Beyond Convergence National Defense University (US) 2017-08-24 The world order built upon the Peace of Westphalia is faltering. State fragility or failure are endemic, with no fewer than one-third of the states in the United Nations earning a "high warning"-or worse-in the Fragile States Index, and an equal number suffering a decline in sustainability over the past decade.¹ State weakness invites a range of illicit actors, including international terrorists, globally networked insurgents, and transnational criminal organizations (TCOs). The presence and operations of these entities keep states weak and incapable of effective governance, and limit the possibility of fruitful partnerships with the United States and its allies. Illicit organizations and their networks fuel corruption, eroding state legitimacy among the governed, and sowing doubt that the state is a genuine guardian of the public interest. These networks can penetrate the state, leading to state capture, and even criminal sovereignty.² A growing number of weak and corrupt states is creating gaping holes in the global rule-based system of states that we depend on for our security and prosperity. Indeed, the chapters of this book suggest the emergence of a highly adaptive and parasitic alternative ecosystem, based on criminal commerce and extreme violence, with little regard for what we commonly conceive of as the public interest or the

public good. The last 10 years have seen unprecedented growth in interactivity between and among a wide range of illicit networks, as well as the emergence of hybrid organizations that use methods characteristic of both terrorist and criminal groups. In a convergence of interests, terrorist organizations collaborate with cartels, and trafficking organizations collude with insurgents. International terrorist organizations, such as al-Qaeda and Hezbollah, engage energetically in transnational crime to raise funds for their operations. Prominent criminal organizations like Los Zetas in Mexico and D-Company in Pakistan have adopted the symbolic violence of terrorists—the propaganda of the deed—to secure their "turf." And networked insurgents, such as the Islamic State of Iraq and the Levant (ISIL), the Revolutionary Armed Forces of Colombia (FARC), and the Liberation Tigers of Tamil Eelam (LTTE), have adopted the techniques of both crime and terror.

Twelve Years a Slave Solomon Northup 2021-01-01 "Having been born a freeman, and for more than thirty years enjoyed the blessings of liberty in a free State—and having at the end of that time been kidnapped and sold into Slavery, where I remained, until happily rescued in the month of January, 1853, after a bondage of twelve years—it has been suggested that an account of my life and fortunes would not be uninteresting to the public." -an excerpt

Travels on the Amazon Alfred Russel Wallace 2022-06-02 Travels on the Amazon presents adventurous chronicles of Alfred Russel Wallace's travels to the Amazon rainforests of Brazil in South America. Inspired by the travelogues of earlier and contemporary traveling naturalists, including Charles Darwin and specifically William Henry Edwards, Wallace was determined to go on an expedition abroad as a naturalist. In 1848, he and Henry Bates left for Brazil. They intended to gather insects and other animal specimens in the Amazon Rainforest for their private collections. They wanted to sell the duplicates to museums and collectors in Britain to fund the trip. Wallace also hoped to gather evidence of the changes in the species. Wallace and Bates spent most of their first year collecting near Belém, then examined inland separately. They sometimes met to discuss their findings. Wallace spent four years analyzing the inhabitants and the languages he encountered, along with the geography, flora, and fauna. After returning to the U.K., he wrote several papers and books about his ventures and findings. This wonderful book is one of his impressive travel books.

Archaeology of Culture Contact and Colonialism in Spanish and Portuguese America Pedro Paulo A. Funari 2014-11-11 The volume contributes to disrupt the old grand narrative of cultural contact and colonialism in Spanish and Portuguese America in a wide and complete sense. This edited volume aims at exploring contact archaeology in the modern era. Archaeology has been exploring the interaction of peoples and cultures from early times, but only in the last few decades have cultural contact and material world been recognized as crucial elements to understanding colonialism and the emergence of modernity. Modern colonialism studies pose questions in need of broader answers. This volume explores these answers in Spanish and Portuguese America, comprising present-day Latin America and formerly Spanish territories now part of the United States. The volume addresses studies of the particular features of Spanish-Portuguese colonialism, as well as the specificities of Iberian colonization, including hybridism, religious novelties, medieval and modern social features, all mixed in a variety of ways unique and so different from other areas, particularly the Anglo-Saxon colonial thrust. Cultural contact studies offer a particularly in-depth picture of the uniqueness of Latin America in terms of its cultural mixture. This volume particularly highlights local histories, revealing novelty, diversity, and creativity in the conformation of the new colonial realities, as well as presenting Latin America as a multicultural arena, with astonishing heterogeneity in thoughts, experiences, practices, and, material worlds.

Expanding the Boundaries of Transformative Learning E. O'Sullivan 2016-04-30 Transformative learning involves experiencing a deep, structural shift in the basic premises of thought, feelings, and actions. It is a shift of consciousness that dramatically and permanently alters our way of being in the world. Such a shift involves our understanding of ourselves and our self-locations; our relationships with other humans and with the natural world; our understanding of relations of power in interlocking structures of class, race and gender; our body awarenesses; our visions of alternative approaches to living; and our sense of possibilities for social justice and peace and personal joy. The editors of this collection make several challenges to the existing field of transformative learning - the first is to theoreticians, who have attempted to describe the nature of transformative learning without regard to the content of transformative learning. The editors argue that transformative learning theory cannot be constructed in a content-neutral or context-free way. Their second challenge, which assumes the importance content for transformative learning, is to educators as practitioners. The editors argue that transformative learning requires new educational practices consistent with the content. Arts-based research and arts-based teaching/learning practices are one example of such new educational practices. Education for the soul, or spiritual practices such as meditation or modified martial arts or indigenous peoples' forms of

teaching/learning, is another example. Each article in the collection presents a possible model of these new practices.

Cognitive Linguistic Approaches to Teaching Vocabulary and Phraseology Frank Boers 2008 Mastering the vocabulary of a foreign language is one of the most daunting tasks that language learners face. The immensity of the task is underscored by the realisation that it is not only single words but also numerous standardised phrases (idioms, collocations, etc.) that need to be acquired. There is thus a clear need for instructional methods that help learners tackle this task, and yet few proposals for vocabulary instruction have so far gone beyond techniques for rote-learning and familiar means of promoting of noticing. The reason for this is that vocabulary and phraseology have long been assumed arbitrary. The volume offers a long-overdue alternative by exploring and exploiting the presence of linguistic 'motivation' - or, systematic non-arbitrariness - in the lexicon. The first half of the volume reports ample empirical evidence of the pedagogical effectiveness of presenting vocabulary to learners as non-arbitrary. The data reported indicate that the proposed instructional methods can benefit when both the nature of the target lexis and the basic cognitive orientations of particular learners are taken into account. The first half of the book mostly targets lexis that has already attracted a fair amount of attention from Cognitive Linguists in the past (e.g. phrasal verbs and figurative idioms). The second half broadens the scope considerably by revealing the non-arbitrariness of diverse other lexical patterns, including collocations and word partnerships generally. This is achieved by recognising some long-neglected dimensions of linguistic motivation - etymological and phonological motivation, in particular. Concrete suggestions are made for putting the non-arbitrary nature of words and phrases to good use in instructed language learning. The volume is therefore of interest not only to applied linguists and researchers in Second Language Acquisition/Foreign Language Teaching, but also to second and foreign language teaching professionals.

Looking for Trouble Virginia Cowles 2021-10-07 This sensational 1941 memoir of life on the frontline of wartime Europe by a 'magnificent' (Antony Beevor) trailblazing female reporter is a rediscovered classic, introduced by Christina Lamb: 'I was blown away ... The Forrest Gump of journalism ... Incredible.' Madrid in the Spanish Civil War Prague during the Munich crisis Berlin the day Germany invaded Poland Helsinki as the Russians attacked Moscow betrayed by the Nazis Paris as it fell to the Germans London on the first day of the Blitz Virginia Cowles has seen it all. As a pioneering female correspondent, she reported from Europe from the 1930s into the Second World War, watching 'the lights in the death-chamber go out one by one' from the frontline - always in the right place at the right time. Flinging off her heels under shellfire; meeting Hitler ('an inconspicuous little man'); gossiping with Churchill by his goldfish pond; dancing in the bomb-blasted Ritz; reading The Intelligent Woman's Guide to Socialism on a Soviet train; eating reindeer with guerrilla skiers ... Introduced by Christina Lamb, Cowles' incredible dispatches will make you an eyewitness to the twentieth-century as you have never experienced it before. 'Passionate and vivid ... A brave reporter and fine writer.' Lindsey Hilsum (Channel 4 News, International Editor, and author of In Extremis; the Life of War Correspondent Marie Colvin) What readers are saying: The Forrest Gump of early World War II The queen of historical name-dropping Holy cow! What a wonderful find!! Most unexpectedly great book that I have read in years. Reads like a novel [but] this is real life. The best book I've read this year ... Exquisitely written [day-to-day] drama of history ... Breathtakingly fresh. I can't recommend this book enough. Cowles' voice and

humanity are her greatest assets, but her willingness to be where the action was - and always find trouble - paid off. A marvel. Her ability to capture anecdotes and dialogue that offer surprising insights into historic personages and events is a frequent source of wonder. It was difficult for me not to drive my family crazy wanting to read them quotes. The intrepid Virginia Cowles was in the right places at the right times and connected to the right people. What a life she led!

Not Just a Pretty Face Stacy Malkan 2007-10-01 Lead in lipstick? 1,4 dioxane in baby soap? Coal tar in shampoo? How is this possible? Simple. The \$35 billion cosmetics industry is so powerful that they've kept themselves unregulated for decades. Not one cosmetic product has to be approved by the US Food and Drug Administration before hitting the market. Incredible? Consider this: The European Union has banned more than 1,100 chemicals from cosmetics. The United States has banned just 10. Only 11% of chemicals used in cosmetics in the US have been assessed for health and safety - leaving a staggering 89% with unknown or undisclosed effects. More than 70% of all personal care products may contain phthalates, which are linked to birth defects and infertility. Many baby soaps are contaminated with the cancer-causing chemical 1,4 dioxane. It's not just women who are affected by this chemists' brew. Shampoo, deodorant, face lotion and other products used daily by men, women and children contain hazardous chemicals that the industry claims are "within acceptable limits." But there's nothing acceptable about daily multiple exposures to carcinogenic chemicals -- from products that are supposed to make us feel healthy and beautiful. Not Just a Pretty Face delves deeply into the dark side of the beauty industry, and looks to hopeful solutions for a healthier future. This scathing investigation peels away less-than-lovely layers to expose an industry in dire need of an extreme makeover. 15 percent of the purchase price of each book sold benefits the national Campaign for Safe Cosmetics, administered by the Breast Cancer Fund, through December 31, 2012.

A Thesaurus of English Word Roots Horace Gerald Danner 2014-03-27 Horace G. Danner's A Thesaurus of English Word Roots is a compendium of the most-used word roots of the English language. As Timothy B. Noone notes in his foreword: "Dr. Danner's book allows you not only to build up your passive English vocabulary, resulting in word recognition knowledge, but also gives you the rudiments for developing your active English vocabulary, making it possible to infer the meaning of words with which you are not yet acquainted. Your knowledge can now expand and will do so exponentially as your awareness of the roots in English words and your corresponding ability to decode unfamiliar words grows apace. This is the beginning of a fine mental linguistic library: so enjoy!" In A Thesaurus of English Word Roots, all word roots are listed alphabetically, along with the Greek or Latin words from which they derive, together with the roots' original meanings. If the current meaning of an individual root differs from the original meaning, that is listed in a separate column. In the examples column, the words which contain the root are then listed, starting with their prefixes, for example, dysacusia, hyperacusia. These root-starting terms then are followed by terms where the root falls behind the word, e.g., acouesthesia and acoumeter. These words are followed by words where the root falls in the middle or the end, as in such terms as bradyacusia and odynacusis.. In this manner, A Thesaurus of English Word Roots places the word in as many word families as there are elements in the word. This work will interest linguists and philologists and anyone interested in the etymological aspects of English language.

Good Capitalism, Bad Capitalism, and the Economics of Growth and Prosperity William J. Baumol 2007-01-01 In this important book, William J. Baumol, Robert E. Litan, and Carl J. Schramm contend that the answers to these questions lie within capitalist economies, though many observers make the mistake of believing that "capitalism" is of a single kind. Writing in an accessible style, the authors dispel that myth, documenting four different varieties of capitalism, some "Good" and some "Bad" for growth. The authors identify the conditions that characterize Good Capitalism--the right blend of entrepreneurial and established firms, which can vary among countries--as well as the features of Bad Capitalism. They examine how countries catching up to the United States can move faster toward the economic frontier, while laying out the need for the United States itself to stick to and reinforce the recipe for growth that has enabled it to be the leading economic force in the world. This pathbreaking book is a must read for anyone who cares about global growth and how to ensure America's economic future.

Cancer as a Metabolic Disease Thomas Seyfried 2012-05-18 The book addresses controversies related to the origins of cancer and provides solutions to cancer management and prevention. It expands upon Otto Warburg's well-known theory that all cancer is a disease of energy

metabolism. However, Warburg did not link his theory to the "hallmarks of cancer" and thus his theory was discredited. This book aims to provide evidence, through case studies, that cancer is primarily a metabolic disease requiring metabolic solutions for its management and prevention. Support for this position is derived from critical assessment of current cancer theories. Brain cancer case studies are presented as a proof of principle for metabolic solutions to disease management, but similarities are drawn to other types of cancer, including breast and colon, due to the same cellular mutations that they demonstrate.
