That Winter Pamela Gillilan 1986 Pamela Gillilan was born in London in 1918, married in 1948 and moved to Cornwall in 1951. When she sat down to write her poem *Come Away* after the death of her husband David, she had written no poems for a quarter of a century. Then came a sequence of incredibly moving elegies. Other poems followed, and two years after starting to write again, she won the Cheltenham Festival poetry competition. Her first collection *That Winter* (Bloodaxe, 1986) was shortlisted for the Commonwealth Poetry Prize.

*Hand + Made* Valerie Cassel Oliver 2010 *Hand + Made: The Performative Impulse in Art and Craft* assesses the latest developments in the ever-increasing overlap between contemporary art and craft. Through the incorporation of performance, the artists featured in this volume have not only broadened the context and function of the handmade object itself, but also usefully blurred the distinctions between the genres of the performing and sculptural arts. The 19 artists featured in this book have either sought to animate the handmade object by using it as an instrument of performance; to extend its impact through public interventions; or to propose their works as residuals of spectacles or happenings. The participating artists are B Team, Conrad Bakker, Nick Cave, Cat Chow, Sonya Clark, Gabriel Craig, Theaster Gates, Cynthia Giachetti, Ryan Gothrup, Sabrina Gschwandtner, Lauren Kalman, Christy Matson, James Melchert, Yuka Otani, Sheila Pepe, Michael Rea, Anne Wilson, Saya Woolfalk, and Bohyun Yoon. *Chemical Synthetic Biology* Pier Luigi Luisi 2011-02-10 *Chemistry* plays a very important role in the emerging field of synthetic biology. In particular, chemical synthetic biology is concerned with the synthesis of chemical structures, such as proteins, that do not exist in nature. With contributions from leading international experts, *Chemical Synthetic Biology* shows how chemistry underpins synthetic biology. The book is an

essential guide to this fascinating new field, and will find a place on the bookshelves of researchers and students working in synthetic chemistry, synthetic and molecular biology, bioengineering, systems biology, computational genomics, and bioinformatics.

Nineteen Eighty-Four George Orwell 2021-01-09 "Nineteen Eighty-Four: A Novel", often published as "1984", is a dystopian social science fiction novel by English novelist George Orwell. It was published on 8 June 1949 by Secker & Warburg as Orwell's ninth and final book completed in his lifetime. Thematically, "Nineteen Eighty-Four" centres on the consequences of totalitarianism, mass surveillance, and repressive regimentation of persons and behaviours within society. Orwell, himself a democratic socialist, modelled the authoritarian government in the novel after Stalinist Russia. More broadly, the novel examines the role of truth and facts within politics and the ways in which they are manipulated. The story takes place in an imagined future, the year 1984, when much of the world has fallen victim to perpetual war, omnipresent government surveillance, historical negationism, and propaganda. Great Britain, known as Airstrip One, has become a province of a totalitarian superstate named Oceania that is ruled by the Party who employ the Thought Police to persecute individuality and independent thinking. Big Brother, the leader of the Party, enjoys an intense cult of personality despite the fact that he may not even exist. The protagonist, Winston Smith, is a diligent and skillful rank-and-file worker and Outer Party member who secretly hates the Party and dreams of rebellion. He enters into a forbidden relationship with a colleague, Julia, and starts to remember what life was like before the Party came to power.

Nova Express William S. Burroughs 2011-02-24 The Soft Machine introduced us to the conditions of a universe where endemic lusts of the mind and body pray upon men, hook them, and turn them into beasts. Nova Express takes William S. Burroughs's nightmarish futuristic tale one step further. The diabolical Nova Criminals—Sammy The Butcher, Green Tony, Iron Claws, The Brown Artist, Jacky Blue Note, Izzy The Push, to name only a few—have gained control and plan on wreaking untold destruction. It's up to Inspector Lee of the Nova Police to attack and dismantle the word and imagery machine of these "control addicts" before it's too late. This surrealist novel is part sci-fi, part Swiftian parody, and always pure Burroughs.

Clinical Observation Georgia Hambrecht 2011-08-25 Health Sciences & Professions Nutrition for Anemia Javier Diaz-Castro 2020 Bladder cancer is the second most common genitourinary malignancy, with 81,190 estimated new diagnoses in 2018, in the United States alone. Transurethral resection of the bladder and radical cystectomy with bilateral pelvic lymph node dissection constitute the standard treatment for non-muscle invasive or very high-risk non-muscle invasive bladder cancer, respectively. However, survival expectations have not shown to improve in the last 20 years, and new diagnostic and therapeutic tools are urgently needed to improve the outcomes of this potentially lethal disease.

Historical Linguistics Lyle Campbell 2004 This accessible, hands-on text not only introduces students to the important topics in historical linguistics but also shows them how to apply the methods described and how to think about the issues; abundant examples and exercises allow students to focus on how to do historical linguistics. Distinctive to this text is its integration of the standard topics with others now considered important to the field, including syntactic change, grammaticalization, sociolinguistic contributions to linguistic change, distant genetic relationships, areal linguistics, and linguistic prehistory. Examples are taken from a broad range of languages; those from the more familiar English, French, German, and Spanish make the topics more accessible, while those from non-Indo-European languages show the depth and range of the concepts they illustrate. This second edition features expanded explanations and examples as well as updates in light of recent work in linguistics, including a defense of the family tree model, a response to recent claims on lexical diffusion/frequency, and a section on why languages diversify and spread.

The book will be beneficial to researchers from various branches of science and technology, and is intended to point them to modern techniques, which might be useful for their specific problems. Spectroscopic techniques, that are discussed include, UV-Visible absorption spectroscopy, XPS, Raman spectroscopy, SERS, TERS, CARS, IR absorption spectroscopy, SFG, LIBS, Quantum cascade laser (QCL) spectroscopy, fluorescence spectroscopy, ellipsometry, cavity-enhanced absorption spectroscopy, such as cavity ring-down spectroscopy (CRDS) and evanescent wave-CRDS both in gas and condensed phases, time-resolved spectroscopy etc. Applications introduced in the different chapters demonstrates the usefulness of the spectroscopic techniques for the characterization of fundamental properties of molecules, e.g. in connection with environmental impact, bio-activity, or usefulness for pharmaceutical drugs, and materials important e.g. for nanoscience, nuclear chemistry, or bio-applications. The book presents how spectroscopic techniques can help to better understand substances, which have also great impact on questions of social and economic relevance (environment, alternative energy, etc.).

Diversification of Mexican Spanish Margarita Hidalgo 2016-10-24 This book offers a diversification model of transplanted languages that facilitates the exploration of external factors and internal changes. The general context is the New World and the variety that unfolded in the Central Highlands and the Gulf of Mexico, herein identified

as Mexican Colonial Spanish (MCS). Linguistic corpora provide the evidence of (re)transmission, diffusion, metalinguistic awareness, and select focused variants. The tridimensional approach highlights language data from authentic colonial documents which are connected to socio-historical reliefs at particular periods or junctions, which explain language variation and the dynamic outcome leading to change. From the Second Letter of Hernán Cortés (Seville 1522) to the decades preceding Mexican Independence (1800-1821) this book examines the variants transplanted from the peninsular tree into Mesoamerican lands: leveling of sibilants of late medieval Spanish, direct object (masc. sing.) pronouns LO and LE, pronouns of address (vos, tu, vuestra merced plus plurals), imperfect subjunctive endings in -SE and -RA), and Amerindian loans. Qualitative and quantitative analyses of variants derived from the peninsular tree show a gradual process of attrition and recovery due to their saliency in the new soil, where they were identified with ways of speaking and behaving like Spanish speakers from the metropolis. The variants analyzed in MCS may appear in other regions of the Spanish-speaking New World, where change may have proceeded at varying or similar rates. Additional variants are classified as optimal residual (e.g. dizque) and popular residual (e.g. vide). Both types are derived from the medieval peninsular tree, but the former are vital across regions and social strata while the latter may be restricted to isolated and / or marginal speech communities. Each of the ten chapters probes into the pertinent variants of MCS and the stage of development by century. Qualitative and quantitative analyses reveal the trails followed by each select variant from the years of the Second Letter (1520-1522) of Hernán Cortés to the end of the colonial period. The tridimensional historical sociolinguistic model offers explanations that shed light on the multiple causes of change and the outcome that eventually differentiated peninsular Spanish tree from New World Spanish. Focused-attrition variants were selected because in the process of transplantation, speakers assigned them a social meaning that eventually differentiated the European from the Latin American variety. The core chapters include narratives of both major historical events (e.g. the conquest of Mexico) and tales related to major language change and identity change (e.g. the socio-political and cultural struggles of Spanish speakers born in the New World). The core chapters also describe the strategies used by prevailing Spanish speakers to gain new speakers among the indigenous and Afro-Hispanic populations such as the appropriation of public posts where the need arose to file documents in both Spanish and Nahuatl, forced and free labor in agriculture, construction, and the textile industry. The examples of optimal and popular residual variants illustrate the trends unfolded during three centuries of colonial life. Many of them have passed the test of time and have survived in the present Mexican territory; others are also vital in the U.S. Southwestern states that once belonged to Mexico. The reader may also identify those that are used beyond the area of Mexican influence. Residual variants of New World Spanish not only corroborate the homogeneity of Spanish in the colonies of the Western Hemisphere but the speech patterns that were unwrapped by the speakers since the beginning of colonial times: popular and cultured Spanish point to diglossia in monolingual and multilingual communities. After one hundred years of study in linguistics, this book contributes to the advancement of newer conceptualization of diachrony, which is concerned with the development and evolution through history. The additional sociolinguistic dimension offers views of social significant and its thrilling links to social movements that provoked a radical change of identity. The amplitude of the

diversification model is convenient to test it in varied contexts where transplantation occurred.

Hispanisation Thomas Stolz 2008-08-27 Literally hundreds of languages world-wide have experienced direct or indirect Hispanisation during the heyday of the Spanish colonial empire. The number of languages which continue to borrow from Spanish on a daily basis is considerable especially in Latin America. This volume gives the reader a better idea of the range of contact constellations in which Spanish functions as the donor language. Moreover, the contributions to this collection of articles demonstrate that it is not only possible to compare the contact-induced processes in the (Hispanised) languages of Austronesia and the Americas. It is emphasized that one can draw far-reaching conclusions from the presented borrowing facts for the theory of language contact in general. The volume is divided into two sections according to geographical principles: section I is devoted to contacts of Spanish in Latin America. Two contributions look at the Hispanisation of varieties of Nahuatl (Classical Nahuatl studied by Anne Jensen and modern varieties studied by José Antonio Flores Farfán). Martina Schrader-Kniffki discusses Spanish-Zapotec contacts and their relations to language mixing and purism. Luciano Giannelli and Raoul Zamponi address the issue of Hispanisms in Kuna, a language from Panama. For South America, Jorge Gómez-Rendón discusses whether or not there are constraints on lexical borrowing from Spanish into Imbabura Quichua. Suzanne Dikker studies the intertwined language Media Lengua in her attempt at redefining the notion of relexification. Section II focuses on the impact of Spanish on the languages of Austronesia and South-East Asia. Steven Roger Fischer shows that the heavy Hispanisation of Rapanui is currently being reverted. Steve Pagel compares Hispanisation processes and their results in the Mariana Islands and on Rapa Nui. The second comparative study is by Patrick O. Steinkrüger who reviews a variety of Philippinian languages and their degrees of Hispanisation. The attitudes of native speakers of Chamorro as to Hispanisms is the

topic of the study by Rosa Salas Palomo and Thomas Stolz. The volume is especially interesting for students of language contact. But also scholars with a background in Romance linguistics or Hispanic philology will find the assembled articles very useful, as well as Austronesianists and Amerindianists.

*Translation and Censorship* Eiléan Ní Chuilleanáin 2009 Who are the censors of foreign literature? What motives influence them as they patrol the boundaries between cultures? Can cuts and changes sometimes save a book? What difference does it make when the text is for children, or designed for schools? These and other questions are explored in this wide-ranging international collection, with copious examples: from Catullus to Quixote, Petrarch to Shakespeare, Wollstonecraft to Waugh, Apuleius to Mansfield, how have migrating writers fared? We see many genres, from Celtic hero-tales to histories, autobiographies, polemics and even popular songs, transformed on their travels by the censor's hand.

*Interpretation* James Nolan 2012-10-09 In recent decades the explosive growth of globalization and regional integration has fuelled parallel growth in multilingual conferences. Although conference interpreting has come of age as a profession, interpreter training programs have had varied success, pointing to the need for an instructional manual which covers the subject comprehensively. This book seeks to fill that need by providing a structured syllabus and an overview of interpretation accompanied by exercises in various aspects of the art. It is meant to serve as a practical guide for interpreters and as a complement to interpreter training programs in the classroom and online, particularly those for students preparing for conference interpreting in international governmental and business settings. This expanded second edition includes additional exercises and provides direct links to a variety of web-based resources and practice speeches, also including additional language combinations.

Manual of Deixis in Romance Languages Konstanze Jungbluth 2015-10-16 Deixis as a field of research has generated increased interest in recent years. It is crucial for a number of different subdisciplines: pragmatics, semantics, cognitive and contrastive linguistics, to name just a few. The subject is of particular interest to experts and students, philosophers, teachers, philologists, and psychologists interested in the study of their language or in comparing linguistic structures. The different deictic structures – not only the items themselves, but also the oppositions between them – reflect the fact that neither the notions of space, time, person nor our use of them are identical cross-culturally. This diversity is not restricted to the difference between languages, but also

appears among related dialects and language varieties. This volume will provide an overview of the field, focusing on Romance languages, but also reaching beyond this perspective. Chapters on diachronic developments (language change), comparisons with other (non-)European languages, and on interfaces with neighboring fields of interest are also included. The editors and authors hope that readers, regardless of their familiarity with Romance languages, will gain new insights into deixis in general, and into the similarities and differences among deictic structures used in the languages of the world.
