

Bueno/smoke/War And The Environment New Approaches To Protecting The Environment In Relation To Armed Conflict Raoul Wallenberg

Eventually, you will certainly discover a additional experience and completion by spending more cash. still when? do you assume that you require to acquire those every needs afterward having significantly cash? Why dont you try to acquire something basic in the beginning? Thats something that will lead you to comprehend even more on the subject of the globe, experience, some places, subsequently history, amusement, and a lot more?

It is your agreed own times to decree reviewing habit. accompanied by guides you could enjoy now is bueno/smoke/War And The Environment New Approaches To Protecting The Environment In Relation To Armed Conflict Raoul Wallenberg below.

The Death of Expertise Thomas M. Nichols 2017 A cult of anti-expertise sentiment has coincided with anti-intellectualism, resulting in massively viral yet poorly informed debates ranging from the anti-vaccination movement to attacks on GMOs. As Tom Nichols shows in *The Death of Expertise*, there are a number of reasons why this has occurred—ranging from easy access to Internet search engines to a customer satisfaction model within higher education.

Environment and Post-Soviet Transformation in Kazakhstan's Aral Sea Region William Wheeler 2021-10-25 The Aral Sea is well known for its devastating regression over the second half of the twentieth century, and for its recent partial restoration. *Environment and Post-Soviet Transformation in Kazakhstan's Aral Sea Region* is the first book to explore what these monumental changes have meant to those living on the sea's shores. Following the fluctuating fortunes of the pre-Soviet, Soviet and post-Soviet fisheries, the book shows how the vast environmental changes the region has undergone cannot be disentangled from the transformations of Soviet socialism and postsocialism. This ethnographic perspective prompts a critical rethinking of the category of environmental disaster through which the region is predominantly known. Tracing how the sea's retreat and partial return have been apprehended by diverse local actors in the former port of Aral'sk and surrounding fishing villages, as well as by scientists, bureaucrats and international development workers, William Wheeler draws out the multiple meanings environmental change acquires within different contexts. This study of how people make their lives amidst overlapping ecological and political-economic upheavals is rich in ethnographic detail that is both rooted in Soviet legacies and alive to the new transnational connections that are reshaping the region. Offering a rigorous political ecology of Soviet socialism and after, the book is a major contribution to the nascent environmental anthropology of Central Asia. It will be of interest to environmental anthropologists, environmental historians, and scholars of all disciplines working on Central Asia and the former USSR.

Ecosystems and Human Well-being Carlos Corvalán 2005 Approximately 60% of the benefits that the global ecosystem provides to support life on Earth (such as fresh water, clean air and a relatively stable climate) are being degraded or used unsustainably. In the report, scientists warn that harmful consequences of this degradation to human health are already being felt and could grow significantly worse over the next 50 years.

Millennial Reflections on International Studies Michael Brecher 2009-12-22 Forty-five prominent scholars engage in self-critical, state-of-the-art reflection on international studies to stimulate debates about successes and failures and to address the larger question of progress in the discipline. Written especially for the collection, these essays are in hardcover in the form of an easy-to-use handbook, and in paperback as a number of separate titles, each of which consists of a particular thematic cluster to merge with the range of topics taught in undergraduate and graduate courses in international studies. The themes addressed are realism, institutionalism, critical perspectives, feminist theory and gender studies, methodology (formal modeling, quantitative, and qualitative), foreign policy analysis, international security and peace studies, and international political economy. This collection provides an accessible and wide-ranging survey of the issues in the field as well as an invaluable bibliography, and will undoubtedly determine the shape of future research in international studies for the millennium. Paperbacks for course adoption: *Realism and Institutionalism in International Studies* Michael Brecher and Frank P. Harvey, Editors *Conflict, Security, Foreign Policy, and International Political Economy: Past Paths and Future Directions in International Studies* Michael Brecher and Frank P. Harvey, Editors *Evaluating Methodology in International Studies* Frank P. Harvey and Michael Brecher, Editors *Critical Perspectives in International Studies* Frank P. Harvey and Michael Brecher, Editors Contributors are: Steve J. Brams, Davis B. Bobrow, Michael Cox, Robert W. Cox, Bruce Bueno de Mesquita, Joseph M. Grieco, Ernst B. Haas, Peter M. Haas, Kal J. Holsti, Ole R. Holsti, Patrick James, Robert O. Keohane, Edward A. Kolodziej, Louis Kriesberg Robert T. Kudrle, David A. Lake, Yosef Lapid, Russell Leng, Jack S. Levy, L. H. M. Ling, Zeev Maoz, Lisa L. Martin, John J. Mearsheimer, Manus I. Midlarsky, Linda B. Miller, Helen Milner, Michael Nicholson, Joseph Nye, V. Spike Peterson, Jan Jindy Pettman, James Lee Ray, James Rosenau, Harvey Starr, J. David Singer, Steve Smith, Christine Sylvester, J. Ann Tickner, John Vasquez, Yaacov Y. I. Vertzberger, R. B. J. Walker, Stephen G. Walker, Jonathan Wilkenfeld, Oran Young, Marysia Zalewski, and Dina A. Zinnes. Michael Brecher is R. B. Angus Professor of Political Science, McGill University, and former president of the International Studies Association. Frank P. Harvey is Professor of Political Science and Director, Center for Foreign Policy Studies, Dalhousie University.

Understanding Morphology Martin Haspelmath 2013-10-28 This new edition of *Understanding Morphology* has been fully revised in line with the latest research. It now includes 'big picture' questions to highlight central themes in morphology, as well as research exercises for each chapter. *Understanding Morphology* presents an introduction to the study of word structure that starts at the very beginning. Assuming no knowledge of the field of morphology on the part of the reader, the book presents a broad range of morphological phenomena from a wide variety of languages. Starting with the core areas of inflection and derivation, the book presents the interfaces between morphology and syntax and between morphology and phonology. The synchronic study of word structure is covered, as are the phenomena of diachronic change, such as analogy and grammaticalization. Theories are presented clearly in accessible language with the main purpose of shedding light on the data, rather than as a goal in themselves. The authors consistently draw on the best research available, thus utilizing and discussing both functionalist and generative theoretical approaches. Each chapter includes a summary, suggestions for further reading, and exercises. As such this is the ideal book for both beginning students of linguistics, or anyone in a related discipline looking for a first introduction to morphology.

Open Veins of Latin America Eduardo Galeano 1997 [In this book, the author's] analysis of the effects and causes of capitalist underdevelopment in Latin America present [an] account of ... Latin American history. [The author] shows how foreign companies reaped huge profits through their operations in Latin America. He explains the politics of the Latin American bourgeoisies and their subservience to foreign powers, and how they interacted to create increasingly unequal capitalist societies in Latin America.-Back cover.

Water, Cultural Diversity, and Global Environmental Change Barbara Rose Johnston 2011-12-07 Co-published with UNESCO A product of the UNESCO-IHP project on Water and Cultural Diversity, this book represents an effort to examine the complex role water plays as a force in sustaining, maintaining, and threatening the viability of culturally diverse peoples. It is argued that water is a fundamental human need, a human right, and a core sustaining element in biodiversity and cultural diversity. The core concepts utilized in this book draw upon a larger trend in sustainability science, a recognition of the synergism and analytical potential in utilizing a coupled biological and social systems analysis, as the functioning viability of nature is both sustained and threatened by humans.

Negotiating Climate Change in Crisis Steffen Böhm 2021-09-28 Climate change negotiations have failed the world. Despite more than thirty years of high-level, global talks on climate change, we are still seeing carbon emissions rise dramatically. This edited volume, comprising leading and emerging scholars and climate activists from around the world, takes a critical look at what has gone wrong and what is to be done to create more decisive action. Composed of twenty-eight essays—a combination of new and republished texts—the anthology is organised around seven main themes: paradigms; what counts?; extraction; dispatches from a climate change frontline country; governance; finance; and action(s). Through this multifaceted approach, the contributors ask pressing questions about how we conceptualise and respond to the climate crisis, providing both 'big picture' perspectives and more focussed case studies. This unique and extensive collection will be of great value to environmental and social scientists alike, as well as to the general reader interested in understanding current views on the climate crisis.

Cumulated Index Medicus 2000

Foundations of Effective Influence Operations Eric Victor Larson 2009 The authors aim to assist the U.S. Army in understanding "influence operations," capabilities that may allow the United States to effectively influence the attitudes and

behavior of particular foreign audiences while minimizing or avoiding combat. The book identifies approaches, methodologies, and tools that may be useful in planning, executing, and assessing influence operations.

International War Melvin Small 1985

Understanding Conflict and Violence Tim Jacoby 2007-09-12 This book examines and interprets a wide range of approaches to the causes of violence and conflict. The causes of violence and conflict are often left untheorized, or they are discussed as an existent problem assumed to be an inevitable part of human interaction. Adopting an accessible approach, this volume presents readers with a clear understanding of the causes of violence and conflict by highlighting their evolutionary roots and illustrating them with in-depth case studies and examples. Tim Jacoby addresses the fragmented nature of the literature on conflict theory by drawing upon a wide range of disciplinary traditions, seeking to reflect the fact that international relations, history, economics, development, politics and sociology all share a long-standing interest in the study of conflict and violence and that common concerns make interdisciplinary stimulating and productive.

Understanding Conflict & Violence will be of interest to students and scholars across the disciplines of international relations, history, economics, development, politics and sociology.

Communication in Turbulent Times Marita Vos 2017-01-12 This book is characterised by a broad approach towards corporate communication, emphasising change and crisis. The focus is not on crises as an exceptional situation but rather on broader volatility in the environment. The purpose of this book is to increase the understanding of multi-stakeholder communication concerning organisational issues and crises. From the perspective of organisational management, this book clarifies how communication contributes to organisational resilience—the ability to adapt to a changing environment and mitigate emergency crises. In today's world, change is not the exception but a constant presence. Moreover, issues and risks occur that may grow to become crises. Coping with change and unexpected events, is what the concept of 'resilience' is about. Organisational resilience is the basis for the long-term viability of organisations in a turbulent environment. Communication, in various ways, is a bridging activity that supports the capacity of the organisation to function despite risks and disruptive incidents.

U.S. Army Special Operations In World War II [Illustrated Edition] David W. Hogan Jr. 2014-08-15 Illustrated with 11 maps and 35 Illustrations From the plains of Europe to the jungles of the Pacific, the U.S. Army in World War II employed a variety of commando and guerrilla operations to harass the Axis armies, gather intelligence, and support the more conventional Allied military efforts. During the Allied invasion of northern France on D-day, elite American infantry scaled the sheer cliffs of the Normandy coast, while smaller combat teams and partisans struck deep behind German lines, attacking enemy troop concentrations and disrupting their communications. On the other side of the globe, U.S. soldiers led guerrillas against Japanese patrols in the jungles of the Philippines and pushed through uncharted paths in the rugged mountains of northern Burma to strike at the enemy rear. Special operations such as these provided some of the most stirring adventure stories of the war, with innumerable legends growing from the exploits of Darby's and Rudder's Rangers, Merrill's Marauders, the Jedburghs, the guerrillas of the Philippines, and the Kachins of northern Burma. Despite the public and historical attention paid to the exploits of American special operations forces in World War II, their significance remains a matter of dispute. Both during and after the conflict, many officers argued that such endeavors contributed little in a war won primarily by conventional combat units. They perceived little, if any, place for such units in official Army doctrine. Yet others have contended that a broader, more intelligent use of special operations would have hastened the triumph of Allied arms during World War II. In their eyes, the experience gained by the U.S. Army in the field during the war was important and foreshadowed the shape of future military operations.

Environment Abstracts Annual 1992 This database encompasses all aspects of the impact of people and technology on the environment and the effectiveness of remedial policies and technologies, featuring more than 950 journals published in the U.S. and abroad. The database also covers conference papers and proceedings, special reports from international agencies, non-governmental organizations, universities, associations and private corporations. Other materials selectively indexed include significant monographs, government studies and newsletters.

Science, Strategy and War Frans P.B. Osinga 2007-01-24 John Boyd is often known exclusively for the so-called 'OODA' loop model he developed. This model refers to a decision-making process and to the idea that military victory goes to the side that can complete the cycle from observation to action the fastest. This book aims to redress this state of affairs and re-examines John Boyd's original contribution to strategic theory. By highlighting diverse sources that shaped Boyd's thinking, and by offering a comprehensive overview of Boyd's work, this volume demonstrates that the common interpretation of the meaning of Boyd's OODA loop concept is incomplete. It also shows that Boyd's work is much more comprehensive, richer and deeper than is generally thought. With his ideas featuring in the literature on Network Centric Warfare, a key element of the US and NATO's so-called 'military transformation' programmes, as well as in the debate on Fourth Generation Warfare, Boyd continues to exert a strong influence on Western military thinking. Dr Osinga demonstrates how Boyd's work can help us to understand the new strategic threats in the post- 9/11 world, and establishes why John Boyd should be regarded as one of the most important (post)modern strategic theorists.

War Paul F. Diehl 2005

The State of World Fisheries and Aquaculture 2020 FAO 2020-06-01 The 2020 edition of The State of World Fisheries and Aquaculture has a particular focus on sustainability. This reflects a number of specific considerations. First, 2020 marks the twenty-fifth anniversary of the Code of Conduct for Responsible Fisheries (the Code). Second, several Sustainable Development Goal indicators mature in 2020. Third, FAO hosted the International Symposium on Fisheries Sustainability in late 2019, and fourth, 2020 sees the finalization of specific FAO guidelines on sustainable aquaculture growth, and on social sustainability along value chains. While Part 1 retains the format of previous editions, the structure of the rest of the publication has been revised. Part 2 opens with a special section marking the twenty fifth anniversary of the Code. It also focuses on issues coming to the fore, in particular, those related to Sustainable Development Goal 14 and its indicators for which FAO is the "custodian" agency. In addition, Part 2 covers various aspects of fisheries and aquaculture sustainability. The topics discussed range widely, from data and information systems to ocean pollution, product legality, user rights and climate change adaptation. Part 3 now forms the final part of the publication, covering projections and emerging issues such as new technologies and aquaculture biosecurity. It concludes by outlining steps towards a new vision for capture fisheries. The State of World Fisheries and Aquaculture aims to provide objective, reliable and up-to-date information to a wide audience – policymakers, managers, scientists, stakeholders and indeed everyone interested in the fisheries and aquaculture sector.

The Oxford Guide to the Romance Languages Martin Maiden 2016-03-10 The Oxford Guide to the Romance Languages is the most exhaustive treatment of the Romance languages available today. Leading international scholars adopt a variety of theoretical frameworks and approaches to offer a detailed structural examination of all the individual Romance varieties and Romance-speaking areas, including standard, non-standard, dialectal, and regional varieties of the Old and New Worlds. The book also offers a comprehensive comparative account of major topics, issues, and case studies across different areas of the grammar of the Romance languages. The volume is organized into 10 thematic parts: Parts 1 and 2 deal with the making of the Romance languages and their typology and classification, respectively; Part 3 is devoted to individual structural overviews of Romance languages, dialects, and linguistic areas, while Part 4 provides comparative overviews of Romance phonology, morphology, syntax, semantics and pragmatics, and sociolinguistics. Chapters in Parts 5-9 examine issues in Romance phonology, morphology, syntax, syntax and semantics, and pragmatics and discourse, respectively, while the final part contains case studies of topics in the nominal group, verbal group, and the clause. The book will be an essential resource for both Romance specialists and everyone with an interest in Indo-European and comparative linguistics.

Engaged Fatherhood for Men, Families and Gender Equality Marc Grau (Policy scientist) 2022 This aim of this open access book is to launch an international, cross-disciplinary conversation on fatherhood engagement. By integrating perspective from three sectors -- Health, Social Policy, and Work in Organizations -- the book offers a novel perspective on the benefits of engaged fatherhood for men, for families, and for gender equality. The chapters are crafted to engaged broad audiences, including policy makers and organizational leaders, healthcare practitioners and fellow scholars, as well as families and their loved ones.

Environmental Control & Safety Management 1917

Thinking about Deterrence Air Univeristy Press 2014-09-01 With many scholars and analysts questioning the relevance of deterrence as a valid strategic concept, this volume moves beyond Cold War nuclear deterrence to show the many ways in which deterrence is applicable to contemporary security. It examines the possibility of applying deterrence theory and practice to space, to cyberspace, and against non-state actors. It also examines the role of nuclear deterrence in the twenty-first century and reaches surprising conclusions.

War Storm Victoria Aveyard 2018-05-15 The #1 New York Times bestselling Red Queen series comes to a stunning conclusion in War Storm. VICTORY COMES AT A PRICE. Mare Barrow learned this all too well when Cal's betrayal nearly destroyed her. Now determined to protect her heart—and secure freedom for Reds and newbloods like her—Mare resolves to overthrow the kingdom of Norta once and for all . . . starting with the crown on Maven's head. But no battle is won alone, and before the Reds may rise as one, Mare must side with the boy who broke her heart in order to defeat the boy who almost broke her. Cal's powerful Silver allies, alongside Mare and the Scarlet Guard, prove a formidable force. But Maven is driven by an obsession so deep, he will stop at nothing to have Mare as his own again, even if it means demolish everything—and everyone—in his path. War is coming, and all Mare has fought for hangs in the balance. Will victory be enough to topple the Silver kingdoms? Or will the little lightning girl be forever silenced? In the epic conclusion to Victoria Aveyard's stunning series, Mare must embrace her fate and summon all her power . . . for all will be tested, but not all will survive. Plus don't miss Realm Breaker! Irresistibly action-packed and full of lethal surprises, this stunning fantasy series from Victoria Aveyard, #1 New York Times bestselling author of the Red Queen series, begins where hope is lost

and asks: When the heroes have fallen, who will take up the sword?

American Indian Myths and Legends Richard Erdoes 2013-12-04 More than 160 tales from eighty tribal groups gives us a rich and lively panorama of the Native American mythic heritage. From across the continent comes tales of creation and love; heroes and war; animals, tricksters, and the end of the world. In addition to mining the best folkloric sources of the nineteenth century, the editors have also included a broad selection of contemporary Native American voices. With black-and-white illustrations throughout Selected and edited by Richard Erdoes and Alfonso Ortiz Part of the Pantheon Fairy Tale and Folklore Library

Ecological Implications of Minilivestock M G Paoletti 2005-01-07 This book provides stimulating and timely suggestions about expanding the world food supply to include a variety of minilivestock. It suggests a wide variety of small animals as nutritious food. These animals include arthropods (insects, earthworms, snails, frogs), and various rodents. The major advantage of minilivestock is that they do not have t

Causes of War, 3rd Ed. Geoffrey Blainey 1988-09-07

Tropic of Chaos Christian Parenti 2011-06-28 From Africa to Asia and Latin America, the era of climate wars has begun. Extreme weather is breeding banditry, humanitarian crisis, and state failure. In *Tropic of Chaos*, investigative journalist Christian Parenti travels along the front lines of this gathering catastrophe--the belt of economically and politically battered postcolonial nations and war zones girding the planet's midlatitudes. Here he finds failed states amid climatic disasters. But he also reveals the unsettling presence of Western military forces and explains how they see an opportunity in the crisis to prepare for open-ended global counterinsurgency. Parenti argues that this incipient "climate fascism"--a political hardening of wealthy states-- is bound to fail. The struggling states of the developing world cannot be allowed to collapse, as they will take other nations down as well. Instead, we must work to meet the challenge of climate-driven violence with a very different set of sustainable economic and development policies.

American Book Publishing Record 1997-09

Climate Change, the Indoor Environment, and Health Institute of Medicine 2011-10-01 The indoor environment affects occupants' health and comfort. Poor environmental conditions and indoor contaminants are estimated to cost the U.S. economy tens of billions of dollars a year in exacerbation of illnesses like asthma, allergic symptoms, and subsequent lost productivity. Climate change has the potential to affect the indoor environment because conditions inside buildings are influenced by conditions outside them. *Climate Change, the Indoor Environment, and Health* addresses the impacts that climate change may have on the indoor environment and the resulting health effects. It finds that steps taken to mitigate climate change may cause or exacerbate harmful indoor environmental conditions. The book discusses the role the Environmental Protection Agency (EPA) should take in informing the public, health professionals, and those in the building industry about potential risks and what can be done to address them. The study also recommends that building codes account for climate change projections; that federal agencies join to develop or refine protocols and testing standards for evaluating emissions from materials, furnishings, and appliances used in buildings; and that building weatherization efforts include consideration of health effects. *Climate Change, the Indoor Environment, and Health* is written primarily for the EPA and other federal agencies, organizations, and researchers with interests in public health; the environment; building design, construction, and operation; and climate issues.

Win, Lose Or Draw Allan C. Stam 1993

Decentralized Governance and Accountability Jonathan A. Rodden 2019-02-28 Reviews recent lessons about decentralized governance and implications for future development programs and policies.

Causes of War Jack S. Levy 2011-09-15 Written by leading scholars in the field, *Causes of War* provides the first comprehensive analysis of the leading theories relating to the origins of both interstate and civil wars. Utilizes historical examples to illustrate individual theories throughout Includes an analysis of theories of civil wars as well as interstate wars -- one of the only texts to do both Written by two former International Studies Association Presidents

Theoretical Foundations of Health Education and Health Promotion Manoj Sharma 2012 "Introduces students to common theories from behavioral and social sciences that are currently being used in health education and promotion. Each discussion of theory is accompanied by a practical skill-building activity in the context of planning and evaluation and a set of application questions that will assist the student in mastering the application of the theory."--

Hidden Cities 2010 "The joint WHO and UN-HABITAT report, *Hidden cities: unmasking and overcoming health inequities in urban settings*, is being released at a turning point in human history. For the first time ever, the majority of the world's population is living in cities, and this proportion continues to grow ... The number of urban residents is growing by nearly 60 million every year. This demographic transition from rural to urban, or urbanization, has far-reaching consequences ... " - p. ix

Harm Reduction James A. Inciardi 1999-10-11 Harm reduction programmes accept the reality of drug use while attempting to reduce its harmful consequences to individuals and society. Here, contributors discuss the philosophical basis and history of such policies and examine their outcomes.

The Tragedy of Great Power Politics (Updated Edition) John J. Mearsheimer 2003-01-17 "A superb book...Mearsheimer has made a significant contribution to our understanding of the behavior of great powers."—Barry R. Posen, *The National Interest* The updated edition of this classic treatise on the behavior of great powers takes a penetrating look at the question likely to dominate international relations in the twenty-first century: Can China rise peacefully? In clear, eloquent prose, John Mearsheimer explains why the answer is no: a rising China will seek to dominate Asia, while the United States, determined to remain the world's sole regional hegemon, will go to great lengths to prevent that from happening. The tragedy of great power politics is inescapable.

Adapting to Climate Change W. Neil Adger 2009-06-25 This presents top scientific research by leading researchers and practitioners on the critical issue of adapting to climate change.

War and Peace in International Rivalry Paul F. Diehl 2010-06-02 This book provides the first detailed analysis of international rivalries, the long-standing and often violent confrontations between the same pairs of states. The book addresses conceptual components of rivalries and explores the origins, dynamics, and termination of the most dangerous form of rivalry--enduring rivalry--since 1816. Paul Diehl and Gary Goertz identify 1166 rivalries since 1816. They label sixty-three of those as enduring rivalries. These include the competitions between the United States and Soviet Union, India and Pakistan, and Israel and her Arab neighbors. The authors explain how rivalries form, evolve, and end. The first part of the book deals with how to conceptualize and measure rivalries and presents empirical patterns among rivalries in the period 1816-1992. The concepts derived from the study of rivalries are then used to reexamine two central pieces of international relations research, namely deterrence and "democratic peace" studies. The second half of the book builds an explanation of enduring rivalries based on a theory adapted from evolutionary biology, "punctuated equilibrium." The study of international rivalries has become one of the centerpieces of behavioral research on international conflict. This book, by two of the scholars who pioneered such studies, is the first comprehensive treatment of the subject. It will become the standard reference for all future studies of rivalries. Paul F. Diehl is Professor of Political Science and University Distinguished Teacher/Scholar, University of Illinois. He is the coeditor of *Reconstructing Realpolitik* and coauthor of *Measuring the Correlates of War*. Gary Goertz is Assistant Professor of Political Science, University of Arizona, and is the coauthor with Paul Diehl of *Territorial Change and International Conflict*.

Reducing Poverty, Protecting Livelihoods, and Building Assets in a Changing Climate Dorte Verner 2010-06-25 Climate change is the defining development challenge of our time. More than a global environmental issue, climate change and variability threaten to reverse recent progress in poverty reduction and economic growth. Both now and over the long run, climate change and variability threatens human and social development by restricting the fulfillment of human potential and by disempowering people and communities in reducing their livelihoods options. Communities across Latin America and the Caribbean are already experiencing adverse consequences from climate change and variability. Precipitation has increased in the southeastern part of South America, and now often comes in the form of sudden deluges, leading to flooding and soil erosion that endanger people's lives and livelihoods. Southwestern parts of South America and western Central America are seeing a decrease in precipitation and an increase in droughts. Increasing heat and drought in Northeast Brazil threaten the livelihoods of already-marginal smallholders, and may turn parts of the eastern Amazon rainforest into savannah. The Andean inter-tropical glaciers are shrinking and expected to disappear altogether within the next 20-40 years, with significant consequences for water availability. These environmental changes will impact local livelihoods in unprecedented ways. Poverty, inequality, water access, health, and migration are and will be measurably affected by climate change. Using an innovative research methodology, this study finds quantitative evidence of large variations in impacts across regions. Many already poor regions are becoming poorer; traditional livelihoods are being challenged in unprecedented ways; water scarcity is increasing, particularly in poor arid areas; human health is deteriorating; and climate-induced migration is already taking place and may increase. Successfully reducing social vulnerability to climate change and variability requires action and commitment at multiple levels. This volume offers key operational recommendations at the government, community, and household levels with particular emphasis placed on enhancing good governance and technical capacity in the public sector, building social capital in local communities, and protecting the asset base of poor households.

Environmental Crime and Social Conflict Avi Brisman 2016-03-09 This impressive collection of original essays explores the relationship between social conflict and the environment - a topic that has received little attention within criminology. The chapters provide a systematic and comprehensive introduction and overview of conflict situations stemming from human exploitation of environments, as well as the impact of social conflicts on the wellbeing and health of specific species and ecosystems. Largely informed by green criminology perspectives, the chapters in the book are intended to stimulate new understandings of the relationships between humans and nature through critical evaluation of environmental destruction and degradation associated with social conflicts occurring around the world. With a goal of creating a typology of environment-social conflict relationships useful for green criminological research, this study is essential reading for

scholars and academics in criminology, as well as those interested in crime, law and justice.
