Twin Passions Lora Leigh 2012 Book three in the Wizard Twins series. Astra Al'madere betrayed all. Those she loved. Those she swore to protect. And all for the Dark Wizards whose passion and heat she can't live without. A Sorceress can sense her Twins, the men destined to join her in her power to strengthen the planet of Sentmar, and Astra has sensed for a while-the Delmari are hers. She can't turn her back on them, deliver them to justice, even though they'd turned from her many years ago. A pain that still rips her heart in two. Torran and Rhydan knew the road to claiming their Consortress would not be an easy one. After all, a painful lie had driven her away, causing her to believe they didn't burn for her. Weren't consumed by her. But when she chooses to save them rather than honor her duty, the Wizards have the chance to show Astra she's always been the only one they desire.

Exercise and Respiratory Diseases in Paediatrics Craig A. Williams 2021-09-24 It is commonly accepted that "exercise is good for children" but, considering the number of children worldwide exercising, we know comparatively little, compared to adults, about how specific mechanisms influence health and sports performance. There are considerable obstacles that challenge the progress of paediatric research, not least in relation to ethical and methodological considerations. Therefore, advances in the science and clinical application of paediatric exercise physiology, psychology and biomechanics have not reached their potential. Paediatric clinical exercise physiology has application to the role of exercise in the assessment and treatment of paediatric chronic diseases, the utilization of physical activity in preventing illness and enhancing wellbeing and can enhance our understanding of how sports can be made safer and more enjoyable for our young athletes. Exercise and Respiratory Diseases in Paediatrics highlights research by various methodologies, including literature reviews, experimental research and innovations, applied to children and adolescents with respiratory diseases. Chronic conditions such as asthma, bronchiectasis (e.g., cystic fibrosis), and those associated with prematurity and medical complexity are worldwide health problems for young people and although management includes pharmaceutical medications, physiotherapy, nutritional and psychological support, exercise has a role in optimising multidisciplinary care. There has been unprecedented acceleration in new technologies and methodologies that promise to facilitate paediatric research and these are explained and discussed as future research directions. This is reading for post graduate students, researchers, academics and policy makers within the field of paediatric healthcare, physical activity, physiology and the related disciplines.

Freed (Dark Love Duet #2) Shanjida Nusrath Ali 2019-12-14 When you see a ray of light in darkness, not only does it gives you hope but it also shows a ray of new life.But what if that very small ray is another path to darkness?Herold was the light in my dark life, but after losing him I'm engulfed by darkness all over again.His death destroyed me. I left all my dreams, my friends and my life for him. No matter how hard I tried to move on he still lived in my memories.But meeting Alex was something I never expected. He came as a tenant in my house but yet whenever I was with him I felt this familiar pull towards him. It was like I have known him for a long time.But things took great turns between us.He made me laugh. He made me alive. He even made me fall in love again.But not everything lasts forever. Soon all these happiness wrecked my life like a hurricane when truth came into light.I was destroyed again when reality hit me. Everything that I have been through, everything I have felt...it was all a lie.I lost belief in love and trust.But what do you do when you have become so connected with the darkness that the ray of light you always looked for now scares you?When this very light endangers everyone you love? I should have never walked through this path of dark love knowing I will be destroyed again. But at the end somehow this dark love freed me.

Save Karyn Karyn Bosnak 2012-01-31 What would you do if you owed \$20,000? Would you: a) Not tell your parents? b) Stop colouring your hair, having pedicures and buying Gucci? c) Start your own website that asks for money without apology? If you were Karyn Bosnak, you'd do all three... In New York for the first time, with the dream job and the smart flat, Karyn starts spending...and spending. But when it all goes horribly wrong, and her credit card balance mounts in a terrifying manner, Karyn knows that she has to take control. She starts her website www.savekaryn.com on which she fearlessly asks for donations to help pay off her debts. The website receives over 2 million hits and has replies from all over the world - some supportive, many abusive. But after four months, Karyn has become a new woman- debt-free, grateful and happy. This is the hilarious and touching true story of how she does it.

Endoscopic Ear Surgery Livio Presutti 2014-12-17 Increasingly used as an adjunctive tool in the diagnosis and management of ear disease, middle ear endoscopy has the potential to decrease patient morbidity, prevent disease recurrence, and reduce costs. Its capacity to uncover hidden anatomy within the small dimensions of the ear has made it essential for functional surgery, allowing surgeons to preserve key anatomic structures such as the cochlea and facial nerve. Now for the first time, the physicians who pioneered this groundbreaking minimally invasive technique review its indications, advantages, disadvantages, and surgical approaches: Written by the foremost leaders in the field, all members of the International Working Group on Endoscopic Ear Surgery Features nearly 1,000 intraoperative endoscopic images filmed with high-definition cameras, plus outstanding line drawings that aid in understanding all concepts Comprehensively covers the field, including chapters on endoscopic and combined endoscopic-microscopic management of cholesteatoma, surgical restoration of middle ear ventilation, myringoplasty, Meniere disease, tympanoplasty and stapes surgery, revision surgery, and much more Demonstrates state-of-the-art endoscopic procedures in 19 instructive videos From the unique anatomy and pathophysiology of the middle ear through diagnosis, surgical indications, procedures, and instrumentation, this book is indispensable for all otolaryngologists and neurotologists. It offers a full picture of the field today, as well as exploring the future possibilities of ear endoscopes alone or in combination with operative microscopes for the most effective treatment of middle ear pathologies.

Project Based Teaching Suzie Boss 2018-09-20 It's no secret that in today's complex world, students face unparalleled demands as they prepare for college, careers, and active citizenship. However, those demands won't be met without a fundamental shift from traditional, teacher-centered instruction toward innovative, student-centered teaching and learning. For schools ready to make such a shift, project-based learning (PBL) offers a proven framework to help students be better equipped to tackle future challenges. Project Based Teachers encourage active questioning, curiosity, and peer learning; create learning environments in which every student has a voice; and have a mastery of content but are also comfortable responding to students' questions by saying, "I don't know. Let's find out together." In this book, Suzie Boss and John Larmer build on the framework for Gold Standard PBL originally presented in Setting the Standard for Project Based Learning and explore the seven practices integral to Project Based Teaching: Build the Culture Design and Plan Align to Standards Manage Activities Assess Student Learning Scaffold Student Learning Engage and Coach For each practice, the authors present a wide range of practical strategies and include teachers' reflections about and suggestions from their classroom experiences. This book and a related series of free videos provide a detailed look at what's happening in PBL classrooms from the perspective of the Project Based Teacher. Let's find out together. Literature and Geography Emmanuelle Peraldo 2016-01-14 In a period marked by the Spatial Turn, time is not the main category of analysis any longer. Space is. It is now considered as a central metaphor and topos in literature, and literary criticism has seized space as a new tool. Similarly, literature turns out to be an ideal field for geography. This book examines the cross-fertilization of geography and literature as disciplines, languages and methodologies. In the past two decades, several methods of analysis focusing on the relationship and interconnectedness between literature and geography have flourished. Literary cartography, literary geography and geocriticism (Westphal, 2007, and Tally, 2011) have their specificities, but they all agree upon the omnipresence of space, place and mapping at the core of analysis. Other approaches like ecocriticism (Buell, 2001, and Garrard, 2004), geopoetics (White, 1994), geography of literature (Moretti, 2000), studies of the inserted map (Ljunberg, 2012, and Pristnall and Cooper, 2011) and narrative cartography have likewise drawn attention to space. Literature and Geography: The Writing of Space Throughout History, following an international conference in Lyon bringing together literary academics, geographers, cartographers and architects in order to discuss literature and geography as two practices of space, shows that literature, along with geography, is perfectly valid to account for space. Suggestions are offered here from all disciplines on how to take into account representations and discourses since texts, including literary ones, have become increasingly present in the analysis of geographers.

Jack and Rochelle Jack Sutin 2015-07-14 The memoir of a man and woman who escaped into the forest, joined the Jewish partisans—and fell in love—as Hitler laid waste to their Polish hometowns. Jack and Rochelle first met at a youth dance in Poland before the war. They shared one dance, and Jack stepped on Rochelle's shoes. She was unimpressed. When the Nazis invaded eastern Poland in 1941, both Jack (in the town of Mir) and Rochelle (in the town of Stolpce) witnessed the horrors of ghettoization, forced labor, and mass killings that decimated their families. Jack and Rochelle managed, in their separate ways, to escape into the forest. They reunited, against all odds, in the winter of 1942–43 and became Jewish partisans who fought back against the Nazis. The couple's careful courtship soon blossomed into an enduring love that sustained them through the raging hatred of the Holocaust and the destruction of the lives they had known. Jack and Rochelle's story, told in their own voices through extensive interviews with their son, Lawrence, has been in print for twenty years and is celebrated as a classic of Holocaust memoir literature. This is the first electronic edition. Gullah Images 2020-05-22 Paintings, magisterial and universal, that capture the essence of a vibrant African American community In his art Jonathan Green paints the world of his childhood and an ode to a people imbued with a profound respect for the dignity and value of others—the Gullah people of the South Carolina barrier islands. His canvases, beloved for their sense of jubilation and rediscovery, evoke the meaning of community in Gullah society and display a reverence for the rich visual, oral, and spiritual traditions of its culture. His art also reveals a keen awareness of the interpersonal, social, and natural environments in which we live. The 180 images assembled in this collection showcase the meaning, purpose, and beauty that Green finds in the small but critical tasks of life. His work elevates the everyday—preparing morning meals, doing the wash, accomplishing farming chores, finishing a day's work, relaxing in the evening—and celebrates the social and religious—community dances, baptisms, weddings, funerals. Green allows his audience the space and silence to observe people unobtrusively as they pursue life's mission of labor, love, and belonging and as they work in harmony with nature's mysterious, ever changing fabric. While Green's paintings speak specifically to his own upbringing, they transcend racial, cultural, and ethnic boundaries, thus allowing individuals of all backgrounds to recall fond memories and to reflect on the place that purpose and dignity hold in their lives. In addition to a foreword by Pat Conroy, essays by Bettye J. (Mbitha) Parker Smith, Lynn Robertson, and Ronne Hartfield complement Green's images. They tell of the vitality of the Gullah community, the progression of Green's career, and the authenticity of his work.

Acute and Critical Care Echocardiography Claire Colebourn 2017-10-26 'Acute and Critical Care Echocardiography' is the first practical guide dedicated to helping doctors use transthoracic echocardiography to manage acutely and critically ill patients. The text provides readers with a grounding in theoretical evidence-based aspects of critical care echocardiography. The work is mapped to the new accreditation syllabus in Advanced Critical Care Echocardiography set by the British Society of Echocardiography, ensuring that it is relevant to professional standards and teaches doctors exactly what they need to know. Self-assessment questions help readers retain what they have learned and revise for exams

The Neurocognition of Translation and Interpreting Adolfo M. García 2019 This groundbreaking work offers a comprehensive account of brain-based research on translation and interpreting. First, the volume introduces the methodological and conceptual pillars of psychobiological approaches vis-à-vis those of other cognitive frameworks. Next, it systematizes neuropsychological, neuroscientific, and behavioral evidence on key topics, including the lateralization of networks subserving cross-linguistic processes; their relation with other linguistic mechanisms; the functional organization and temporal dynamics of the circuits engaged by different translation directions, processing levels, and source-language units; the system's susceptibility to training-induced plasticity; and the outward correlates of its main operations. Lastly, the book discusses the field's accomplishments, strengths, weaknesses, and requirements. Its authoritative yet picturesque, didactic style renders it accessible to researchers in cognitive translatology, bilingualism, and neurolinguistics, as well as teachers and practitioners in related areas. Succinctly, this piece establishes a much-needed platform for translation and interpreting studies to fruitfully interact with cognitive neuroscience.

5-HT2B Receptors Luc Maroteaux 2021-03-12 This contributed volume provides a comprehensive assessment of the roles played by 5-HT2B receptors in humans. These receptors have been shown to play an important role in the cardiac, intestinal, and central nervous systems as well as in bone marrow formation and growth. In this book, expert researchers present their findings on molecular and physiological/pathological aspects of 5-HT2B receptors. The molecular section includes a discussion of the genetics of 5-HT2B receptors and impulse control. The physiological section covers their role in many biological systems including the nervous system, the heart, and the lungs.?

Mosquitopia Marcus Hall 2021-09-02 This edited volume brings together natural scientists, social scientists and humanists to assess if (or how) we may begin to coexist harmoniously with the mosquito. The mosquito is humanity's deadliest animal, killing over a million people each year by transmitting malaria, yellow fever, Zika and several other diseases. Yet of the 3,500 species of mosquito on Earth, only a few dozen of them are really dangerous—so that the question arises as to whether humans and their mosquito foe can learn to live peacefully with one another. Chapters assess polarizing arguments for conserving and preserving mosquitoes, as well as for controlling and killing them, elaborating on possible consequences of both strategies. This book provides informed answers to the dual question: could we eliminate mosquitoes, and should we? Offering insights spanning the technical to the philosophical, this is the “go to” book for exploring humanity's many relationships with the mosquito—which becomes a journey to finding better ways to inhabit the natural world. Mosquitopia will be of interest to anyone wanting to explore dependencies between human health and natural systems, while offering novel perspectives to health planners, medical experts, environmentalists and animal rights advocates.

Hollywood Highbrow Shyon Baumann 2018-06-05 Today's moviegoers and critics generally consider some Hollywood products—even some blockbusters—to be legitimate works of art. But during the first half century of motion pictures very few Americans would have thought to call an American movie "art." Up through the 1950s, American movies were regarded as a form of popular, even lower-class, entertainment. By the 1960s and 1970s, however, viewers were regularly judging Hollywood films by artistic criteria previously applied only to high art forms. In Hollywood Highbrow, Shyon Baumann for the first time tells how social and cultural forces radically changed the public's perceptions of American movies just as those forces were radically changing the movies themselves. The development in the United States of an appreciation of film as an art was, Baumann shows, the product of large changes in Hollywood and American society as a whole. With the postwar rise of television, American movie audiences shrank dramatically and Hollywood responded by appealing to richer and more educated viewers. Around the same time, European ideas about the director as artist, an easing of censorship, and the development of art-house cinemas, film festivals, and the academic field of film studies encouraged the idea that some American movies—and not just European ones—deserved to be considered art.

Afterlives of Confinement Susana Draper 2012 During the age of dictatorships, Latin American prisons became a symbol for the vanquishing of political opponents, many of whom were never seen again. In the post-dictatorship era of the 1990s, a number of these prisons were repurposed into shopping malls, museums, and memorials. Susana Draper uses the phenomenon of the "opening" of prisons and detention centers to begin a dialog on conceptualizations of democracy and freedom in post-dictatorship Latin America. Focusing on the Southern Cone nations of Uruguay, Chile, and Argentina, Draper examines key works in architecture, film, and literature to peel away the veiled continuity of dictatorial power structures in ensuing consumer cultures. The afterlife of prisons became an important tool in the "forgetting" of past politics, while also serving as a reminder to citizens of the liberties they now enjoyed. In Draper's analysis, these symbols led the populace to believe they had attained freedom, although they had only witnessed the veneer of democracy—in the ability to vote and consume. In selected literary works by Roberto Bolaño, Eleuterio Fernández Huidoboro, and Diamela Eltit and films by Alejandro Agresti and Marco Bechis, Draper finds further evidence of the emptiness and melancholy of underachieved goals in the afterlife of dictatorships. The social changes that did not occur, the inability to effectively mourn the losses of a now-hidden past, the homogenizing effects of market economies, and a yearning for the promises of true freedom are thematic currents underlying much of these texts. Draper's study of the manipulation of culture and consumerism under the guise of democracy will have powerful implications not only for Latin Americanists but also for those studying neoliberal transformations globally.

The Republic of Arabic Letters Alexander Bevilacqua 2018-02-23 A Longman—History Today Book Prize Finalist Winner of the Thomas J. Wilson Memorial Prize A Times Literary Supplement Book of the Year “Deeply thoughtful...A delight.” —The Economist “[A] tour de force...Bevilacqua's extraordinary book provides the first true glimpse into this story...He, like the tradition he describes, is a rarity.” —New Republic In the seventeenth and eighteenth centuries, a pioneering community of Western scholars laid the groundwork for the modern understanding of Islamic civilization. They produced the first accurate translation of the Qur'an, mapped Islamic arts and sciences, and wrote Muslim history using Arabic sources. The Republic of Arabic Letters is the first account of

this riveting lost period of cultural exchange, revealing the profound influence of Catholic and Protestant intellectuals on the Enlightenment understanding of Islam. "A closely researched and engrossing study of...those scholars who, having learned Arabic, used their mastery of that difficult language to interpret the Quran, study the career of Muhammad...and introduce Europeans to the masterpieces of Arabic literature." —Robert Irwin, Wall Street Journal "Fascinating, eloquent, and learned, The Republic of Arabic Letters reveals a world later lost, in which European scholars studied Islam with a sense of affinity and respect...A powerful reminder of the ability of scholarship to transcend cultural divides, and the capacity of human minds to accept differences without denouncing them." —Maya Jasanoff "What makes his study so groundbreaking, and such a joy to read, is the connection he makes between intellectual history and the material history of books." —Financial Times

Hockey: Then to WOW! The Editors of Sports Illustrated Kids 2017-09-26 Hockey: Then to WOW! shows readers how the cool sport has evolved from the early days of its 19th century origins to the game as it is today. Using NHL action photographs, illustrations, stories, and trivia, the book is a journey through time both for hockey fans and those new to the game. Kids will learn how basic equipment has changed from a ball to a puck and how the evolution of game strategy has transformed the sport, players, and equipment. Players throughout history are stacked up against each other in every position so fans can dream up the perfect fantasy team with Wayne Gretzky playing alongside Patrick Roy and Stan Mikita. A fun-filled section of the book explores everything fan culture—from the best ice rinks, to the iconic hockey sweater and the hockey haircut along with key aspects of the toughest sport around.

On the Threshold of Knowing Lucia Rainer 2017-04-30 In this in-depth analysis of artistic and academic lectures and performances, Lucia Rainer features an innovative conceptual and methodological tool that augments Goffman's Frame Analysis with a praxeological perspective. This way, she gives profound insight into how knowledge - as a practice and a concept - is associated with clarity rather than truth. Based on four case studies - including John Cage's unpublished and unabridged audio recording of Lecture on Nothing - the study explores how the concept of lecture performances, which adheres to two frames that never entirely blend, provides a space to (re-)negotiate the artistic-academic relationship.

Advances in the Neurocognition of Music and Language Daniela Sammler 2020-09-16 Neurocomparative music and language research has seen major advances over the past two decades. The goal of this Special Issue on "Advances in the Neurocognition of Music and Language" was to showcase the multiple neural analogies between musical and linguistic information processing, their entwined organization in human perception and cognition, and to infer the applicability of the combined knowledge in pedagogy and therapy. Here, we summarize the main insights provided by the contributions and integrate them into current frameworks of rhythm processing, neuronal entrainment, predictive coding, and cognitive control.
