Moon-face and Other Stories Jack London 1906 JACK LONDON (1876-1916), American novelist, born in San Francisco, the son of an itinerant astrologer and a spiritualist mother. He grew up in poverty, scratching a living in various legal and illegal ways -robbing the oyster beds, working in a canning factory and a jute mill, serving aged 17 as a common sailor, and taking part in the Klondike gold rush of 1897. This various experience provided the material for his works, and made him a socialist. "The son of the

Wolf" (1900), the first of his collections of tales, is based upon life in the Far North, as is the book that brought him recognition, "The Call of the Wild" (1903), which tells the story of the dog Buck, who, after his master's death, is lured back to the primitive world to lead a wolf pack. Many other tales of struggle, travel, and adventure followed, including "The Sea-Wolf" (1904), "White Fang" (1906), "South Sea Tales" (1911), and "Jerry of the South Seas" (1917). One of London's most interesting novels is the semi-autobiographical "Martin Eden" (1909). He also wrote socialist treatises, autobiographical essays, and a good deal of journalism.

Application of Surrogate-based Global Optimization to Aerodynamic Design Emiliano Iuliano 2015-10-05 Aerodynamic design, like many other engineering applications, is increasingly relying on computational power. The growing need for multi-disciplinarity and high fidelity in design optimization for industrial applications requires a huge number of repeated simulations in order to find an optimal design candidate. The main drawback is that each simulation can be computationally expensive – this becomes an even bigger issue when used within parametric studies, automated search or optimization loops, which

typically may require thousands of analysis evaluations. The core issue of a design-optimization problem is the search process involved. However, when facing complex problems, the high-dimensionality of the design space and the high-multi-modality of the target functions cannot be tackled with standard techniques. In recent years, global optimization using meta-models has been widely applied to design exploration in order to rapidly investigate the design space and find sub-optimal solutions. Indeed, surrogate and reduced-order models can provide a valuable alternative at a much lower computational cost. In this context, this volume offers advanced surrogate modeling applications and optimization techniques featuring reasonable computational resources. It also discusses basic theory concepts and their application to aerodynamic design cases. It is aimed at researchers and engineers who deal with complex aerodynamic design problems on a daily basis and employ expensive simulations to solve them.

Twelve Years a Slave Solomon Northup 2021-01-01 "Having been born a freeman, and for more than thirty years enjoyed the blessings of liberty in a free State—and having at the end of that time been kidnapped and sold into Slavery, where I remained, until happily rescued in the month of January, 1853, after a bondage of twelve years—it has been suggested that an account of my life and fortunes would not be uninteresting to the public." -an excerpt

Gordo Jaime Cortez 2021-08-10 Shedding profound natural light on the inner lives of migrant workers, Jaime Cortez's debut collection ushers in a new era of American literature that gives voice to a marginalized generation of migrant workers in the West. The first-ever collection of short stories by Jaime Cortez, Gordo is set in a migrant workers camp near Watsonville, California in the 1970s. A young, probably gay, boy named Gordo puts on a wrestler's mask and throws fists with a boy in the neighborhood, fighting his own tears as he tries to grow into the idea of manhood so imposed on him by his father. As he comes of age, Gordo learns about sex, watches his father's drunken fights, and discovers even his own documented Mexican-American parents are wary of illegal migrants. Fat Cookie, high schooler and resident artist, uses tiny library pencils to draw huge murals of graffiti flowers along the

camp's blank walls, the words "CHICANO POWER" boldly lettered across, until she runs away from home one day with her mother's boyfriend, Manny, and steals her mother's Panasonic radio for a final dance competition among the camp kids before she disappears. And then there are Los Tigres, the perfect pair of twins so dark they look like indios, Pepito and Manuel, who show up at Gyrich Farms every season without fail. Los Tigres, champion drinkers, end up assaulting each other in a drunken brawl, until one of them is rushed to the emergency room still slumped in an upholstered chair tied to the back of a pick-up truck. These scenes from Steinbeck Country seen so intimately from within are full of humor, family drama, and a sweet frankness about serious matters – who belongs to America and how are they treated? How does one learn decency, when laborers, grown adults, must fear for their lives and livelihoods as they try to do everything to bring home a paycheck? Written with balance and poise, Cortez braids together elegant and inviting stories about life on a California camp, in essence redefining what all-American means.

The Handbook for Embedded Formative Assessment Solution Tree 2017-11-09 Educational achievement carries more importance than ever in the 21st century. According to academic research, teacher quality plays the most vital role in raising achievement among all K<sub>12</sub> students, so improving teacher quality will lead to both greater student outcomes and greater prosperity for individuals and the whole of society. The Handbook for Embedded Formative Assessment makes the case that incorporating formative assessment into daily classroom practice raises teacher quality and enhances student learning to help all parties meet the evolving demands of society. As a companion to Embedded Formative Assessment, Second Edition (William, 2018), this book has one main purpose: to help teachers develop the practice of formative assessment in classrooms by providing tried-and-tested classroom formative
