Whose Keeper? Alan Wolfe 2022-03-25 Whose Keeper? is a profound and creative treatise on modernity and its challenge to social science. Alan Wolfe argues that modern liberal democracies, such

as the United States and Scandinavia, have broken with traditional sources of mortality and instead have relied upon economic and political frameworks to define their obligations to one another. Wolfe calls for reinvigorating a sense of community and thus a sense of obligation to the larger society. Reflections on My Life Thomas H. Olbricht 2012-04-25
Thomas H. Olbricht grew up in Churches of Christ, has

taught in several of their universities, and has given religious lectures on six continents and in most states in the United States. He has met most leaders in Churches of Christ globally. He has been active in several religious and rhetoric societies and has worked with leaders in all these organizations to bring about changes over the past sixty years. C. Clifton Black and Duane F. Watson wrote about Olbricht, "Tom Olbricht possesses a memory of elephantine proportions. Not only does he have at his fingertips the names and places and dates; better than most he understands how the study of rhetoric has flourished among, while cross-pollinating, multiple disciplines in the humanities, classics, English, speech communication, and religion." *A History of the City of Saint Paul, and of the County of Ramsey, Minnesota* John Fletcher Williams 1876
Usable Pasts Tad Tuleja 1997-06 An eclectic collection of essays on creative use, manipulation, and "invention" of traditions by groups of many sizes and types: ethnic, regional, religious, organizational, and national.

Broadcasting Baseball Eldon L. Ham 2011-07-29

There is a long-standing relationship between broadcasting and sports, and nowhere is this more evident than in the marriage of baseball and radio: a slow sport perfectly suited to the word-painting of broadcasters. This work covers the development of the baseball broadcasting industry from the first telegraph reports of games in progress, the influence of early pioneers at Pittsburgh's KDKA and Chicago's WGN, including the first World Series broadcast, the launch of the Telstar Satellite, the Carlton Fisk homerun in the 1975 World Series, which changed how baseball is broadcast, through the latest computer graphics, HD television, and the Internet.

Phonetics, Theory and Application William R. Tiffany 1977

Observing the Observer Zahid Bukhari 2012 THE collection of papers in this volume documents the study of Islam in American Universities. Over the last few decades the United States has seen significant growth in the study of Islam and Islamic societies in institutions of higher learning fueled primarily by events including economic relations of the U.S. with Muslim countries, migration of Muslims into the country, conversion of Americans to Islam, U.S. interests in Arab oil resources, involvement of Muslims in the American public square, and the tragic events of 9/11.

Although there is increasing recognition that the study of Islam and the role of Muslims is strategically essential in a climate of global integration, multiculturalism, and political turmoil, nevertheless, the state of Islamic Studies in America is far from satisfactory. The issue needs to be addressed, particularly as the need for intelligent debate and understanding is continuously stifled by what some have termed an “Islam industry” run primarily by fly-by journalists, think tank pundits, and cut-and-paste “experts.”

The Colored Patriots of the American Revolution
William Cooper Nell 2010-12-01 In "Colored Patriots of the American Revolution," William Cooper Nell documents the important and oft-forgotten contributions of black Americans who fought during the Revolutionary War. While most history books focus on white heroes such as George Washington, Paul Revere, and Ethan Allen, "Colored Patriots" focuses on the black Americans who fought bravely and heroically for freedom and independence in the American Revolution. When the Revolution started, the American colonies had a population of about two and a half million people, one fifth of whom were black, mostly slaves. The courage and bravery demonstrated by blacks during the Revolution influenced legal decisions in the northern states to abolish slavery, leading to freedom for about 60,000 slaves. Yet for the most part, acts of heroism and the contributions of blacks during the Revolution either went unrecorded or were not widely publicized. "Colored Patriots of the American Revolution" is organized by state, with many historical names mentioned and an account given of the African

American involvement state-by-state.

Land of Necessity Alexis McCrossen 2009-06-19

Published in cooperation with the William P. Clements Center for Southwest Studies, Southern Methodist University. In *Land of Necessity*, historians and anthropologists unravel the interplay of the national and transnational and of scarcity and abundance in the region split by the 1,969-mile boundary line dividing Mexico and the United States. This richly illustrated volume, with more than 100 images including maps, photographs, and advertisements, explores the convergence of broad demographic, economic, political, cultural, and transnational developments resulting in various forms of consumer culture in the borderlands. Though its importance is uncontested, the role of necessity in consumer culture has rarely been explored. Indeed, it has been argued that where necessity reigns, consumer culture is anemic. This volume demonstrates otherwise. In doing so, it sheds new light on the history of the U.S.-Mexico borderlands, while also opening up similar terrain for scholarly inquiry into consumer culture. The volume opens with two chapters that detail the historical trajectories of consumer culture and the borderlands. In the subsequent chapters, contributors take up subjects including smuggling, tourist districts and resorts, purchasing power, and living standards. Others address home décor, housing, urban development, and commercial real estate, while still

others consider the circulation of cinematic images, contraband, used cars, and clothing. Several contributors discuss the movement of people across borders, within cities, and in retail spaces. In the two afterwords, scholars reflect on the U.S.-Mexico borderlands as a particular site of trade in labor, land, leisure, and commodities, while also musing about consumer culture as a place of complex political and economic negotiations. Through its focus on the borderlands, this volume provides valuable insight into the historical and contemporary aspects of the big “isms” shaping modern life: capitalism, nationalism, transnationalism, globalism, and, without a doubt, consumerism. From Pleasure Machines to Moral Communities
Geoffrey M. Hodgson 2013 Are humans at their core

seekers of their own pleasure or cooperative members of society? Paradoxically, they are both. Pleasure-seeking can take place only within the context of what works within a defined community, and central to any community are the evolved codes and principles guiding appropriate behavior, or morality. The complex interaction of morality and self-interest is at the heart of Geoffrey M. Hodgson's approach to evolutionary economics, which is designed to bring about a better understanding of human behavior. In *From Pleasure Machines to Moral Communities*, Hodgson casts a critical eye on neoclassical individualism, its foundations and flaws, and turns to recent insights from research on the evolutionary bases of human behavior. He focuses his attention on the evolution of morality, its meaning, why it came about, and how it influences human attitudes and behavior. This more nuanced understanding sets the stage for a fascinating investigation of its implications on a range of pressing issues drawn from diverse environments, including the business world and crucial policy realms like health care and ecology. This book provides a valuable complement to Hodgson's earlier work with Thorbjørn Knudsen on evolutionary economics in *Darwin's Conjecture*, extending the evolutionary outlook to include moral and policy-related issues.

Sweet Freedom's Plains Shirley Ann Wilson Moore

2016-10-20 The westward migration of nearly half a million Americans in the mid-nineteenth century looms large in U.S. history. Classic images of rugged Euro-Americans traversing the plains in their prairie schooners still stir the popular imagination. But this traditional narrative, no matter how alluring, falls short of the actual—and far more complex—reality of the overland trails. Among the diverse peoples who converged on the western frontier were African American pioneers—men, women, and children. Whether enslaved or free, they too were involved in this transformative movement. *Sweet Freedom's Plains* is a powerful retelling of the migration story from their perspective. Tracing the journeys of black overlanders who traveled the Mormon, California, Oregon, and other trails, Shirley Ann Wilson Moore describes in vivid detail what they left behind, what they encountered along the way, and what they expected to find in their new, western homes. She argues that African Americans understood advancement and prosperity in ways unique to their situation as an enslaved and racially persecuted people, even as they shared many of the same hopes and dreams held by their white contemporaries. For African Americans, the journey westward marked the beginning of liberation and transformation. At the same time, black emigrants' aspirations often came into sharp conflict with real-world conditions in the West. Although many scholars have focused on African

Americans who settled in the urban West, their early trailblazing voyages into the Oregon Country, Utah Territory, New Mexico Territory, and California deserve greater attention. Having combed censuses, maps, government documents, and white overlancers' diaries, along with the few accounts written by black overlancers or passed down orally to their living descendants, Moore gives voice to the countless, mostly anonymous black men and women who trekked the plains and mountains. *Sweet Freedom's Plains* places African American overlancers where they belong—at the center of the western migration narrative. Their experiences and perspectives enhance our understanding of this formative period in American history.

Teaching Islam Brannon M. Wheeler 2003 Despite the importance of Islam in global affairs and the role of Islamic Studies in Religious Studies, little attention has been given to the basic questions of how Islam should be taught. This volume brings together a number of leading scholars of Islamic Studies with rich experience in teaching Islam in a diversity of undergraduate settings, from large public universities to small private colleges. Topics addressed include Islamic law, the Quran, Sufism, women in Islam, Islam in America, and teaching about Islam through Arabic literature and the use of new information technology. Along with providing practical information about structuring courses and assignments, the contributors examine the place of Islamic Studies in the larger theoretical framework of Religious Studies and liberal arts curricula.

The Genetics of Pain Jeffrey Steven Mogil 2004

Genetics more than any other biological approach can explain why some people experience more pain than others and receive less benefit from existing analgesics. Sixteen scholarly articles from international contributors describe the application of genetic techniques to the problem of pain and consider the knowledge that has so far resulted. Three themed sections review the techniques that are allowing the study of pain mechanisms at the genetic level; describe the progress being made in lab animals and humans in identifying the genes responsible for individual differences; and explore the practical and ethical issues that face pain researchers. The editor is associated with the Centre for Research on Pain, McGill U., Montreal. Annotation : 2004 Book News, Inc., Portland, OR (booknews.com).
