American Narrow Gauge Railroads George W. Hilton 1994 This is a comprehensive, illustrated account of the growth and decline of American narrow gauge railroading. It documents a long-gone era, bringing to life ancient steam locomotives, railroads and rolling stock that have mostly disappeared without trace. The basic facts and information on the subject are heavily illustrated with photographs, drawings and maps, presented in an encyclopedia format.

Assessing Site Significance Donald L. Hardesty 2000 Of the many properties listed on the National Register of Historic Places, only 7% are archaeological sites. With

the Register designed to primarily assess the historical significance of standing sites, archaeologists have had difficulty translating eligibility criteria to sites known primarily from archaeological work. Hardesty and Little provide practical guidance for archaeologists and others on how to examine these properties for their historical significance, both for academic reasons and for proposal to the Register. This useful guide will be helpful for anyone working in a cultural resource management context with recent archaeological sites.

The Historical Archaeology of Virginia from Initial Settlement to the Present
Clarence R. Geier 2017-02-10 The book includes six chapters that cover Virginia history from initial settlement through the 20th century plus one that deals with the important role of underwater archaeology. Written by prominent archaeologists with research experience in their respective topic areas, the chapters consider important issues of Virginia history and consider how the discipline of historic archaeology has addressed them and needs to address them . Changes in research strategy over time are discussed , and recommendations are made concerning the need to recognize the diverse and often differing roles and impacts that characterized the different regions of Virginia over the course of its historic past. Significant issues in Virginia history needing greater study are identified.

Chicago Trolleys David Sadowski 2017-09-25 Chicago's extensive transit system first started in 1859, when horsecars ran on rails in city streets. Cable cars and electric streetcars came next. Where new trolley car lines were built, people, businesses, and neighborhoods followed. Chicago quickly became a world-class city. At its peak, Chicago had over 3,000 streetcars and 1,000 miles of track--the largest such system in the world. By the 1930s, there were also streamlined trolleys and trolley buses on rubber tires. Some parts of Chicago's famous "L" system also used trolley wire instead of a third rail. Trolley cars once took people from the Loop to such faraway places as Aurora, Elgin, Milwaukee, and South Bend. A few still run today.

Spearhead of Logistics Benjamin King 2016-02-25 Spearhead of Logistics is a narrative branch history of the U.S. Army's Transportation Corps, first published in 1994 for transportation personnel and reprinted in 2001 for the larger Army community. The Quartermaster Department coordinated transportation support for the Army until World War I revealed the need for a dedicated corps of specialists. The newly established Transportation Corps, however, lasted for only a few years. Its significant utility for coordinating military transportation became again transparent during World War II, and it was resurrected in mid-1942 to meet the unparalleled logistical demands of fighting in distant theaters. Finally becoming a permanent branch in 1950, the Transportation Corps continued to demonstrate its capability of rapidly supporting U.S. Army operations in global theaters over the next fifty years. With useful lessons of high-quality support that validate the

necessity of adequate transportation in a viable national defense posture, it is an important resource for those now involved in military transportation and movement for ongoing expeditionary operations. This text should be useful to both officers and noncommissioned officers who can take examples from the past and apply the successful principles to future operations, thus ensuring a continuing legacy of Transportation excellence within Army operations. Additionally, military science students and military historians may be interested in this volume.

Cutting Rhythms Karen Pearlman 2012-08-21 How does a film editor make decisions about where and when to cut in order to make a film 'feel right'?

Generally speaking, the answer is, 'it's intuitive', which is accurate but leaves one wanting to know more. *Cutting Rhythms* breaks down the definition of intuition to find that, even if rhythmic thinking is intuitive thinking, we can still say more than we 'just know.' This book offers possibilities rather than prescriptions. It presents questions an editor or filmmaker can ask themselves about their work, and a clear and useful vocabulary for working with those questions. *Cutting Rhythms* makes ideas about rhythm in film editing clear and accessible, so that you can do more than just imitate editing you've seen on TV. With this book you'll develop your own sense of rhythm, refine our rhythmic shaping skills, and increase your creativity--and in so doing, become a better filmmaker.

Hard Hitting Songs for Hard-Hit People Alan Lomax 2012-09-01 Twenty-seven years in the making (1940–67), this tapestry of nearly two hundred American popular and protest songs was created by three giants of performance and musical research: Alan Lomax, indefatigable collector and preserver; Woody Guthrie, performer and prolific balladeer; and Pete Seeger, entertainer and educator who has introduced three generations of Americans to their musical heritage. In his

afterword, Pete Seeger recounts the long history of collecting and publishing this anthology of Depression-era, union-hopeful, and New Deal melodies. With characteristic modesty, he tells us what's missing and what's wrong with the collection. But more important, he tells us what's right and why it still matters, noting songs that have become famous the world over: "Union Maid," "Which Side Are You On?," "Worried Man Blues," "Midnight Special," and "Tom Joad." "Now, at the turn of the century, the millennium, what's the future of these songs?" he asks. "Music is one of the things that will save us. Future songwriters can learn from the honesty, the courage, the simplicity, and the frankness of these hard-hitting songs. And not just songwriters. We can all learn." In addition to 123 photographs and 195 songs, this edition features an introductory note by Nora Guthrie, the daughter of Woody Guthrie and overseer of the Woody Guthrie Foundation.

Archaeometry of Pre-Columbian Sites and Artifacts David A. Scott 1994-10-27

Based on the 28th International Archaeometry Symposium jointly sponsored by the University of California, Los Angeles, and the Getty Conservation Institute, this volume offers a rare opportunity to survey under a single cover a wide range of investigations concerning pre-Columbian materials. Twenty chapters detail research in five principal areas: anthropology and materials science; ceramics; stone and obsidian; metals; and archaeological sites and dating. Contributions

include Heather Lechtman's investigation of "The Materials Science of Material Culture," Ron L. Bishop on the compositional analysis of pre-Columbian pottery from the Maya region, Ellen Howe on the use of silver and lead from the Mantaro Valley in Peru, and J. Michael Elam and others on source identification and hydration dating of obsidian artifacts.

The World of the Maya Sam Osmanagich 2005 Sam Osmanagich transports the reader to ruined Mayan cities including the brilliant Chichen Itza, elegant Uxmal, artistic Copan, magical Palenque, forgotten Ek Balam, beautiful Izamal, hidden Yaxchilan, spiritual Oxkintok, monumental Coba, and colossal Tikal.

Rabinal Achi Dennis Tedlock 2003-09-04 Here is one of the most important surviving works of pre-Columbian civilization, Rabinal Achi, a Mayan drama set a century before the arrival of the Spanish, produced by the translator of the best selling Popol Vuh. The first direct translation into English from Quiché Maya, based on the original text, Rabinal Achi is the story of city-states, war, and nobility, of diplomacy, mysticism, and psychic journeys. Cawek of the Forest People has been

captured by Man of Rabinal, who serves a ruler named Lord Five Thunder. Cawek is a renegade, a warrior who has inflicted much suffering on Rabinal. Yet he is also the son of the lord of the allied city of Quiché--a noble who once fought alongside Man of Rabinal. The drama presents the confrontation between the two during the trial of Cawek, who defies his captors and proudly accepts death by beheading. Dennis Tedlock's translation is clear and vivid; more than that, it is rooted in an understanding of how the play is actually performed. Despite being banned for centuries by Spanish authorities, it survived in actual practice, and is still performed in the town of Rabinal today. Tedlock's photographs and diagrams accompany the text, capturing nuances not apparent in the dialogue alone. He also provides an introduction and commentary that explain the historical events compressed into the play, the Spanish influence on the Mayan dramatic tradition, and the cultural and religious world preserved in this remarkable play. Rabinal Achi ranks as a classic of Mayan literature--and a rare window on a world that had yet to be invaded by Europeans. Dennis Tedlock brings this drama to life in all its richness.

Bender 2013 Southern Pacific and its predecessor railroads constructed and maintained depots throughout their territory. Between 1877 and 1894, a series of 26 numbered standard plans for depots was developed, and each plan was successively in use for a few years. By the beginning of the 20th century, there were more than 600 SP depots and telegraph offices. By then, many older depots, as well as most new ones at that time, had been or would be built to these standards. This book describes those depots. "The story of depots in SP's far-flung territory is an interesting one: when they were built, what they looked like, and when they were destroyed or were saved. Particularly for smaller communities, the depot was once an integral part of local life, so the life stories of these depots are an integral part of town history. "In addition to the 26 numbered standard depot designs, SP also built a number of other de facto standard depots, such as the colonnade style, and several such designs are

described here. Also included are a group of stuccoed depots, modernized from older buildings, as well as standard-design depots built by predecessor railroads, such as the El Paso & Southwestern. Southern Pacific built each depot with an eye to what was expected to be needed. The overall size of the depot often reflected current or anticipated town size. The agent had quarters upstairs in a two-story depot, essential in places where suitable local housing was not available, but otherwise a one-story depot would be built. Freight rooms were sized according to the expected volume of business. Well-known depot historian Henry Bender has extensively researched this subject, and presents here an authoritative account of hundreds of SP standard depots, illustrated with a fine collection of photographs. The jacket painting is by noted railroad artist John R. Signor.

Cultures of Development Jonathan Warren 2016-11-25 The North Atlantic development establishment has had a blemished track record over the past 65 years. In addition to a sizeable portfolio of failure, the few economic success stories in the developing world, such as South Korea and China, have been achieved by rejecting the advice of Western experts. Despite these realities, debates within mainstream development studies have stagnated around a narrow, acultural emphasis on institutions or the size and role of government. Cultures of Development uses a contrapuntal comparison of Vietnam and Brazil to show why it is important for development scholars and practitioners to broaden their conceptualization of economies to include the socio-cultural. This smartly written book based on original, ethnographic research breathes new life into development studies by bringing cultural studies into conversation with development studies, with an emphasis on improving—rather than merely critiquing—market economies. The applied deployment of critical development studies, i.e., interpretive economics, results in a number of theoretical advances in both development and areas studies, demonstrating the economic importance of certain kinds of cultural work carried out by religious leaders, artists, activists, and educators. Most importantly, the reader comes to fully appreciate how economies are embedded

within the subjectivities, discourses, symbols, rituals, norms, and values of a given society. This pioneering book revives development practice and policy by offering fresh insights and ideas about how development can be advanced. It will be of special interest to scholars and students of Development Studies, Sociology, Economics, Anthropology, and Area Studies.

Produce Traffic & Trains Jeff Wilson 2018-08-01 From the late 1800s to the 1960s, the railroad industry faced a unique challenge: What was the best way to ship fresh produce across the U.S. to prevent spoiling? Produce Traffic & Trains looks at the development of refrigerator cars and how their development led to wide-scale growing and shipping of produce. Covered topics include: The development of refrigerator cars, car fleets, and produce terminals. Harvesting, loading, shipping, and delivering fresh produce, and later frozen products. Running express trains, making ice and icing stations, and carrying out perishable operations.

Building Chicago's Subways David Sadowski 2018 While the elevated Chicago Loop is justly famous as a symbol of the city, the fascinating history of its subways is less well known. The City of Chicago broke ground on what would become the "Initial System of Subways" during the Great Depression and finished 20 years later. This gigantic construction project, a part of the New Deal, would overcome many obstacles while tunneling through Chicago's soft blue clay, under congested

downtown streets, and even beneath the mighty Chicago River. Chicago's first rapid transit subway opened in 1943 after decades of wrangling over routes, financing, and logistics. It grew to encompass the State Street, Dearborn-Milwaukee, and West Side Subways, with the latter modernizing the old Garfield Park "L" into the median of Chicago's first expressway. Take a trip underground and see how Chicago's "I Will" spirit overcame challenges and persevered to help with the successful building of the subways that move millions. Building Chicago's subways was national news and a matter of considerable civic pride--making it a "Second City" no more

North Carolina 1988 All of us, at one time or another, have had a strong desire to be able to get into a time machine and be transported magically to an earlier place and time. Science has not yet produced for us such a time machine, but the Federal Writers Project (FWP), a division of the Works Progress Administration, did produce for prosperity guides to all of the old 48 states. Using talented local researchers and writers the FWP created an image of America fifty plus years ago. North Carolina: The WPA Guide to the Old North State is a reprint of the original WPA guide. It contains a calendar of events and sections on the natural setting, Indians, history, Negroes, agriculture, modes of travel, industry and labor, education, religion, sports and recreation, folkways and folklore. A section on the

principal cities and towns, their history and interesting facts about the present-day communities, and points of interest are included.

Chinati Marianne Stockebrand 2020-03-10 A beautiful book on the famed Chinati Foundation in Marfa, Texas

When Boston Rode the EL Frank Cheney 2000 The Boston Elevated Railway broke ground in 1899 for a new transit service that opened in 1901, providing a seven-mile elevated railway that connected Dudley Street Station in Roxbury and Sullivan Square Station in Charlestown, two huge multilevel terminals. When the EL, as it was popularly known, opened for service, it provided an unencumbered route high above the surging traffic of Boston, until it went underground through the city. The new trains of the EL were elegant coaches of African mahogany, bronze hardware, plush upholstered seats, plate glass windows, and exteriors of aurora red with silver gilt striping and slate grey roofs. They stopped at ten equally distinguished train stations, designed by the noted architect Alexander Wadsworth Longfellow. All of this elegance, let alone convenience, could be had for the price of a five-cent ticket. The popularity of the EL was instantaneous. The railway continued to provide transportation service high above Boston's streets until 1987, when it was unfortunately ended after 86 years of elevated operation. Today, the squealing wheels of the Elevated trains, the rocking coaches, the fascinating

views, and the fanciful copper-roofed stations of the line are a missing part of the character of Boston, when one could ride high above the city for a nickel.
