Diet, Nutrition, and the Prevention of Chronic Diseases World Health Organization 2003-04-22 Trends such as shifting dietary patterns and an increasingly sedentary lifestyle combined with smoking and alcohol consumption are major risk factors for noncommunicable chronic diseases such as obesity, diabetes, cardiovascular diseases such as hypertension and stroke, cancer dental diseases and osteoporosis. This report reviews the scientific evidence on the effects of diet, nutrition and physical activity on chronic diseases and makes recommendations for public health policies and programmes. Issues considered include the macro-economic implications of public health on agriculture and the global supply and demand for fresh and processed foods.

Teaching Translation from Spanish to English Allison Beeby Lonsdale 1996 While many professional translators believe the ability to translate is a gift that one either has or does not have, Allison Beeby Lonsdale questions this view. In her innovative book, she demonstrates how teachers can guide their students by showing them how insights from communication theory, discourse analysis, pragmatics, and semiotics illuminate the translation process. Challenging long-held assumptions, she establishes a fascinating framework on which to base the structure of a professional prose-translation class. Her original contributions to the question of directionality and to the specific strategies of translating are applicable to not only the teaching of translation from Spanish to English, but to other teaching situations and to other pairs of languages as well. She also reviews the latest attempts in translation theory to define and contextualize ideal translator competence, student translator competence, and general translation strategies. Beeby Lonsdale completes her book by applying her conclusions to selecting and organizing the content of teaching translation from Spanish to English. She illustrates one or more of the basic translation principles through 29 teaching

units, which are prefaced by objectives, tasks, and commentaries for the teacher, and through 48 task sheets, which show how to present the material to students.

Theories of Personality Duane P. Schultz 2001 This revision of the Schultz's popular text surveys the field, presenting theory-by-theory coverage of the major theorists who represent the psychoanalytic, neopsychanalytic, life-span, trait, humanistic, cognitive, behavioral, and social-learning approaches, as well as clinical and experimental work. Where warranted, the authors show how the development of certain theories was influenced by events in a theorist's personal and professional life. This thoroughly revised Seventh Edition now incorporates more examples, tables, and figures to help bring the material to life for students. The new content in this edition reflects the dynamism in the field. The text explores how race, gender, and culture issues figure in the study of personality and in personality assessment. In addition, a final integrative chapter looks at the study of personality theories and suggests conclusions that can be drawn from the many theorists' work.

Outliers Malcolm Gladwell 2008-11-18 From the bestselling author of *Blink* and *The Tipping Point*, Malcolm Gladwell's *Outliers: The Story of Success* overturns conventional wisdom about genius to show us what makes an ordinary person an extreme overachiever. Why do some people achieve so much more than others? Can they lie so far out of the ordinary? In this provocative and inspiring book, Malcolm Gladwell looks at everyone from rock stars to professional athletes, software billionaires to scientific geniuses, to show that the story of success is far more surprising, and far more fascinating, than we could ever have imagined. He reveals that it's as much about where we're from and what we do, as who we are - and that no one, not even a genius, ever makes it alone. *Outliers* will change the way you think about your own life story, and about what makes us all unique. 'Gladwell is not only a brilliant storyteller; he can see what those stories tell us, the lessons they contain' *Guardian* 'Malcolm Gladwell is a global phenomenon ... he has a genius for making everything he writes seem like an impossible adventure' *Observer* 'He is the best kind of writer - the kind who makes you feel like you're a genius, rather than he's a genius' *The Times*

Acid Dreams Martin A. Lee 1992 Provides a social history of how the CIA used the psychedelic drug LSD as a tool of espionage during the early 1950s and tested it on U.S. citizens before it spread into popular culture, in particular the counterculture as represented by Timothy Leary, Allen Ginsberg, Ken Kesey, and others who helped spawn political and social upheaval.

Why Democracies Flounder and Fail Michael Haas 2018-06-26 Democracy is in crisis because voices of the people are ignored due to a politics of mass society. After demonstrating how the French Fourth Republic failed, wherein Singapore's totalitarianism is a dangerous model, Washington is enmeshed in gridlock, and there is a global democracy deficit, solutions are offered to revitalize democracy as the best form of government. The book demonstrates how mass society politics operates, with intermediate institutions of civil society (media, pressure groups, political parties) no longer transmitting the will of the people to government but instead are concerned with corporate interests and have developed oligarchical mindsets. Rather than micro-remedy bandaids, the author focuses on the need to transform governing philosophies from pragmatic to humanistic solutions.

Leaving Little Havana Cecilia M Fernandez 2015-01-06 Revolution uprooted six-year-old Cecilia from her comfortable middle-class Cuban home and dropped her into the low-income neighborhood of Miami's Little Havana. Her philandering father focused on rebuilding his career, chasing the American promise of wealth and freedom from the past. Her mother spiraled into madness trying to hold the family together and get him back. Neglected and trapped, Cecilia rebelled against her conservative culture and embraced the 1960s counter-

culture - seeking love, attention and a place of her own in America. But immigrant children either thrive or self-destruct in a new land. How will Cecilia beat the odds? While most memoirs by Cuban-Americans revolve around childhood scenes in Cuba and explore the experiences of a young man, *Leaving Little Havana* is the first refugee memoir to focus on a Cuban girl growing up in America, rising above the obstacles and clearing a path to her American Dream. "Leaving Little Havana is the compelling story of a Cuban girl seeking a new life in the U.S. with her family as the Cuban revolution unfolds in the early sixties. 'Cecilita's' personal account, and sexual awakening, is transparent, sad, and triumphant, sprinkled with anecdotes of an emerging Cuban-American landscape. In short, this book is a colorful reminiscence of historical scenes on both sides of the Straits of Florida, providing closure to a Cuban American journalist coming to terms with her turbulent past." - Guarione M. Diaz, President Emeritus, Cuban American National Council "Cecilia Fernandez's memoir of growing up Cuban in Miami is not only fascinating reading, it tells more about the story of Cubans in this U.S. than a truckload of sociology textbooks - and is a thousand times more entertaining!" - Dan Wakefield, author of *New York in the Fifties* "Leaving Little Havana is a candid, touching, and engaging memoir of a young Cuban exile's coming of age. Cecilia Fernandez writes with passion and intensity, both of her missteps and her triumphs, casting fresh light on the American experience in the process." - Les Standiford, author of *Havana Run and Bringing Adam Home* "Cecilia Fernandez gives us a coming of age story told with wide open eyes and vivid details of growing up in Little Havana. Broken-hearted more times than she can count, she gradually finds a path to new beginnings and the infinite promises of the American Dream. A poignant and important chronicle of the Miami Cuban immigrant journey." - Ruth Behar, author of *Traveling Heavy: A Memoir in Between Journeys* "Every so often along comes a book that seizes you by the collar and arrests you on the spot. From page one, *Leaving Little Havana* is a brilliant, voice-driven book that will make your heart skip a few beats. My experience reading this book was similar to the first time I read *The House on Mango Street* by Sandra Cisneros when you instantly know you are reading a classic, a story so achingly beautiful and unforgettable you relish every last word as if it were the buzzing of a hummingbird at your lips feeding you honey. This book is about family, about what happens to family in exile, about how people come into a great world of struggle and manage to get by and survive. The author has a great gift for capturing that world-known enclave of Miami we love and call Little Havana. This might be the book that puts it on the literary map for good and forever." - Virgil Suárez, author of *Latin Jazz, The Cutter, and 90 Miles: Selected and New Poems*

*Brands of Faith* Mara Einstein 2007-09-14 In a society overrun by commercial clutter, religion has become yet another product sold in the consumer marketplace, and faiths of all kinds must compete with a myriad of more entertaining and more convenient leisure activities. *Brands of Faith* argues that in order to compete effectively faiths have had to become brands – easily recognizable symbols and spokespeople with whom religious prospects can make immediate connections Mara Einstein shows how religious branding has expanded over the past twenty years to create a blended world of commerce and faith where the sacred becomes secular and the secular sacred. In a series of fascinating case studies of faith brands, she explores the significance of branded church courses, such as Alpha and The Purpose Driven Life, mega-churches, and the popularity of the televangelist Joel Olsteen and television presenter Oprah Winfrey, as well as the rise of Kaballah. She asks what the consequences of this religious marketing will be, and outlines the possible results of religious commercialism – good and bad. Repackaging religion – updating music, creating teen-targeted bibles – is justifiable and necessary. However, when the content becomes

obscured, religion may lose its unique selling proposition – the very ability to raise us above the market.

Theoretical Foundations of Health Education and Health Promotion Manoj Sharma 2012 "Introduces students to common theories from behavioral and social sciences that are currently being used in health education and promotion. Each discussion of theory is accompanied by a practical skill-building activity in the context of planning and evaluation and a set of application questions that will assist the student in mastering the application of the theory."--

International Handbook of Urban Education William T. Pink 2008-09-03 The universality of the problematics with urban education, together with the importance of understanding the context of improvement interventions, brings into sharp focus the importance of an undertaking like the International Handbook of Urban Education. An important focus of this book is the interrogation of both the social and political factors that lead to different problem posing and subsequent solutions within each region.

The Structures of Practical Knowledge Matteo Valleriani 2017-02-20 The Structures of Practical Knowledge investigates the nature of practical knowledge – why, how, when and by whom it is codified, and once codified, how this knowledge is structured. The inquiry unfolds in a series of fifteen case studies, which range in focus from early modern Italy to eighteenth century China. At the heart of each study is a shared definition of practical knowledge, that is, knowledge needed to obtain a certain outcome, whether that be an artistic or mechanical artifact, a healing practice, or a mathematical result. While the content

of practical knowledge is widely variable, this study shows that all practical knowledge is formally equivalent in following a defined workflow, as reflected in a construction procedure, a recipe, or an algorithm. As explored in the volume's fifteen contributions, there are three levels at which structures of practical knowledge may be understood and examined. At the most immediate level, there are the individual workflows that encompasses practical knowledge itself. Probing further, it is possible to examine the structure of practical knowledge as it is externalized and codified in texts, drawings, and artifacts such as models. Finally, practical knowledge is also related to social structures, which fundamentally determine its dissemination and evolution into new knowledge structures. The social structures of professionals and institutions represent the critical means by which practical knowledge takes form. These actors are the agents of codification, and by means of selection, appropriation, investment, and knowledge development, they determine the formation of new structures of practical knowledge. On a more abstract level, the creation of new knowledge structures is understood as constituting the basis for the further development of scientific knowledge. Rich in subject matter and incisive in the theory it lays out, this volume represents an important contribution to the history of science and epistemology. Individually, the fifteen case studies – encompassing the history of architecture, mining, brewing, glass production, printing, ballistics, mechanics, cartography, cosmology and astronomy – are replete with original research, and offer new insights into the history of science. Taken together, the contributions remodel historical epistemology as a whole, elucidating the underlining knowledge structures that transcend disciplinary boundaries, and that unite practitioners across time and space.

Dakini Power Michaela Haas 2013-04-09 What drives a young London librarian to board a ship to India, meditate in a remote cave by herself for twelve years, and then build a flourishing nunnery in the Himalayas? How does a surfer girl from Malibu become the head of the main international organization for Buddhist women? Why does the daughter of a music executive in Santa Monica dream so vividly of peacocks one night that she chases these images to Nepal, where she finds the love of her life in an unconventional young Tibetan master? The women featured in *Dakini Power*—contemporary teachers of Tibetan Buddhism, both Asians and Westerners, who teach in the West—have been universally recognized as accomplished practitioners and brilliant teachers whose life stories demonstrate their immense determination and bravery. Meeting them in this book, readers will be inspired to let go of old fears, explore new paths, and lead the lives they envision. Featured here are: • Jetsun Khandro Rinpoche (*This Precious Life*) • Dagmola Sakya (*Princess in the Land of Snows*) • Jetsun Tenzin Palmo (Diane Perry) (*Into the Heart of Life*) • Pema Chödrön (Deirdre Blomfield-Brown) (*When Things Fall Apart; Start Where You Are*) • Khandro Tsering Chödrön (most familiar to readers as the late aunt of Sogyal Rinpoche, author of *The Tibetan Book of Living and Dying*) • Thubten Chodron (*Cherry Greene*) (*Buddhism for Beginners; Taming the Mind*) • Karma Lekshe Tsomo (Patricia Zenn) (*Buddhism Through American Women's Eyes*) • Chagdud Khadro (Jane Dedman) (*P'howa Commentary; Life in Relation to Death*) • Sangye Khandro (Nanci Gay Gustafson) (*Meditation, Transformation, and Dream Yoga*) • Roshi Joan Halifax (*Being with Dying*) • Lama Tsultrim Allione (Joan Rousmanière Ewing) (*Women of Wisdom; Feeding Your Demons*) • Elizabeth Mattis-Namgyel (*The Power of an Open Question*)

Sport Psychology Nicholas T. Gallucci 2013-12-04 *Sport Psychology*, 2nd Edition provides a synthesis of the major topics in sport psychology with an applied focus and an emphasis on achieving optimal performance. After exploring the history of sport psychology, human motivation, and the role of exercise, there are three main sections to the text: Performance

Enhancement, Performance Inhibition, and Individuals and Teams. The first of these sections covers topics such as anxiety, routines, mental imagery, self-talk, enhancing concentration, relaxation, goals, and self-confidence. The section on Performance Inhibition includes chapters on choking under pressure, self-handicapping, procrastination, perfectionism, helplessness, substance abuse, and disruptive personality factors. While much of the information presented is universally applicable, individual differences based on gender, ethnicity, age, and motivation are emphasized in the concluding section on Individuals and Teams. Throughout, there are case studies of well-known athletes from a variety of sports to illustrate topics that are being explored.

Should We Let the Bomb Spread? Henry D Sokolski 2019-07-27 Nuclear deterrence and nonproliferation no longer enjoy the broad support they once did during the Cold War. Academics and security experts now question the ability of either to cope or check nuclear rogue states or terrorists. On the one hand, America's closest allies-e.g., Japan and South Korea-believe American nuclear security guarantees are critical to their survival. If the United States is unwilling to provide Tokyo or Seoul with the assurance they believe they need, would it then not make sense for them to acquire nuclear forces of their own? On the other hand, with more nuclear-armed states and an increased willingness to use them, how likely is it that nuclear deterrence will work? This volume investigates these questions. In it, six experts offer a variety of perspectives to catalyze debate. The result is a rich debate that goes well beyond current scholarship to challenge the very basis of prevailing nonproliferation and security policies.

The Future of the Public's Health in the 21st Century Institute of Medicine 2003-02-01 The anthrax incidents following the 9/11 terrorist attacks put the spotlight on the nation's public health agencies, placing it under an unprecedented scrutiny that added new dimensions to the complex issues considered in this report. The Future of the Public's Health in the 21st Century reaffirms the vision of Healthy People 2010, and outlines a systems approach to assuring the nation's health in practice, research, and policy. This approach focuses on joining the unique resources and perspectives of diverse sectors and entities and challenges these groups to work in a concerted, strategic way to promote and protect the public's health. Focusing on diverse partnerships as the framework for public health, the book discusses: The need for a shift from an individual to a population-based approach in practice, research, policy, and community engagement. The status of the governmental public health infrastructure and what needs to be improved, including its interface with the health care delivery system. The roles nongovernment actors, such as academia, business, local communities and the media can play in creating a healthy nation. Providing an accessible analysis, this book will be important to public health policy-makers and practitioners, business and community leaders, health advocates, educators and journalists.

Spell of the Urubamba Daniel W. Gade 2015-10-05 This work examines the valley of the Urubamba River in terms of vertical zonation, Incan impact on the environment, plant use, the history of exploration and the notion of discovery, the idea of land reform, and cultural contact with the European world. Winding its path northward from the Andean Highlands to the Amazon, the valley has served as the stage of pre-Columbian civilizations and focal point of Spanish conquest in Peru. "Gade left behind not only a superb body of scholarly work, but a network of colleagues and students who remain indebted to his example. This book should serve as an inspiration for all scholars who wish to pursue the Sauerian, counter enlightenment or post development agendas of understanding and respecting particular

places in all their historical and cultural complexity, including ambiguities and contradictions." -- The Geographical Review, American Geographical Society

Preharvest Food Safety Siddhartha Thakur 2019-12-17 An overview of farm-to-fork safety in the preharvest realm Foodborne outbreaks continue to take lives and harm economies, making controlling the entry of pathogens into the food supply a priority. Preharvest factors have been the cause of numerous outbreaks, including Listeria in melons, Salmonella associated with tomatoes, and Shiga toxin-producing E.coli in beef products, yet most traditional control measures and regulations occur at the postharvest stage. Preharvest Food Safety covers a broad swath of knowledge surrounding topics of safety at the preharvest and harvest stages, focusing on problems for specific food sources and food pathogens, as well as new tools and potential solutions. Led by editors Siddhartha Thakur and Kalmia Kniel, a team of expert authors provides insights into critical themes surrounding preharvest food safety, including Challenges specific to meat, seafood, dairy, egg, produce, grain, and nut production Established and emerging foodborne and agriculture-related pathogens Influences of external factors such as climate change and the growing local-foods trend Regulatory issues from both US and EU perspectives Use of pre- and probiotics, molecular tools, mathematical modeling, and one health approaches Intended to encourage the scientific community and food industry stakeholders to advance their knowledge of the developments and challenges associated with preharvest food safety, this book addresses the current state of the field and provides a diverse array of chapters focused on a variety of food commodities and microbiological hazards.

Building Brand Authenticity M. Beverland 2009-10-22 The projection of authenticity is one of the key pillars of marketing. Research reveals that consumers seek authenticity through the brands they choose. Based on extensive research with consumers and brand managers this book offers seven guiding principles for building brand authenticity.

Basic Issues in Police Performance 1982 Since the complexity of police services does not lend itself to standardized performance measures, measurement techniques should be designed to inform more about what police do and how they affect their communities. This report reviews conventional police measurement practices and offers ways to improve the management value of performance information. Traditional performance measurement has emphasized the measurement of individual departments' effectiveness in preventing crime. This approach fails to consider the broad range of other police duties, citizens' expectations of police, and how police activities produce social change. Police can be evaluated in terms of efficiency, effectiveness, equity, and accountability, but citizens disagree about which of these performance criteria are the most important because community/police problems are too diverse. Instead of developing uniform, inflexible performance standards to apply globally to entire departments, evaluators should ask more detailed questions about common police processes and their results. Sketchy knowledge of how policing works now produces many hypotheses, but rarely standards worthy of emulation. Evaluators should develop better theories about police functions, obtain more reliable data, and control data collection costs with the aid of police managers so that measures inform departmental policymakers. Tables, diagrams, and 197 references are given. Appendixes include police services study data and a list of problem codes.

Politically Incorrect Nutrition Michael Barbee 2012-05-22 Did you know that some noncaloric artificial sweeteners can actually make you fat—or even kill you? Did you know that the overconsumption of certain soy products can upset your hormonal balance and lead to

hypothyroidism? Most people didn't, until now. Politically Incorrect Nutrition exposes many current and widely held beliefs foisted on both consumers and health-care practitioners by well-oiled, agenda-driven food industry propaganda. It analyzes popular claims and reveals what, in fact, is healthy—and what is decidedly unhealthy—by exploring the most current and objective scientific data regarding good nutrition. If you want to provide the best possible food for yourself and your family, or if you simply want to learn the truth behind the many food myths that are presented to us day after day, Politically Incorrect Nutrition is must reading.

Strategic Public Relations Leadership Anne Gregory 2013-07-18 Public relations is operating in an increasingly challenging and complex environment. Pressures from outside the organisation include new accountabilities, empowered stakeholders, increased public cynicism and a new communication landscape. Internally, there are increasing demands to demonstrate a return on investment, alongside a requirement to coach and counsel senior managers exposed to these environmental pressures. This context requires public relations professionals to be able to clearly articulate and demonstrate their own contribution to organisational effectiveness. This textbook provides public relations leaders with a framework to do this, as well as a checklist of essential capabilities which they must acquire and exhibit if they are to operate at the highest levels of any organisation. This short textbook is suitable for aspiring practitioners, MBA and other masters qualifications in public relations - especially for those students who wish to pursue a successful career as a professional PR specialist able to operate strategically at the top of successful organisations.

Burnout for Experts Sabine Bährer-Kohler 2012-11-11 Wherever people are working, there is some type of stress—and where there is stress, there is the risk of burnout. It is widespread, the subject of numerous studies in the U.S. and abroad. It is also costly, both to individuals in the form of sick days, lost wages, and emotional exhaustion, and to the workplace in terms of the bottom line. But as we are now beginning to understand, burnout is also preventable. Burnout for Experts brings multifaceted analysis to a multilayered problem, offering comprehensive discussion of contributing factors, classic and less widely perceived markers of burnout, coping strategies, and treatment methods. International perspectives consider phase models of burnout and differentiate between burnout and related physical and mental health conditions. By focusing on specific job and life variables including workplace culture and gender aspects, contributors give professionals ample means for recognizing burnout as well as its warning signs. Chapters on prevention and intervention detail effective programs that can be implemented at the individual and organizational levels. Included in the coverage:

- History of burnout: a phenomenon.
- Personal and external factors contributing to burnout.
- Depression and burnout
- Assessment tools and methods.
- The role of communication in burnout prevention.
- Active coping and other intervention strategies.

Skillfully balancing scholarship and accessibility, Burnout for Experts is a go-to resource for health psychologists, social workers, psychiatrists, and organizational, industrial, and clinical psychologists.

Memory and Cultural History of the Spanish Civil War 2013-10-04 The volume addresses the study of political violence from a humanistic and democratic perspective. The chapters utilize the lens of gender, examine myths and otherness, reflect on structural hunger and fear, and narrate testimonials of exile abroad and in Spain. The methodologies employed are grounded in hermeneutics and discourse analysis.

Arrival Cities Burcu Dogramaci 2020-09-01 Exile and migration played a critical role in the diffusion and development of modernism around the globe, yet have long remained largely understudied phenomena within art historiography. Focusing on the intersections of exile, artistic practice and urban space, this volume brings together contributions by international researchers committed to revising the historiography of modern art. It pays particular attention to metropolitan areas that were settled by migrant artists in the first half of the 20th century. These arrival cities developed into hubs of artistic activities and transcultural contact zones where ideas circulated, collaborations emerged, and concepts developed. Taking six major cities as a starting point – Bombay (now Mumbai), Buenos Aires, Istanbul, London, New York, and Shanghai –the authors explore how urban topographies and landscapes were modified by exiled artists re-establishing their practices in metropolises across the world. Questioning the established canon of Western modernism, Arrival Cities investigates how the migration of artists to different urban spaces impacted their work and the historiography of art. In doing so, it aims to encourage the discussion between international scholars from different research fields, such as exile studies, art history, social history, architectural history, architecture, and urban studies.

Make Him Look Good Alisa Valdes-Rodriguez 2007-02-20 The "him" in Make Him Look Good is Ricky Biscayne, sexy Latin singing sensation who has taken the pop world by storm. But it takes more than swiveling hips and dreamy eyes to get to the top of the charts. The women who orbit Ricky are: -- Milan, Ricky's new publicist, and her sister Geneva whose Club G promises to have Miami's hottest opening ever -- Jill Sanchez, a media-maniac Latina star who has crossed over from CDs to perfume, clothes and movies -- Jasminka, Ricky's gorgeous Croatian model wife -- Irene, a firefighter whose high school romance with Ricky was the last love in her life, eking out an existence for herself and her daughter Sophia, who is beginning to suspect that she and Ricky Biscayne look a little too much alike With several satisfying romances set against Miami's music, club and modeling scenes, Make Him Look Good is irresistible fiction from one of America's most original voices.

Female Corpses in Crime Fiction Glen S. Close 2018-10-10 This book examines the central significance of sexualized female corpses in modern and contemporary Hispanic and Anglophone crime fiction. Beginning with the foundational detective fictions of the nineteenth century, it draws from diverse subgenres to describe a transatlantic tradition of necropornography characterized by lascivious interest in female cadavers, dissection, morgues, femicide, and snuff movies. Hard-boiled and police procedural classics from the U.S. and the U.K. are juxtaposed with texts by established Spanish and Spanish American genre masters and with obscure works that prefigure the contemporary transmedial boom in corpse-centered fictions. The rhetoric and aesthetics of necropornographic crime fiction are

related to those of popular crime journalism and forensic-science television dramas. This study argues that crime fiction has long fixated disproportionately on the corpses of beautiful young white women and continues to treat their deaths and autopsies as occasions for male visual pleasure, male subjective self-affirmation and male homosocial bonding.
