The Tobacco Epidemic R. Loddenkemper 2015-03-13 This completely revised and enlarged 2nd edition of The Tobacco Epidemic provides a comprehensive update of the clinical, public health and political aspects of tobacco smoking. Since its 1st edition in 1997, knowledge on the health hazards of tobacco and nicotine addiction has increased considerably, but recent data has shown that the global problem has become more aggravated in low- and middle-income countries: if current trends continue, tobacco smoking will be responsible for the deaths of 1 billion people in the 21st century. Written by outstanding international experts, the book covers the history of tobacco production and use, the economics of tobacco use and control, as well as the health consequences of active and passive smoking in both adults and children. Special chapters discuss the impact of media, movies and TV on tobacco consumption in young people, the patterns and predictors of smoking cessation in the general population and in different social subgroups, and initiatives supported by the WHO Framework Convention on Tobacco Control. Readers will find the latest information on how nicotine dependence is treated with nicotine replacement products, what role health care professionals play in helping smokers to quit and what effects smoke-free environments, advertising bans and price increases have on smoking prevalence. The potential harms and benefits of smokeless tobacco, waterpipe tobacco smoking and electronic cigarettes are also evaluated. This book is a must-read for anyone in the medical profession who treats patients with smoking-related diseases and for those engaged in tobacco control. It will also be appreciated by interested nonmedical readers like journalists and legislators.

Diet, Nutrition, and the Prevention of Chronic Diseases World Health Organization 2003-04-22 Trends such as shifting dietary patterns and an increasingly sedentary lifestyle combined with smoking and alcohol consumption are major risk factors for noncommunicable chronic diseases such as obesity, diabetes, cardiovascular diseases such as hypertension and stroke, cancer

dental diseases and osteoporosis. This report reviews the scientific evidence on the effects of diet, nutrition and physical activity on chronic diseases and makes recommendations for public health policies and programmes. Issues considered include the macro-economic implications of public health on agriculture and the global supply and demand for fresh and processed foods.

How Tobacco Smoke Causes Disease 2010 This report considers the biological and behavioral mechanisms that may underlie the pathogenicity of tobacco smoke. Many Surgeon General's reports have considered research findings on mechanisms in assessing the biological plausibility of associations observed in epidemiologic studies. Mechanisms of disease are important because they may provide plausibility, which is one of the guideline criteria for assessing evidence on causation. This report specifically reviews the evidence on the potential mechanisms by which smoking causes diseases and considers whether a mechanism is likely to be operative in the production of human disease by tobacco smoke. This evidence is relevant to understanding how smoking causes disease, to identifying those who may be particularly susceptible, and to assessing the potential risks of tobacco products.

The State of World Fisheries and Aquaculture 2020 FAO 2020-06-01 The 2020 edition of The State of World Fisheries and Aquaculture has a particular focus on sustainability. This reflects a number of specific considerations. First, 2020 marks the twenty-fifth anniversary of the Code of Conduct for Responsible Fisheries (the Code). Second, several Sustainable Development Goal indicators mature in 2020. Third, FAO hosted the International Symposium on Fisheries

Sustainability in late 2019, and fourth, 2020 sees the finalization of specific FAO guidelines on sustainable aquaculture growth, and on social sustainability along value chains. While Part 1 retains the format of previous editions, the structure of the rest of the publication has been revised. Part 2 opens with a special section marking the twenty fifth anniversary of the Code. It also focuses on issues coming to the fore, in particular, those related to Sustainable Development Goal 14 and its indicators for which FAO is the “custodian” agency. In addition, Part 2 covers various aspects of fisheries and aquaculture sustainability. The topics discussed range widely, from data and information systems to ocean pollution, product legality, user rights and climate change adaptation. Part 3 now forms the final part of the publication, covering projections and emerging issues such as new technologies and aquaculture biosecurity. It concludes by outlining steps towards a new vision for capture fisheries. The State of World Fisheries and Aquaculture aims to provide objective, reliable and up-to-date information to a wide audience – policymakers, managers, scientists, stakeholders and indeed everyone interested in the fisheries and aquaculture sector.

In the Time of the Butterflies Julia Alvarez 2010-01-12 It is November 25, 1960, and three beautiful sisters have been found near their wrecked Jeep at the bottom of a 150-foot cliff on the north coast of the Dominican Republic. The official state newspaper reports their deaths as accidental. It does not mention that a fourth sister lives. Nor does it explain that the sisters were among the leading opponents of Gen. Rafael Leonidas Trujillo’s dictatorship. It doesn’t have to. Everybody knows of Las Mariposas—“The Butterflies.” In this extraordinary novel, the voices of all four sisters—Minerva, Patria, María Teresa, and the survivor, Dedé—speak across the decades to tell their own stories, from hair ribbons and secret crushes to gunrunning and prison torture, and to describe the everyday horrors of life under Trujillo’s rule. Through the art and magic of Julia

Alvarez's imagination, the martyred Butterflies live again in this novel of courage and love, and the human cost of political oppression.

Writing in a Bilingual Program Carole Edelsky 1986 A year-long study of the writing development of 27 first through third graders in an English/Spanish bilingual program was conducted during the 1980-81 school year. Samples of the children's writing were collected at four intervals, coded for computer tallying, and analyzed in terms of code-switching, spelling, punctuation and segmentation, structural features, stylistic devices, and content. Additionally, the context in which the writing developed was evaluated by classroom observations, teacher interviews, review of familial backgrounds, and a survey of the community language situation. Myths about bilingual language proficiency, biliteracy, bilingual education, teaching writing, and learning to write are all countered by evidence presented in this study. In a discussion of implications, the concept of a whole language approach to writing instruction is supported, in which authentic and functional texts are offered to and produced by children. Examples of the children's writing with appropriate translations are given along with various tables. Informal follow-up information is presented in three epilogues dealing with changes in the researcher's commitment to the study's original writing theories, the writing of some students a year after the study; and a chronological outline of the demise of the bilingual program used in the study. Appendices list interview questions used for teachers and aides and categories for coding the writing data. This book contains 134 references. (ALL)

Chilling Effect Valerie Valdes 2019-09-17 "Jam-packed with weird aliens, mysterious artifacts, and lovable characters... a tremendous good time and an impressive debut." -- Kirkus Reviews (starred) A hilarious, offbeat debut space opera that skewers everything from pop culture to video games and features an irresistible foul-mouthed captain and her motley crew, strange life forms,

exciting twists, and a galaxy full of fun and adventure. Captain Eva Innocente and the crew of La Sirena Negra cruise the galaxy delivering small cargo for even smaller profits. When her sister Mari is kidnapped by The Fridge, a shadowy syndicate that holds people hostage in cryostasis, Eva must undergo a series of unpleasant, dangerous missions to pay the ransom. But Eva may lose her mind before she can raise the money. The ship's hold is full of psychic cats, an amorous fish-faced emperor wants her dead after she rejects his advances, and her sweet engineer is giving her a pesky case of feelings. The worse things get, the more she lies, raising suspicions and testing her loyalty to her found family. To free her sister, Eva will risk everything: her crew, her ship, and the life she's built on the ashes of her past misdeeds. But when the dominoes start to fall and she finds the real threat is greater than she imagined, she must decide whether to play it cool or burn it all down.

Engaged Fatherhood for Men, Families and Gender Equality Marc Grau (Policy scientist) 2022
This aim of this open access book is to launch an international, cross-disciplinary conversation on fatherhood engagement. By integrating perspective from three sectors -- Health, Social Policy, and Work in Organizations -- the book offers a novel perspective on the benefits of engaged fatherhood for men, for families, and for gender equality. The chapters are crafted to engaged broad audiences, including policy makers and organizational leaders, healthcare practitioners and fellow scholars, as well as families and their loved ones.

The Only Road Alexandra Diaz 2016-10-04 PURA BELPRÉ HONOR BOOK ALA NOTABLE BOOK "An important, must-have addition to the growing body of literature with immigrant themes." —School Library Journal (starred review) Twelve-year-old Jaime makes the treacherous and life-changing journey from his home in Guatemala to live with his older brother in the United States in this "powerful and timely" (Booklist, starred review) middle grade novel. Jaime is sitting on his bed

drawing when he hears a scream. Instantly, he knows: Miguel, his cousin and best friend, is dead. Everyone in Jaime's small town in Guatemala knows someone who has been killed by the Alphas, a powerful gang that's known for violence and drug trafficking. Anyone who refuses to work for them is hurt or killed—like Miguel. With Miguel gone, Jaime fears that he is next. There's only one choice: accompanied by his cousin Ángela, Jaime must flee his home to live with his older brother in New Mexico. Inspired by true events, *The Only Road* is an individual story of a boy who feels that leaving his home and risking everything is his only chance for a better life. The story is “told with heartbreaking honesty,” Booklist raved, and “will bring readers face to face with the harsh realities immigrants go through in the hope of finding a better, safer life, and it will likely cause them to reflect on what it means to be human.”

Assassin's Heart Sarah Ahiers 2016-02-02 With shades of *Game of Thrones* and *Romeo and Juliet*, this richly imagined fantasy from debut author Sarah Ahiers is a tale of love, lies, and vengeance. Fans of Kristin Cashore and Rae Carson will devour the flawlessly crafted action and inventive world building. Seventeen-year-old Lea Saldana is a trained assassin. She was born into one of the nine clipper Families in the kingdom of Lovero who lawfully take lives for a price. As a member of the highest-ranking clan, loyalty to Family is valued above all, but that doesn't stop Lea from getting into a secret relationship with Val Da Via, a boy from a rival clan. Despite her better judgment, Lea has fallen in love with him; but she's confident she can anticipate any threat a mile away. Then she awakens one night to a house full of smoke. Although she narrowly escapes, she isn't able to save her Family as their home is consumed by flames. With horror, she realizes that Val and his Family are the only ones who could be responsible. Devastated over his betrayal and the loss of her clan, there's just one thing on her mind: making the Da Vias pay. The heart of this

assassin craves revenge.

All the Ugly and Wonderful Things Bryn Greenwood 2019-11-17 As the daughter of a drug dealer, Wavy knows not to trust people, not even her own parents. It's safer to keep her mouth shut and stay out of sight. Struggling to raise her little brother, Donal, eight-year-old Wavy is the only responsible adult around. Obsessed with the constellations, she finds peace in the starry night sky above the fields behind her house, until one night her star gazing causes an accident. After witnessing his motorcycle wreck, she forms an unusual friendship with one of her father's thugs, Kellen, a tattooed ex-con with a heart of gold. By the time Wavy is a teenager, her relationship with Kellen is the only tender thing in a brutal world of addicts and debauchery. When tragedy rips Wavy's family apart, a well-meaning aunt steps in, and what is beautiful to Wavy looks ugly under the scrutiny of the outside world. Kellen may not be innocent, but he is the fixed point in Wavy and Donal's chaotic universe. Instead of playing it safe, Wavy has to learn to fight for Kellen, for her

brother, and for herself. About the Author Bryn Greenwood is a fourth-generation Kansan, one of seven sisters, and the daughter of a mostly reformed drug dealer. She earned a MA in Creative Writing from Kansas State University. She is the New York Times bestselling author of the novels *The Reckless Oath We Made*, *All the Ugly and Wonderful Things*, *Last Will*, and *Lie Lay Lain*. She lives in Lawrence, Kansas. Industry Reviews New York Times bestseller USA Today bestseller *Disease Control Priorities in Developing Countries* Dean T. Jamison 2006-04-02 Based on careful analysis of burden of disease and the costs of interventions, this second edition of 'Disease Control Priorities in Developing Countries, 2nd edition' highlights achievable priorities; measures progress toward providing efficient, equitable care; promotes cost-effective interventions to targeted populations; and encourages integrated efforts to optimize health. Nearly 500 experts - scientists, epidemiologists, health economists, academicians, and public health practitioners - from around the world contributed to the data sources and methodologies, and identified challenges and priorities, resulting in this integrated, comprehensive reference volume on the state of health in developing countries.

Outliers Malcolm Gladwell 2008-11-18 From the bestselling author of *Blink* and *The Tipping Point*, Malcolm Gladwell's *Outliers: The Story of Success* overturns conventional wisdom about genius to show us what makes an ordinary person an extreme overachiever. Why do some people achieve so much more than others? Can they lie so far out of the ordinary? In this provocative and inspiring book, Malcolm Gladwell looks at everyone from rock stars to professional athletes, software billionaires to scientific geniuses, to show that the story of success is far more surprising, and far more fascinating, than we could ever have imagined. He reveals that it's as much about where we're from and what we do, as who we are - and that no one, not even a genius, ever makes it alone. *Outliers* will change the way you think about your own life story, and about what

makes us all unique. 'Gladwell is not only a brilliant storyteller; he can see what those stories tell us, the lessons they contain' Guardian 'Malcolm Gladwell is a global phenomenon ... he has a genius for making everything he writes seem like an impossible adventure' Observer 'He is the best kind of writer - the kind who makes you feel like you're a genius, rather than he's a genius' The Times

Knight of Darkness Kinley MacGregor 2009-10-13 For countless centuries, I've been the assassin for the infamous Merlin, even though the woman who birthed me sits at the right hand of our enemy, Morgen le Fey. Now both my mother and Morgen have decided that it's time I take my place on their side of this conflict. Normally, telling them no wouldn't be a problem, except for the fact that the good guys I protect think that I'm an even worse demon than the ones we fight. Hmm, maybe they're right. I have to say that I do enjoy maiming anyone who gets in my way. At least until my mother gives me a simple choice: join Morgen's Circle of the Damned or see an innocent woman die. I'm all for saving the innocent, but Merewyn isn't as innocent as she seems. And she's none too fond of the fact that her fate is in my dubious hands. Personally I'm all for taking the easy way out, but leaving her to Morgen is rough, even for me. Now the only way to save both our lives is to face the vilest forces ever known—my mother and Morgen. And two people who know nothing of trust must learn to rely on each other or die: provided we don't kill each other first.

Let's Pretend This Never Happened Jenny Lawson 2012-04-17 The #1 New York Times bestselling (mostly true) memoir from the hilarious author of *Furiously Happy*. “Gaspingly funny and wonderfully inappropriate.”—O, The Oprah Magazine When Jenny Lawson was little, all she ever wanted was to fit in. That dream was cut short by her fantastically unbalanced father and a

morbidly eccentric childhood. It did, however, open up an opportunity for Lawson to find the humor in the strange shame-spiral that is her life, and we are all the better for it. In the irreverent *Let's Pretend This Never Happened*, Lawson's long-suffering husband and sweet daughter help her uncover the surprising discovery that the most terribly human moments—the ones we want to pretend never happened—are the very same moments that make us the people we are today. For every intellectual misfit who thought they were the only ones to think the things that Lawson dares to say out loud, this is a poignant and hysterical look at the dark, disturbing, yet wonderful moments of our lives. Dietary Reference Intakes for Vitamin C, Vitamin E, Selenium, and Carotenoids Institute of Medicine 2000-08-27 This volume is the newest release in the authoritative series of quantitative estimates of nutrient intakes to be used for planning and assessing diets for healthy people. Dietary Reference Intakes (DRIs) is the newest framework for an expanded approach developed by U.S. and Canadian scientists. This book discusses in detail the role of vitamin C, vitamin E, selenium, and the carotenoids in human physiology and health. For each nutrient the committee presents what is known about how it functions in the human body, which factors may affect how it works, and how the nutrient may be related to chronic disease. Dietary Reference Intakes provides reference intakes, such as Recommended Dietary Allowances (RDAs), for use in planning nutritionally adequate diets for different groups based on age and gender, along with a new

reference intake, the Tolerable Upper Intake Level (UL), designed to assist an individual in knowing how much is "too much" of a nutrient.

Clearing the Smoke Institute of Medicine 2001-10-17 Despite overwhelming evidence of tobacco's harmful effects and pressure from anti-smoking advocates, current surveys show that about one-quarter of all adults in the United States are smokers. This audience is the target for a wave of tobacco products and pharmaceuticals that claim to preserve tobacco pleasure while reducing its toxic effects. Clearing the Smoke addresses the problems in evaluating whether such products actually do reduce the health risks of tobacco use. Within the context of regulating such products, the committee explores key questions: Does the use of such products decrease exposure to harmful substances in tobacco? Is decreased exposure associated with decreased harm to health? Are there surrogate indicators of harm that could be measured quickly enough for regulation of these products? What are the public health implications? This book looks at the types of products that could reduce harm and reviews the available evidence for their impact on various forms of cancer and other major ailments. It also recommends approaches to governing these products and tracking their public health effects. With an attitude of healthy skepticism, Clearing the Smoke will be important to health policy makers, public health officials, medical practitioners, manufacturers and marketers of "reduced-harm" tobacco products, and anyone trying to sort through product claims.

Death in the Afternoon Ernest Hemingway 2002-07-25 Still considered one of the best books ever written about bullfighting, Death in the Afternoon is an impassioned look at the sport by one of its true aficionados. It reflects Hemingway's conviction that bullfighting was more than mere sport and reveals a rich source of inspiration for his art. The unrivaled drama of bullfighting, with its rigorous combination of athleticism and artistry, and its requisite display of grace under pressure, ignited Hemingway's imagination. Here he describes and explains the technical aspects of this dangerous

ritual and "the emotional and spiritual intensity and pure classic beauty that can be produced by a man, an animal, and a piece of scarlet serge draped on a stick." Seen through his eyes, bullfighting becomes a richly choreographed ballet, with performers who range from awkward amateurs to masters of great elegance and cunning. A fascinating look at the history and grandeur of bullfighting, *Death in the Afternoon* is also a deeper contemplation of the nature of cowardice and bravery, sport and tragedy, and is enlivened throughout by Hemingway's sharp commentary on life and literature.

American Psychiatric Association Practice Guidelines American Psychiatric Association 1996 The aim of the American Psychiatric Association Practice Guideline series is to improve patient care. Guidelines provide a comprehensive synthesis of all available information relevant to the clinical topic. Practice guidelines can be vehicles for educating psychiatrists, other medical and mental health professionals, and the general public about appropriate and inappropriate treatments. The series also will identify those areas in which critical information is lacking and in which research

could be expected to improve clinical decisions. The Practice Guidelines are also designed to help those charged with overseeing the utilization and reimbursement of psychiatric services to develop more scientifically based and clinically sensitive criteria.

Thinking about Deterrence Air Univeristy Press 2014-09-01 With many scholars and analysts questioning the relevance of deterrence as a valid strategic concept, this volume moves beyond Cold War nuclear deterrence to show the many ways in which deterrence is applicable to contemporary security. It examines the possibility of applying deterrence theory and practice to space, to cyberspace, and against non-state actors. It also examines the role of nuclear deterrence in the twenty-first century and reaches surprising conclusions.

The Death of Expertise Thomas M. Nichols 2017 A cult of anti-expertise sentiment has coincided with anti-intellectualism, resulting in massively viral yet poorly informed debates ranging from the anti-vaccination movement to attacks on GMOs. As Tom Nichols shows in The Death of Expertise, there are a number of reasons why this has occurred-ranging from easy access to Internet search engines to a customer satisfaction model within higher education.

Physical Activity and Cancer Kerry S. Courneya 2010-11-26 This book explores in depth the relation between physical activity and cancer control, including primary prevention, coping with treatments, recovery after treatments, long-term survivorship, secondary prevention, and survival. The first part of the book presents the most recent research on the impact of physical activity in preventing a range of cancers. In the second part, the association between physical activity and

cancer survivorship is addressed. The effects of physical activity on supportive care endpoints (e.g., quality of life, fatigue, physical functioning) and disease endpoints (e.g., biomarkers, recurrence, survival) are carefully analyzed. In addition, the determinants of physical activity in cancer survivors are discussed, and behavior change strategies for increasing physical activity in cancer survivors are appraised. The final part of the book is devoted to special topics, including the relation of physical activity to pediatric cancer survivorship and to palliative cancer care.
