Reproductive Health Indicators Guidelines For

Comprehensive sets of health indicators support in formulating evidence-based policies. Indicators should be developed and prioritized based on consensus and regional relevance. This is one of the first studies to employ the Delphi technique for prioritizing adolescent sexual and reproductive health (ASRH) indicators for South Asia.

In the years following ICPD, international agencies agreed on 17 indicators for monitoring the international sexual and reproductive health goals. Selection of these indicators included a comprehensive review process, and this document contains a brief description of and justification for each of the 17 indicators.
