Strategic Latency Unleashed Zachary Davis 2021-01-30 The world is being transformed physically and politically. Technology is the handmaiden of much of this change. But since the current sweep of global change is transforming the face of warfare, Special Operations Forces (SOF) must adapt to these circumstances. Fortunately, adaptation is in the SOF DNA. This book examines the changes affecting SOF and offers possible solutions to the complexities that are challenging many long-held assumptions. The chapters explore what has changed, what stays the same, and what it all means for U.S. SOF. The authors are a mix of leading experts in technology, business, policy, intelligence, and geopolitics, partnered with experienced special operators who either cowrote the chapters or reviewed them to ensure accuracy and relevance for SOF. Our goal is to provide insights into the changes around us and generate ideas about how SOF can adapt and succeed in the emerging operational environment.

Misery Loves Cabernet Kim Gruenenfelder 2009-04-14 Charlize "Charlie" Edwards finally has it all: a house in Silverlake, L.A.'s hippest neighborhood, two fabulous best friends who always have her back, and a great (though hectic) job as the personal assistant to Hollywood's hottest movie star, Drew Stanton. But best of all, Charlie has a newly feathered love nest with Jordan, the sexy photographer she recently started dating. Maybe Charlie's journal of smart-alecky life advice—which she's always been better at writing than following—has finally helped put her on the right track. Unfortunately for Charlie, Drew is causing complete havoc on his new movie set, her eccentric family is descending upon L.A. for the upcoming holiday season, and her love life may be back to square one. Jordan has left L.A. to work on a film shooting in Paris, where the women are gorgeous, sophisticated, and possibly after her man. And Drew's handsome new producer, Liam, is an old crush who has reappeared to tug at Charlie's heartstrings. Charlie's torn between the misery of waiting for Jordan and the tingly feelings she has for Liam. But there's nothing misery—or seduction—loves better than a great glass of cabernet.

Basic Issues in Police Performance 1982 Since the complexity of police services does not lend itself to standardized performance measures, measurement techniques should be designed to inform more about what police do and how they affect their communities. This report reviews conventional police measurement practices and offers ways to improve the management value of performance information. Traditional performance measurement has emphasized the measurement of individual departments' effectiveness in preventing crime. This approach fails to consider the broad range of other police duties, citizens' expectations of police, and how police activities produce social change. Police can be evaluated in terms of efficiency, effectiveness, equity, and accountability, but citizens disagree about which of these performance criteria are the most important because community/police problems are too diverse. Instead of developing uniform, inflexible performance standards to apply globally to entire departments, evaluators should ask more detailed questions about common police processes and their results. Sketchy knowledge of how policing works now produces many hypotheses, but rarely standards worthy of emulation. Evaluators should develop better theories about police functions, obtain more reliable data, and control data collection costs with the aid of police managers so that measures inform departmental policymakers. Tables, diagrams, and 197 references are given. Appendixes include police services study data and a list of problem codes.

Comprehensive Guidelines for Prevention and Control of Dengue and Dengue

Haemorrhagic Fever Who Regional Office for South-East Asia 2011 Dengue Fever is the fastest emerging arboviral infection with major public health consequences for millions of people around the world, and in particular the South-East Asia region. These regional

guidelines were extensively revised, updated and expanded with the focus on new and additional topics of current relevance to the populations of the region. They are intended to provide guidance to national and local-level program managers and public health officials, as well as stakeholders, including health practitioners, laboratory personnel and multisectoral partners, in strategic planning, implementation, monitoring and evaluation, and strengthening the response to dengue prevention and control in their countries. Scientists and researchers involved in vaccine and antiviral drug development will also find crucial baseline information in this publication.

Procedures in the Justice System Cliff Roberson 2019-01-11 For courses in criminal procedure. From arrest to sentencing: A comprehensive guide to criminal procedure Procedures in the Justice System presents the judicial procedures of criminal cases in plain language and a concise format suitable for a one-semester course. In addition to detailing legal rules, it considers why we have laws and why those laws are broken, the constitutional rights of the accused, and the philosophy of correctional endeavors. The 12th edition has new content on victim impact statements and expanded discussion of legal procedures, while continuing to use actual court cases to show the real implications of the judicial process for enforcers and offenders alike.

Dengue World Health Organization 2009 This publication is intended to contribute to prevention and control of the morbidity and mortality associated with dengue and to serve as an authoritative reference source for health workers and researchers. These guidelines are not intended to replace national guidelines but to assist in the development of national or regional guidelines. They are expected to remain valid for five years (until 2014), although developments in research could change their validity.--Publisher's description

Aging, Technology and Health Richard Pak 2018-03-15 Aging, Health and Technology takes a problem-centered approach to examine how older adults use technology for health. It examines the many ways in which technology is being used by older adults, focusing on challenges, solutions and perspectives of the older user. Using aging-health technology as a lens, the book examines issues of technology adoption, basic human factors, cognitive aging, mental health, aging and usability, privacy, trust and automation. Each chapter takes a case study approach to summarize lessons learned from unique examples that can be applied to similar projects, while also providing general information about older adults and technology. Discusses human factors design challenges specific to older adults Covers the wide range of health-related uses for technology—from fitness to leading a more engaged life Utilizes a case study approach for practical application Envisions what the future will hold for technology and older adults Employs a roster of interdisciplinary contributors

The Study Of Educational Politics Jay D. Scribner 2003-08-29 This text is intended to be of use as a guide for students, scholars and researchers of the politics of education and of educational policy studies. The comprehensive work surveys major trends between 1969 and 1994, with chapters synthesising political and policy developments at local, national and state levels in the US as well as in the international arena. The text contains in-depth examinations of the emerging micropolitics of the field of education as well as policy analysis and cultural and feminist studies, and bibliographies are provided at the end of each chapter.; Designed as both a text and a reference volume, this special yearbook was planned in conjunction with the 25th anniversary of the Politics of Education Association in

1994.

Thinking about Deterrence Air Univeristy Press 2014-09-01 With many scholars and analysts questioning the relevance of deterrence as a valid strategic concept, this volume moves beyond Cold War nuclear deterrence to show the many ways in which deterrence is applicable to contemporary security. It examines the possibility of applying deterrence theory and practice to space, to cyberspace, and against non-state actors. It also examines the role of nuclear deterrence in the twenty-first century and reaches surprising conclusions.

The Social Life of Economic Inequalities in Contemporary Latin America Margit Ystanes 2017-10-25 This book is open access under a CC BY 4.0 license. This edited volume examines how economic processes have worked upon social lives and social realities in Latin America during the past decades. Through tracing the effects of the neoliberal epoch into the era of the so-called pink tide, the book seeks to understand to what extent the turn to the left at the start of the millennium managed to challenge historically constituted configurations of inequality. A central argument in the book is that in spite of economic reforms and social advances on a range of arenas, the fundamental tenants of socio-economic inequalities have not been challenged substantially. As several countries are now experiencing a return to right-wing politics, this collection helps us better understand why inequalities are so entrenched in the Latin American continent, but also the complex and creative ways that it is continuously contested. The book directs itself to students, scholars and anyone interested in Latin America, economic anthropology, political anthropology, left-wing politics, poverty and socio-economic inequalities.

Industrial/Organizational Psychology Michael Aamodt 2009-02-04 Striking a balance between research, theory, and application, the sixth edition of INDUSTRIAL/ORGANIZATIONAL PSYCHOLOGY: AN APPLIED APPROACH prepares students for their future careers through a combination of scholarship, humor, case studies, and practical applications. Students will see the relevance of industrial/organizational psychology to their everyday lives through such practical applications as how to write a resume, survive an employment interview, write a job description, create a performance appraisal instrument, and motivate employees. Charts and tables simplify such complicated issues as employment law, job satisfaction, work motivation and leadership. Theories of Personality Duane P. Schultz 2001 This revision of the Schultz's popular text surveys the field, presenting theory-by-theory coverage of the major theorists who represent the psychoanalytic, neopsychoanalytic, life-span, trait, humanistic, cognitive, behavioral, and social-learning approaches, as well as clinical and experimental work. Where warranted, the authors show how the development of certain theories was influenced by events in a theorist's personal and professional life. This thoroughly revised Seventh Edition now incorporates more examples, tables, and figures to help bring the material to life for students. The new content in this edition reflects the dynamism in the field. The text explores how race, gender, and culture issues figure in the study of personality and in personality assessment. In addition, a final integrative chapter looks at the study of personality theories and suggests conclusions that can be drawn from the many theorists' work.

Visions of Law Enforcement Technology in the Period 2024-2034 Richard Silberglitt 2015-03-16 "This report describes the results of the Law Enforcement Futuring Workshop, which was held at RAND's Washington Office in Arlington, Virginia, from July 22 to 25, 2014. The objective of this workshop was to identify high-priority technology needs for law enforcement based on consideration of current and future trends in society, technology, and law enforcement over a ten- to 20-year time period. During the workshop, participants developed sets of future scenarios, constructed pathways from the present to alternative futures, and considered how law enforcement use of technology might affect these pathways. They then identified technology needs (including training and changes in policies or practice) that, if addressed, could enable pathways to desirable futures or prevent or mitigate the effects of pathways to undesirable futures. On the final days of the workshop, the technology needs were prioritized using a Delphi method. The output of this workshop described in the report included ten future scenarios and 30 technology needs. The technology needs fell into three general categories--technology-related knowledge and practice, information sharing and use, and technology research and development--and were placed into three priority tiers"--Back cover.

Beyond Convergence National Defense University (US) 2017-08-24 The world order built upon the Peace of Westphalia is faltering. State fragility or failure are endemic, with no fewer than one-third of the states in the United Nations earning a "high warning"-or worse-in the Fragile States Index, and an equal number suffering a decline in sustainability over the past decade.¹ State weakness invites a range of illicit actors, including international terrorists, globally networked insurgents, and transnational criminal organizations (TCOs). The presence and operations of these entities keep states weak and incapable of effective governance, and limit the possibility of fruitful partnerships with the United States and its allies. Illicit organizations and their networks fuel corruption, eroding state legitimacy among the governed, and sowing doubt that the state is a genuine guardian of the public interest.

These networks can penetrate the state, leading to state capture, and even criminal sovereignty.² A growing number of weak and corrupt states is creating gaping holes in the global rule-based system of states that we depend on for our security and prosperity. Indeed, the chapters of this book suggest the emergence of a highly adaptive and parasitic alternative ecosystem, based on criminal commerce and extreme violence, with little regard for what we commonly conceive of as the public interest or the public good. The last 10 years have seen unprecedented growth in interactivity between and among a wide range of illicit networks, as well as the emergence of hybrid organizations that use methods characteristic of both terrorist and criminal groups. In a convergence of interests, terrorist organizations collaborate with cartels, and trafficking organizations collude with insurgents. International terrorist organizations, such as al-Qaeda and Hezbollah, engage energetically in transnational crime to raise funds for their operations. Prominent criminal organizations like Los Zetas in Mexico and D-Company in Pakistan have adopted the symbolic violence of terrorists—the propaganda of the deed—to secure their "turf." And networked insurgents, such as the Islamic State of Iraq and the Levant (ISIL), the Revolutionary Armed Forces of Colombia (FARC), and the Liberation Tigers of Tamil Eelam (LTTE), have adopted the techniques of both crime and terror.

Fiscal Administration John L. Mikesell 1986

The Transgender Exigency Edward Schiappa 2021-11 "At no other point in human history have the definitions of "woman" and "man," "male" and "female," "masculine" and "feminine," been more contentious than now. This book advances a pragmatic approach to the act of defining that acknowledges the important ethical dimensions of our definitional practices. Increased transgender rights and visibility has been met with increased opposition, controversy, and even violence. Who should have the power to define the meanings of sex and gender? What values and interests are advanced by competing definitions? Should an all-boys' college or high school allow transgender boys to apply? Should transgender women be allowed to use the women's bathroom? How has growing recognition of intersex conditions challenged our definitions of sex/gender? In this timely intervention, Edward Schiappa examines the key sites of debate and including schools, bathrooms, the military, sports, prisons, and feminism, drawing attention to the political, practical, and ethical dimensions of the act of defining itself. This is an important text for students and scholars in gender studies, philosophy, communication, and sociology"--

Grammar of Paraguayan Guarani Bruno Estigarribia 2020-06-29 The history of Guarani is a history of resilience. Paraguayan Guarani is a vibrant, modern language, mother tongue to millions of people in South America. It is the only indigenous language in the Americas spoken by a non-ethnically-indigenous majority, and since 1992, it is also an official

language of Paraguay alongside Spanish. This book provides the first comprehensive reference grammar of Modern Paraguayan Guaraní written for an English-language audience. It is an accessible yet thorough and carefully substantiated description of the language's phonology, morphosyntax, and semantics. It also includes information about its centuries of documented history and its current sociolinguistic situation.

Outliers Malcolm Gladwell 2008-11-18 From the bestselling author of *Blink* and *The Tipping Point*, Malcolm Gladwell's *Outliers: The Story of Success* overturns conventional wisdom about genius to show us what makes an ordinary person an extreme overachiever. Why do some people achieve so much more than others? Can they lie so far out of the ordinary? In this provocative and inspiring book, Malcolm Gladwell looks at everyone from rock stars to professional athletes, software billionaires to scientific geniuses, to show that the story of success is far more surprising, and far more fascinating, than we could ever have imagined. He reveals that it's as much about where we're from and what we do, as who we are - and that no one, not even a genius, ever makes it alone. *Outliers* will change the way you think about your own life story, and about what makes us all unique. 'Gladwell is not only a brilliant storyteller; he can see what those stories tell us, the lessons they contain' *Guardian* 'Malcolm Gladwell is a global phenomenon ... he has a genius for making everything he writes seem like an impossible adventure' *Observer* 'He is the best kind of writer - the kind who makes you feel like you're a genius, rather than he's a genius' *The Times*

International Classification of Functioning, Disability, and Health World Health Organization 2007 This publication is a derived version of the International Classification of Functioning, Disability and Health (ICF, WHO, 2001) designed to record characteristics of the developing child and the influence of environments surrounding the child. This derived version of the ICF can be used by providers, consumers and all those concerned with the health, education, and well being of children and youth. It provides a common and universal language for clinical, public health, and research applications to facilitate the documentation and measurement of health and disability in child and youth populations.--Publisher's description.

The Dictator's Seduction Lauren H. Derby 2009-01-01 The dictatorship of Rafael Trujillo, who ruled the Dominican Republic from 1930 until his assassination in 1961, was one of the longest and bloodiest in Latin American history. *The Dictator's Seduction* is a cultural history of the Trujillo regime as it was experienced in the capital city of Santo Domingo. Focusing on everyday forms of state domination, Lauren Derby describes how the regime infiltrated civil society by fashioning a "vernacular politics" based on popular idioms of masculinity and fantasies of race and class mobility. Derby argues that the most pernicious aspect of the dictatorship was how it appropriated quotidian practices such as gossip and gift exchange, leaving almost no place for Dominicans to hide or resist. Drawing on previously untapped documents in the Trujillo National Archives and interviews with Dominicans who recall life under the dictator, Derby emphasizes the role that public ritual played in Trujillo's exercise of power. His regime included the people in affairs of state on a massive scale as never before. Derby pays particular attention to how events and projects were received by the public as she analyzes parades and rallies, the rebuilding of Santo Domingo following a major hurricane, and the staging of a year-long celebration marking the twenty-fifth year of Trujillo's

regime. She looks at representations of Trujillo, exploring how claims that he embodied the popular barrio antihero the tiguere (tiger) stoked a fantasy of upward mobility and how a rumor that he had a personal guardian angel suggested he was uniquely protected from his enemies. *The Dictator's Seduction* sheds new light on the cultural contrivances of autocratic power.

Patterns for College Writing Laurie G. Kirszner 2011-12-22 Laurie Kirszner and Stephen Mandell, authors with nearly thirty years of experience teaching college writing, know what works in the classroom and have a knack for picking just the right readings. In *Patterns for College Writing*, they provide students with exemplary rhetorical models and instructors with class-tested selections that balance classic and contemporary essays. Along with more examples of student writing than any other reader, *Patterns* has the most comprehensive coverage of active reading, research, and the writing process, with a five-chapter mini-rhetoric; the clearest explanations of the patterns of development; and the most thorough apparatus of any rhetorical reader, all reasons why *Patterns for College Writing* is the best-selling reader in the country. And the new edition includes exciting new readings and expanded coverage of critical reading, working with sources, and research. It is now available as an interactive Bedford e-book and in a variety of other e-book formats that can be downloaded to a computer, tablet, or e-reader. Read the preface.

Style and Social Identities Peter Auer 2007-01-01 This volume presents an interactional perspective on linguistic variability that takes into account the construction of social identities through the formation of social communicative styles. It shows that style is a useful category in bridging the gap between single parameter variation and social identity. Social positioning, i.e., finding one's place in society, is one of its motivating forces. Various aspects of the expression of stylistic features are focused on, from language choice and linguistic variation in a narrow sense to practices of social categorization, pragmatics patterns, preferences for specific communicative genres, rhetorical practices including prosodic features, and aesthetic choices and preferences for specific forms of taste (looks, clothes, music, etc.). These various features of expression are connected to multimodal stylistic indices through talk; thus, styles emerge from discourse. Styles are adapted to changing contexts, and develop in the course of social processes. The analytical perspective chosen proposes an alternative to current approaches to variability under the influence of the so-called variationist paradigm.
