Cashing in on Education Mercedes Mateo Díaz 2016-10-19 Investments in education across countries in Latin America and the Caribbean have transformed the lives of millions of girls and the prospects of their families and societies. Unleashing the full economic potential of women is nevertheless still a curtailed issue in the region: just about half of women are unable to participate in paid work. The majority of the population out of the labor market is women between the ages of 24 and 45. This is the largest share of the available pool of unused human capital countries have, and where mothers of young children are concentrated. This book argues that more and better childcare constitutes a fundamental policy option to improve female outcomes in the labor market, but countries need to pay particular attention to the design and features of such services. First-rate educational programs will be useless if children are not enrolled or do not attend formal education centers. A large program expansion will be wasted if parents cannot enroll their children because they are unable to reach the center, don't trust its quality, if the program is too expensive, or if work and care schedules are not compatible. Through an integrated framework applied to each country and an overview of the existing evidence, this book addresses the why and what questions about policy relevant instruments to achieve female labor participation. Parts I and II of the book lay out the motivation for Latin-American and Caribbean countries to act depicting their current situation both in terms of women's labor participation and the use and provision of childcare services. Moreover, this book tackles the how question contributing to the incipient evidence about factors affecting the take-up of programs and demand for childcare services and other informal care arrangements. Part III of the book explores how to improve services and implement more and better formal, center-based care arrangements for young children. It looks at international benchmarks, discusses different experiences and proposes specific actions to solve potential inequalities in access to childcare.

Computational Linguistics and Intelligent Text Processing Alexander Gelbukh 2003-06-29 CICLing 2001 is the second annual Conference on Intelligent text processing and Computational Linguistics (hence the name CICLing), see [www.CICLing.org](http://www.CICLing.org). It is intended to provide a balanced view of the cutting edge developments in both theoretical foundations of computational linguistics and practice of natural language text processing with its numerous applications. A feature of the CICLing conferences is their wide scope that covers nearly all areas of computational linguistics and all aspects of natural language processing applications. The conference is a forum for dialogue between the specialists working in these two areas. This year our invited speakers were Graeme Hirst (U. Toronto, Canada), Sylvain Kahane (U. Paris 7, France), and Ruslan Mitkov (U. Wolverhampton, UK). They delivered excellent extended lectures and organized vivid discussions. A total of 72 submissions were received, all but very few of surprisingly high quality. After careful reviewing, the Program Committee selected for presentation 53 of them, 41 as full papers and 12 as short papers, by 98 authors from 19 countries: Spain (19 authors), Japan (15), USA (12), France, Mexico (9 each), Sweden (6), Canada, China, Germany, Italy, Malaysia, Russia, United Arab Emirates (3 each), Argentina (2), Bulgaria, The Netherlands, Ukraine, UK, and Uruguay (1 each).

ALEKS Math Exercise Book 2020-2021 Reza Nazari 2020-06-18 Get ready for the ALEKS Math Test with a PERFECT Math Workbook! ALEKS Math Exercise Book 2020-2021, which reflects the 2020 - 2021 test guidelines, represents extensive exercises, math problems, sample ALEKS questions, and quizzes with answers and detailed solutions to help you hone your math skills, overcome your exam anxiety, boost your confidence-and do your best to ace the ALEKS Math test. The surest way to succeed on the ALEKS Math Test is with intensive practice in every math concept tested-and that's what you will get in ALEKS Exercise Book 2020-2021. Not only does this comprehensive exercise book review all math topics you will need to defeat the ALEKS Math test, but it also offers two full-length and realistic ALEKS Math tests that reflect the format and question types on the ALEKS to help you check your exam-readiness and identify where you need more practice. This comprehensive exercise book for the Math section of the ALEKS test contains many exciting and unique features to help you improve your test scores, including: Content 100% aligned with the 2020 ALEKS test Complete coverage of all ALEKS Math concepts and topics which you will be tested Numerous ALEKS math practice questions in both multiple-choice and grid-in formats with answers grouped by topic, so you can focus on your weak areas Abundant Math skill-building exercises to help test-takers approach different question types that might be unfamiliar to them 2 full-length practice tests (featuring new question types) with detailed answers ALEKS Math Exercise Book 2020-2021 and other Effortless Math Education books are used by thousands of test-takers each year to help them review core content areas, brush-up in math, discover their strengths and weaknesses, and achieve their best scores on the ALEKS test. Biological Management of Diseases of Crops P. Narayanasamy 2013-06-05 Biological management of diseases of crops is influenced by the nature of interactions between the pathogens and other organisms and the plants. Due to development of resistance in pathogens to fungicides and bactericides, determination of compatibility of biotic biocontrol agents with chemicals is essential for selecting strains of biocontrol agents (BCAs) showing resistance to chemicals to effectively restrict use of the chemicals. Microbial plant pathogens and the antagonists present in the soil and on the plant surfaces are influenced by various cultural practices. It is possible to reduce disease incidence and intensity by crop sanitation and using appropriate rotational crops. Application of physical techniques involving the use of heat, solarization and irradiation has potential to reduce the pathogen population or weaken the potential of pathogens present in the seed, planting materials and soil.

Global Virology III: Virology in the 21st Century Paul Shapshak 2019-11-22 Global Virology, Volume III: Virology in the 21st Century examines work that has been undertaken, or is planned, in several fields of virology, in an effort to promote current and future work, research, and health. Fields and methods addressed include virology, immunology, space research, astrovirology/astrobiology, plasmids, swarm intelligence, bioinformatics, data-mining, machine learning, neural networks, critical equations, and advances in biohazard biocontainment. Novel and forward-looking methods, techniques, and approaches in research and development are presented by experts in the field.

Representing Women? Mercedes Mateo Diaz 2005 This work discusses questions on political participation, representation and legitimacy in the European Union national parliaments. Three major empirical questions structure the book: What affects women's presence in parliaments?, Does the number of women in parliament have an effect? And are women in parliament representing women? Empirical evidences show that institutional reforms need a 'minimal environment' in terms of socio-economic development so as to prove effective. As opposed to the critical mass theory, claiming that a few representatives cannot have an impact on the political outcomes, here the empirical evidences suggest that smaller groups can also influence the different components of the legislative process. The last part turns to the fundamental question of whether a parliament that is descriptively representative, i.e. in which the parliamentarians share certain characteristics with the voters, also is a substantively descriptive parliament, i.e. in which the parliamentarians mirror the voters' opinions.

Digital Integrated Circuits Thomas A. DeMassa 1996 Contains the most extensive coverage of digital integrated circuits available in a single source. Provides complete qualitative descriptions of circuit operation followed by in-depth analytical analyses and spice simulations. The circuit families described in detail are transistor-transistor logic (TTL, STTL, and ASTTL), emitter-coupled logic (ECL), NMOS logic, CMOS logic, dynamic CMOS, BiCMOS structures and various GASFET technologies. In addition to detailed presentation of the basic inverter circuits for each digital logic family, complete details of other logic circuits for these families are presented.

Amnesty International Report 2008 Amnesty International 2008 This annual report documents human rights abuses by governments and armed opposition groups in 150 countries across the world. It provides an invaluable reference guide to international human rights developments.

Anaphora Resolution Ruslan Mitkov 2014-02-24 Teaching computers to solve language problems is one of the major challenges of natural language

processing. There is a large amount of interesting research devoted to this field. This book fills an existing gap in the literature with an up-to-date survey of the field, including the author's own contributions. A number of different fields overlap in anaphora resolution – computational linguistics, natural language processing (NLP), grammar, semantics, pragmatics, discourse analysis and artificial intelligence. This book begins by introducing basic notions and terminology, moving onto early research methods and approaches, recent developments and applications, and future directions. It addresses various issues related to the practical implementation of anaphora systems, such as rules employed, algorithms implemented or evaluation techniques used. This is an ideal reference book for students and researchers in this particular area of computational linguistics. Since anaphora resolution is vital for the development of any practical NLP system, the book will be of interest to readers from both academia and industry.

**Trichoderma: Agricultural Applications and Beyond Chakravarthula Manoharachary 2022-01-06** This book gives a comprehensive overview on the various aspects of Trichoderma, a filamentous fungus ubiquitously present in soil. Topics addressed are the biology, diversity, taxonomy, ecology, biotechnology and cultivation of Trichoderma, to just name a few. Basic as well as applied aspects are covered and a special focus is given on use of Trichoderma in agriculture and beyond. Trichoderma species are widely distributed throughout the world in soil, rotting plant material, and wood. Although they are often considered as a contaminants, Trichoderma species are also known for their ability to act as biocontrol agents against various plant pathogens and plant diseases, and also as biostimulants promoting plant growth. The contents of this book will be of particular interest to, agricultural scientists, biotechnologists, plant pathologists, mycologists, and microbiologists, students, extension workers, policy makers and other stakeholders.

**Handbook on High-Speed Rail and Quality of Life Yoshitsugu Hayashi 2020-12-29** Handbook on High-Speed Rail and Quality of Life outlines global experiences of high-speed rail development, including its construction, impacts, and planning, with a special focus on countries that are planning implementation in the coming decade. High-speed rail infrastructure can bring considerable socioeconomic benefits that cannot be captured through econometric modeling alone. Thus, analysis of the true impacts requires a scalar as well as a temporal lens. The studies in this handbook discuss transport infrastructure projects of varying geographic scale and describe the underlying complexities of developing an infrastructure system while focusing on the aspects that can enhance quality of life. The cases, concepts, and ideas presented in this handbook were discussed and refined during a conference and seminar series held at the Asian Development Bank Institute in Tokyo and special sessions on transport and quality of life at the 15th World Conference on Transport Research at the Indian Institute of Technology Bombay in Mumbai. The special sessions were jointly organized by the Asian Development Bank Institute and World Conference on Transport Research Society Special Interest Group A4, "High-Speed Rail: Policy, Investment, and Impacts". The conference and special sessions highlighted critical issues and delivered key messages on the broad research on high-speed rail and quality of life.

**Good Governance in the Era of Global Neoliberalism Jolle Demmers 2004-08-02** This new collection critically examines the new global policy of 'good governance'. This catchphrase of aid policy and development thinking has been the subject of too little analysis to date. This book redresses the balance. It places the prefix 'good', and exactly what that means, under the microscope and examines the impact of neoliberal governance in a wide range of countries and territories, including Chile, Russia, Argentina and Indonesia.

**Functional Categories in Learner Language Christine Dimroth 2009** Research on spontaneous processes of language acquisition has shown that early learner systems are based on lexical structures. At some point in acquisition this lexical-semantic system is given up in favour of a target-like functional category system. This work deals with the driving forces behind the acquisition of the functional properties of inflection, word-order variation, definiteness and agreement.

**Sustainable Ecological Engineering Design Lloyd Scott 2020-06-29** Through research and proven practice, the aim of the International Conference of Sustainable Ecological Engineering Design for Society (SEEDS) is to foster ideas on how to reduce negative impacts on the environment while providing for the health and well-being of society. The professions and fields of research required to ensure buildings meet user demands and provide healthy enclosures are many and diverse. The SEEDS conference addresses the interdependence of people, the built and natural environments, and recognizes the interdisciplinary and international themes necessary to assemble the knowledge required for positive change.

**Soil Analysis: Recent Trends and Applications Amitava Rakshit 2020-04-07** Soil analysis is critically important in the management of soil-based production systems. In the absence of efficient methods of soil analysis our understanding of soil is pure guesswork. Ideally the pro-active use of laboratory analysis leads to more sustainable soil productivity. Unfortunately, most of the world's agriculture is still reactionary, waiting for obvious yield declines to occur before taking action to identify the reasons. The modern soil laboratory is pivotal to informing soil managers what adaptive practices are needed to address chemical and physical imbalances before they occur, and the intelligent adaptive use of laboratory data not only greatly speeds up and reduces the cost of empirical soil study, but can even render it unnecessary. This book provides a synopsis of the analytical procedures used for soil analysis, discussing the common physical, chemical and biological analytical methods used in agriculture and horticulture. Written by experienced experts from institutions and laboratories around the globe, it provides insights for a range of users, including those with limited laboratory facilities, and helps students, teachers, soil scientists and laboratory technicians increase their knowledge and skills and select appropriate methods for soil analysis.

**The International Jute Commodity System Chhabilendra Roul 2009** The jute commodity system as prevalent in the Indian subcontinent is a conglomeration of paradoxes. Jute was once called the golden fibre on account of its contribution to means of livelihood to millions of farmers, traders, manufacturers in the unorganized sector, mill workers in the organized sector as well scores of people employed in the service sector relating to trading, manufacturing and exports of jute and jute goods. Jute industry along with textile manufacturing provided the foundation of modern manufacturing industry in India. Simultaneously, this industry was also the fountain head of the growth of private entrepreneurship and capital in India. Most of the traditional Industrial Houses in India grew out of trading and manufacturing of jute and jute goods, coal and tea. On the other hand most of the farmers involved in cultivation of natural fibres like jute are small and marginal farmers. Without alternative avenues of gainful employment elsewhere, these millions in South Asia would be deprived of a part of their livelihood. The entire commodity chain of natural fibres is characterized by low productivity, low value addition, high volumes and low returns. The advent and discovery of mineral oil helped exploit cheap HDPE and PP polyethylene sacks, which started replacing the natural fibre based packaging materials. As a result, the jute industry got wiped out from Europe, America and the Far East. Today, it is survived in the Indian subcontinent and to a lesser extent in Brazil. The unique feature of the volume is that it focuses on the first hand experience of the policy-makers and other stakeholders in the jute commodity system, who are confronted with a dilemma of reviving a declining economic subsector. At this juncture, when there is need for a Commodity Development Strategy suitable to the ethos of a commodity like the jute fibre, the present, volumes attempts to devise such a strategy thorough analysis of the system based on authentic and up-to-date information. The Book furnishes an erudite analysis and stock-taking of the jute commodity system. This analysis points out to the fact that there is a need for a holistic, systemic approach to the problems being faced by this sector focusing on the economic exploitation of the whole jute plant; holistic research for addressing productivity and processing efficiency in the entire commodity chain of jute; and creating a network of organisations for advocacy for jute and allied fibres, which would focus on repositioning the golden fibre as sustainable and eco-friendly commodity with the help of green and sustainable development advocacy groups. The Commodity Development Strategy highlights the need for greater effort for significant degree of product diversification which would entail significant consumption of the fibre or fabric in volume terms. The volume ends with an optimistic note with ideas of inclusive development under the Millennium Development Goals and Carbon Credits Sustainable Development under the United Nations Framework Convention on Climate Change the welcome paradigm shifts in the approach to the jute sector. The effort by Sh Roul is a timely one on the eve of the observance of 2009 as

International Year for Natural Fibres by the United Nations. The book is quite comprehensive with its focus on a wide range of issues pertaining to the jute agri-commodity system addressed against a historical background and from macro-economic analytical perspective. The volume offers stimulating reading for those interested in the dynamics of agricultural commodity systems like jute and allied fibres. The book is expected to help sensitise national governments, international organizations and nongovernmental organizations towards the eco-sustainability of jute as a natural fibre. The book can serve as an excellent reference book for post-graduate students in economics, jute and textiles management, development studies, regional development and agriculture and agro-marketing.

Proceedings of the Third International Conference on Computing, Mathematics and Statistics (iCMS2017) Liew-Kee Kor 2019-03-28 This book is a product of the Third International Conference on Computing, Mathematics and Statistics (iCMS2017) to be held in Langkawi in November 2017. It is divided into four sections according to the thrust areas: Computer Science, Mathematics, Statistics, and Multidisciplinary Applications. All sections sought to confront current issues that society faces today. The book brings collectively quantitative, as well as qualitative, research methods that are also suitable for future research undertakings. Researchers in Computer Science, Mathematics and Statistics can use this book as a sourcebook to enrich their research works.

Book Seventeen Greg Delanty 2015-02-16 Purporting to be a "lost" seventeenth book of the 16-volume *Anthologia Graeca*, Book Seventeen uses the themes and images of ancient mythology to conjure a new way of looking at our modern world. Gods of all types line the pages of this collection, from those deities that only operate in our personal spaces—the poet's companion, the demigod Solitude, as well as the elusive god of Complicity—to more familiar divinities in unfamiliar roles, such as Helios shopping in an outdoor market in Paris, or an aging Aphrodite in a short skirt chatting with visitors to an unfamiliar city. Pithy and humorous, reverential and impudent, Greg Delanty's poems showcase the author's keen eye for the mythologies on which we depend to make sense of our messy, bewildering lives.

The Viagra Diaries Barbara Rose Brooker 2013-04-30 THE NOVEL THAT PROVES THERE'S PLENTY OF LIFE— AND HOT SEX—AFTER SIXTY! Just because Anny Applebaum qualifies for a senior discount doesn't mean she's ready for retirement. But if she wants to keep her job at the San Francisco Times, she'll have to find a way to spice up her lifestyle column. Even if it means posting her profile as an eligible single on JDate .com. Sure, Anny's a little out of practice. She hasn't been with a man since she found Viagra in her ex-husband's suit pocket, and he wasn't taking it for her. But she's got her friends to help her fumble her way through the strange and intriguing world of online dating. After hearing cautionary tales from the trenches—about "boomer oldies" who drag around pictures of their dead wives and fixed-income misers who wine and dine their dates at chain restaurants—Anny is relieved to meet Marv Rothstein, a charming . . . 75-year-old diamond dealer. Unfortunately, he's also a Digital Age Don Juan who prowls singles sites for younger women. Not be outdated by this "Serial JDate," Anny realizes Marv is the perfect subject for her flagging column and chronicles his sexcapades for the reading public. But when the new column becomes an overnight hit, Anny can't help but feel conflicted—because now she's having sex with Mr. X . . . and it's nothing less than extraordinary.

Ugly Ronney Sandra Kiss 2021-06-22 Ronney is an introverted young woman with a disgraceful appearance. She lives humbly in one of the poorest neighborhoods of Sheryl Valley, a town corrupted by the mafia in Southern California. With no diploma, she works hard in her parents' restaurant and provides voice-overs for children's animated movies during the weekend. In accordance with a long-standing family tradition, Ronney's twenty-fifth birthday celebration comes with a dare from her cousins: she must knock on the front door of the infamous Khan household. The Khans' reputation precedes them, rumored to be in association with the mafia. But when Ronney knocks on the door, before she has the chance to run, the Khan family matriarch, Camilia, takes an interest in Ronney. Ronney's lack of conventional beauty and disinterest in fashion draws Camilia in, leading her to offer Ronney the position of personal assistant to her eldest son, Yeraz, with a substantial salary at stake. It's an offer Ronney cannot refuse. To keep her job, Ronney's task is simple: do not fall in love with Yeraz. "Easy," she thinks. But what if destiny decides otherwise? Ugly Ronney is a romance in which the heroes enter the gallery of legendary lovers.

Financing Infrastructure in Asia and the Pacific Naoyuki Yoshino 2017-08-30 Governments throughout the Asia-Pacific region recognize the catalyzing role of infrastructure investment for sustainable growth. Yet, they are faced with the problem of financing new infrastructure. This book provides the latest evidence on the impact of infrastructure investment on economic and social indicators. Presenting several country studies, the book explains how infrastructure investment can increase output, taxes, trade, and firm productivity. Based on this evidence, the book proposes innovative modes of infrastructure financing. Written by leading international experts in economic analysis of infrastructure, the book is an invaluable source for policy makers to better design infrastructure projects.

Virulent Zones Lyle Fearnley 2020-10-23 Scientists have identified southern China as a likely epicenter for viral pandemics, a place where new viruses emerge out of intensively farmed landscapes and human-animal interactions. In *Virulent Zones*, Lyle Fearnley documents the global plans to stop the next influenza pandemic at its source, accompanying virologists and veterinarians as they track lethal viruses to China's largest freshwater lake, Poyang Lake. Revealing how scientific research and expert agency operate outside the laboratory, he shows that the search for origins is less a linear process of discovery than a constant displacement toward new questions about cause and context. As scientists strive to understand the environments from which the influenza virus emerges, the unexpected scale of duck farming systems and unusual practices such as breeding wild geese unsettle research objects, push scientific inquiry in new directions, and throw expert authority into question. Drawing on fieldwork with global health scientists, state-employed veterinarians, and poultry farmers in Beijing and at Poyang Lake, Fearnley situates the production of ecological facts about disease emergence inside the shifting cultural landscapes of agrarian change and the geopolitics of global health.

Meeting Asia's Infrastructure Needs Asian Development Bank 2017-02-01 Infrastructure is essential for development. This report presents a snapshot of the current condition of developing Asia's infrastructure—defined here as transport, power, telecommunications, and water supply and sanitation. It examines how much the region has been investing in infrastructure and what will likely be needed through 2030. Finally, it analyzes the financial and institutional challenges that will shape future infrastructure investment and development.

The Biology of Schistosomes D. Rollinson 1987 Due to their devastating impact on both human and animal health in numerous tropical countries of the world, schistosomes have become one of the most widely studied of parasitic organisms. The tremendous ongoing research and control effort, primarily directed at ridding man of the disease schistosomiasis, involves people from many different disciplines and backgrounds. The intention of this book is to draw together the many interesting advances in knowledge in diverse areas of study which relate to the biology of schistosomes, and to provide a standard and comprehensible text which will be of immediate benefit to advanced students, research workers, clinicians and field workers.

Global Sociology and the Struggles for a Better World Markus S. Schulz 2019-03-11 "The crisis consists precisely in the fact that the old is dying and the new cannot be born; in this interregnum a great variety of morbid symptoms appear" (Antonio Gramsci). From a global financial crisis that has not led to a fundamental change in institutions, to a global refugee crisis that questions our ideas of governance, all against a background of global climate crisis with no intergovernmental consensus on solutions . . . how do we think about the future, about futures? What could then lead to the new? What role could sociology play in the inventing of the new? What is a sociological imagination of the future? This richly theoretical and empirically informed text explores the trends, alternative visions, and new directions for sociological research. The diversity of theoretical approaches and regional expertise reflect the complexity of challenges and the multiplicity of future projects on a shared planet. It is now time to re-examine the sociological imagination of futures. There are at least four crucial intellectual trends that must shape such rethinking. First, scholars from or engaged with the Global South have challenged static, determinist orthodoxies and emphasized the conflictual nature of knowledge. Second, there is increased attention to contingency, choice, and creativity across vastly different theory types and research approaches from the micro to the macro. Third, there is the passionate advocacy of what Burawoy has called "public sociology", which has helped sociologists to reach out to and engage with publics, especially in countries, such as the United States, where sociologists. Fourth, social movements and contentious practices in everyday life keep critical thought about alternative futures alive. A sociology with global aspirations and attuned to the problems of inequality can benefit listening closely to the voices at the grassroots.
