Occupational and Environmental Safety and Health Pedro M. Arezes 2019-02-27 This book explores a number of important issues in the area of occupational safety and hygiene. Presenting both research and best practices for the evaluation of occupational risk, safety and health in various types of industry, it particularly focuses on occupational safety in automated environments, innovative management systems and occupational safety in a global context. The different chapters examine the perspectives of all those involved, such as managers, workers and OSH professionals. Based on selected contributions presented at the 15th International Symposium on Occupational Safety and Hygiene (SHO 2019), held on 15–16 April, 2019, in Guimarães, Portugal, the book serves as a timely reference guide and source of inspiration to OSH researchers, practitioners and organizations operating in a global context.

Critical Medical Anthropology Jennie Gamlin 2020-03-12 Critical Medical Anthropology presents inspiring work from scholars doing and engaging with ethnographic research in or from Latin America, addressing themes that are central to contemporary Critical Medical Anthropology (CMA). This includes issues of inequality, embodiment of history, indigeneity, non-communicable diseases, gendered violence, migration, substance abuse, reproductive politics and judicialisation, as these relate to health. The collection of ethnographically informed research, including original theoretical contributions, reconsiders the broader relevance of CMA perspectives for addressing current global healthcare challenges from and of Latin America. It includes work spanning four countries in Latin America (Mexico, Brazil, Guatemala and Peru) as well as the trans-migratory contexts they connect and are defined by. By drawing on diverse social practices, it addresses challenges of central relevance to medical anthropology and global health, including reproduction and maternal health, sex work, rare and chronic diseases, the pharmaceutical industry and questions of agency, political economy, identity, ethnicity, and human rights.

Essentials of Psychological Assessment Supervision A. Jordan Wright 2019-09-23 The only pocket-size reference on supervising psychological testing and assessment In 2014, the American Psychological Association (APA) adopted a set of guidelines for clinical supervision for health service psychology. While technically covered by these guidelines, supervising clinical psychological assessment includes additional tasks (such as ensuring accurate administration, scoring, and interpretation of tests) and tensions. Supervisors must often instruct supervisees on the data-integration process—which can involve more direct teaching than standard clinical supervision—while encompassing the same interpersonal, therapeutic, and less structured guiding aspects as psychotherapy supervision. It is increasingly common to view clinical supervision in the assessment process and supervision of psychotherapy as two significantly different tasks. Surprisingly, there is very little training and guidance available on appropriate, effective, and beneficial methods of psychological assessment supervision. Essentials of Psychological Assessment Supervision seeks to remedy the lack of literature in this area, offering guidance on supervising psychological testing and assessment. This much-needed guide provides supervisors with authoritative, up-to-date information on guidelines relevant to assessment supervision. Additionally, detailed coverage of supervision of cognitive, personality/emotional, psychoeducational, neuropsychological, forensic, and therapeutic assessments, among others, provide supervisors with guidance and structure in the supervision process. Focusing on practical application, this book offers guidance on topics such as assessment models appropriate in different areas of assessment; diversity issues; evaluation and feedback of supervisee performance; and ethical, legal, and regulatory considerations relevant in each assessment context. An invaluable resource for practitioners, this book: Offers practical advice on supervising a wide range of clinical psychological assessments Includes contributions from experts in their respective subfields Provides guidance on incorporating new American Psychological Association (APA) and Society for Personality Assessment (SPA) guidelines into the supervision process Fills an urgent need for an up-to-date reference on assessment supervision Essentials of Psychological Assessment Supervision is a must-have reference for both psychology practitioners who supervise the assessment process and instructors of psychological testing and assessment.

Twelve Years a Slave Solomon Northup 2021-01-01 "Having been born a freeman, and for more than thirty years enjoyed the blessings of liberty in a free State—and having at the end of that time been kidnapped and sold into Slavery, where I remained, until happily rescued in the month of January, 1853, after a bondage of twelve years—it has been suggested that an account of my life and fortunes would not be uninteresting to the public." -an excerpt

You Don't Have to Be Smart to Own a Smartphone Hank Adler 2013-09 Hank Adler tackles one of the most critical topics in our work lives: how to be successful in that first job. Whether it be when to use or when not to use a Smartphone or how to make sure the receptionist is your friend rather than a stranger or enemy, Hank Adler provides a plethora of ideas for recent graduates in their first post graduation job. This advice, put forth in a readable and enjoyable style is equally relevant to supervisors and parents with respect to delivering helpful advice to recent graduates (and maybe not so recent graduates). As a former partner in an international accounting firm, a former school board president and now a veteran college professor, Adler is in a unique position to provide advice to recent graduates. He mentored first year graduates for decades when he was an accounting firm partner and today, he helps prepare college graduates for their first post graduate business job. In You Don't Have To Be Smart To Own A Smartphone, Adler addresses the cultural issues and day to day expectations of employers versus the modern life experiences of recent graduates. He explains how the cultural expectations of supervisors are different because they entered the work force before it was possible or anticipated that they would have a Smartphone embedded in their palm. Through a specific experience, he demonstrates with great humor how effective multi-tasking while texting on a Smartphone is an oxymoron. From Smartphone etiquette to understanding how damaging it is to complain to colleagues about how hard one is working to avoiding being part of the gossip community to explaining what it takes to be interesting to bosses and clients, You Don't Have To Be Smart To Own A Smartphone is the best first job primer written in the last twenty years. It is timely, it is interesting and Adler's story telling puts mistakes he has made into a context that will be useful to every reader. This is a book that will enhance careers.

Researching Non-state Actors in International Security Andreas Kruck 2017-04-28 This volume provides researchers and students with a discussion of a broad range of methods and their practical application to the study of non-state actors in international security. All researchers face the same challenge, not only must they identify a suitable method for analysing their research question, they must also apply it. This volume prepares students and scholars for the key challenges they confront when using social-science methods in their own research. To bridge the gap between knowing methods and actually employing them, the book not only introduces a broad range of interpretive and explanatory methods, it also discusses their practical application. Contributors reflect on how they have used methods, or combinations of methods, such as narrative analysis, interviews, qualitative comparative analysis (QCA), case studies, experiments or participant observation in their own research on non-state actors in international security. Moreover, experts on the relevant methods discuss these applications as well as the merits and limitations of the various methods in use. Research on non-state actors in international security provides ample challenges and opportunities to probe different methodological approaches. It is thus particularly instructive for students and scholars seeking insights on how to best use particular methods for their research projects in International Relations (IR), security studies and neighbouring disciplines. It also offers an innovative laboratory for developing new research techniques and engaging in unconventional combinations of methods. This book will be of much interest to students of non-state security actors such as private military and security companies, research methods, security studies and International Relations in general. The Open Access version of this book, available at <https://www.routledge.com/Researching-Non-state-Actors-in-International-Security-Theory-and-Practice/Kruck-Schneiker/p/book/9780367141561>, has been made available under a Creative Commons Attribution-Non Commercial-No Derivatives 4.0 license.

Eular Compendium on Rheumatic Diseases Johannes W.J. Bijlsma 2009 The compendium on Rheumatic Diseases found its origin in the successful EULAR on-line course on rheumatic diseases. The yearly updated reviews of the fifty modules of that course form the content of this book. Each chapter is written by two dedicated expert rheumatologists from two different countries, to get a balanced view. Most of them were assisted by a junior doctor or researcher from their own department, in order to stimulate focus on modern educational goals and techniques. The fifty chapters, encompassing the whole spectrum of rheumatology, brought together in a textbook, are a vital part of rheumatologists' continuing medical education, keeping doctors up to date in daily practice. The structure of the chapters in the Compendium is the same as the one of the modules in the on-line course: starting with learning points, text with many figures, tables and pictures, a summary, and a limited number of key references.

Air Pollution from Motor Vehicles Asif Faiz 1996-01-01 Contributions by Surhid Gautam and Lit-Mian Chan. This book presents a state-of-the art review of vehicle emission standards and regulations and provides a synthesis of worldwide experience with vehicle emission control technologies and their applications in both industrial and developing countries. Topics covered include: * The two principal international systems of vehicle emission standards: those of North America and Europe * Test procedures used to verify compliance with emissions standards and to estimate actual emissions * Engine and aftertreatment technologies that have been developed to enable new vehicles to comply with emission standards, as well as the cost and other impacts of these technologies * An evaluation of measures for controlling emissions from in-use vehicles * The role of fuels in reducing vehicle emissions, the benefits that could be gained by reformulating conventional gasoline and diesel fuels, the potential benefits of alternative cleaner fuels, and the prospects for using hydrogen and electric power to run motor vehicles with ultra-low or zero emissions. This book is the first in a series of publications on vehicle-related pollution and control measures prepared by the World Bank in collaboration with the United Nations Environment Programme to underpin the Bank's overall objective of promoting transport that is environmentally sustainable and least damaging to human health and welfare.

From Three to Five Hank Adler 2011-06 By the summer of 2011, Senator George Vincent, a Democratic senior senator from Ohio and staunch supporter of the president in 2008, realized that he could support neither the president nor the likely nominee of the Republican Party in the upcoming 2012 election. The senator had come to the conclusion that the leadership of both political parties was far too close to the extremes of each party. No one running for the presidency represented his views of and for the United States of America. Senator Vincent formed the American Exceptionalism Party and spent every waking hour, collected every political marker he had earned during his political career, and invested most of his personal wealth to legally qualify his fledgling little political party in every state. The Senator found an unknown vice presidential candidate and easily prevailed in every primary race of his own political party in the winter and spring of 2012. Few knew of or followed the primary campaign of this new American Exceptionalism Party and of those who did, most viewed the campaign as nothing more than hubris. With the first nominating convention of the American Exceptionalism Party days away, a few politically savvy voters and academicians began to ponder the possibility that Senator George Vincent and his nascent political party could strike a chord with the voters. From Three to Five is the story of the country's journey into the world of three serious political parties with its resulting political and Constitutional mayhem.

Innovation Policy Challenges for the 21st Century Deborah Cox 2013 As the economies of western countries move from primarily resource-based to knowledge-based, and trade liberalization limits what governments can do through direct action, the landscape of innovation is changing and policymakers must react accordingly. This exciting new book examines the challenges that policy makers face in responding to a new environment. The book addresses how governments are now seeking to drive innovation through new forms of R&D policies, through public procurement, skills development, entrepreneurship and innovation culture to name but a few of the approaches. Innovation Policy Challenges for the 21st Century explores these and other contemporary issues in innovation, reviewing the state of the art literature and consolidating current thinking at the frontiers of innovation. The volume debates and presents scattered and anonymous material in a coherent way, with a particular focus is on 'hot topics' in the field of innovation studies that have been previously under-researched. The book is divided into four key themes: government as a key actor in the innovation process, entrepreneurs as innovators, skills and competences required to maintain and improve innovation performance in Europe and finally, the wider context in which innovation policy develops.

Bariatric and Metabolic Surgery Seung Ho Choi 2014-02-21 Bariatric and Metabolic Surgery is recognized to be an important and effective option for the treatment of severe obesity and the various associated conditions and diseases. This book presents state of the art knowledge on such surgery with the aim of facilitating the sharing and exchange of knowledge, documenting effective techniques, and enhancing safety and outcomes. All technical aspects are covered in detail, and the text is complemented by many helpful illustrations. A further key feature is the provision of accompanying surgical videos, which will be of value to both novice and experienced surgeons. This textbook will be a great asset in clinical practice for all who are involved or interested in bariatric and metabolic surgery.

An Introduction to International Relations Theory Jill Steans 2013-09-13 This long-awaited new edition has been fully updated and revised by the original authors as well as two new members of the author team. Based on many years of active research and teaching it takes the discipline's most difficult aspects and makes them accessible and interesting. Each chapter builds up an understanding of the different ways of looking at the world. The clarity of presentation allows students to rapidly develop a theoretical framework and to apply this knowledge widely as a way of understanding both more advanced theoretical texts and events in world politics. Suitable for first and second year undergraduates studying international relations and international relations theory.

Zero Hunger Walter Leal Filho 2020-05-03 The problems related to the process of industrialisation such as biodiversity depletion, climate change and a worsening of health and living conditions, especially but not only in developing countries, intensify. Therefore, there is an increasing need to search for integrated solutions to make development more sustainable. The United Nations has acknowledged the problem and approved the "2030 Agenda for Sustainable Development". On 1st January 2016, the 17 Sustainable Development Goals (SDGs) of the Agenda officially came into force. These goals cover the three dimensions of sustainable development: economic growth, social inclusion and environmental protection. The Encyclopedia of the UN Sustainable Development Goals comprehensively addresses the SDGs in an integrated way. It encompasses 17 volumes, each devoted to one of the 17 SDGs. This volume addresses SDG 2, namely "End hunger, achieve food security and improved nutrition and promote sustainable agriculture" and contains the description of a range of related terms, to allow for a better understanding and foster knowledge. Our planet produces enough food to feed everyone. Malnutrition and hunger are the result of inappropriate food production processes, bad governance and injustice. SDG 2 seeks to guarantee quality and nutritious food to ensure healthy life by adopting a holistic approach that involves various actions targeting different actors, technologies, policies and programs. These initiatives have to face challenges coming from extensive environmental degradation, loss of biodiversity and the interrelated effects of climate change. Concretely, the defined targets are: End hunger and ensure access by all people, in particular the poor and people in vulnerable situations, including infants, to safe, nutritious and sufficient food all year round End all forms of malnutrition, including achieving the internationally agreed targets on stunting and wasting in children under 5 years of age, and address the nutritional needs of adolescent girls, pregnant and lactating women and older persons Double the agricultural productivity and incomes of small-scale food producers, in particular women, indigenous peoples, family farmers, pastoralists and fishers, including through secure and equal access to land, other productive resources and inputs, knowledge, financial services, markets and opportunities for value addition and non-farm employment Ensure sustainable food production systems and implement resilient agricultural practices that increase productivity and production, that help maintain ecosystems, that strengthen capacity for adaptation to climate change, extreme weather, drought, flooding and other disasters and that progressively improve land and soil quality Maintain the genetic diversity of seeds, cultivated plants and farmed and domesticated animals and their related wild species, including through soundly managed and diversified seed and plant banks at the national, regional and international levels, and promote access to and fair and equitable sharing of benefits arising from the utilization of genetic resources and associated traditional knowledge, as internationally agreed Increase investment, including through enhanced international cooperation, in rural infrastructure, agricultural research and extension services, technology development and plant and livestock gene banks in order to enhance agricultural productive capacity in developing countries, in particular least developed countries Correct and prevent trade restrictions and distortions in world agricultural markets, including through the parallel elimination of all forms of agricultural export subsidies and all export measures with equivalent effect, in accordance with the mandate of the Doha Development Round Adopt measures to ensure the proper functioning of food commodity markets and their derivatives and facilitate timely access to market information, including on food reserves, in order to help limit extreme food price volatility Editorial Board Datu Buyung Agusdinata, Mohammad Sadegh Allahyari, Usama Awan, Nerise Johnson, Paschal Arsein Mugabe, Vincent Onguso Oeba, Tony Wall/div Minimally Invasive Bariatric Surgery Stacy A. Brethauer 2015-03-03 The second edition of Minimally Invasive Bariatric Surgery provides a comprehensive, state-of-the-art review of this field, and it serves as a valuable resource for clinicians, surgeons and researchers with an interest in minimally invasive bariatric surgery. Additionally, the second edition includes new features that will benefit the resident, fellow, or bariatric surgeon new to the field. Specifically, each evidence-based chapter (i.e. outcomes, complications, epidemiology, etc) concludes with three or four exam questions that emphasize the salient points of the chapter and provide fellowship programs a valuable training tool and resource for their academic curriculum. These questions are either single-answer multiple choice or true/false format and the correct response with a brief explanation follows. As more emphasis is placed on completing a comprehensive curriculum and obtaining certification for bariatric training, this aspect of the book is unique and provides added value to the text. The new edition also incorporates many new or updated medical illustrations to enhance the technique chapters and provide more uniformity for the artwork throughout the book. Each of the major procedures include surgical technique, outcomes, and management of complications in separate chapters to provide an easy reference for the busy clinician preparing for a case or presentation. Another unique feature of the text is a link to video files hosted online for the relevant chapters. This video library will be of great value to the user. As the number of fellowships in laparoscopic bariatric surgery continues to increase, this updated text will provide a valuable resource for general and bariatric surgeons, laparoscopic surgeons, fellows, residents, medical students, obesity researchers, and industry representatives involved in this field.

The Myth of Colorblindness Sarah E. Turner 2019-09-28 This book explores representations of race and ethnicity in contemporary cinema and the ways in which these depictions all too often promulgate an important racial ideology: the myth of colorblindness. Colorblindness is a discursive framework employed by mainstream, neoliberal media to celebrate a multicultural society while simultaneously disregarding its systemic and institutionalized racism. This collection is unique in its examination of such films as Ex Machina, The Lone Ranger, The Blind Side, Zootopia, The Fast and the Furious franchise, and Dope, which celebrate the myth of colorblindness, yet perpetuate and entrench the racism and racial inequities that persist in contemporary society. While the #OscarsSoWhite movement has been essential to bringing about structural changes to media industries and offers the opportunity for a wide diversity of voices to alter and transform the dominant, colorblind narratives continue to proliferate. As this book demonstrates, Hollywood still has a long way to go.

The Writers Miranda J. Banks 2015-01-14 Screenwriters are storytellers and dream builders. They forge new worlds and beings, bringing them to life through storylines and idiosyncratic details. Yet up until now, no one has told the story of these creative and indispensable artists. The Writers is the only comprehensive qualitative analysis of the history of writers and writing in the film, television, and streaming media industries in America. Featuring in-depth interviews with over fifty writers—including Mel Brooks, Norman Lear, Carl Reiner, and Frank Pierson—The Writers delivers a compelling, behind-the-scenes look at the role and rights of writers in Hollywood and New York over the past century. Granted unprecedented access to the archives of the Writers Guild Foundation, Miranda J. Banks also mines over 100 never-before-published oral histories with legends such as Nora Ephron and Ring Lardner Jr., whose insight and humor provide a window onto the enduring priorities, policies, and practices of the Writers Guild. With an ear for the language of storytellers, Banks deftly analyzes watershed moments in the industry: the advent of sound, World War II, the blacklist, ascension of television, the American New Wave, the rise and fall of VHS and DVD, and the boom of streaming media. The Writers spans historical and contemporary moments, and draws upon American cultural history, film and television scholarship and the passionate politics of labor and management. Published on the sixtieth anniversary of the formation of the Writers Guild of America, this book tells the story of the triumphs and struggles of these vociferous and contentious hero-makers.

EcoJustice Education Rebecca A. Martusewicz 2014-08-21 EcoJustice Education offers a powerful model for cultural ecological analysis and a pedagogy of responsibility, providing teachers and teacher educators with the information and classroom practices they need to help develop citizens who are prepared to support and achieve diverse, democratic, and sustainable societies in an increasingly globalized world. Readers are asked to consider curricular strategies to bring these issues to life in their own classrooms across disciplines. Designed for introductory educational foundations and multicultural education courses, the text is written in a narrative, conversational style grounded in place and experience, but also pushes students to examine the larger ideological, social, historical, and political contexts of the crises humans and the planet we inhabit are facing. Pedagogical features in each chapter include a Conceptual Toolbox, activities accompanying the theoretical content, examples of lessons and teacher reflections, and suggested readings, films, and links. The Second Edition features a new chapter on Anthropocentrism; new material on Heterosexism; updated statistics and examples throughout; new and updated Companion Website content.

Punk Pedagogies Gareth Dylan Smith 2017-09-22 Punk Pedagogies: Music, Culture and Learning brings together a collection of international authors to explore the possibilities, practices and implications that emerge from the union of punk and pedagogy. The punk ethos—a notoriously evasive and multifaceted beast—offers unique applications in music education and beyond, and this volume presents a breadth of interdisciplinary perspectives to challenge current thinking on how, why and where the subculture influences teaching and learning. As (punk) educators and artists, contributing authors grapple with punk's historicity, its pervasiveness, its (dis)functionality and its messiness, making Punk Pedagogies relevant and motivating to both instructors and students with proven pedagogical practices.

Strategic Communication in Context: Theoretical Debates and Applied Research Sara Balonas 2021-07-30 Strategic communication is becoming more relevant in communication sciences, though it needs to deepen its reflective practices, especially considering its potential in a VUCA world — volatile, uncertain, complex and ambiguous. The capillary, holistic and result-oriented nature that portrays this scientific field has led to the imperative of expanding knowledge about the different approaches, methodologies and impacts in all kinds of organisations when strategic communication is applied. Therefore Strategic Communication in Context: Theoretical Debates and Applied Research assembles several studies and essays by renowned authors who explore the topic from different angles, thus testing the elasticity of the concept. Moreover, this group of authors represents various schools of thought and

geographies, making this book particularly rich and cross-disciplinary.

Leadership and Nursing Care Management - E-Book Diane Huber 2013-08-07 Comprehensive and easy to read, this authoritative resource features the most up-to-date, research-based blend of practice and theory related to the issues that impact nursing management and leadership today. Key topics include the nursing professional's role in law and ethics, staffing and scheduling, delegation, cultural considerations, care management, human resources, outcomes management, safe work environments, preventing employee injury, and time and stress management. Research Notes in each chapter summarize relevant nursing leadership and management studies and show how research findings can be applied in practice. Leadership and Management Behavior boxes in each chapter highlight the performance and conduct expected of nurse leaders, managers, and executives. Leading and Managing Defined boxes in each chapter list key terminology related to leadership and management, and their definitions. Case Studies at the end of each chapter present real-world leadership and management situations and illustrate how key chapter concepts can be applied to actual practice. Critical Thinking Questions at the end of each chapter present clinical situations followed by critical thinking questions that allow you to reflect on chapter content, critically analyze the information, and apply it to the situation. A new Patient Acuity chapter uses evidence-based tools to discuss how patient acuity measurement can be done in ways that are specific to nursing. A reader-friendly format breaks key content into easy-to-scan bulleted lists. Chapters are divided according to the AONE competencies for nurse leaders, managers, and executives. Practical Tips boxes highlight useful strategies for applying leadership and management skills to practice.

The Fairtax Fantasy Hank Adler 2009-04 The details of the FairTax plan, why its advocacy is a disaster for the GOP, and why its implementation would be a disaster for the United States are discussed in this book. Hank Adler and Hugh Hewitt both favor real tax reform but don't advocate either economic or political suicide; the FairTax is both. --publisher.

The Handbook of TESOL in K-12 Luciana C. de Oliveira 2019-06-10 The first handbook to explore the field of Teaching English to Speakers of Other Languages in elementary and secondary education (K-12) The number of students being educated in English has grown significantly in modern times — globalization, immigration, and evolving educational policies have prompted an increased need for English language learner (ELL) education. The Handbook of TESOL in K-12 combines contemporary research and current practices to provide a comprehensive overview of the origins, evolution, and future direction of Teaching English to Speakers of Other Languages at the elementary and secondary levels (K-12). Exploring the latest disciplinary and interdisciplinary issues in the field, this is a first-of-its-kind Handbook and contributions are offered from a team of internationally-renowned scholars.

Comprehensive in scope, this essential Handbook covers topics ranging from bilingual language development and technology-enhanced language learning, to ESOL preparation methods for specialist and mainstream teachers and school administrators. Three sections organize the content to cover Key Issues in Teaching ESOL students in K-12, Pedagogical Issues and Practices in TESOL in K-12 Education, and School Personnel Preparation for TESOL in K-12. Satisfies a need for inclusive and in-depth research on TESOL in K-12 classrooms Presents a timely and interesting selection of topics that are highly relevant to working teachers and support staff Applies state-of-the-art research to real-world TESOL classroom settings Offers a balanced assessment of diverse theoretical foundations, concepts, and findings The Handbook of TESOL in K-12 is an indispensable resource for undergraduate and graduate students, researchers and scholars, and educators in the field of Teaching English to Speakers of Other Languages in elementary and secondary education.

From Madea to Media Mogul TreaAndrea M. Russworm 2016-06-20 For over a decade, Tyler Perry has been a lightning rod for both criticism and praise. To some he is most widely known for his drag performances as Madea, a self-proclaimed "mad black woman," not afraid to brandish a gun or a scalding pot of grits. But to others who watch the film industry, he is the businessman who by age thirty-six had sold more than \$100 million in tickets, \$30 million in videos, \$20 million in merchandise, and was producing 300 projects each year viewed by 35,000 every week. Is the commercially successful African American actor, director, screenwriter, playwright, and producer "malt liquor for the masses," an "embarrassment to the race!," or is he a genius who has directed the most culturally significant American melodramas since Douglas Sirk? Are his films and television shows even melodramas, or are they conservative Christian diatribes, cheeky camp, or social satires? Do Perry's flattened narratives and character tropes irresponsibly collapse important social discourses into one-dimensional tales that affirm the notion of a "post-racial" society? In light of these debates, *From Madea to Media Mogul* makes the argument that Tyler Perry must be understood as a figure at the nexus of converging factors, cultural events, and historical traditions. Contributors demonstrate how a critical engagement with Perry's work and media practices highlights a need for studies to grapple with developing theories and methods on disreputable media. These essays challenge value-judgment criticisms and offer new insights on the industrial and formal qualities of Perry's work.

Aging, Technology and Health Richard Pak 2018-03-15 Aging, Health and Technology takes a problem-centered approach to examine how older adults use technology for health. It examines the many ways in which technology is being used by older adults, focusing on challenges, solutions and perspectives of the older user. Using aging-health technology as a lens, the book examines issues of technology adoption, basic human factors, cognitive aging, mental health, aging and usability, privacy, trust and automation. Each chapter takes a case study approach to summarize lessons learned from unique examples that can be applied to similar projects, while also providing general information about older adults and technology. Discusses human factors design challenges specific to older adults Covers the wide range of health-related uses for technology—from fitness to leading a more engaged life Utilizes a case study approach for practical application Envisions what the future will hold for technology and older adults Employs a roster of interdisciplinary contributors
