amateur boxing—a single-elimination contest in which young hopefuls square off in steamy gyms with the boxing elite looking on. Robert Anasi took up boxing in his twenties to keep in shape, attract women, and sharpen his knuckles for the odd bar fight. He thought of entering "the Gloves," but put it off. Finally, at age thirty-two—his last year of eligibility—he vowed to fight, although he was an old man in a sport of teenagers and a light man who had to be even lighter (125 pounds) to fight others his size. So begins Anasi's obsessive preparation for the Golden Gloves. He finds Milton, a wily and abusive trainer, and joins Milton's "Supreme Team": a black teenager who used to deal guns in Harlem, a bus driver with five kids, a hard-hitting woman champion who becomes his sparring partner. Meanwhile, he observes the changing world of amateur boxing, in which investment bankers spar with ex-convicts and everyone dreads a fatal blow to the head. With the Supreme Team, he goes to the tournament, whose outcome, it seems, is rigged, like so much in boxing life today. Robert Anasi tells his story not as a journalist on assignment but as a man in the midst of one of the great adventures of his life. The Gloves, his first book, has the feel of a contemporary classic.

Synthesis of Heterocyclic Compounds A. L. Mndzhoian 2013-11-09 The chemistry of heterocyclic compounds now forms one of the most extensive and important branches of organic chemistry. The rapid expansion of investigation in this field is due largely to the ever increasing practical importance of heterocyclic compounds. The present stage in the development of organic chemistry and closely allied branches of biology is characterized by extensive investigation of physiologically active substances encountered in the plant and animal world and playing important parts in the life processes of micro- and macro-organisms. This extensive investigation of alkaloids, vitamins, hormones, antibiotics and their synthetic substitutes, and also of substances that control the biochemical processes of the nervous system, has acted as a powerful stimulus to the further development of the chemistry of heterocyclic compounds. Moreover, there are many well known applications of heterocyclic compounds in the manufacture of dyes, synthetic resins, synthetic rubbers, and other important materials. In response to growing demands, several monographs and treatises on the chemistry of heterocyclic compounds have appeared in recent years, the most comprehensive of these being the series "Heterocyclic Compounds," edited by R. C. Elderfield, which is already appearing in Russian translation. On the other hand, the lack of a practical guide to the laboratory preparation of heterocyclic compounds is being felt more and more.

Studio Studies Ignacio Farías 2015-10-14 Consider the vast array of things around you, from the building you are in, the lights illuminating the interior, the computational devices mediating your life, the music in the background, even the crockery, furniture and glassware you are in the presence of. Common to all these objects is that their concrete, visual and technological forms were invariably conceived, modelled, finished and tested in sites characterised as studios. Remarkably, the studio remains a peculiar lacuna in our understanding of how cultural artefacts are brought into being and how 'creativity' operates as a located practice. Studio Studies is an agenda setting volume that presents a set of empirical case studies that explore and examine the studio as a key setting for aesthetic and material production. As such, Studio Studies responds to three contemporary concerns in social and cultural thought: first, how to account for the situated nature of creative and cultural production; second, the challenge of reimagining creativity as a socio-materially distributed practice rather than the cognitive privilege of the individual; and finally, to unravel the parallels, contrasts and interconnections between studios and other sites of cultural-aesthetic and technoscientific production, notably laboratories. By enquiring into the operations, topologies and displacements that shape and format studios, this volume aims to demarcate a novel and important object of analysis for empirical social and cultural research as well to develop new conceptual repertoires to unpack the multiple ways studio processes shape our everyday lives.
