The Purple Violet of Oshaantu Neshani Andreas 2017-03-27 Through the voice of Mee Ali, readers experience the rhythms and rituals of life in rural Namibia in interconnected stories. In Oshaantu, a place where women are the backbone of the home but are expected to submit to patriarchal dominance, Mee Ali is happily married. Her friend, Kauna, however, suffers at the hands of an abusive husband. When he is found dead at home, many of the villagers suspect her of poisoning him. Backtracking from that time, the novel, with its universal appeal, reveals the value of friendships, some of which are based on tradition while others grow out of strength of character, respect, and love.

The Color Bind Erica Gabrielle Foldy 2014-02-28 Since the 1960s, the dominant model for fostering diversity and inclusion in the United States has been the “color blind” approach, which emphasizes similarity and assimilation and insists that people should be understood as individuals, not as members of racial or cultural groups. This approach is especially prevalent in the workplace, where discussions about race and ethnicity are considered taboo. Yet, as widespread as “color blindness” has become, many studies show that the practice has damaging repercussions, including reinforcing the existing racial hierarchy by ignoring the significance of racism and discrimination. In The Color Bind, workplace experts Erica Foldy and Tamara Buckley investigate race relations in office settings, looking at how both color blindness and what they call “color cognizance” have profound effects on the ways coworkers think and interact with each other. Based on an intensive two-and-a-half-year study of employees at a child welfare agency, The Color Bind shows how color cognizance—the practice of recognizing the profound impact of race and ethnicity on life experiences while affirming the importance of racial diversity—can help workers move beyond silence on the issue of race toward more inclusive workplace practices. Drawing from existing psychological and sociological research that demonstrates the success of color-cognizant approaches in dyads, workgroups and organizations, Foldy and Buckley analyzed the behavior of work teams within a child protection agency. The behaviors of three teams in particular reveal the factors that enable color cognizance to flourish. While two of the teams largely avoided explicitly discussing race, one group, “Team North,” openly talked about race and ethnicity in team meetings. By acknowledging these differences when discussing how to work with their clients and with each other, the members of Team North were able to dig into challenges related to race and culture instead of avoiding them. The key to achieving color cognizance within the group was twofold: It required both the presence of at least a few members who were already color cognizant, as well as an environment in which all team members felt relatively safe and behaved in ways that strengthened learning, including productively resolving conflict and reflecting on their practice. The Color Bind provides a useful

lens for policy makers, researchers and practitioners pursuing in a wide variety of goals, from addressing racial disparities in health and education to creating diverse and inclusive organizations to providing culturally competent services to clients and customers. By foregrounding open conversations about race and ethnicity, Foldy and Buckley show that institutions can transcend the color bind in order to better acknowledge and reflect the diverse populations they serve.

Consumer Behavior and Marketing Strategy J. Paul Peter 1996 This work shows how the various elements of consumer analysis fit together in an integrated framework, called the Wheel of Consumer Analysis. Psychological, social and behavioural theories are shown as useful for understanding consumers and developing more effective marketing strategies. The aim is to enable students to develop skills in analyzing consumers from a marketing management perspective and in using this knowledge to develop and evaluate marketing strategies. The text identifies three groups of concepts - affect and cognition, behaviour and the environment - and shows how these they influence each other as well as marketing strategy. The focus of the text is managerial, with a distinctive emphasis on strategic issues and problems. Cases and questions are included in each chapter.

Nudes Elle Nash 2021-04 Fiction. Women's Studies. Short Stories. Beginning with a story of an ex sex-worker drifting through a small rural town in the south, and ending with a young woman's wedding night, who learns from her new husband what it takes to kill a man, Nash writes across the complications of working class women, rendering their desires with visceral prose and psychologically dissecting the fundamental root that threads her work: craving and the conflicts within.

All the Women in My Family Sing Z. Z. Packer 2018-01-30 All the Women in My Family Sing tells the sometimes raw, always illumining stories of women of color in today's political climate. Sixty-eight authors in total--African American, Asian American, Chicana, Native American, Cameroonian, South African, British and LGBTQI--these voices broaden cross-cultural understanding and contribute to building bridges to understanding how very alike we are in the daily experiences of life. No other anthology offers the wide spectrum of stories about cultural identity, migration, sexuality, illness, racism and generosity from such illustrious voices, including America Ferrera on her powerful experience at the Women's March in Washington, D.C. on January 21, 2017; Natalie Baszile on returning to Louisiana to research Queen Sugar and finding the "painful truths" her father experienced in the "belly of segregation;" Porochista Khakpour on flying across America under the Muslim travel ban; and Lalita Tademy on her transition from top executive at Sun Microsystems to NY Times bestselling author. In other essays, a woman writes from prison about widows incarcerated for cashing their husbands' retirement checks. A young mother writes of suffering hundreds of strokes and a heart attack while giving birth. An art historian argues why Carmen Lomas Garza is as important as Norman Rockwell to our conception of what constitutes the American tableau. An escapee from the Cambodian Killing Fields writes about her life in America after

losing 37 family members. A daughter writes about her father growing up in Louisiana having the soles of his feet set on fire as a joke.

How To Teach Creativity: A Hands-on Guide for a Holistic Development of Creative Competencies and Confidence in Education. Christian Byrge 2020-03-21 This book is intended for educators and leaders in education who want to be serious about developing creative competencies and confidence. - This has been the most important and useful learning experience in my 16 years of education. - Within a week my brain was totally reconfigured. - I now dare to approach any problem creatively. - I can now produce as many ideas as I like, literally. - I learned to apply and produce far more knowledge, and in ways that are more meaningful. How to teach creativity in schools, youth education, vocational education, higher education as well as in professional education? There are lots of books about creativity in education. However, this may be the first to offer a research based, yet completely hands-on, guide for developing a systematic and holistic advancement of creative competencies and confidence. With this book you can: - Design creativity as a course on its own. - Integrate creativity teaching into existing subjects. - Prepare assignments and activities that foster creativity. - Practise individual and team creative process work. - Develop creative learning environments. - Perform holistic evaluations of creativity. - Advance creativity so that it becomes second nature. Creativity may be one of the most powerful and influential skills in the history of mankind. However, so far creativity has been primarily a skill possessed by great thinkers who push forward the human race. Do you also believe that creativity should be a skill for everyone to master, so that they can help innovate everyday life, organisations, industries, domains and societies? In the near future, creativity will be one of the top sought after skills in workplaces, by entrepreneurs and in general life, as robots and artificial intelligence are increasingly being introduced to take over human tasks. However, the current teaching of creative process methods is far too weak. Adding some creative techniques is not enough either. We need to start teaching creativity in a more holistic way. In a way that builds both creative competence and confidence. Creativity needs to become second nature. This book will help you kickstart creativity teaching in an engaging, serious, systematic and holistic way. It provides a comprehensive hands-on practical introduction on how to teach creativity in all kinds of education, in all kinds of subjects and at all levels of education. It goes way beyond the traditional simple methods and techniques for designing and facilitating creative processes and creative workshops. This includes lots of creativity exercises that you can use directly in your teaching and that can be easily translated to fit your subject and project themes. The book introduces: - A competency hierarchy model with 20 fundamental creative skills, detailing how to practice each skill. The model includes cognitive stimulation, idea expression, perceptual flexibility, imagination, persuasion, subconscious thinking and more. - A creative phase model with 7 universal creative process steps, detailing how to integrate each phase into general study activities and project work. The model includes focus, internal exploration, co-creation, compliance gaining and more. - A holistic creativity evaluation model with 6 important approaches for evaluating creativity, detailing how to perform each evaluation. The model includes how to evaluate creative self-perception, creative production, personal creative methods and more. - A systematic approach for developing a creative learning environment, detailing key pedagogical elements like time and duration of creative activities, the role of individuals and teams in teaching creativity, the difference between domain-specific and domain-general cases, and more.

I Will Survive Gloria Gaynor 2014-03-11 I Will Survive is the story of Gloria Gaynor, America's "Queen of Disco." It is the story of riches and fame, despair, and finally salvation. Her meteoric rise to stardom in the mid-1970s was nothing short of phenomenal, and hits poured forth that pushed her to the top of the charts, including "Honey Bee," "I Got You Under My Skin," "Never Can Say Goodbye," and the song that has immortalized her, "I Will Survive," which became a #1 international gold seller. With that song, Gloria heralded the international rise of disco that became synonymous with a way of life in the fast lane - the sweaty bodies at Studio 54, the lines of cocaine, the indescribable feeling that you could always be at the top of your game and never come

down. But down she came after her early stardom, and problems followed in the wake, including the death of her mother, whose love had anchored the young singer, as well as constant battles with weight, drugs, and alcohol. While her fans always imagined her to be rich, her personal finances collapsed due to poor management; and while many envied her, she felt completely empty inside. In the early 1980s, sustained by her marriage to music publisher Linwood Simon, Gloria took three years off and reflected upon her life. She visited churches and revisited her mother's old Bible. Discovering the world of gospel, she made a commitment to Christ that sustains her to this day.

XXXXX Martin Howse 2006 xxxxx proposes a radical, new space for artistic exploration, with essential contributions from a diverse range of artists, theorists, and scientists. Combining intense background material, code listings, screenshots, new translation, [the] xxxxx [reader] functions as both guide and manifesto for a thought movement which is radically opposed to entropic contemporary economies. xxxxx traces a clear line across eccentric and wide ranging texts under the rubric of life coding which can well be contrasted with the death drive of cynical economy with roots in rationalism and enlightenment thought. Such philosophy, world as machine, informs its own deadly flipside embedded within language and technology. xxxxx totally unpicks this hiroshimic engraving, offering an dandyish alternative by way of deep examination of software and substance. Life coding is primarily active, subsuming deprecated psychogeography in favour of acute wonderland technology, wary of any assumed transparency. Texts such as Endonomadology, a text from celebrated biochemist and chaos theory pioneer Otto E. Roessler, who features heavily throughout this intense volume, make plain the sadistic nature and active legacy of rationalist thought. At the same time, through the science of endophysics, a physics from the inside elaborated here, a delicate theory of the world as interface is proposed. xxxxx is very much concerned with the joyful elaboration of a new real; software-led propositions which are active and constructive in eviscerating contemporary economic culture. xxxxx embeds Perl Routines to Manipulate London, by way of software artist and Mongrel Graham Harwood, a Universal Dovetailer in the Lisp language from AI researcher Bruno Marchal rewriting the universe as code, and self explanatory Pornographic Coding from plagiarist and author Stewart Home and code art guru Florian Cramer. Software is treated as magical, electromystical, contrasting with the tedious GUI desktop applications and user-led drudgery expressed within a vast ghost-authored literature which merely serves to rehearse again and again the demands of industry and economy. Key texts, which well explain the magic and sheer art of programming for the absolute beginner are published here. Software subjugation is made plain within the very title of media theorist Friedrich Kittler's essay Protected Mode, published in this volume. Media, technology and destruction are further elaborated across this work in texts such as War.pl, Media and Drugs in Pynchon's Second World War, again from Kittler, and Simon Ford's elegant take on J.G Ballard's crashed cars exhibition of 1970, A Psychopathic Hymn. Software and its expansion stand in obvious relation to language. Attacking transparency means examining the prison cell or virus of language; life coding as William Burrough's cutup. And perhaps the most substantial and thorough-going examination is put forward by daring Vienna actionist Oswald Wiener in his Notes on the Concept of the Bio-adapter which has been thankfully unearthed here. Equally, Olga Goriunova's extensive examination of a new Russian literary trend, the online male literature of udaff.com provides both a reexamination of culture and language, and an example of the diversity of xxxxx; a diversity well reflected in background texts ranging across subjects such as Leibniz' monadology, the ur-crash of supreme flaneur Thomas de Quincey and several rewritings of the forensic model of Jack the Ripper thanks to Stewart Home and Martin Howse. xxxxx liberates software from the machinic, and questions the transparency of language, proposing a new world view, a sheer electromysticism which is well explained with reference to the works of Thomas Pynchon in Friedrich Kittler's essay, translated for the first time into English, which closes xxxxx. Further contributors include Hal Abelson, Leif Elggren, Jonathan Kemp, Aymeric Mansoux, and socialfiction.org.

American Like Me America Ferrera 2019-09-03 INSTANT NEW YORK TIMES BESTSELLER From award-winning actress and political activist America Ferrera comes a vibrant and varied collection of first-person accounts from prominent figures about the experience of growing up between cultures. America Ferrera has always felt wholly American, and yet, her identity is inextricably linked to her parents' homeland and Honduran culture. Speaking Spanish at home, having Saturday-morning-salsa-dance-parties in the kitchen, and eating tamales alongside apple pie at Christmas never seemed at odds with her American identity. Still, she yearned to see that identity reflected in the larger American narrative. Now, in American Like Me, America invites thirty-

one of her friends, peers, and heroes to share their stories about life between cultures. We know them as actors, comedians, athletes, politicians, artists, and writers. However, they are also immigrants, children or grandchildren of immigrants, indigenous people, or people who otherwise grew up with deep and personal connections to more than one culture. Each of them struggled to establish a sense of self, find belonging, and feel seen. And they call themselves American enthusiastically, reluctantly, or not at all. Ranging from the heartfelt to the hilarious, their stories shine a light on a quintessentially American experience and will appeal to anyone with a complicated relationship to family, culture, and growing up.
