C for Programmers with an Introduction to C11 Paul Deitel 2013-04-19 The professional programmer's Deitel® guide to procedural programming in C through 130 working code examples. Written for programmers with a background in high-level language programming, this book applies the Deitel signature live-code approach to teaching the C language and the C Standard Library. The book presents the concepts in the context of fully tested programs, complete with syntax shading, code highlighting, code walkthroughs and program outputs. The book features approximately 5,000 lines of proven C code and hundreds of savvy tips that will help you build robust applications. Start with an introduction to C, then rapidly move on to more advanced topics, including building custom data structures, the Standard Library, select features of the new C11 standard such as multithreading to help you write high-performance applications for today's multicore systems, and secure C programming sections that show you how to write software that is more robust and less vulnerable. You'll enjoy the Deitels' classic treatment of procedural programming. When you're finished, you'll have everything you need to start building industrial-strength C applications. Practical, example-rich coverage of: C programming fundamentals Compiling and debugging with GNU gcc and gdb, and Visual C++® Key new C11 standard features: Type generic expressions, anonymous structures and unions, memory alignment, enhanced Unicode® support, `_Static_assert`, `quick_exit` and `at_quick_exit`, `_Noreturn` function specifier, C11 headers C11 multithreading for enhanced performance on today's multicore systems Secure C Programming sections Data structures, searching and sorting Order of evaluation issues, preprocessor Designated initializers, compound literals, `bool` type, complex numbers, variable-length arrays, restricted pointers, type generic math, inline functions, and more. Transitional Justice and Education Clara Ramírez-Barat 2018-07-16 This volume addresses the role and importance of education for processes of transitional justice. In the aftermath of conflict and mass violence, education has been one of the tools with which societies have sought to achieve positive transformation. While education has the potential to trigger, maintain, and exacerbate conflict, it has also been designed to promote a deeper, more nuanced understanding of the past and to advance reconciliation, peacebuilding, and prevention. The original contributions in the book reflect on lessons learned from education policies of the past in post-conflict societies and seek innovative, sustainable, and context-sensitive grassroots approaches, designed to advocate critical thinking, values of inclusion and tolerance, and ultimately a culture of peace.

Dr Podcast Scripts for the Final FRCA Rebecca A. Leslie 2011-07-28 Dr Podcast (www.dr-podcast.com) is a great way to revise for the FRCA exams and has been met with widespread enthusiasm from candidates. It provides podcasts of questions and model answers with no redundant material. Dr Podcast scripts are now available in print format. Containing the scripts of all 103 individual podcasts from the Dr Podcast Final FRCA collection, they also include diagrams the reader can draw to explain their answers. They cover the entire syllabus for the Final FRCA, allowing the readers to experience the style of the questions likely to be asked and providing tips on how to excel in the exam. Each podcast is written by a successful candidate who has insight and experience of the exam, and all material has been reviewed by experienced consultants with detailed knowledge of the educational standards. For those preparing for the Final FRCA exams, Dr Podcast scripts are a must.

Inflammatory Bowel Disease Nursing Manual Andreas Sturm 2019-01-24 This comprehensive manual discusses the many aspects of inflammatory bowel disease (IBD), providing relevant information along with practical guidance. The reader is also directed to additional resources for extra and current information. This book comes at a time when the number of people suffering from the two major forms of IBD, ulcerative colitis (UC) and Crohn's disease (CD), is rising around the globe. Despite their huge impact on daily life and health economics, these diseases are not fully understood, and diagnosis and treatment remains a significant challenge. IBD nurses are increasingly recognised as key clinicians within the multidisciplinary team caring for people with IBD. Through experience and specialist knowledge IBD nurses provide timely support, advice, and treatment for people living with this unpredictable condition. IBD nurses are also well placed to liaise with the wider team, developing patient centred services which best fit their local health framework. The combined international expertise and accessible guidance here will equip nurses, or any clinician wanting to increase their competence in IBD management. Thereby this manual aims to contribute to the optimisation of IBD care throughout the world.

Guide to Flow-Aware Networking Jerzy Dom?a? 2020-10-26 The book presents a comprehensive view on Flow-Aware Networking. It starts with a brief overview of the known QoS architectures based on the concept of a flow. Then, the original FAN concept is presented, along with its variations proposed by the authors. The next chapter covers a very valuable feature of the FAN architecture, namely its ability to assure net neutrality. The chapters that follow will discuss, in detail, a variety of issues making the FAN concept implementable, including congestion control, fairness, resilience to failures, service differentiation and degradation. The final chapter presents the test implementation of the FAN router, including the environment used and performance tests. Chapters are supplemented with problems to solve, along with their solutions. The pedagogical character of the book is supported by a number of illustrative examples contained in most of the chapters. At the end of the book, a glossary of the key terms is included, along with a comprehensive bibliography. Flow-based traffic management is currently becoming a mainstream. There is plenty of Quality of Service (QoS) techniques based on flows. Software-Defined Networking with its dominant protocol OpenFlow also follows this trend. Flow-Aware Networking (FAN) is a promising QoS architecture. Information on FAN can be found in various research papers. It is, therefore highly scattered. This book gathers practically all relevant information regarding FAN and puts it together. Quality of Service assurance is one of the key challenges of today's Internet. The existing approaches to provide QoS do not meet expectations of network operators, managers and users although numerous efforts in this area have been reported. One of the most promising concepts is the Flow-Aware Network (FAN). FAN can play a key role in assuring the net neutrality, smoothly combining interests of all the involved parties. The authors of the proposal have been involved in FAN research practically since its inception at the start of the 21st century. The book reports the wide experiences the authors accumulated in the subject area during the work on common FAN-related projects conducted with the team of James Roberts that proposed the original FAN concept as well as other leading research groups in Europe and the USA. One of the aims of the book is to accompany courses taught by the authors.

Advancing Human Assessment Randy E. Bennett 2017-10-17 This book is open access under a CC BY-NC 2.5 license.?? This book describes the extensive contributions made toward the advancement of human assessment by scientists from one of the world's leading research institutions, Educational Testing Service. The book's four major sections detail research and development in measurement and statistics, education policy analysis and evaluation, scientific psychology, and validity. Many of the developments presented have become de-facto standards in educational and psychological measurement, including in item response theory (IRT), linking and equating, differential item functioning (DIF), and educational surveys like the National Assessment of Educational Progress (NAEP), the Programme of international Student Assessment (PISA), the Progress of International Reading Literacy Study (PIRLS) and the Trends in Mathematics and Science Study (TIMSS). In addition to its comprehensive coverage of contributions to the theory and methodology of educational and psychological measurement and statistics, the book gives significant attention to ETS work in cognitive, personality, developmental, and social psychology, and to education policy analysis and program evaluation. The chapter authors are long-standing experts who provide broad coverage and thoughtful insights that build upon decades of experience in research and best practices for measurement, evaluation, scientific psychology, and education policy analysis. Opening with a chapter on the genesis of ETS and closing with a synthesis of the enormously diverse set of contributions made over its 70-year history, the book is a useful resource for all interested in the improvement of human assessment.

Argument Types and Fallacies in Legal Argumentation Thomas Bustamante 2015-04-07 This book provides theoretical tools for evaluating the soundness of arguments in the context of legal argumentation. It deals with a number of general argument types and their particular use in legal

argumentation. It provides detailed analyses of argument from authority, argument ad hominem, argument from ignorance, slippery slope argument and other general argument types. Each of these argument types can be used to construct arguments that are sound as well as arguments that are unsound. To evaluate an argument correctly one must be able to distinguish the sound instances of a certain argument type from its unsound instances. This book promotes the development of theoretical tools for this task.

e-Learning Cookbook Nataša Brouwer 2013-10-18 Information and communication technology (ICT) makes it possible to bring information to everyone who wants to learn. Rapid advances in technology offer strong support for using ICT in teaching. Online education can intensify and improve students' learning process, and enables us to reach more students than by traditional means. The number of courses and modules being offered online is increasing rapidly worldwide. This is happening not only at traditional institutions for distance education, but even more so in the "classical" institutions for higher education. Such decisions are motivated by the improved technology available for web lectures, combined with financial motivations, i.e. being able to offer courses to larger groups of students. There is a huge trend toward open massive online courses or MOOCs. Prestigious universities offer MOOCs free of charge to a mass audience, often up to hundreds of thousands of learners. Although online education can reach more people nowadays and new and challenging learning experiences can be created with it, in the average university course the digital dimension too often remains limited to simply publishing the existing face-to-face course content online. Educational technology is often seen as an "extra", a luxury tool, and not as an integral and indispensable element of a university's teaching design. It is thus crucial that lecturers have and can obtain knowledge about how to design technology-enhanced teaching. Technical advances can be expected to continue in the future, and those who wish to implement educational technology in their own teaching practice must reckon on becoming lifelong learners. This fits the culture of academic teachers perfectly: they are already lifelong learners and creators of new knowledge within their discipline. This book is based on the notion that a lecturer who uses ICT in teaching must learn how to apply his or her knowledge about content, pedagogy and technology in an integrated manner. The idea of integrating these three types of knowledge is based on the TPACK model, which stands for Technological Pedagogical Content Knowledge model.

Handbook of Student Skills Sprintprint Neil Burdess 2007 With its clear structure and practical approach, Good Study provides the ideal guide to help students through their demanding first year of study. Its basic aim is to give them the maximum information in the minimum time so they can concentrate on using the advice whilst studying. Good Study is the complete revision of the best-selling Handbook of Student Skills and is written by a lecturer with many years of first-year university teaching.

Universities in Transition Heather Brook 2014-12 Universities are social universes in their own right. They are the site of multiple, complex and diverse social relations, identities, communities, knowledges and practices. At the heart of this book are people enrolling at university for the first time and entering into the broad variety of social relations and contexts entailed in their 'coming to know' at, of and through university. For some time now the terms 'transition to university' and 'first-year experience' have been at the centre of discussion and discourse at, and about, Australian universities. For those university administrators, researchers and teachers involved, this focus has been framed by a number of interlinked factors ranging from social justice concerns to the hard

economic realities confronting the contemporary corporatising university. In the midst of changing global economic conditions affecting the international student market, as well as shifting domestic politics surrounding university funding, the equation of dollars with student numbers has remained a constant, and has kept universities' attention on the current 'three Rs' of higher education — recruitment, retention, reward — and, in particular, on the critical phase of students' entry into the tertiary institution environment. By recasting 'the transition to university' as simultaneously and necessarily entailing a transition of university — indeed universities — and of their many and varied constitutive relations, structures and practices, the contributors to this book seek to reconceptualise the 'first-year experience' in terms of multiple and dynamic processes of dialogue and exchange amongst all participants. They interrogate taken-for-granted understandings of what 'the university' is, and consider what universities might yet become.

Assessment Strategies for Online Learning Dianne Conrad 2018-07-15 Assessment has provided educational institutions with information about student learning outcomes and the quality of education for many decades. But has it informed practice and been fully incorporated into the learning cycle? Conrad and Openo argue that the potential inherent in many of the new learning environments being explored by educators and students has not been fully realized. In this investigation of a variety of assessment methods and learning approaches, the authors aim to discover the tools that engage learners and authentically evaluate education. They insist that moving to new learning environments, specifically those online and at a distance, afford opportunities for educators to adopt only the best practices of traditional face-to-face assessment while exploring evaluation tools made available by a digital learning environment in the hopes of arriving at methods that capture the widest set of learner skills and attributes.

Essential Notes in Psychiatry Victor Olisah 2012-04-27 Psychiatry is one of the major specialties of medicine, and is concerned with the study and treatment of mental disorders. In recent times the field is growing with the discovery of effective therapies and interventions that alleviate suffering in people with mental disorders. This book of psychiatry is concise and clearly written so that it is usable for doctors in training, students and clinicians dealing with psychiatric illness in everyday practice. The book is a primer for those beginning to learn about emotional disorders and psychosocial consequences of severe physical and psychological trauma; and violence. Emphasis is placed on effective therapies and interventions for selected conditions such as dementia and suicide among others and the consequences of stress in the workplace. The book also highlights important causes of mental disorders in children.

ISEAS Perspective Ulla Fionna 2015-07-08 "As the euphoria fades from the Jokowi presidency, this timely book reviews the processes that brought him to the top, and the processes that have undermined his initial standing. The nineteen articles by ten writers provide views from along the way, starting with a chapter on the Jakarta governor elections from November 2012 and preceding through the key events up to a contemporary assessment in February 2015. Several major clues to the current disillusion are provided in accounts of the legislative elections and the presidential campaigns. Key topics are vote buying, the Islamic factor, economic platforms, pluralism, economic challenges. Max Lane points to deep alienation from politics and the emergence of new unions and a new political arena. The ISEAS team provides a range of events and analyses that will be most useful to all students of current Indonesian politics; clear, concise, insightful." - David Reeve, Conjoint Associate Professor UNSW, ILTI Academic Coordinator ACICIS. "This book effectively captures the dynamics of Indonesian politics by focusing on the various phenomena

surrounding the 2014 elections. It begins this political journey with an analysis of the implementation of local autonomy, and the birth of a leader brave enough to challenge extant political elites. It further explores the application of political culture in campaigns, the shortcomings of elected leaders, and the inadequacy of a state obliged to accommodate various interest groups. Beyond all these, this book proves that the political culture approach remains crucial in investigating Indonesia's political realities." - Sukardi Rinakit, Political Analyst, Special Staff to President Joko Widodo

Higher Education Landscape 2030 Dominic Orr 2020-05-22 This open access Springer Brief provides a systematic analysis of current trends and requirements in the areas of knowledge and competence in the context of the project "(A) Higher Education Digital (AHEAD)—International Horizon Scanning / Trend Analysis on Digital Higher Education." It examines the latest developments in learning theory, didactics, and digital-education technology in connection with an increasingly digitized higher education landscape. In turn, this analysis forms the basis for envisioning higher education in 2030. Here, four learning pathways are developed to provide a glimpse of higher education in 2030: Tamagotchi, a closed ecosystem that is built around individual students who enter the university soon after secondary education; Jenga, in which universities offer a solid foundation of knowledge to build on in later phases; Lego, where the course of study is not a monolithic unit, but consists of individually combined modules of different sizes; and Transformer, where students have already acquired their own professional identities and life experiences, which they integrate into their studies. In addition, innovative practice cases are presented to illustrate each learning path.

Behavioral Analysis of Maternal Filicide Joy Lynn E. Shelton 2014-10-01 Maternal filicide has been discussed in the medical, mental health, and child abuse fields, yet little research exists with a criminal justice/law enforcement perspective. Nevertheless, criminal justice professionals responsible for investigation and prosecution of these offenders often must give attention to unique behavioral, social, and psychological dynamics not considered in many other types of cases. The Federal Bureau of Investigation's (FBI) Behavioral Analysis Unit (BAU) III – Crimes Against Children identified, collected, and reviewed law enforcement case files in which a biological mother killed her child(ren). Collectively, the cases involve 213 biological mothers who killed 265 children, and are comprised of neonaticide, infanticide, and filicide cases. Data analysis revealed that the offenders ranged in age from 12-46 years, and many were unmarried, unemployed, and had a history of violence. Many of the victims were three years of age or younger, did not live with their biological fathers at the time of their deaths, and had a history of maltreatment most often perpetrated by their mothers. In addition, traditional weapons such as a firearm or knife were used less often compared to asphyxiants and blunt force instruments. The authors explore the tenets of female violence, the mother-child dynamic and mental disorders, and address the complexities associated with investigating and prosecuting maternal filicide offenders. ?

The Classic Dungeon Design Guide II Kent David Kelly 2018-09-05 The sequel to the Classic Dungeon Design Guide is here ... Have you read every dungeon design book out there, but you're still hungry for great ideas to amaze your players? Would you like to possess the tools to generate countless millions of randomized results for bizarre rooms and shrines, dungeon doors, magical laboratories, skeletons, Lovecraftian abominations, and torture chambers? Then this is the book for you. This massive tome is the direct sequel to Wonderland Imprints' Gold Medal Best Seller, CDDG1: THE CLASSIC DUNGEON DESIGN GUIDE. Where Book 1 was a basic inspirational tome filled with thousands of ideas, Book II: Dungeon Mastery Design Tables is an advanced nuts-and-bolts guide that provides you with hundreds of pages of tables which you can use to create an infinite number of dungeon rooms, monster lairs, thematic levels and endless details such as barracks, caves, chests, corpses, fountains, prisoner cells, quarters, shrines, and magical gateways. You can even use this book's treasure trove of systems to create millions of deities,

slime monsters, prisoner NPCs, and unique NPC villains and prisoners, using nearly 1,000 different experience level titles and other tools that intersect with DDE1, DUNGEON DELVER ENHANCER. Book One was only the beginning, the entry work to a series. This is one of the largest and most extensive dungeon design books in existence, with features branching out from CDDG1 including: data for on-the-spot creation of altars, barracks, caves, containers, corpses, doors, dungeon dressing, fountains, fungi, galleries, hideouts, laboratories, magical gateways, prisoners, quarters, stairways, torture chambers, unusual rooms, and those ever-baffling magical "unclassifiable chambers" which no one can fully comprehend. It's all here, the massive set of tables I have used for years to create new mega-dungeons for the Castle Oldskull OSR campaign. I have refined and expanded them over many months of writing, and now I offer them to you. So what are you waiting for? This book is the perfect companion for THE CLASSIC DUNGEON DESIGN GUIDE, and has been specially designed to serve both as a learning grimoire and as a tabletop go-to book for design and for sandbox play. After all, if you're going to dare to delve into the netherworld, you should probably take not just a lantern and an elvish sword of great antiquity; you should also carry the ultimate guidebook to help you from getting lost along the way ... Another classic Fantasy Role-Playing Game Supplement from Wonderland Imprints, Only the Finest Works of Fantasy.

Journalism and Politics in Indonesia David T. Hill 2010-01-21 Mochtar Lubis was one of Indonesia's best-known newspaper editors, authors and cultural figures, with a national, regional and international prominence that he retained from the early 1950s until his recent death in 2004. This book traces the major events in the life of Mochtar Lubis, which is also a prism through which much of Indonesia's post-independence history can be interpreted. This book is also the story of Indonesia in the second half of the twentieth century, when the people of the archipelago became an independent nation, and when print media and the influential figures who controlled and produced newspapers, played a pivotal role in national political, educational and cultural life, defining Indonesia. Editors with strong personalities dominated the industry and sparred with the nation's leadership; Lubis was a vocal critic of the abuse of power and a thorn in the side of the country's first two presidents, becoming synonymous with combative journalism. Under both Sukarno and Suharto, Lubis had his newspaper closed down and was imprisoned. As the only comprehensive biography of this towering figure, the book provides a unique insight into the history and development of media, literature and the political system in Indonesia.

The Father of Us All Victor Davis Hanson 2010-05-03 Victor Davis Hanson has long been acclaimed as one of our leading scholars of ancient history. In recent years he has also become a trenchant voice on current affairs, bringing a historian's deep knowledge of past conflicts to bear on the crises of the present, from 9/11 to Iran. "War," he writes, "is an entirely human enterprise." Ideologies change, technologies develop, new strategies are invented-but human nature is constant across time and space. The dynamics of warfare in the present age still remain comprehensible to us through careful study of the past. Though many have called the War on Terror unprecedented, its contours would have been quite familiar to Themistocles of Athens or William Tecumseh Sherman. And as we face the menace of a bin Laden or a Kim Jong-Il, we can prepare ourselves with knowledge of how such challenges have been met before. The Father of Us All brings together much of Hanson's finest writing on war and society, both ancient and modern. The author has gathered a range of essays, and combined and revised them into a richly textured new work that explores such topics as how technology shapes warfare, what constitutes the "American way of war," and why even those who abhor war need to study military history. "War is the father and king of us all," Heraclitus wrote in ancient Greece. And as Victor Davis Hanson shows, it is no less so today.

Financing Higher Education and Economic Development in East Asia Shiro Armstrong 2011-11-01 This volume addresses important issues to do with access to higher education and different models of its financing in the East Asia region. It is enriched by diverse perspectives from vastly different starting points and by the historical and institutional settings in the region. The issues are set out in the context of the value of higher education in economic development and how it contributes to the capacities to adopt and adapt to new technologies and undertake institutional innovation. The established and well-functioning higher education loan and financing systems, such as those in Australia, and the experience of different systems tried - both in East Asia and in the United States - are brought to bear in this volume.

Habeas Corpus in Wartime Amanda L. Tyler 2017-11-01 Habeas Corpus in Wartime unearths and presents a comprehensive account of the legal and political history of habeas corpus in wartime in the Anglo-American legal tradition. The book begins by tracing the origins of the habeas privilege in English law, giving special attention to the English Habeas Corpus Act of 1679, which limited the scope of executive detention and used the machinery of the English courts to enforce its terms. It also explores the circumstances that led Parliament to invent the concept of suspension as a tool for setting aside the protections of the Habeas Corpus Act in wartime. Turning to the United States, the book highlights how the English suspension framework greatly influenced the development of early American habeas law before and after the American Revolution and during the Founding period, when the United States Constitution enshrined a habeas privilege in its Suspension Clause. The book then chronicles the story of the habeas privilege and suspension over the course of American history, giving special attention to the Civil War period. The final chapters explore how the challenges posed by modern warfare during the twentieth and twenty-first centuries have placed great strain on the previously well-settled understanding of the role of the habeas privilege and suspension in American constitutional law, particularly during World War

II when the United States government detained tens of thousands of Japanese American citizens and later during the War on Terror. Throughout, the book draws upon a wealth of original and heretofore untapped historical resources to shed light on the purpose and role of the Suspension Clause in the United States Constitution, revealing all along that many of the questions that arise today regarding the scope of executive power to arrest and detain in wartime are not new ones.

The Dream Is Over Simon Marginson 2016-09-08 A free ebook version of this title is available through Luminos, University of California Press's Open Access publishing program for monographs. Visit www.luminosoa.org to learn more. The Dream Is Over tells the extraordinary story of the 1960 Master Plan for Higher Education in California, created by visionary University of California President Clark Kerr and his contemporaries. The Master Plan's equality of opportunity policy brought college within reach of millions of American families for the first time and fashioned the world's leading system of public research universities. The California idea became the leading model for higher education across the world and has had great influence in the rapid growth of universities in China and East Asia. Yet, remarkably, the political conditions supporting the California idea in California itself have evaporated. Universal access is faltering, public tuition is rising, the great research universities face new challenges, and educational participation in California, once the national leader, lags far behind. Can the social values embodied in Kerr's vision be renewed?

Management of Adult Glioma in Nursing Practice Ingela Oberg 2019-01-04 This contributed book focuses on the nursing care and considerations for the most common type of malignant brain tumours – gliomas, out of the 150 different types of brain tumours . The reader will gain specialist knowledge in understanding the disease trajectory of malignant gliomas and gain a deeper understanding of the presenting symptoms and varying treatment options of this highly malignant tumour. High grade malignant gliomas impact significantly on prognosis, with an average life expectancy of 18-24 months from diagnosis, given maximum treatment options including surgery, chemotherapy and radiotherapy. This book takes you through all current treatment options with their associated risks and intended benefits. Brain tumours affect not just the patient, but their family and carers too and this important aspect of holistic nursing care is not to be overlooked. This book encompasses first hand experiences of both a brain tumour patient living with a glioma and aspects from a carer. The structure of this book follows a typical patient pathway from presenting signs / symptoms through to MDT (multidisciplinary team) discussions to surgical techniques and radiological investigations, right through to chemotherapy, radiotherapy and palliative care including end of life care. It provides a distinct overview of the holistic needs spectrum encompassing the entire patient journey and equips the reader with learning objectives set at every chapter.
