## **AWJO61 - ASHLEY KEIRA**

---

This work looks at the topic of victimisation and blame as a pathology for our time, and its consequences for personal responsibility.

51 Creative Ideas for Marriage Mentors offers an 'idea box' of activities and innovative ways to deepen relationships between mentoring couples. It can be used in any of the three areas of the marriage mentoring triad: \* Preparing---mentoring engaged and newlywed couples \* Maximizing---mentoring couples from good to great \* Restoring---mentoring couples in distress Creative ideas for marriage mentors are grouped into these three areas. There is

also an entire section of ideas appropriate for mentoring any couple. With activities that vary from quickly implemented suggestions to more involved interactions, this easy-to-use reference will help alleviate the stress of couples overwhelmed by mentoring ... and take experienced mentors to a whole new level. Designed to work on its own or in tandem with the Parrotts' other marriage mentoring resources, 51 Creative Ideas for Marriage Mentors will inspire fresh ideas, increase a sense of vision for the marriage mentoring process, and build the confidence of all marriage mentors, regardless of age or stage.

In The Victimization of Women, Michelle Meloy and Susan Miller

present a balanced and comprehensive summary of the most significant research on the victimizations, violence, and victim politics that disproportionately affect women. They examine the history of violence against women, the surrounding debates, the legal reforms, the related media and social-service responses, and the current science on intimate-partner violence, stalking, sexual harassment, sexual assault, and rape. They augment these victimization findings with original research on women convicted of domestic battery and men convicted of sexual abuse and other sex-related offenses. In these new data, the authors explore the unanticipated consequences associated with changes to the laws governing domestic violence and the newer forms of sex-offender legislation. Based on qualitative data involving in-depth, offender-based interviews, and analyzing the circumstances surrounding arrests, victimizations, and experiences with the criminal justice system, *The Victimization of Women* makes great strides forward in understanding and ultimately combating violence against women.

This book provides an overview of the problem of the molestation of children, and includes the issue of false accusations. It analyzes the subject of incest, and discusses both treatment and assessment.

Published in 1997. Literature is reviewed relating to those behaviours which have traditionally been referenced as date rape, acquaintance rape, or rape by a friend or someone known to the victim. Forced sexual intercourse in intimate relationships is placed in both an historical context and a conceptual context. Limited published and unpublished data from the authors re-

search are included in appropriate chapters. The theory chapter ends with the presentation of a rudimentary model for examining forced sexual intercourse in intimate relationships developed by the authors. The topics of domestic violence, courtship violence and forced sexual intercourse are highly controversial and tend to be dominated by those who are promoting specific political agendas. Much of the work in this field has been written from the 'feminist' perspective with recent works appearing which oppose the feminist perspective. This work is neither 'feminist' nor anti-feminist in its approach. It is analytical and, as much as possible in a politicized environment, analytical and neutral.

*Rape Culture and Spiritual Violence* examines sexual violence against women, how religion and society contribute to a rape culture, and the extreme suffering endured by rape victims as a result. Using the testimony of women who have experienced both rape and the consequences of rape culture—from a range of religious, cultural, ethnic, and social contexts—the book explores both the suffering and healing of rape victims from World War II to today. Among the issues considered are victim invisibility, the inability to express pain, and the tendency to assume shame and self-blame. The study examines the role of society in shaping and reinforcing these responses, contributing to traumas that can lead to spiritual death. The book also explores possibilities for multiple spiritual resurrections within the practice of daily life, encouraging both individual healing and social change.

Forensic psychology has mushroomed into a diverse and increasingly complex field that is equal parts law and psychology. Psychologists act as expert witnesses in legal cases - sometimes without knowing much about the laws involved, and legal profession-

als rely on the assessment of psychologists sometimes without knowing much about how such assessments are made. The purpose of this handbook is to provide professionals with current, practical, and empirically based information to guide their work in forensic settings, or to better their understanding of the issues and debates in forensic psychology. Divided into four sections, the Handbook of Forensic Psychology covers basic issues, assessment, mental disorders and forensic psychology, and special topics. The basic issue chapters present a primer on law for the psychologist, a primer on psychology for attorneys, an overview of ethical issues relevant to forensic psychology, and a chapter on forensic report writing. The assessment section discusses factors and measures relevant for assessing a variety of behaviors, propensities, and capabilities, including dangerousness, violence, suicide, competency, substance abuse, PTSD and neuropsychological evaluations, as well as discussing interviewing children and child custody evaluations. Additional chapters discuss eyewitness testimony, recovered memory, polygraphs, sexual harassment, juror selection, and issues of ethnicity in forensic psychology.

In *A Transnational Human Rights Approach to Human Trafficking*, Yoon Jin Shin proposes an innovative and comprehensive human rights framework to human trafficking, to empower victimized individuals as rights-holders, overcoming the current regime's state-interest-driven border and crime control approach.

Moral psychology is the study of how human minds make and are made by human morality. This state-of-the-art volume covers contemporary philosophical and psychological work on moral psychology, as well as notable historical theories and figures in the field

of moral psychology, such as Aristotle, Kant, Nietzsche, and the Buddha. The Oxford Handbook of Moral Psychology's fifty chapters, authored by leading figures in the field, cover foundational topics, such as character, virtue, emotion, moral responsibility, the neuroscience of morality, weakness of will, and the nature of moral judgments and reasons. The volume also canvases emerging work in applied moral psychology, including adaptive preferences, animals, mental illness, poverty, marriage, race, bias, and victim blaming. Collectively, the essays form the definitive survey of contemporary moral psychology.

Over the past 15 years, I (MB) have taught a graduate-level course in Psychology of Women to students in two different professional psychology programs. Because my students were at the doctoral level and often had some familiarity with the psychology of women, these courses focused on bringing a feminist analysis of psychology and integrating a feminist analysis into one's scholarly work and professional activities. Although I used several fine psychology of women textbooks during this time, I found none that was specifically designed for graduate students. Thus, I always augmented the textbook with journal articles on specific aspects of the topic, and these focused articles have typically been well received by the students. The students whom I have encountered in these courses have often expressed a wish for a textbook that is designed for their needs; I think what they are asking for is one that could serve as a foundation for their scholarly analysis of psychology as well as a springboard for thoughtful application of a feminist perspective to the profession of psychology. Therefore, *Issues in the Psychology of Women* has been designed to serve as a textbook for advanced undergraduate or graduate courses in-

cluding Psychology of Women or Feminist Analysis of Psychology. This book is the collective work of authors with special expertise in their chapter topic.

This book is about the human factor in cybercrime: its offenders, victims and parties involved in tackling cybercrime. It takes a diverse international perspective of the response to and prevention of cybercrime by seeking to understand not just the technological, but the human decision-making involved. This edited volume represents the state of the art of research on the human factor in cybercrime, addressing its victims, offenders, and policing. It originated at the Second annual Conference on the Human Factor in Cybercrime, held in The Netherlands in October 2019, bringing together empirical research from a variety of disciplines, and theoretical and methodological approaches. This volume will be of particular interest to researchers and students in cybercrime and the psychology of cybercrime, as well as policy makers and law enforcement interested in prevention and detection.

Collects entries on domestic violence that cover topics that include ritual abuse-torture and domestic violence against women with disabilities.

In America, Christian adolescents and young adults have grown up with fiercely competing narratives about sex, relationships, and fulfillment. Within a Christian world of church services, formal religious education, and retreats, they have been warned about the dangers and sinfulness of premarital sex. All the while, popular culture has inundated them with a very different message: casual sex is fun, thrilling, expected, and no-big-deal. Popular culture's influence is perhaps nowhere more evident than on college

campuses where hookups - casual sexual encounters devoid of commitment or emotional attachment - have become the norm for emerging adults. *College Hookup Culture and Christian Ethics* engages 126 college students as sober ethnographers whose task is to observe and analyze their own complex social reality. Part I reveals students' disillusionment with contemporary sexual and relational norms, challenging benevolent or even neutral views of hookup culture. Part II brings the students into conversation with Christianity's counter-cultural narrative of what it means to become fully human and experience genuine joy and fulfillment. The spokesperson for this vision is theologian Johann Metz, whose portrait of Jesus enduring his desert temptations and becoming fully human resonates profoundly with today's college students. Comparing Jesus' way of being in the world with their college culture's status quo, many undergraduates discover in "poverty of spirit" a hopeful, counter-cultural path to authenticity and happiness. Part III culminates in a call to action. Students explore obstacles to sexual justice on college campuses, identify key commitments necessary for change, and envision how undergraduates can work to create the college culture they truly desire and deserve.

Steve Bogira's riveting book takes us into the heart of America's criminal justice system. *Courtroom 302* is the story of one year in one courtroom in Chicago's Cook County Criminal Courthouse, the busiest felony courthouse in the country. We see the system through the eyes of the men and women who experience it, not only in the courtroom but in the lockup, the jury room, the judge's chambers, the spectators' gallery. When the judge and his staff go to the scene of the crime during a burglary trial, we

go with them on the sheriff's bus. We witness from behind the scenes the highest-profile case of the year: three young white men, one of them the son of a reputed mobster, charged with the racially motivated beating of a thirteen-year-old black boy. And we follow the cases that are the daily grind of the court, like that of the middle-aged man whose crack addiction brings him repeatedly back before the judge. Bogira shows us how the war on drugs is choking the system, and how in most instances justice is dispensed—as, under the circumstances, it must be—rapidly and mindlessly. The stories that unfold in the courtroom are often tragic, but they no longer seem so to the people who work there. Says a deputy in 302: “You hear this stuff every day, and you're like, ‘Let's go, let's go, let's get this over with and move on to the next thing.’” Steve Bogira is, as Robert Caro says, “a masterful reporter.” His special gift is his understanding of people—and his ability to make us see and understand them. Fast-paced, gripping, and bursting with character and incident, Courtroom 302 is a unique illumination of our criminal court system that raises fundamental issues of race, civil rights, and justice.

'Accounts of Innocence' explores the question of why such psychological significance is placed on victimisation in people's lives. Focusing on adult survivors of childhood sexual abuse, David shows how the idea of innocence shaped the emergence of traumapsychology.

Winner of the 1999 Choice Outstanding Academic Title More than just a study of legal history, *Shifting the Blame* looks at the "abuse excuse" defense as an indicator of broad social change in cultural understandings of victimization, responsibility, and womanhood. The introduction of victimization as an exculpatory condi-

tion within the context of a criminal defense tells the story of a society that has accepted victimization as a new way of explaining and excusing misbehavior. Through case law analysis, the book documents the initial development of the strategy in three different types of cases in the 1970s - "rotten social background", brainwashing, and battered women's self-defense cases. Since its initial acceptance in battered women's cases in the early 1980s, the use of the strategy has expanded to a variety of offenders in different types of relationships arguing different defenses. In lively, readable prose, Westervelt examines each form of expansion, revealing that while the expansion of the strategy has been fairly extensive, it has also been limited in some important ways. Her research shows readers that only certain types of "victims," particularly victims of physical abuse, have successfully used this defense. *Shifting the Blame* exposes the ways in which the acceptance of this new defense strategy illuminates a cultural shift in understandings of individual responsibility and shows how the law plays a role in defining who can be an acceptable victim. Saundra D. Westervelt is an assistant professor in the Sociology Department at the University of North Carolina at Greensboro.

Essays explain how fear shapes the contemporary landscape, giving us security systems, gated communities, and semi-public mall and atrium spaces.

This book takes a holistic approach by providing insight into the behavior and nature of sex offenders within the church. The text covers various types of sex offenders as well as their criminal propensities and methods of acquiring victims. Warning signs associated with sex crimes within the church are explained as well

as security measures and prevention strategies that church leaders and criminal justice professionals can utilize to minimize risk to congregants. Discussion questions and case study scenarios are provided to allow the reader to examine relevant issues and explore a range of potential solutions and interventions. This comprehensive book is intended for criminal justice academicians who teach courses on sex crimes and sex offenders, criminal justice agents (police and investigators), seminary professors and students, and clergy members. It can also assist security teams, church board members, leaders, and teachers in developing intervention and prevention strategies.

*Women, Gender, and Crime: Core Concepts* provides you with a complete and concise view into the intersection of gender and the criminal justice system. Author Stacy L. Mallicoat explores core topics on women as victims, offenders, and criminal justice professionals as they interact with various areas of the criminal justice system. She investigates relevant subjects that are not found in many traditional texts, including women who work as victim advocates and international issues of crime and justice relating to gender. Key Features: This text discusses women and victimization prior to covering women as offenders, because victimization is often a precursor to offending. Case Studies present compelling examples that connect concepts to real-life occurrences to reinforce learning and cover key issues, such as, sexual victimization in the military, stalking on college campuses, financial challenges for incarcerated women, pregnancy and policing, and self-care for victim advocates. Coverage of critical topics introduce you to important issues such as gender representation in criminal justice academia, multiple marginalities and LGBT popu-

lations, cyberstalking, labor trafficking, and challenges faced by women as criminal justice practitioners. Statistics, graphs, and tables demonstrate the most recent trends in the field to give students an accurate picture of the criminal justice system today.

In recent years, members of legal, law enforcement, media and academic circles have portrayed rape as a special kind of crime distinct from other forms of violence. In *Framing the Rape Victim*, Carine M. Mardorossian argues that this differential treatment of rape has exacerbated the ghettoizing of sexual violence along gendered lines and has repeatedly led to women's being accused of triggering, if not causing, rape through immodest behavior, comportment, passivity, or weakness. Contesting the notion that rape is the result of deviant behaviors of victims or perpetrators, Mardorossian argues that rape saturates our culture and defines masculinity's relation to femininity, both of which are structural positions rather than biologically derived ones. Using diverse examples throughout, Mardorossian draws from Hollywood film and popular culture to contemporary women's fiction and hospitalized birth emphasizing that the position of dominant masculinity can be occupied by men, women, or institutions, while structural femininity is a position that may define and subordinate men, minorities, and other marginalized groups just as effectively as it does women. Highlighting the legacies of the politically correct debates of the 1990s and the terrorist attacks of 9/11, the book illustrates how the framing of the term "victim" has played a fundamental role in constructing notions of agency that valorize autonomy and support exclusionary, especially masculine, models of American selfhood. The gendering of rape, including by well-meaning, sometimes feminist, voices that claim to have victims'

best interests at heart, ultimately obscures its true role in our culture. Both a critical analysis and a call to action, *Framing the Rape Victim* shows that rape is not a special interest issue that pertains just to women but a pervasive one that affects our society as a whole.

Victimology and crime prevention are growing, interrelated areas cutting across several disciplines. Victimology examines victims of all sorts of criminal activity, from domestic abuse, to street violence, to victims in the workplace who lose jobs and pensions due to malfeasance by corporate executives. Crime prevention is an important companion to victimology because it offers insight and techniques to prevent situations that lead to crime and attempts to offer ideas and means for mitigating or minimizing the potential for victimization. In many ways, the two fields have developed along parallel yet separate paths, and the literature on both has been scattered across disciplines as varied as sociology, law and criminology, public health and medicine, political science and public policy, economics, psychology and human services, and more. The *Encyclopedia of Victimology and Crime Prevention* provides a comprehensive reference work bringing together such dispersed knowledge as it outlines and discusses the status of victims within the criminal justice system and topics of deterring and preventing victimization in the first place and responding to victims' needs. Two volumes containing approximately 375 signed entries provide users with the most authoritative and comprehensive reference resource available on victimology and crime prevention, both in terms of breadth and depth of coverage. In addition to standard entries, leading scholars in the field have con-

tributed Anchor Essays that, in broad strokes, provide starting points for investigating the more salient victimology and crime prevention topics. A representative sampling of general topic areas covered includes: interpersonal and domestic violence, child maltreatment, and elder abuse; street violence; hate crimes and terrorism; treatment of victims by the media, courts, police, and politicians; community response to crime victims; physical design for crime prevention; victims of nonviolent crimes; deterrence and prevention; helping and counseling crime victims; international and comparative perspectives, and more.

The classic work that refutes the lies we tell ourselves about race, poverty and the poor. Here are three myths about poverty in America: - Minority children perform poorly in school because they are "culturally deprived." - African-Americans are handicapped by a family structure that is typically unstable and matriarchal. - Poor people suffer from bad health because of ignorance and lack of interest in proper health care. *Blaming the Victim* was the first book to identify these truisms as part of the system of denial that even the best-intentioned Americans have constructed around the unpalatable realities of race and class. Originally published in 1970, William Ryan's groundbreaking and exhaustively researched work challenges both liberal and conservative assumptions, serving up a devastating critique of the mindset that causes us to blame the poor for their poverty and the powerless for their powerlessness. More than twenty years later, it is even more meaningful for its diagnosis of the psychic underpinnings of racial and social injustice.

*Sex Crimes and Offenders* emphasizes the need to focus on individual perpetrators while also stressing the importance of looking

at the offender's social and cultural environments, as well as the social and political responses designed to hold perpetrators accountable and help support victims

This anthology contains 12 original papers analyzing the latest worldwide findings on repeat victimization and exploring their implications for prevention policy. Contributors present a cross-national comparison of rates of repeat victimization, and discuss attitudes of repeat victims toward the police, repeat burglary victimization in Europe and Australia, personal fraud scams and victims, repeat bank robbery, offender targeting, and implications for crime control policy. There is no subject index. Annotation copyrighted by Book News, Inc., Portland, OR

"Sharp's book reemphasizes the tremendous costs of maintaining the death penalty—costs to real people and real families that ripple throughout generations to come."—Saundra D. Westervelt, author of *Shifting the Blame: How Victimization Became a Criminal Defense* "Everyone concerned with the effects of capital punishment must have this book."—Margaret Vandiver, professor, department of criminology and criminal justice, University of Memphis Murderers, particularly those sentenced to death, are considered by most to be unusually heinous, often sub-human, and entirely different from the rest of us. In *Hidden Victims*, sociologist Susan F. Sharp challenges this culturally ingrained perspective by reminding us that those individuals facing a death sentence, in addition to being murderers, are brothers or sisters, mothers or fathers, daughters or sons, relatives or friends. Through a series of vivid and in-depth interviews with families of the accused, she demonstrates how the exceptionally severe way in which we view

those on death row trickles down to those with whom they are closely connected. Sharp shows how family members and friends—in effect, the indirect victims of the initial crime—experience a profoundly complicated and socially isolating grief process. Departing from a humanist perspective from which most accounts of victims are told, Sharp makes her case from a sociological standpoint that draws out the parallel experiences and coping mechanisms of these individuals. Chapters focus on responses to sentencing, the particular structure of grieving faced by this population, execution, aftermath, wrongful conviction, family formation after conviction, and the complex situation of individuals related to both the killer and the victim. Powerful, poignant, and intelligently written, *Hidden Victims* challenges all of us—regardless of which side of the death penalty you are on—to understand the economic, social, and psychological repercussions that shape the lives of the often forgotten families of death row inmates.

This insightful volume integrates criminological theories, prevention science, and empirical findings to create an up-to-date survey of crime prevention research and strategies. Its interdisciplinary perspective expands on our knowledge of risk factors to isolate the malleable mechanisms that produce criminal outcomes, and can therefore be targeted for intervention. In addition, the text identifies developmental, lifespan, and social areas for effective intervention. Reviews of family-, community-, and criminal justice-based crime prevention approaches not only detail a wide gamut of successful techniques, but also provide evidence for why they succeed. And as an extra research dimension, the book's chapters on methodological issues and challenges uncover rich possibilities for the next generation of crime prevention

studies. Included in the coverage: Integrating criminology and prevention research Social disorganization theory: its history and relevance to crime prevention Research designs in crime and violence prevention Macro- and micro-approaches to crime prevention and intervention programs Implications of life course: approaches for prevention science Promising avenues for prevention, including confronting sexual victimization on college campuses Spotlighting current progress and continuing evolution of the field, Preventing Crime and Violence will enhance the work of researchers, practitioners, academicians, and policymakers in public health, prevention science, criminology, and criminal justice, as well as students interested in criminology and criminal justice.

Silenced, discredited, stripped of powers of moral appeal, and deprived of the interpersonal conditions necessary for maintaining self-respect, many people suffer from serious but subtle forms of oppression involving neither physical violence nor the use of law. In *Civilized Oppression* J. Harvey forcefully argues for the crucial role of morally distorted relationships in such oppression. While uncovering a set of underlying moral principles that account for the immorality of civilized oppression, Harvey's analyses provide frameworks for identifying morally problematic situations and relationships, criteria for evaluating them, and guidelines for appropriate responses. This book will be essential for both graduates and undergraduates in ethics, social theory, theory of justice, and feminist and race studies.

Practice the three simple phrases that heal relationships, strengthen connection, and change the world. We all believe that saying, "Thank you," "I'm sorry," and "Tell me more" will help us

become better people, friends, partners, employees, neighbors, and global citizens. And yet, having been brought up on rugged individualism, we often slip into self-centeredness and a corresponding sense of entitlement. We have lost the ability to speak with gentleness toward one another. We have replaced kind words that connect us to one another with ones that divide, isolate, and hurt. Everywhere we turn there is deep conflict. In this simple yet profound book, clinical psychologist Rod Wilson introduces us to the sacredness of these familiar but forgotten sayings. What impact do these sayings have on our relationships? When we say, "Thank you," we acknowledge the way others impact us. When we say, "I'm sorry," we acknowledge the way we impact others. When we say, "Tell me more," we acknowledge the way we impact each other. Try it. Read this book and be encouraged and equipped to deliver kindness in your speech. As you engage with these three phrases more thoughtfully and speak them more frequently, you will enjoy a life full of deeper friendships and joy.

Demonstrates how the campaign against "victim politics" and the "victim mentality" has profoundly altered Americans' understanding of victimhood, and investigates the consequences of this change in politics, law, culture, and the "war against terror."

*Victimology: A Text/Reader, Second Edition*, engages students with the most current, cutting-edge articles published in the field of victimology as well as connects them to the basic concepts. Unlike existing victimology textbooks, this unique combination of published articles with original material presented in a mini-chapter format puts each topic into context so students can devel-

op a better understanding of the extent, causes, and responses to victimization. Students will build a foundation in the history and development of the field of victimology, will be shown the extent to which people are victimized and why, will learn the specific types of victimization, and will witness the interaction between the criminal justice system and victims today.

This definitive resource in social psychology includes engaging study tools designed to help students grasp the underlying theories and the latest research in the field. In the 7th edition of *An Introduction to Social Psychology*, students will discover a wealth of tools to help them understand the theories and fundamental knowledge in the ever-evolving field of social psychology. With contributions leading psychologists, this feature-rich edition includes Theory Boxes, Research Close-ups, and Lab Boxes to help cement students' understanding of the study material. This essential study guide has been engaging and educating students on social psychology theories and research for over 34 years. For students entering into the world of social psychology for the first time, this book covers foundational topics, such as:

- The history of social psychology throughout Europe
- Updated research methods and newly developed theories
- In-depth looks at social cognition, aggression, prosocial behavior, and relationships
- Strategies for changing attitude and behavior
- Critical study materials for multiple-choice testing

The combination of traditional academic study with cohesion of topics, accessibility of material, and pedagogy in this 7th edition makes it a definitive resource for both instructors and beginning psychology students alike.

Since 1945, Japan has successfully reinvented itself, rising from the ashes of defeat to become a peaceful and prosperous nation.

It is seen as an inspiration for other developing nations and contributes significantly to global development. As the third largest economy in the world, with a reputation for technological innovation and cultural creativity, Japan is a country shaping the world we live in. In this new edition of *Japan in Transformation*, Jeffrey Kingston explores the character of the nation as it has evolved since the end of the Second World War. The book: - examines the US Occupation and explains the causes of the economic miracle and its demise - evaluates the effect of the Lost Decade of the 1990s and the unravelling of the Japan, Inc system that prevailed in the twentieth century - analyses such central and topical issues as the demographic crisis, regional relations, security concerns, political change and the role of women Expanded and thoroughly revised to cover the period of 1945 to 2010, this second edition of *Japan in Transformation* provides a succinct and comprehensive study of the recent history of one of the most dynamic nations in the modern world.

This work is a wide-ranging and sensitive examination of the lived experience of intimate stalking victimization. It explores how it feels and what it means to be stalked by a former intimate and how this situation creates dilemmas for victims and their advocates. What is it like to try to become a "victim" in the eyes of the law and then to remain one, when almost anything a woman does to manage the violent emotions of an ex-husband or ex-boyfriend can backfire and discredit her claims? The author draws upon a broad array of rich data, including a survey of college women, courtroom testimony, prosecutors' case files, interviews with victims and observations in a prosecutor's office and a stalking sur-

vivor's support group to illustrate the difficulties women face as they work to cope with danger - and to negotiate the hazardous terrain of legal systems - simultaneously. For some victims, Dunn shows, prosecution processes are more traumatic than the events that brought them to seek legal help and her analysis of the historical, cultural and gendered frameworks in which stalking victimization and prosecution takes place accounts for the additional trauma. Definitions of situations and identities are contested rather than given in these arenas where lives and self-concepts rest in the balance. The ways in which we socially construct and confer meaning upon intimate violence and its victims profoundly shape what happens to ordinary women facing extraordinary circumstances. "Courting Disaster" illuminates what we can learn from their experience, whether we are working in these arenas or theorizing about how they do, and sometimes do not, work.

"It happens quickly. I'm not in that house ten minutes before my world stops making sense." From victim to survivor, Mary Ann Ricciardi pens from a most honest and heartfelt point of view, sharing what she knows to be true about the emotional ruin that trails behind the silence and myths surrounding intimate violence. In *Screaming Through the Silence: Memories, Truths and a Hope Toward Understanding*, Ricciardi writes with a purpose and desire to end the harmful silence of generations past and present. Present-

ing the issues simply and logically, Ricciardi's "gentle rant" comes from years of social observations, her own personal struggle as victim turned survivor and her ongoing work with victims of intimate assault. Included are the voices of intimate assault and abuse survivors who so willingly share their truths in hopes of encouraging better understanding and awareness. "Society cannot understand because victims don't tell; victims don't tell because society does not understand."

First published in 2000. Routledge is an imprint of Taylor & Francis, an informa company.

When I wrote the first edition of this book (2009), it was written as a reference book with the sole purpose of educating community awareness. Since then, I have dedicated my life to helping victims and survivors of sexual violence, domestic violence, racism, and bullying. The goal of this book is for victims and survivors of sexual violence and domestic violence to have a voice and to know that they are not alone with their victimization and recovery process. I also know what it means to walk in one's shoes, which is why I chose to talk about my own battles with anorexia, bulimia, Post-traumatic Stress Disorder (PTSD) and sexual harassment victimization. I felt it was best to share some of my own related life events so that my readers can connect on a more personal level with whatever it is that they may be going through. Recovery is possible.
