La manipulación mediática de la sociedad y la prensa amarillista de hoy. Qué hay detrás de todo este juego oscuro. Las luchas por el poder, el dinero y el éxito. El infierno que vivió su familia, las mentiras y trampas que se fueron entramando, alrededor de su proceso judicial. Mario R. Segovia decide hablar y contar la verdad desde la cárcel.

This book chronicles the divergent growth trends in car production in Belgium and Spain. It delves into how European integration, high wages, and the demise of GM and Ford led to plant closings in Belgium. Next, it investigates how lower wages and the expansion strategies of Western European automakers stimulated expansion in the Spanish auto industry. Finally, it offers three alternate scenarios regarding how further EU expansion and Brexit may potentially reshape the geographic footprint of European car production over the next ten years. In sum, this book utilizes history to help expand the knowledge of scholars and policymakers regarding how European integration and Brexit may impact future auto industry investment for all EU nations.

This book was born from curiosity. To begin with, it was the curiosity of an economist who studied in the 60's in an environment which has subsequently developed from national into global economics. Who has to recognize that politicians, scholars and large segments of society oblivious to supranational authorities and economic globalization forces continue to labour under the notion that they are still fully autonomous and sovereign when shaping national economic policy. And pretend as though their own national state were still the "m- ter in its own house" that despite unbridled market economics could continue to dictate to the economy and companies how to live and in which "rooms". All that has become fiction. The laws of globalization diminish the - noeuving space for shaping national economic policy. Even if many folks today don't want to hear it: The issue is no longer achieving what is socially desirable for the own society but rather the optimal adaptation of society and social benefits to the politically practicable.

Die Automobilmärkte der Welt (Triade) sind gesättigt. Neue Wachstumsmärkte wie Asien und Osteuropa können die fehlende Nachfrage nicht ausgleichen. Die globale Krise verursacht einen Verdrängungswettbewerb, der sich durch aggressive Rabattschlachten bemerkbar macht. Die Folgen: sinkende Erträge, Arbeitsplatzabbau, Produktionsverlagerung in Niedriglohnländer. In diesem Buch: die fundierte Prognose über die Zukunftsfähigkeit der elf verbliebenen Volumenhersteller (IWK-Survival-Index) und damit der gesamten Branche. Wie entwickelt sich der Markt in den nächsten zehn Jahren? Wer überlebt, wer scheidet aus? Wird Deutsch-

land Automobilstandort bleiben?

Работа посвящена обзору моделей нелинейного

ценообразования, а также анализу способов их воплощения в жизнь на реальных рынках. На простых примерах описываются базовые формы нелинейного ценообразования и ценовой дискриминации, изложены основные теоретические результаты, касающиеся моделирования ассортимента ряда, в особенности применительно к тем потребителям, которые готовы платить за более высокий уровень качества. Показано, что автомобили из стран, обладающих репутацией «автомобильных держав» (Великобритания, Германия, Швеция), продаются с максимальной надбавкой по сравнению с базовым случаем. Кроме того, рассмотрены приемы, используемые на российском рынке, которые подтверждают, что при всех информационных ограничениях автодилеры находят способы продавать автомобили максимально близко к резервной цене потребителя, в той или иной форме используя все типы ценовой дискриминации.
