The Sexism of Social and Political Theory Lorenne M. G. Clark 1979

Pharmacology and Nutritional Intervention in the Treatment of Disease Faik

Atroshi 2014-05-28 Pharmacology and Nutritional Intervention in the Treatment of

Disease is a book dealing with an important research field that has worldwide significance. Its aim is to strengthen the research base of this field of investigation as it yields knowledge that has important implications for biomedicine, public health and biotechnology. The book has brought together an interdisciplinary group of contributors and prominent scholars from different parts of the world. The basic purpose of this book was to promote interaction and discussion of problems of mutual interests among people in related fields everywhere. The main subjects of the book include nutrition, mechanisms underlying treatments, physiological aspects of vitamins and trace elements, antioxidants: regulation, signalling, infection and inflammation, and degenerative and chronic diseases.

Aristotle's Generation of Animals Andrea Falcon 2018-01-11 Generation of

Animals is one of Aristotle's most mature, sophisticated, and carefully crafted scientific writings. His overall goal is to provide a comprehensive and systematic account of how animals reproduce, including a study of their reproductive organs, what we would call fertilization, embryogenesis, and organogenesis. In this book, international experts present thirteen original essays providing a philosophically

and historically informed introduction to this important work. They shed light on the unity and structure of the *Generation of Animals*, the main theses that Aristotle defends in the work, and the method of inquiry he adopts. They also open up new avenues of exploration of this difficult and still largely unexplored work. The volume will be essential for scholars and students of ancient philosophy as well as of the history and philosophy of science.

Galenism; Rise and Decline of a Medical Philosophy Owsei Temkin 1973

The Nineteenth-Century Woman Sara Delamont 2012-10-09 This collection of papers draws on insights from social anthropology to illuminate historical material, and presents a set of closely integrated studies on the inter-connections between feminism and medical, social and educational ideas in the nineteenth century. Throughout the book evidence from both the USA and UK shows that feminists had to operate in a restricting and complex social environment in which the concept of "the lady" and the ideal of the saintly mother defined the nineteenth-century woman's cultural and physical world.
