Islands of History Marshall Sahlins 2013-03-06 Marshall Sahlins centers these essays on islands—Hawaii, Fiji, New Zealand—whose histories have intersected with European history. But he is also concerned with the insular thinking in Western scholarship that creates false dichotomies between past and present, between structure and event, between the individual and society. Sahlins's provocative reflections form a powerful critique of Western history and anthropology.

The Essential Gay Mystics Andrew Harvey 1998 Books about homosexuality and religion have traditionally attempted to reconcile "sin" with a modern understanding of sexuality. Andrew Harvey's The Essential Gay Mystics,

however, is predicated on the assumption that sin and sex don't need to be reconciled and that gay sexuality is innately spiritual. Excerpting passages from 60 gay and lesbian writers--covering 20 centuries and at least a dozen traditions including classical Greek, Native American, Sufic, and Christian-- Harvey explores a variety of religious and sexual experiences. His extensive research, empathetic perspective, and compelling grasp of spirituality make this book not only unique, but also vital to an understanding of contemporary theology and religion.

Computer Architecture Gerrit A. Blaauw 1997 In this remarkable book on computer design, long-known in the field and widely used in manuscript form, Gerrit A. Blaauw and Frederick P. Brooks, Jr. provide a definitive guide and reference for practicing computer architects and for students. The book complements Brooks' recently updated classic, The Mythical Man-Month, focusing here on the design of hardware and there on software, here on the content of computer architecture and there on the process of architecture design. The book's focus on architecture issues complements Blaauw's early work on implementation techniques. Having experienced most of the computer age, the authors draw heavily on their first-hand knowledge, emphasizing timeless insights and observations. Blaauw and Brooks first develop a conceptual framework for understanding computer architecture. They then describe not only what present architectural practice is, but how it came to be so. A major theme is the early divergence and the later reconvergence of computer architectures. They examine both innovations that survived and

became part of the standard computer, and the many ideas that were explored in real machines but did not survive. In describing the discards, they also address why these ideas did not make it. The authors' goals are to analyze and systematize familiar design alternatives, and to introduce you to unfamiliar ones. They illuminate their discussion with detailed executable descriptions of both early and more recent computers. The designer's most important study, they argue, is other people's designs. This book's computer zoo will give you a unique resource for precise information about 30 important machines. Armed with the factors pro and con on the various known solutions to design problems, you will be better able to determine the most fruitful architectural course for your own design. 0201105578B04062001

Chuck Jones Chuck Jones 2005 Chuck Jones: Conversations brings to life the legendary Warner Bros. artist who helped shape the history of American animation, defining our impressions of such characters as Bugs Bunny, Daffy Duck, Road Runner, Wile E. Coyote, and Pepé le Pew. These interviews span more than thirty years, beginning with a 1968 conversation in which Jones (1912-2002) shares the spotlight with science fiction giant Ray Bradbury.

Throughout, the interviews illustrate the development of Jones's career, including shifts that came after the Warner Bros. animation unit closed in the early 1960s-from the uncertain years of American animation during that decade and the 1970s through the "rediscovery" of Jones and Hollywood studio animation during the 1980s and 1990s. Jones candidly discusses his aesthetic sensibilities, providing tips for aspiring animators and describing Warner Bros. animation in its heyday. Jones was an art college graduate who struggled through the Depression, trying to establish himself within the Hollywood industry. In these conversations he emerges as a witty raconteur and a well-read, inspiring advocate for animation art, intent on nurturing future generations of animators. Jones recalls vividly the Golden Age of studio animation from the 1930s to the 1950s, including his connections with the Walt Disney studio and United Productions of America. With pleasure, insight, and depth, he describes his family and early life as well as his post-Looney Tunes and Merrie Melodies days. These interviews reveal Jones's struggles as an artist, the many influences upon him, and the creative process that made him famous. This volume contains previously unpublished material along with classic interviews. Maureen Furniss, Savannah, Georgia, professor of

animation and film at Savannah College of Art and Design, is the founding editor and publisher of Animation Journal. She is the author of Art in Motion: Animation Aesthetics, and her work has appeared in many periodicals. Encyclopedia of Computer Science Anthony Ralston 2003-08-29 The Encyclopedia of Computer Science is the definitive reference in computer science and technology. First published in 1976, it is still the only single volume to cover every major aspect of the field. Now in its Fourth Edition, this influential work provides an historical timeline highlighting the key breakthroughs in computer science and technology, as well as clear and concise explanations of the latest technology and its practical applications. Its unique blend of historical perspective, current knowledge and predicted future trends has earned it its richly deserved reputation as an unrivalled reference classic. What sets the Encyclopedia apart from other reference sources is the comprehensiveness of each of its entries. Encompassing far more than mere definitions, each article elaborates on a topic giving a remarkable breadth and depth of coverage. The visual impact of the volume is enhanced with a 16 page colour insert spotlighting advanced computer applications and computer-generated graphics technology. In addition, the text is enlivened with figures,

tables, diagrams, illustrations and photographs. With contributions from over 300 international experts, the 4th Edition contains over 100 completely new articles ranging from artificial life to computer ethics, data mining to Java, mobile computing to quantum computing and software safety to the World Wide Web. In addition, each of the more than 600 articles have been extensively revised, expanded and updated to reflect the latest developments in computer science and technology. The Nehrus and the Gandhis Tariq Ali 2005 The Nehrus are a dynasty without precedent in the modern world; nowhere else and at no other time in recent history has a single family wielded such enduring and pervasive power over the country – and the electorate – they serve. From Jawaharlal Nehru to his daughter, Indira Gandhi, and from there, via Sanjay and Rajiv to – most recently – Sonia, this remarkable family have consistently established both the parameters and rhetoric of India's political development. In the eighties, Tariq Ali made several trips to India, meeting a wide range of political and public

figures, including Mrs Gandhi, and leaders of both the Congress and Opposition parties. The Nehrus and the Gandhis, first published in 1985, was the result. Now updated to include the most recent chapters in India's political history, it remains as relevant as ever, offering an intricate and revealing portrait of power, seen through the continued rise – and eyes – of one family. The Black Ascot Charles Todd 2019-02-05 Scotland Yard's Ian Rutledge seeks a killer who has eluded Scotland Yard for years in this next installment of the acclaimed New York Times bestselling series. An astonishing tip from a grateful ex-convict seems implausible—but Inspector Ian Rutledge is intrigued and brings it to his superior at Scotland Yard. Alan Barrington, who has evaded capture for ten years, is the suspect in an appalling murder during Black Ascot, the famous 1910 royal horse race meet honoring the late King Edward VII. His disappearance began a manhunt that consumed Britain for a decade. Now it appears that Barrington has returned to England, giving the Yard a last chance to retrieve its reputation and see justice done. Rutledge is put in charge of a quiet search under cover of a routine review of a cold case. Meticulously retracing the original inquiry, Rutledge begins to know Alan Barrington well, delving into relationships and secrets that hadn't surfaced in

1910. But is he too close to finding his man? His sanity is suddenly brought into question by a shocking turn of events. His sister Frances, Melinda Crawford, and Dr. Fleming stand by him, but there is no greater shame than shell shock. Questioning himself, he realizes that he cannot look back. The only way to save his career—much less his sanity—is to find Alan Barrington and bring him to justice. But is this elusive murderer still in England?
